"Brevity prevents doing more than to call attention to the fact that the organized body of militia within the States as trained by the States under the direction of Congress became known as the National Guard (act of January 21, 1903; National Defense Act of June 5, 1916). And to make further preparation from among the great body of the citizens, an additional number to be determined by the President was directed to be organized and trained by the States as the National Guard Reserve. (National defense act, supra). Thus sanctioned as is the act before us by the text of the Constitution, and by its significance as read in the light of the fundamental principles with which the subject is concerned, by the power recognized and carried into effect in many civilized countries, by the authority and practice of the colonies before the Revolution, of the States under the Confederation and of the Government since the formation of the Constitution, the want of merit in the contentions that the act in the particulars which we have been previously called upon to consider was beyond the constitutional power of Congress, is manifest. Cogency, however, if possible, is added to the demonstration by pointing out that in the only case to which we have been referred where the constitutionality of the act of 1863 was contemporaneously challenged on grounds akin to, if not absolutely identical with, those here urged, the validity of the act was maintained for reasons not different from those which control our judgment. And as further evidence that the conclusion we reach is but the inevitable consequence of the provisions of the Constitution as effect follows cause, we briefly recur to events in another environment. The seceding States wrote into the constitution which was adopted to regulate the government which they sought to establish in identical words the provisions of the Constitution of the United States which we here have under consideration. And when the right to enforce under that instrument a selective draft law which was enacted not differing in principle from the one here in question was challenged, its validity was upheld evidently after great consideration by the courts of Virginia, of Georgia, of Texas, of Alabama, of Mississippi, and of North Carolina, the opinions in some of the cases copiously and critically reviewing the whole grounds which we have stated.

The Fourteenth Amendment.

"In reviewing the subject we have hitherto considered it as it has been argued from the point of view of the Constitution as it stood prior to the adoption of the fourteenth amendment. But to avoid all misapprehension we briefly direct attention to that amendment for the purpose of pointing out, as has been frequently done in the past, how completely it broadened the national scope of the Government under the Constitution by causing citizenship of the United States to be paramount and dominant instead of being subordinate and derivative, and therefore operating as it does upon all the powers conferred by the Constitution leaves no possible support for the contentions made if their want of merit was otherwise not so clearly made manifest. It remains only to consider contentions which, while not disputing power, challenge the act because of the repugnancy to the Constitution supposed to result from some of its provisions. First, we are of opinion that the contention that the act is void as a delegation of Federal power to State officials because of some of its administrative features is too wanting in merit to require further notice. Second, we think that the contention that the statute is void because vesting administrative officers with legislative discretion has been so completely adversely settled as to require reference only to some of the decided cases. (Field v. Clark, 143 U. S., 649; Buttfield v. Stranahan, 192 U. S., 470; Intermountain Rate Cases, 234 U. S., 476; First National Bank v. Union Trust Co., 244 U. S., 416.) A like conclusion also adversely disposes of a similar claim concerning the conferring of judicial power. (Buttfield v. Stranahan, 192 U. S., 470, 497; West v. Hitchcock, 205 U. S., 80; Ocean Navigation Co. v. Stranahan, 214 U. S., 320, 338-340; Zakonaite v. Wolf, 226 U. S,. 272, 275.) And we pass without anything but statement that the proposition that an establishment of a religion or an interference with the free exercise thereof repugnant to the first amendment resulted from the exemption clauses of the act to which we at the outset referred because we think its unsoundness is too apparent to require us to do more.

"Finally, as we are unable to conceive upon what theory the exaction by Government from the citizen of the performance of his supreme and noble duty of contributing to the defense of the rights and honor of the Nation as the result of a war declared by the great representative body of the people can be said to be the imposition of involuntary servitude in violation of the prohibitions of the thirteenth amendment, we are constrained to the conclusion that the contention to that effect is refuted by its mere statement."

THE SELECTIVE DRAFT NUMBERS.

HERE are the 17 000 draft numbers as drawn Sept. 30-Oct. 1, 1918, at Washington. Read each column downwards. The largest registration in any district in N. Y. City was 7.028 (in Dist. No. 149, 181st St. and St. Nicholas Ave.).

STATISTICS OF THE DRAFT.

CONGRESS, May 18, 1917, passed the First Selective Service Law which, with its subsequent amendments, resulted in four registrations:

June 5, 1917, 21 to 30 years	9,586,508	Sept. 12, 1918, 18 to 20 and 32 to 45 yrs.	12,966,594
June 5, 1918, 21 to 30 years	744,865		
Aug. 24, 1918, 21 to 30 years	158,054	Total	23,456,021

The numbers of the first draft were drawn July 20, 1917; those for the second, June 27, 1918; those for the third, September 30-October 1, 1918.

BALANCE SHEET OF THE FIRST DRAFT.

(As prepared by the Provost Marshal General's Office on the best information available as of Aug. 30, 1918.)

Registration of June 5, 1917, 9,586,508; inducted or otherwise accounted for prior to December 1, 1917, 897,061; number due to file questionnaires, 8,689,447; number placed in Class I., 2,473,680; number placed in Class II., 497,261; number placed in Class III., 416,456; number placed in Class IV., 3,406,240; number placed in Class V., 1,895,810; total, 8,689,447.

Analysis of Class I.—Total number in Class I., as of September 1, 1918, 2,473,680; delinquents, 285,895; emergency fleet, 46,552; limited service, 245,234; remedial defectives, 58,950; not physically examined, 42,801; total, 679,432.

Fighting men left, 1,794,248; registration of June 5, 1918, 744,865; number placed in Class I., 408,517; total, 2,202,765.

Delinquents, 11,107; emergency fleet, 5,530; limited service, 32,589; remedial defectives, 9,433; not physically examined, 37,771; total, 96,430.

Total number of fighting men to be accounted for, 2,106,335; January calls, 23,288; February calls, 83,779; March calls, 132,484; April calls, 174,377; May calls (1), 360,230; June calls, 292,354; July calls, (2), 396,811; August calls, 285,039; rejected at camp requiring replacements during May and June, 56,076; total, 1,804,438.

Balance fighting men as of September 1, 1918, 301,897; deductions for inductions to replace men rejected under July, August, and September calls, deaths, reclassifications, etc., 70,327.

Net balance fighting men September 1, 1918 (3), 231,570.

NOTE—(1) 12,833 inducted from Porto Rico, making total for May, 373,063.. (2) 4,336 inducted from Hawaii, making total for July, 401,147. (3) Of this number 160,401 are white, 56,169 are colored, and 15,000 are in Porto Rico.

THE DRAFT OF JUNE 5, 1917.

(The figures cover the first quota, and the data are summarized from the report made to the Secretary of War, December 20, 1917, by Provost Marshal General Enoch H. Crowder.)

THE Selective Service Law was enacted by Congress on May 18, 1917. On June 5, 9,586,508 young men of military age, between 21 and 30 years, assembled before the more than 3,500 registration boards throughout the country and subscribed their names. These boards contained over 12,000 members, and had 125,000 registrars and other assistants. The regulations for exemptions were distributed by June 18, and early in July the task of allotting quotas and credits for voluntary enlistments was completed. The order in which the registrants were to be called on to determine their availability for military service was settled by a great central lottery at Washington, in the Senate Office Building, on July 20. The first quota under the draft was 687,000 men. On July 30 the National Army took in the first selected man under the draft plan, and by September 1, 1917 about 180,000 men had been passed by the boards and were ready for training. The designation of Gen. Crowder as Provost had been made on May 22. He

was assisted in working out draft details by Captains Hugh S. Johnson, cavalry, and Cassius M. Dowell, infantry.

For the purpose of apportioning quotas to the States and Territories and the District of Columbia there was added to the total number of men 687,000, to be raised by the first draft under the Selective Service act; the further number of 465,985 thus composed: (*a*) 164,292 men who were in the military service of the United States as members of the National Guard on April 1, 1917; (*b*) 183,719 men who entered the military service of the United States as members of the National Guard during the period from April 2 to June 30, 1917, both dates inclusive; and (*c*) 117,974 men who entered the military service of the United States as members of the Regular Army during the period from April 2 to June 30, 1917, both dates inclusive, making 1,152,985 in all.

The first call was August 25; second, September 19; third, September 22; fourth, October 13; fifth, November 2; sixth, November 21; seventh, December 7; eighth, December 8;

The cost of obtaining men by the selective-service system includes only expenses up to the time of entrainment for the camps. By a statement from the Adjutant General, the per capita cost of recruiting in 1914 was $24.48 and in 1915 $19.14. It further appears, from a statement of the Adjutant General, that the per capita cost of recruiting for the first nine months of the fiscal year 1917—July, 1916, to April, 1917, inclusive—was $28.95.

Per capita cost of the selective-service system in 1917 and the Civil War draft, compared—Under the act of March 3, 1863, Gen. James B. Fry was appointed the Provost Marshal General. In his report, dated March 17, 1866, he states that the cost of recruiting 1,356,593 men, prior to the passage of the act referred to, was $34.01. Under the act of March 3, 1863, referred to, each district of every loyal State was assigned a certain quota of men which it was required to produce for the army. If the entire quota volunteered, no draft was held. If part volunteered the balance was drafted. For that reason the expenses of the volunteer and draft systems under Gen. Fry's administration were so intermingled that no separate per capita cost can be arrived at. His report shows a total of 1,120,621 men produced at a cost of $11,027,715.21, or $9.84 per capita. This report nowhere gives the items going to make up the total amount. Of this number only 168,649 were drafted men or substitutes.

Agricultural claims—Filed, 93,428; granted, 33,528. Non-agricultural claims—Filed, 47,448; granted 20,315.

ALIENS REGISTERED AND CALLED IN BIG CITIES, 1917 (The first number shows the registered, second number the called)—New York, 161,805, 64,161; Chicago, 72,405, 29,500; Philadelphia, 32,635, 12,524; Cleveland, 25,189, 11,572; Boston, 19,290, 6,581; Milwaukee, 6,473, 2,002; Seattle, 5,606, 1,765; St. Louis, 5,412, 1,602; San Francisco, 3,793, 1,962; Cincinnati, 2,367, 608; New Orleans, 1,990,525.

NATIONALITY OF ALIENS REGISTERED: Cobelligerents—Belgium, 3,952; France, 3,510. Great Britain—England, 27,553; Ireland, 20,840; Scotland, 7,491; Wales, 1,563; Canada, 47,258; elsewhere, 16,479. Greece, 68,005; Italy, 245,679; Portugal, 21,943; Roumania, 7,695; Russia, 275,413; Serbia, 2,852; China, 7,170; Japan, 16,336. Neutral—Denmark, 8,063; Netherlands, 6,679; Norway, 16,678; Sweden, 24,663; Switzerland, 4,929; Mexico, 59,145; Central and South America, 5,429; sundries, 22,688. Enemy—Germany, 40,663; Austria-Hungary, 238,768. Allied with enemy—Bulgaria, 7,271; Turkey, 36,031; total, 1,243,801.

COST OF THE SELECTIVE DRAFT IN NEW YORK STATE.

The average cost of registering 1,029,226 New York State men for the Federal draft and inducting 167,643 of them into the National Army by June 30, 1918, was $1.42, according to figures sent to Gov. Whitman by Major F. S. Hutchinson, disbursing officer and agent of the United States in the State of New York, in charge of the Selective Service Bureau of Adjutant General Sherrill's office. In New Rochelle the cost to the Government was nothing, that city bearing the expense. In other places the induction cost per capita ran from 12 cents a man by Board 164 of New York City to $2.58 a man by Board 161 of New York City. The boards ranking next to New Rochelle and Board 164, New York City, in lowest cost were: Board 184, New York City, 26 cents per man for 2,833 men; Oneida County Board 2, 27 cents a man for 1,698 men; Orange County Board 2, 31 cents a man for 2,428 men. The highest per capita cost in cities outside of New York was in Albany City Board 1, where 2,036 men were inducted at $2.00 each. The highest per capita cost in counties was in Rensselaer County Board 1, where the average was $2.44 for 1,822 men going into the service, for the period ending June 30, 1918.

The figures for the September 12, 1918 registration cover the actual register that day with local boards, and do not include straggling returns.

In Idaho there was no estimate of outstanding expenditures. In Nevada the expense was borne by the State.

THE Second Registration occurred June 5, 1918, under a Resolution signed by the President, May 20, 1918. It applied to men who had attained twenty-one since the First Registration, of June 5, 1917, and who numbered 744,865. The lottery was held at Washington, June 27, 1918.

SOLDIERS' HOMES.

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS.

President of the Board of Managers.....Capt. John C. Nelson, National Military Home, Ohio.
Secretary.....Hon. James S. Catherwood, Hoopeston, Illinois.

There are branches of the National Home at Dayton, Ohio; Milwaukee, Wis.; Togus, Me.; Hampton, Va.; Leavenworth, Kan.; Santa Monica, Cal.; Marion, Ind.; Danville, Ill.; Johnson City, Tenn., and Hot Springs, S. Dak. The aggregate number of members cared for is about 32,000.

REQUIREMENTS FOR ADMISSION.

1. An honorable discharge from the United States service during a war in which it was engaged.
2. Disability which prevents the applicant from earning his living by labor.
3. Applicants for admission will be required to stipulate and agree to abide by all the rules and regulations made by the Board of Managers, or by its order; to perform all duties required of them, and to obey all the lawful orders of the officers of the Home. Attention is called to the fact that by the law establishing the Home the members are made subject to the Rules and Articles of War, and will be governed thereby in the same manner as if they were in the Army of the United States.
4. A soldier or sailor must forward with his application for admission his Discharge Paper, and when he is a pensioner, his Pension Certificate, which papers will be retained at the branch to which the applicant is admitted, to be kept there for him, and returned to him when he is discharged. This rule is adopted to prevent the loss of such papers and certificates, and to hinder fraudulent practices; and no application will be considered unless these papers are sent with it. If the original discharge does not exist, a copy of discharge, certified by the War or Navy Department, or by the Adjutant-General of the State, must accompany the application.

There are State Homes for disabled volunteer soldiers provided by the States of California, Colorado, Connecticut, Idaho, Illinois, Indiana, Iowa, Kansas, Massachusetts, Michigan, Minnesota, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Dakota, Vermont, Washington, Wisconsin, and Wyoming.

STATE HOMES FOR DISABLED VOLUNTEER SOLDIERS.

States.	Location.	States.	Location.	States.	Location.
California	Yountville.	Missouri	St. James.	Ohio	Sandusky.
Colorado	Monte Vista.	Montana	Columbus Falls.		Madison.
Connecticut	Noroton Heights	Nebraska	Burkett.	Oregon	Roseburg.
Idaho	Boise.		Milford.	Pennsylvania	Erie.
Illinois	Quincy.	N. Hampshire	Tilton.	Rhode Island	Bristol.
Indiana	Lafayette.	New Jersey	Kearny.	South Dakota	Hot Springs.
Iowa	Marshalltown.		Vineland.	Vermont	Bennington.
Kansas	Fort Dodge.	New York	Bath.	Washington	Orting.
Massachusetts	Chelsea.		Oxford.		Retsil.
Michigan	Grand Rapids.	North Dakota	Lisbon.	Wisconsin	Waupaca.
Minnesota	Minnehaha.			Wyoming	Buffalo.

UNITED STATES SOLDIERS' HOME FOR THE REGULAR ARMY.

The United States Soldiers' Home in the District of Columbia receives and maintains discharged soldiers of the *regular* army. All soldiers who have served twenty years as enlisted men in the army (including volunteer service, if any), or who have served in any war, and all soldiers of less than twenty years' service who have incurred such disability, by wounds, disease, or injuries *in the line of duty while in the regular army*, as unfits them for further service, are entitled to the benefits of the Home.

Pensions of inmates are drawn by the Treasurer of the Home and held in trust for the pensioner, to whom it is paid in such sums as the Governor of the Home deems proper while he is an inmate of the Home, the balance being paid in full when he takes his discharge and leaves the Home.

Inmates are subject to the Rules and Articles of War, the same as soldiers in the army. They are comfortably lodged, fed, and clothed, and receive medical attendance and medicine, all without cost to them. There were (September 27, 1918) 824 resident soldiers, 133 on outdoor relief, 43 in St. Elizabeth's Hospital, 181 on furlough, 1 absent without leave, and 106 at the United States Army Hospital, Fort Bayard, N. M.

Applications for admission to the Home may be addressed to the "Board of Commissioners, U. S. Soldiers' Home, War Department, Washington, D. C.," and must give date of enlistment and date of discharge, with letter of company and number of regiment for each and every term of service, and rate of pension, if any, and must be accompanied by a medical certificate showing nature and degree of disability if any exists.

Governor—Lieut. Gen. S. B. M. Young (retired). *Dep. Governor*—Major Parker W. West (retired). *Secretary-Treasurer*—Brig. Gen. I. W. Littell, Quartermaster Corps, U. S. A. *Attending-Surgeon*—Col. W. B. Davis (retired).

UNITED STATES GEOGRAPHIC BOARD.

Chairman—Andrew Braid, Coast and Geodetic Survey, Department of Commerce. *Secretary*—Charles S. Sloane, Bureau of the Census, Department of Commerce. Headquarters, Washington, D. C.

Frank Bond, General Land Office, Department of the Interior.
Lieut. Col. Marlborough Churchill, General Staff, War Department.
Goodwin D. Ellsworth, Post-Office Department.
David M. Hildreth, Post-Office Department.
J. N. B. Hewitt, Bureau of American Ethnology, Smithsonian Institution.
Lieut. Col. Robert B. Marshall, Geological Survey, Department of the Interior.
William McNeir, Bureau of Accounts, Dept. of State.
C. Hart Merriam, Department of Agriculture.
John S. Mills, Department of the Treasury.
James E. Payne, Government Printing Office.
George R. Putnam, Bureau of Lighthouses, Department of Commerce.
E. A. Sherman, United States Forest Service, Department of Agriculture.
Rear Admiral Seaton Schroeder, Hydrographer, Department of the Navy.
Charles W. Stewart, Library and Naval War Records Office, Department of the Navy.

By executive order of August 10, 1906, the official title of the United States Board on Geographic Names was changed to United States Geographic Board, and its duties enlarged. The board passes on all unsettled questions concerning geographic names which arise in the departments, as well as determines, changes, and fixes place names within the United States and its insular possessions, and all names hereafter suggested by any officer of the Government shall be referred to the board before publication. The decisions of the board are to be accepted by all the departments of the Government as standard authority. Advisory powers were granted the board concerning the preparation of maps compiled, or to be compiled, in the various offices and bureaus of the Government, with a special view to the avoidance of unnecessary duplication of work; and for the unification and improvement of the scales of maps, of the symbols and conventions used upon them, and of the methods of representing relief. Hereafter, all such projects as are of importance shall be submitted to this board for advice before being undertaken. The board has passed on 18,000 place names since its creation. It now averages 2,000 decisions a year.

War Cyclopedia.

(Compiled from data published by the Committee on Public Information in its work of the same title, and from other official sources. For late happenings at places named, consult War Chronology.)

Adjutant General—An officer who keeps the records, orders, and correspondence of the Army. He serves under the direction of the Secretary of War and of the Chief of Staff. Through him and over his name instructions and regulations of the War Department are sent forward to military officers and troops. He is secretary and archivist to the Secretary of War.

Aisne—A French river flowing through Soissons, tributary to the Oise. The Germans occupied positions north of the Aisne after their retreat from the Marne in September, 1914, and were forced back there again in August 1918, this time by the Americans and French, in pursuit of the Crown Prince's fleeing army.

Albania—A former province of Turkey, made an independent State after the Balkan Wars. Italian forces occupied the southern part in 1915. In January, 1916, the Austro-German-Bulgarian forces, proceeding from their conquest of Serbia and Montenegro, overran the country as far south as Avlona, which was held by the Italians. On June 3, 1917, the General in charge of the Italian forces proclaimed Albania an independent country under Italian protection.

Allies—France and Great Britain (also Russia), bound together by the pact of London, September 5, 1917, against making a separate peace. Italy and Japan later joined this alliance.

Alsace-Lorraine—The territory bounded by the Rhine on the east, the Vosges Mountains on the west, Luxemburg on the north, and Switzerland on the south. The soil is fertile and Lorraine is rich in iron ore. The total area is 5,604 square miles and the population in 1910 was 1,874,014. Both Alsace and Lorraine originally lay within the Holy Roman Empire, but the former was acquired by France in Louis XIV.'s time, and the latter during the reign of Louis XV. After the Franco-Prussian War Germany took the provinces and they were erected into an imperial territory (Reichsland), directly subject to the German Emperor and the Federal Council. A Constitution was granted in 1911. Germanizing of the population has been sought by bringing in settlers and limiting instruction in the French language in the public schools.

Ambulance Companies—Used to supplement the Regular Army in transportation of sick and wounded to base hospitals, and thence to other hospitals in the home country. The personnel may man ambulance trains, hospital trains, ships, and other agencies for sick transport by land and water, or for the establishment of emergency hospitals. Each company consists of five officers and eighty-six men, and such other personnel as may be approved by the Secretary of War. Persons who enroll in a Red Cross ambulance company agree to serve in the Medical Department of the Army.

American Ambulance Corps—Shortly after the outbreak of the war there was organized in connection with the American hospital at Neuilly, near Paris, a volunteer fleet of motor ambulances for the transport of wounded from the front, and the first "section" soon expanded into a corps which was given a definite place in the French Army. The ambulances are manned chiefly by American college men, who agree to serve not less than six months.

American Ambulance Hospital—Organized at the outbreak of the war in Europe by the American colony in Paris and housed in a college building at Neuilly, near Paris. It was, in July, 1917, turned over to the Medical Corps of the United States Army as Military Hospital No. 1.

Anglo-Japanese Alliance—Japan entered the war because of a treaty with Great Britain, concluded in 1902. The original alliance preceded the Russo-Japanese war. In 1905 the alliance was further extended to provide for the defense of British interests in India and Afghanistan, while England agreed to give Japan a free hand in Korea. In 1911 it was again modified by the agreement that Great Britain should not be bound to aid Japan against any power with whom she had a treaty of arbitration—thus excluding the United States as a possible enemy. The alliance has been extended to 1921.

Anti-aircraft Guns—These are of various types, ranging from a light machine gun up to batteries of three-inch and six-inch guns, for defense against aircraft. Shrapnel is the most effective ammunition. Bursting, it throws its bullets in all directions. When these reach the petrol tanks or other vital parts of the machine, it falls and is destroyed, often burning in its descent. German anti-aircraft guns on the western front have brought down Allied machines flying at a height of 10,000 or 12,000 feet. Allied artillery of this kind is equally effective. Often machines escape with the wings riddled with shrapnel, but without the tank being punctured or the propelling or steering gear disabled. Balloons are more vulnerable in that they present a larger surface to be aimed at. Observation balloons are attacked by fire bombs dropped from aeroplanes overhead or by rockets and incendiary bullets.

Antwerp—A Belgian city on the Scheldt River. After the fall of Brussels the Belgian defense centred about Antwerp. On September 28, 1914, the Germans opened fire upon the outer forts. On October 5 the Belgian Army began to withdraw from the city, and the Germans occupied it on October 9, 1914.

Army Corps—The largest complete tactical and administrative unit in an army, which is composed of two or more corps. The corps is the appropriate command of a lieutenant general. In the United States service an army corps is formed by combining two or more divisions, under orders given by the President when he deems such a formation necessary. Such a corps may consist of corps headquarters, six complete divisions, and special corps troops, including one pioneer regiment of infantry, two regiments of cavalry, one anti-aircraft machine gun battalion, one anti-aircraft artillery battalion, one trench mortar battalion, one field battalion, signal corps, one telegraph battalion, one aero wing, one regiment of engineers, one pontoon train, one corps artillery park, one remount depot, one veterinary hospital, one bakery company, one supply train, one troop transport train. In addition, one artillery brigade, one sanitary train, and one corps engineer park may be formed from detachments from the divisional organizations. Its approximate strength is 185,000 officers and men.

Army Organization—There are three principal fighting arms of the service—infantry, field artillery and cavalry. The infantry is organized in regiments of ten companies, brigades of two regiments each, and divisions of two brigades each. The divisions of the United States Regular Army are numbered 1-25; those of the National Guard, 26-75, and those of the National Army, 76-000. The fighting forces are served by the staff, whose principal divisions are quartermaster corps, ordnance, medical corps, signal corps, engineer corps. The general staff, controlling and directing the whole establishment, under the President and Secretary of War, has a war college and an intelligence bureau.

Articles of War—Rules enacted by Congress for military discipline and punishment in the army, corresponding to the annual mutiny act in Great Britain. The latest form of the Articles of War will be found in the Army Appropriation Act of 1916. (See 1917 Almanac.)

Artillery—This war differs from previous wars, in increase in the use of artillery, due to the manufacturing resources of the countries at war, which enable them to produce great numbers of guns and great quantities of ammunition. A gun cannot be accurately aimed at an object the exact location of which is unknown. The airplane is able to bring back or to signal back this information sometimes by wireless, so that the artillery may now be used with great effect. The size of the guns and the force of the explosive shells fired from them have been largely increased. Field artillery is the artillery which accompanies the army in the field, as distinguished from the coast artillery, which is permanently mounted in emplacements in the coast forts. Field artillery is divided into light, horse, heavy, and mountain artillery. The light artillery is armed with three-inch guns, and the majority of the men are not mounted, while the horse artillery usually accompanies cavalry and the entire personnel is mounted. The heavy artillery is armed

with guns above three-inch calibre, including six-inch guns and howitzers. Mountain artillery is carried usually on pack mules, and is for use in difficult and mountainous country.

The coast artillery is for defensive use. Nearly all of the guns are fixed in forts, though it is planned to make some of them mobile for removal to unfortified harbors and beaches. The modern scheme for defense of our coast begins with the report of the Endicott board in 1886. There are three principal districts, the North Atlantic, running from Maine to Sandy Hook, N. J.; the South Atlantic, from the Delaware River to Texas; the Pacific Coast, from San Diego up to Puget Sound. There are forts also in the Philippines, in Hawaii, and at Panama. Under the National Defense Act of June 3, 1916, for the reorganization of the army this branch of the service called for over 30,000 men.

Aviation—A vast new arm of military service which has undergone a most remarkable development during the present war. The combined British and French air squadrons, it was recently stated, have been increased since the war began from 1,700 to more than 20,000 machines, with a personnel of 200,000 men. England did not possess more than 200 qualified aviators at the outbreak of hostilities. Aircraft in use include airplanes, the German Zeppelins, other dirigibles, and the observation kite balloons. The Allies at the beginning were surprised to see sausage-shaped bags anchored behind the German lines at altitudes reaching up to 5,000 feet. These were in position to report upon troop movements of the enemy and to guide the artillery. But the main line of development has been in the manufacture and use of airplanes. These are monoplanes, biplanes, and triplanes. They are of various types, sizes, and makes, designed for all kinds of uses. Principally they are for reconnaissance, for direction of artillery fire, for scouting and chasing, and for bombardment. The reconnaissance machines often carry cameras, and from them detailed photographs of ground to be attacked are made and returned to headquarters. They afterward direct the fire of the guns. The scout plane precedes and feels the way for other planes. The chaser is to pursue the enemy and to protect aerial movements. The planes for bombardment of enemy positions or troop masses carry bombs. All war planes are armed, the principal reliance being upon machine guns, with which to wound and precipitate enemy machines to the earth. Some of the chasers are built to fly at the rate of 150 miles an hour. One has risen to a height of 15,000 feet in seven and one-half minutes. In battles on the west front, as at Messines Ridge, there have been first, near the earth, a squadron of fighting planes, armed with guns for attacking troops in the trenches, transports, etc.; at a height of 3,000 to 5,000 feet a division of machines for dropping bombs into the enemy lines; and above, at a height of 15,000 or 20,000 feet, fast one-man machines for engaging planes sent out by the enemy to attack the bombers from overhead.

Barbed-wire Entanglements—Made of wire with protruding points, run back and forth over ground to be defended. The wire is sometimes electrified.

Barrage—A new word in the military vocabulary—specifically, the act of barring by artillery fire. By exact measurements a line of guns is brought to bear upon a certain terrain. The fire creates a complete screen of projectiles. Behind it a body of troops is safe; through it no enemy can advance. By moving the barrage line forward ("creeping" barrage) a detachment can advance with a minimum of casualties. It is controlled by observers at the front who find ranges and direct artillery fire by telephone or wireless, and it demolishes, in front of the attacking force, wire entanglements, trenches, and "pill boxes."

Base Hospitals—Receive the wounded from the front, treat their wounds, and then pass them on to permanent hospitals in the rear. Shortly after the beginning of the war in Europe the American Red Cross proceeded to organize base hospital units in connection with medical centres. Each of these base hospitals has a staff of twenty-two physicians, two dentists, sixty-five Red Cross nurses and 150 enlisted men of the Army Medical Corps. It costs on an average $75,000 to equip a base hospital with beds, blankets, sterilizers, operating tables, tents, dental outfits, automobiles, and kitchens.

Battalion—An organization of two, or more, generally four, companies in the infantry, engineers, and signal corps, and of two or more batteries in the field artillery. Two or more coast artillery companies are usually organized into provisional battalions for other than coast artillery formations. The total strength of a complete infantry battalion in the United States service is twenty-six officers and 1,000 men; of a machine-gun battalion of three companies twenty officers and 550 men, and of four companies, twenty-six officers and 728 men; of a battalion of light artillery, seventeen officers and 579 men; of heavy field artillery, twelve officers and 456 men; of a field signal battalion, fourteen officers and 248 men; and of an engineer battalion, twenty officers and 753 men. A trench mortar battalion has seventeen officers and 747 men. In the present war the importance of the battalion has been greatly increased.

Battery—Smallest administrative and tactical unit in the field artillery. A three-inch gun battery (light artillery) has five officers and 193 men; a heavy field artillery (six-inch) has five officers and 228 men. The term "battery" includes both the personnel and materiél. It is also used to designate a coast artillery emplacement, the guns mounted therein, and the materiél and supplies necessary for their service. Two batteries of heavy field artillery and three batteries of light usually make up a battalion, under command of a major.

Belgrade—Capital of Serbia, commands the Danube River at the Austro-Serbian frontier. It was shelled by the Austrians July 29, 1914. December 1 the Serbians evacuated the city. The Austrians entered on December 2, being forced to conduct the bombardment from across the Danube, and reduce the city to ruins. The rally of the Serbians on December 5 enabled them to reoccupy Belgrade, December 13, 1914. The next fall of Belgrade took place on October 9, 1915.

Bessarabia (anciently Wallachia)—This former province of Russia, which joined Roumania, in 1918, after the Peace of Bucharest, has 17,143 square miles, and 1,500,000 inhabitants. It fronts on the Black Sea, and is bounded south by the River Danube, and west by the River Pruth. It is a flat, fertile, grain country. In 1812 Turkey separated Bessarabia from Moldavia and gave the former to Russia. After the Crimean War Bessarabia and Moldavia were reunited; and in 1859, Moldavia and modern Wallachia united to form the Kingdom of Roumania. Bessarabia was got by Russia again in 1878, after her war with Turkey. The Bessarabians are mostly Roumanians.

"Boche'"—A term commonly used by the French soldiers to designate the Germans. The origin is disputed. It was used before the war as the equivalent of German. It was so used by the Paris printers to designate their German assistants. The term ce boche was used, before the Franco-Prussian war at least, as equivalent to "that chump," and tete de boche is given by French dictionaries of slang as equivalent to "wooden-pate" or "blockhead." Some French scholars derive the present use of boche from caboche, a French word meaning head.

Bohemia—A division of Austria with an area of 20,065 square miles and a population (1910) of 6,769,548, of whom the overwhelming majority is Czech. Bohemia was formerly an independent kingdom, which passed to the Hapsburgs in 1526; its independent political organization was suppressed in 1620.

Bolsheviki—Meaning "belonging to the majority;" originally the left or radical wing of the Russian Socialist Democratic Party. In 1905, at the time when the split in the party occurred, the radicals, led by Nikolai Lenine, were in the majority, or Bolshinstvo, and hence called themselves Maximalists or Bolsheviki, meaning the majority faction. The moderates, similarly, are called Minimalists or Mensheviki.

Bosnia-Herzegovina—The two southernmost provinces of Austria-Hungary, in the northwest part of the Balkan Peninsula. Originally part of the Turkish Empire, they were placed under Austria by the Congress of Berlin, and in 1908 were definitely annexed by Austria, contrary to the agreement made at that congress. Together they cover about 19,700 square miles, with a population of 2,000,000. The great majority of the inhabitants are Slav and pro-Serbian. This resulted in numerous attempts on the lives of Austrian officials, together with a more or less open state of insurrection on the part of the people, which

Austrian officials claimed was aided and abetted by Serbia. After the assassination of the Archduke Francis Ferdinand, at Sarajevo, the Bosnian capital, Austria-Hungary addressed to Serbia the ultimatum which brought about the war.

Brest-Litovsk Peace Conference—The first session was held Saturday, December 22, 1917. The delegates were: Germany—Dr. Richard von Kühlmann, Foreign Minister; Herr von Rosenberg, Baron von Hoek, Gen. Hoffmann and Major Brinekmann. Austria-Hungary—Count Czernin, Foreign Minister; Herr von Merey, Freiherr von Wisser, Count Collerda, Count Osaky, Field Marshal von Chisceries, Lieut. Polarny, and Major von Gluise. Bulgaria—Minister Popoff, Former Secretary Cosseff, Postmaster General Stoyanovich, Col. Gantjiff and Dr. Anastasoff. Turkey—Former Minister of Foreign Affairs Nesimy Bey, Ambassador Hakki, Under Foreign Secretary Hekmit Bey and Gen. Zekki Pasha. Russia—Joffe Kamineff, Bisenko Pokrosky, Karaghan Lubinski, Weltman Pawlowich, Admiral Altvater, Gen. Tumorri. Col. Rokki, Col. Zeplett and Capt. Lipsky. The delegates were welcomed by Prince Leopold of Bavaria. Russia put in fifteen peace requests, including evacuation of her territory by enemy troops, no indemnities: and the restoration of Belgium and indemnity through an international fund for damages. The conference then adjourned until December 25, when the Teutons put in counter proposals, including independence for Poland, Courland, Lithuania, and parts of Esthonia and Livonia, and a European commission to administer the mouth of the Danube. Nothing was said as to Belgium.

On January 2, 1918, the Executive Committee of the Russian Council of Workmen's and Soldiers' Delegates announced a rejection of the German counter proposals, with a demand that the conference be transferred from Brest-Litovsk to Stockholm. Germany and Austria then declared the Russian demands ungrantable as to Stockholm and evacuation of Russia's territories. The second session of the Brest-Litovsk Peace Conference opened on Thursday, January 10, 1918. The meeting was attended by Minister Trotzky, one woman, Mme. Bitbenko; a former exile, M. Joffe; M. Kameneff, M. Pokrovsky, and three Councillors. Representing the Central Powers were Dr. von Kühlmann, Count Czernin, Talaat Bey, the Turkish Grand Vizier, and the Bulgarian Foreign Minister. There was also a representation from Ukrainia, which, through its Rada, or Parliament, had demanded independent peace commissions, this having been agreed to by the Bolsheviki and the Central Powers. Count Czernin stated that to shift the parley to Stockholm, on neutral land, would give the Allies a chance to interfere. The Teutons complained that the Bolsheviki were using the Russian wireless to spread Socialist doctrines among the German troops.

On January 11, 1918, the conference agreed to extend to February 12 the armistice of December 14, 1917, which expired January 12, 1918. The Central Powers announced to the other delegates informal recognition of Ukrainian independence. On January 14 the conference was broken off. Meantime, since December 25, there had been economic conferences at Petrograd between commissions from both sides. On January 16, at a private conference of the delegates, an agreement was reached between the Central Powers and the Ukrainians. On January 25, before the formal conference had resumed, the Ukrainian Rada warned the Petrograd Government that unless Russia made peace with Germany within twenty-four hours the Ukraine would make a separate peace. This was not agreed to by Petrograd. Then the Brest-Litovsk conference was resumed, and on February 9 a treaty was signed between Germany, Austria-Hungary, Bulgaria, and Turkey, on the one side, and the Ukraine Rada on the other side. On March 3 peace was signed at Brest-Litovsk between the Central Powers and the Russian Bolsheviki; on March 7 the peace was signed between Germany and Finland, and negotiations were under way with Roumania. This wound up the Brest-Litovsk conference. The peace treaty between the Central Powers and Roumania was signed at Bucharest May 6.

Brigade—An infantry brigade is a tactical organization commanded by a brigadier general, and is made up of brigade headquarters, two infantry regiments, and a machine-gun battalion, with a total strength of 232 officers and 8,210 men, of which 17 officers and 202 men are noncombatants, i. e., the chaplain and the Medical Corps. A brigade of field artillery consists of brigade headquarters, two regiments of light artillery, one regiment of heavy artillery, and a trench mortar battery, with 72 guns, 12 trench mortars and the necessary transportation, supplies, etc. It has a total strength of 185 officers and 4,781 men. A cavalry brigade is composed of headquarters and three cavalry regiments, and has a strength of approximately 181 officers and 4,575 men.

Brussels—Capital of Belgium. Evacuated by the Belgian Government August 19, 1914. German forces occupied the city on August 20, levying a war tax upon the inhabitants on August 21. It became the centre of German administration for Belgium.

Bucharest—Capital of Roumania. December 6, 1916, the Germans took possession of the city.

Buffer States set up by Germany—Comparatively early in the war, and long before the actual collapse of the Russian military offensive, the Central Powers set about establishing buffer states on their eastern borders. German agents in Russian Poland promised that region independence, so the Poles declared. In the Ukraine district of Russia an Austrian bund was formed for active propagandizing. In Finland, in Courland, in Esthonia, and in Lithuania, similar movements were started. In Finland, and also in Poland, the Russians, too, were in competition with the Germans in promising independence and the establishment of buffer states. The Kerensky government, the first in Russia after the revolution, strove to keep the Ukraine region intact with Russia proper, on account of its bordering on the Black Sea. The Bolshevist government, which succeeded the pro-Ally government of Kerensky, got in competition with the Central Powers in promising independence to the Ukraine. In the end, Austrian influence in the Ukraine overcame that of the Bolsheviki, and the Ukrainians were the first to make a treaty of peace with the Germans.

A formal admission that Germany's aim was to set up buffer states on her east was made by the Foreign Secretary, von Kühlmann, who, in a statement in the Reichstag in February, 1918, regarding the Russian treaty, said: "It contains no conditions whatever which dishonor Russia, no mention of oppressive war indemnities, no forcible appropriations of Russian territory. A number of the border states have severed their connection with the Russian State in accordance with their own will, which was recognized by Russia. In regard to these States we adopt the standpoint formerly expressed by me, that under the mighty protection of the German Empire they can give themselves political form corresponding with their situation and the tendency of their kultur, while at the same time, of course, we are safeguarding our own interests."

Bulgaria—A constitutional monarchy, in the Balkans, capital, Sofia. Its area has been altered by gains and losses in the recent Balkan wars, and was estimated for 1913 at 114,017 square kilometres (approximately 45,000 square miles), while its population at that time was 4,711,917. In 1908 Bulgaria repudiated certain restrictions imposed by the Congress of Berlin and became an independent monarchy, with Prince Ferdinand as Czar. Like Serbia, Bulgaria is a link in the Berlin to Bagdad railway. On October 14, 1914, Bulgaria declared war upon Serbia and became an ally of the Central Powers.

Bulgaria sued for an armistice from the Allies, which was granted on condition that she demobilize and get out of the war; at noon, September 30, hostilities between Bulgaria and the Allies ceased.

"Cadets"—The Constitutional Democratic Party of Russia, so-called from the initial letters of the party name.

Cambrai—A town of 21,791 inhabitants (1906) in northern France, thirty-seven miles south and a little east of Lille. Old fortifications had been levelled before the outbreak of the present war, but the city possessed military importance as the converging point of four railways and numerous highways. The Germans made it a great distributing centre for the armies along the Hindenburg line and also along the Aisne. It was a link in the chain of supply stations—Laon, St. Quentin, Cambrai, Douai, Lille—in front

of which the Germans took their stand after the retreat from the Marne. It was the objective of the drive begun by Gen. Byng on November 20. 1917, and renewed in the late summer of 1918.

Camouflage—A French word for a military art that has assumed new importance in the present war as a result of the effort to conceal fortifications, ships. guns, trenches, etc., from the observation of hostile aircraft. It consists in painting objects of war so that they may blend readily into the landscape and thus be lost to view, or in concealing them by screens or false work, or even in "faking" fortifications or "Quaker" guns.

Cavalry—Soldiers organized and armed with the rifle, pistol, and sabre, mounted on horses, and trained to fight either on foot or on horseback; of great importance in past wars. The smallest administrative unit of the cavalry; four troops form a squadron, and three squadrons, with headquarters, supply and machine gun troops, form a regiment. Captains command troops; majors, squadrons; and a colonel, the regiment.

Caucasus—This region has an area of 180,703 square miles and an estimated population of 14,000,000. It is bounded on the north by Ukrainia and the Don region, on the east by the Caspian Sea, on the south by the Turkish-Persian frontiers, and on the west by the Black Sea. It comprises two geographical divisions, namely: Ciscaucasia, or the northern Caucasus and Transcaucasia, or the southern Caucasus. Ciscaucasia contains four out of the fourteen administrative divisions of the old viceregency of the Caucasus. It has an area of 96,672 square miles and an estimated population of 7,000,000, 90 per cent. of which are Turko-Tartars, Circassians and other Moslem tribes. Ciscaucasia, at the instigation of Germany and Turkey, declared, in 1918, its independence from Russia and assumed the title of the Union of the Independent State of the Mountaineers of the Caucasus. Transcaucasia contains ten out of the fourteen administrative divisions of the old viceregency of the Caucasus. It has an area of 84,131 square miles and constitutes exclusively the Russian Georgia and Armenia. Of its estimated population of 7,000,000 about 3,000,000 are Georgians; 2,000,000 are Armenians, exclusive of the 350,000 refugees from Turkish Armenia, and the rest are Turko-Tartars, Russians, Jews, etc. Transcaucasia is bounded on the north by Ciscaucasia; on the east by the Caspian; on the south by the Turkish-Persian frontiers, and on the west by the Black Sea.

Cavell, Edith, Execution of—Occurred at 2 A. M. of October 13, 1915, in pursuance of sentence passed by the German military court at Brussels, the charge against her being that she had assisted English and Belgian young men, who had come under her care as nurse, to cross the frontier into Holland.

Cettinje—Capital of Montenegro, fell before the Austrian armies November 13, 1915.

Company—Smallest administrative unit in the infantry, engineers, signal corps, and coast artillery. The quartermaster corps and medical corps also have special units designated as companies, such as truck companies, field hospital companies etc. A company is the proper command of a captain, and its strength in the different arms of the service varies from 250 in an infantry rifle company to seventy-five in the signal corps. In the infantry and coast artillery, four companies, with battalion headquarters, make a battalion; in the engineers, signal corps, quartermaster corps, and medical department, companies are organized into battalions when necessary, such number of companies being used as will most efficiently combine for the special work for which the troops are intended.

Congress of Berlin—Met under the presidency of Bismarck at Berlin in 1878 to settle questions which had arisen out of the Russian defeat of the Turks in the war of 1877-78. It had been the desire of Russia to erect a strong Slav State, Bulgaria, out of land taken from Turkey, leaving the latter little in Europe except Constantinople. England opposed, from fear of Russian control at Constantinople, and Austria, desiring Balkan land and fearing a strong Russia, added her protest. Bismarck mediated. Russian plans for Bulgaria were checkmated, and Austria secured control of Bosnia and Herzegovina. Much of the land intended for Bulgaria was given back to Turkey. This contributed to break up the old Russo-German friendship and later led to the Franco-Russian alliance.

Contraband—Goods of warlike use, neutral trade in which, with the enemy, may be intercepted by the belligerent either on the high seas or in enemy's waters and suitably penalized. It is, or at least used to be, of two sorts—(1) absolute contraband, which comprises generally speaking, articles of predominantly warlike use, such as munitions; and (2) conditional contraband, which includes articles of double use, like foodstuffs. The carriage of the former to the enemy country is attended by the risk of confiscation both of cargo and vessel; that of the latter, only when it is shown to be destined for the enemy forces or Government. The difficulty of distinguishing between the civil population of the belligerents in the present war and their armed forces has rendered the distinction between the two kinds of contraband precarious; and the science of chemistry has worked to the same end. Raw cotton, which the Declaration of London listed in 1909 with articles never contraband, now furnishes the basis of the highest explosives, and has, in consequence, been declared absolutely contraband by Great Britain and France.

Courland, Livonia, and Esthonia—These three provinces in European Russia, declared independent states by the Central Powers early in 1918 under their treaty with Russia, lie side by side on the east shore of the Baltic Sea.

Courland, the most southerly, occupies a peninsula which juts into the southeast corner of the Baltic, with Libau as its chief port, and has the Gulf of Riga on its east. Above Courland is Livonia, lying between the Gulf of Riga and the province of Petrograd. Riga is its seaport and capital. Esthonia is north of Livonia, and is bounded on the north by the Gulf of Finland, which is an arm of the Baltic. Its capital Reval, lies on the gulf. Courland had, in 1915, an area of 10,435 square miles—slightly larger than Maryland—and a population of 812,000. It was once a part of Poland. The Dvina is the chief river. Formerly much flax was grown, great quantities of amber were gathered on the coast. There are large exports of corn, lint, hemp, oils, and lumber. Iron is mined. The country is level, with many lakes and marshes. The upper classes are mainly of German descent; the peasantry, Letts. The name Courland, or Kurland, comes from the Kur, who were Letts.

Livonia (formerly Riga), in 1915, had an area of 17,574 square miles—larger than Massachusetts and New Hampshire together—and a population of 1,778,000. It is 250 miles long, north and south, and 150 miles wide, east and west. There are many lakes and forests. One of the lakes, Virty, or Virts Yerve (now called Wrzjarv), is twenty-three miles by nine miles. Livonia, a century ago, was the "corn granary of Europe." Cereals, potatoes, flax, and dairying are now the chief industries. The upper classes are mostly Germans; the lower, Letts and Esthonians. The country was Polish, then Swedish, then Russian. The Germans got in there in the thirteenth century.

Esthonia (formerly Reval) had, in 1915, an area of 7,605 square miles—somewhat larger than New Jersey—and a population of 512,000. It is a flat land, humid; much sand, and marsh, and pine woods; corn, cattle, and fish are important products. The upper classes are German; the lower, Finns and Esthonians. The capital, Reval, is a bathing resort, and was called by the Russians, Kolyvan in the middle ages. The Esthonians called it Tallin.

Cuxhaven—The fortified port of Hamburg, situated at the mouth of the Elbe, directly opposite the west end of the Kiel Canal, and used in the present war as a German naval base.

Czecho-Slovak National Unity Movement—Preceding the Congress of Oppressed Nationalities, held at Rome, April 8-10, 1918, a home-rule declaration was made in the Austrian Parliament on May 30, 1917, in the name of the Czechs of Bohemia, and by the Poles, Czecho-Slovaks and Jugo Slavs. The Slav leaders were imprisoned, and released in July, 1917, by the young Emperor, Charles. Their leader, Dr. Kramar, was received by a cheering throng on his return to Prague. At that city, January 6, 1918, was held a Constituent Assembly of all Czech Deputies in the Austrian Parliament, at which a resolution

was adopted demanding Bohemian independence. In February the various Czech Socialist groups in Bohemia united. On April 2, 1918, the Austro-Hungarian Premier, Count Czernin, spoke in Parliament, denouncing the Czech leaders as "high traitors" and "Masaryks." The second appellation was denied by the Czecho-Slovaks at a national Bohemian convention at Prague, April 13, 1918, attended by 6,000 delegates. Then Czernin resigned as Premier, the Reichsrat, or Parliament, was adjourned, and the Emperor threatened Bohemia with partition. On May 1, 1918, Czech demonstrations were held all over Bohemia.

Following the Roman Congress, the Czechs of Bohemia held a similar gathering at Prague, May 16, 1918. The Slovenes sent one hundred delegates, as did the Croatians, Serbians, Bosnians, Italians, Bukovinians, Roumanians of Transylvania, Slovaks of Hungary, and Poles from Galicia, Silesia, and Posen. On May 17 the assembly adopted a resolution calling for "world democracy, a real and sovereign national people's government and a universal League of Nations, endowed with the necessary authority." The Austrian Government on May 19, 1918, suppressed the newspaper Narodni Listy, many arrests were made on treason charges, and Dr. Kramar was expelled.

Destroyers—Large torpedo craft of from 350 to 1,100 tons displacement. They have greater freeboard and higher speed than the torpedo boats, which they were devised to destroy. In the present war they have proved to be one of the best means for fighting submarines.

Division—The infantry division is complete in itself, having infantry, cavalry, artillery, engineers, signal and quartermaster corps troops, medical and sanitary troops, and all necessary supplies, material, and transportation, with the headquarters personnel, enabling it to act independently of any other organization. It is the command of a major general. The infantry division of the United States army is now composed of division headquarters, two infantry brigades, each of two regiments of infantry and one machine gun battalion, one field artillery brigade (having two regiments of light and one of heavy field artillery and one trench mortar battery), one divisional machine gun battalion, one regiment of engineers, one field signal battalion, headquarters train, and military police, and engineer, ammunition, supply, and sanitary trains. The division has a total strength of 887 officers and 26,265 enlisted men. The cavalry division at the beginning of the present war included headquarters and three brigades of cavalry, with horse artillery, mounted engineers, train, etc., and its total strength was 711 officers and 17,537 men. This organization will, in all probability, be somewhat changed to meet present conditions.

Essen—Industrial town in the midst of iron and coal fields in the Rhineland in Prussia. It is situated at a point some twenty-seven miles from Dusseldorf. It is the seat of the Krupp iron and steel works, the largest in Europe.

Embargo—Formerly defined as consisting in the detention of ships and goods within the port of the state resorting to it. It was ordinarily a measure of reprisal and might be either (1) pacific, when the detention was confined to the states' own vessels; or (2) hostile, when it was extended to the goods and ships of another state.

Finland—The restoration of autonomy to Finland was one of the first acts of the Russian revolution, and put once more in force the Constitution of the old Grand Duchy, granted to the Finns in 1863 by Czar Alexander II. of Russia, and which had confirmed the rights and privileges given to the Grand Duchy by Czar Alexander I. after he formed the duchy out of the Swedish province of Finland (wrested from Sweden in 1809), and out of the province of Vyborg, conquered by Peter the Great. Czar Nicholas II. suspended the Constitution of Finland in 1899, and began a Russification of the province. In 1905 there was an upheaval in Finland, and Solnien, the Procurator General, was assassinated. The Finns agreed to pay $2,000,000 a year to Russia, in return for the stopping of recruiting and the making of judges irremovable. In 1910 there was trouble due to laws set up by Russia.

Finland contained, in 1916, an area of 144,000 square miles, somewhat smaller than that of Montana, and a population of 3,000,000. The Finns call their country Suomi, the "land of lakes." Helsingfors, the capital, a seaport on the Gulf of Finland, has 93,000 population and a large university, removed from the city of Abo in 1827. The latter city was the capital until 1819. It is near the entrance to the Gulf of Bothnia. Finland joins Sweden on the east, and Norway projects above it. Finland is 700 miles long, from 112 to 370 miles wide, and includes a large part of Russian Lapland. It is a fertile agricultural (284,000 farms) and pastoral (1,400,000 horses and cattle) country, with immense forests, a large merchant marine, and mineral deposits in the north. The Finns belong to the Uralto-Altaic stock, and speak a language like that of the Lapps, though the two races do not mix. They date back to the Scythians. In the twelfth and thirteenth centuries the Finns, up to that time pagans, were conquered by the Swedes. In 1721 that part of southern Finland, on the Gulf of Finland, was got by treaty by Peter the Great of Russia, and in 1808-9 most of Finland was taken by Czar Alexander I. of Russia, including the southern portion. Under Russian control, Finland became a Grand Duchy, under a Governor General, residing at Helingsfors, but until recent years, preserving its old constitution. The Governor General was the head of the Imperial Senate of Finland, composed of four classes—nobles, clergy, burghers, and peasants. The country was divided into eight laons, or provinces. In 1911 the population consisted of 2,571,000 Finns, 339,000 Swedes, 7,000 Russians, 1,800 Germans, and 1,600 Lapps. Nearly all the people are Lutherans. In 1907, when the old constitution was restored, having been suspended for several years, Finland adopted universal suffrage, including both sexes. The whole country was included, for military purposes only, in the Petrograd army district, the Russian capital lying just across the Gulf from Helsingfors.

Finnish Republic—The Russian Grand Duchy of Finland was proclaimed, March 21, 1917, by the Revolutionary Russian Provisional Government, to be a free and independent state, in a Russian federation. The manifesto revoked the laws contrary to the old constitution, freed all Finns who had been imprisoned or exiled for religious or political offenses, and promised the establishment of a Diet, or local legislature, and independent government. Under the Finnish Constitution government authority was vested in the Emperor of Russia, who was also Grand Duke of Finland. No bill passed by the Diet could become a law without the confirmation of the Emperor-Grand Duke, as the monarchy no longer existed, the question now was who was to inherit authority in Finland. The leaders argued that the grand ducal prerogatives had automatically passed to the Finnish Senate, i. e., Cabinet of Ministers. The Provisional Government held that the rights formerly vested in the Grand Duke of Finland now belonged to itself, and that the future relations between the two countries were to be determined not by a one-sided act of the Finnish Diet but by a mutual agreement, whose terms could be fixed only by the All-Russian Constituent Assembly. The Diet opened on April 4, 1917, the date fixed by the Provisional Government in a special edict. Although it had a Socialist—that is, a separatist—majority, it refrained for some time from challenging the Russian Government, and reluctantly submitted to its authority.

Finally the Diet passed, July 19, 1917, a bill giving Finland a government independent from that of Russia. The Russian Provisional Government, August 3, 1917, ordered the dissolution of the Finnish Diet and the summoning of a new one on November 1, 1917. It had been in session several days when the Kerensky Government in Russia was overthrown by Lenine and the Bolsheviki, who, through the Government of the Soviets, declared the right of the Russian peoples to secede, without waiting for the decision of the Constituent Assembly. A manifesto issued by the Peoples' Commissaries, the Bolshevist Ministers, on November 23, confirmed the right to freedom and self-determination on the part of the various nationalities in Russia, and stated that "this right of the Russian peoples to their self-determination is to be extended even as far as separation and the forming of independent states."

Finland, accordingly, on December 5, 1917, declared its own independence. On December 9 the President of the Finnish Senate issued a proclamation that the Finnish Diet had assumed sovereign power and had appointed the Senate as the supreme executive authority; that the President of the Senate had submitted

to the Diet a bill instituting Finland an independent republic, and that no legal Russian authority existed in Finland. The declaration of independence was recognized by Sweden, France, Norway, Denmark, and Germany, in the order named, and on January 9, 1918, the Russian Provisional Government, through the Central Executive Committee of the Soviets, unanimously recognized Finland as free and independent. Then followed Socialist strike riots and civil war. The "Red Guards" (Bolsheviki) set up a government at Viborg, and the "White Guards" (pro-German) set up a rival government at Vasa. On March 7, 1918, Germany signed a peace treaty with Finland, having invaded the country and occupied the Aland Islands. After the treaty, the Germans took part in the civil war, occupying Helsingfors on April 13, and Viborg on April 30.

France—The present French Republic was proclaimed on September 4, 1870. She was the friend and ally of the United States in the struggle for independence, and in her own great revolution gave Europe the Declaration of the Rights of Man. The first French Republic was established in 1792, but it was unable to maintain itself against the reactionary forces of the age. At the beginning of the war the Germans seized the territory of northeastern France, in which are located 90 per cent. of her coal and iron, and her most productive industries. France has an area of 207,129 square miles, with a population in 1911 of 39,607,509. The capital, Paris, had 2,888,110. The Government consists of a Senate and Chamber of Deputies, elected by the people, and a President chosen for seven years by the Houses sitting jointly. M. Poincare has been President since 1913.

Fryatt, Capt., Execution of—June 23, 1916, the British steamship Brussels, Capt. Fryatt, was captured by German warships. On July 27 he was condemned to death by a German court-martial at Bruges, and shot the same day, for having attempted on March 20, 1915, to ram the German submarine U 33.

Freedom of the Seas—Doctrine first propounded by Grotius in his Mare Liberum, "The air, running water, the sea—are common to all." Selden answered with his Mare Clausum, which defended the pretensions of England over the waters surrounding the British Isles. The issue between Grotius and Selden may be regarded as settled by the present doctrine regarding the marine league, i. e., that the jurisdiction of a state extends three miles beyond the coast line, and no further. In the eighteenth century continental antagonism to British sea power produced the doctrine that "free ships make free goods." This was backed by the armed neutralities of 1780 and 1800, and was finally incorporated, in great part, into international law by the Declaration of Paris, 1856, which also abolished privateering. Meantime a third meaning had come to be fastened to "freedom of the seas," the idea that private property should be immune from capture on the high seas in war time unless it was contraband or intended for a blockaded port. Of this notion the United States has always been the champion.

Galicia—Acquired by Austria in the eighteenth century at the partition of Poland by Russia, Prussia, and Austria. It is the largest of the Austrian Crown lands; the population (8,022,126) is about evenly divided between Poles (west) and Ruthenes (east); it was the region of the first Russian drive into Austria, which, beginning September 1, 1914, captured Lemberg on September 5, and swept across Galicia to the edge of the Hungarian plains. The Russians were almost completely expelled from the district by Mackensen's advance in May-June, 1915, and the Austro-German invasion of Russia which followed. The Russians returned to the invasion of Galicia under Brussiloff in 1916, penetrating as far as Halicz, where they were halted by internal affairs in Russia. A third drive in Galicia was begun in July, 1917, and rapid gains were made July 11-July 20; but this campaign was ended by the revolution.

Gallipoli—A narrow peninsula north of the Dardanelles and the strategic key thereto. After the failure, with heavy losses, of a naval demonstration, Allied forces were landed in April, 1915, in an attempt to force the straits. The landing was accomplished only at heavy cost. On April 28, the Allied troops commenced to advance. On May 11 they were able to begin siege operations against the intrenched Turco-German forces, but these failed of success, as did a flanking attack at Suvla Bay in August. The campaign was abandoned in January, 1916.

Gas Warfare—During the engagement near Ypres, April 22, 1915, the German army introduced poisonous or asphyxiating gases. These gases were generated in bombs, grenades, and other apparatus, and allowed to drift with suitable winds into the allied trenches. A week earlier, says Gen. French, the Germans had falsely announced that the British were using asphyxiating gases as a weapon of war. Later, the use of gas in explosive shells became general.

German Colonies—Germany's colonial possessions, before the war, had an area of more than 1,000,000 square miles. She had Kamerun, in West Africa, with an area of 191,000 square miles and a population of 4,500,000; German East Africa, 400,000 square miles and a population of 6,850,000, and German Southwest Africa, 320,000 square miles, and a population of 200,000. In 1904, Germany's expenditures on her colonies amounted to $31,000,000, while her trade with them reached a third of this sum.

German Empire—It is composed of twenty-five states and the Reichsland (Alsace-Lorraine). The capital is Berlin. The area is 208,825.2 square miles; population at the outbreak of the war, 67,816,000. The separate states have a measure of local self-government. William II. ascended the throne June 15, 1888.

Helgoland—A small island one-fifth of a square mile in area with a population of 2,307 (1906). It belonged to England up to 1890, when it was ceded to Germany in exchange for territories in Africa. The German Government has fortified it and made it a very important feature in the defense of the coasts. The harbors are not of sufficient size to admit battleships, but it makes a station for small cruisers and torpedo craft. An important naval engagement was fought near it in August, 1914. It commands the entrance to the Kiel Canal.

"Hindenburg Line"—German preparation for a renewal of the Somme battle in 1917 was a "strategic retreat" to the "Hindenburg line," assumed to have been through Laon, La Fere, St. Quentin, Cambrai, and Lille, joining the old line at Vimy Ridge north of Arras. The retreat on a front extending from Arras to the Aisne was carried out in March, 1917. The Allied pursuit overtook the retreat. La Fere was rendered useless by French successes. St. Quentin was eliminated from the line in April, 1917. On March 21, 1918, when the Germans renewed their offensive, the Hindenburg line, beginning at the north at Nieuport, went south through Lens, Croiselles, Bullecourt, Hermes, Epehy, Bellenglise, Essigny, and St. Quentin, La Fere, Anizy, and Craonne, to Rheims. The Allied armies, including American brigades, under Gen. Foch, began a counter movement in June, 1918 (at which time the Germans had swept west to Arras, Beaumont, Corbie, Hangard, Braches, Montdidier, Cambronn, Bailly, Courtil, Soissons, Troenes, Vaux, Chateau-Thierry, Dormans, Chatillon, and Thillois, to Rheims), and by September 22 the Soissons-Rheims salient had been wiped out, and from La Fere, through Laon, to Rheims, the Germans were gradually being pushed toward, and then across, the southern remnants of the Hindenburg line.

Infantry—Soldiers trained and organized to fight on foot. It is the most important of the three arms, and constitutes the bulk of our own and the military forces of other countries. The National Defense Act of 1916 provided for sixty-four regiments of infantry in the Regular Army of the United States. Since that act was passed, the act of May 18, 1917, authorized the President to increase the personnel of the army, but the number of regiments in the regular establishment cannot be changed. An infantry regiment, according to the new Tables of Organization, has a strength of 103 officers and 3,652 enlisted men.

Italia Irredenta—Means unredeemed Italy. After 1861, when the present kingdom was established, the Papal States, Venetia, the district around Trieste, and the district around Trent, were still—although inhabited mainly or in part by Italians—not parts of the kingdom. Venetia and the Papal States were annexed in 1866 and 1870. This process of winning Italy from foreign control came to be called redeeming

Italy, and after 1870 the term "Italia irredenta" was applied to Trieste and the Trentino, these being territories still "unredeemed."

Italy—A constitutional and parliamentary monarchy; area of 110,688 square miles; population in 1915, 36,120,118. Rome is the capital. The reigning King, Victor Emmanuel III., came to the throne on July 29, 1900. The Queen is Elena, a princess of Montenegro. On May 23, 1915, Italy declared war against Austria; on August 20, 1915, against Turkey; on August 27, 1916, against Germany; and on October 19, 1915, against Bulgaria. Prior to the war Italy, Germany, and Austria composed the Triple Alliance, which had been in existence since 1882, as a counter balance to the Triple Entente (England, France and Russia), which began in 1893 with an alliance between Russia and France. England joined France in 1904, and joined Russia in 1907.

Japanese-American Agreement—On November 2, 1917, Viscount Ishii for Japan and Secretary Lansing for the United States exchanged notes on their policy regarding China. In a statement Secretary Lansing spoke of the attitude of constraint and doubt fostered by a campaign of falsehood adroitly and secretly carried out by the Germans, and declared that through the frankness and cordiality of the Japanese commissioners this propaganda of years had been undone in a few days. The main points of the agreement were as follows: "The Governments of the United States and Japan recognize that territorial propinquity creates special relations between countries, and consequently the Government of the United States recognizes that Japan has special interests in China, particularly in the part to which her possessions are contiguous. The territorial sovereignty of China, nevertheless, remains unimpaired, and the Government of the United States has every confidence in the repeated assurances of the Japanese Government that, while geographical position gives Japan such special interests, they have no desire to discriminate against the trade of other nations. * * * Moreover, they mutually declare that they are opposed to the acquisition by any Government of any special rights or privileges that would affect the independence or territorial integrity of China, or that would deny to the subjects or citizens of any country the full enjoyment of equal opportunities in the commerce and industries of China." The Chinese Government issued a statement that it could not be bound by agreements concerning it entered into by other powers.

Junker—A member of a noble Prussian family, who belongs to the landed aristocracy, and, as a rule, adopts the profession of arms and enters the officer corps. Since 1862, when, under the leadership of Bismarck, the aristocratic party came into political power, the term has been applied to those who desire to preserve intact the social, military, and political privileges belonging traditionally to the "well-born."

Jugoslav Congress of Oppressed Nationalities—This was held at Rome, April 8-10, 1918. Senator Ruffini presided. There were delegates present from Italy, Poland, Roumania, and from committees of the Czechs and Jugoslavs (southern Slavs). The Czecho-Slovak National Committee was represented (in the absence of Professor Masaryk in Russia) by Dr. Benes and the aviator, Col. Stefanik; the Jugoslav Committee, by its President, Dr. Trumbic, the Dalmatian sculptor, Mr. Mestrovic, the Bosnian ex-Deputy, Mr. Stojanovic, and others; the Poles by the Galician Deputy, Mr. Zamorski, and by Messrs. Seyda, Skirmunt, Loret, and others; the Roumanians by the Senators Draghicescu and Mironescu, the Deputy Lupu and the Transylvanians, Mandrescu and De Luca. The Serbian Skupstchina sent a deputation of twelve deputies and a delegation of officers from the Jugoslav Division at Salonica. Among the foreign visitors invited to the congress were M. Franklin-Bouillon, President of the Foreign Affairs Committee of the French Chamber, the ex-Minister, M. Albert Thomas, M. Fournol, M. Pierre de Quirielle, Mr. H. W. Steed, Mr. Seton-Watson, and Mr. Nelson Gay. The congress unanimously adopted the general resolutions agreed upon between the various nationalities and the special Italo-Jugoslav Convention concluded between Messrs. Torre and Trumbic, in which they declared for separate national independence. The United States announced sympathy with and interest in the congress.

Kiaochow—In 1897 the German fleet seized the land on both sides of Kiaochow Bay, China, to secure reparation for the murder of two German missionaries. It was afterwards arranged that the bay and the land adjacent should be leased to Germany for ninety-nine years; area about 117 square miles. The port is Tsingtau, fortified by Germany; was besieged by Japan and taken November 10, 1914.

Kieff, or Kiev—An ancient fortified city on the right bank of the Dnieper, 670 miles south of Petrograd, and 290 miles north of Odessa, which latter city is near the mouth of the Dnieper, on an inlet of the Black Sea. Kieff (population, 1915, 329,000) was the cradle of Christianity in Russia. It is the seat of the University of St. Vladimir, and when the Russian monarchy was founded, in the second half of the ninth century, Kieff became the capital, and so continued until the division of the empire, in the middle of the eleventh century. Long afterwards it remained the chief centre of power of Russia. It is a centre of the beet sugar, and fruit preserving industries. In recent times it has been the scene of many outbreaks against the Jews.

"Kultur"—Has been defined as indicating the whole mass of customs, conventions, usages, laws, institutions, and language from which the Prussian people derives its outlook, and in which it expresses the dominant characteristic differences distinguishing it from other peoples. A Kulturmensch (culture-man) is not primarily a distinctive individual, but the exponent of self-conscious national tendencies under the definition above.

Lafayette Escadrille—A body of young American aviators who, in memory of Lafayette's services to the United States during our War for Independence, volunteered to aid France. Before we had yet declared hostilities upon Germany it was stated that they had brought down thirty enemy aircraft. The pilots use Nieuport machines. They were the first to raise the Stars and Stripes on the western front in April, 1917, upon receiving news of our entry into the war.

Lithuanian Republic—In January, 1918, a Congress of Lithuanians, at Vilna, declared for a Lithuanian Republic, reaffirming the independence declaration made there first in 1905, and again in October, 1917. On March 13-14, 1918, Lithuanians in convention at New York proclaimed an Independent Lithuanian Republic. A republic was recognized by Germany, March 23, 1918, and the Kaiser, on May 12, 1918, issued a proclamation to that effect. This was followed by the organization of a provisional Lithuanian Government. The Independent Lithuanian Republic comprises more than old Samogitia, which was on the Baltic border. Lithuania was overswept in 1915 by the Germans, who refused to give it up when they made their treaties of peace with Russia and Ukrainia. Lithuania has an area of 132,000 square miles, being 10,000 square miles greater in extent than New Mexico. It includes the provinces of Kovno, Vilna, Suvalk, bordering on Prussia; a part of Russian Poland, and parts of Grodno, Moghilev, Minsk and Vitebsk, and has an estimated population of 7,000,000. For forty years before the present war, the Russian Government had a ban on the Lithuanian language in public places, including courts, railroad stations, schools and churches. The dissemination of Lithuanian books, pamphlets, papers and periodicals was forbidden. Now and then, printed matter in the Lithuanian language was stocked in the market places in Vilna, the capital, and burned. In 1897, the German Emperor began the same course, but abandoned it on May 7, 1904, after which the language spread to most of the Lithuanian schools of all grades.

According to some historians, among them Dr. John Szlupas, a member of the Lithuanian Society of Science, now an American citizen, of Scranton, Pa., that race was divided in the tenth century into three main branches, the first of which, the Borussians, or Prussians, gave the name to Prussia. The second branch, the Letts, went north, settling on the Baltic, in the region afterwards known as Livonia. Later they were subjugated by the Germans. The third branch, the Lithuanian proper, joined with the Samogitians in forming an independent state and were almost continuously at war with the Slavs around them, particularly to the north and east. Mendowe, the first Christian King of Lithuania, was assassinated in 1263. On February 14, 1386, Jogiello, King of Lithuania, was crowned King of Poland, having married

the Queen of that country, Yadviga. At that time, Lithuania, extended from the Danube to the Black Sea and thence to the Sea of Azov. In 1569, Lithuania ceased to be a grand principality and was incorporated with the Kingdom of Poland. The area of Lithuania at the time of the partition of Poland was approximately 100,000 square miles. The country is level and for centuries has been fitted for grazing and has abounded in timber. The Lithuanians, the Letts, and the Prussians, form a separate division of the Aryan, or Indo-European stock. Middle Age Lithuania took in Little Russia and extended from the cities of Orel, Kursk, Kharkov, Poltava, and Ekaterinoslav on the east, to Odessa on the Black Sea, and, was bounded on the west by Bessarabia, Galicia, Poland, and Courland. Dr. Szlupas says that the Lithuanians are descendants of the race known in the Bible as Hittites. They are fair in complexion, tall and sturdy, and have never been inclined to segregate into large communities.

Lusitania—About 2 P. M., on May 7, 1915, the Cunard liner Lusitania, on a voyage from New York, with 1,918 persons on board, was sunk without notice by the German submarine U 39, ten miles off Old Head of Kinsale. The vessel went down twenty-one minutes after the attack, with loss of 1,154 lives, including men, women, and children, of whom 114 were Americans. The Berlin Government at first asserted that the Lusitania was armed. The essence of the Lusitania case was stated by our Government in its note of June 9, as follows: "Whatever be the other facts regarding the Lusitania, the principal fact is that a great steamer, primarily and chiefly a conveyance for passengers, and carrying more than a thousand souls who had no part or lot in the conduct of the war, was sunk without so much as a challenge or a warning, and that men, women, and children were sent to their death in circumstances unparalleled in modern warfare."

There were three American notes to Germany upon the Lusitania sinking. In the first, May 13, 1915, occurs the expression, "The Imperial German Government will not expect the Government of the United States to omit any word or any act." and the contention is advanced that it is impossible to conduct submarine warfare against commerce conformably with international law. In the second, June 9, occurs the statement that "the Government of the United States is contending for something much greater than mere rights of property or privileges of commerce. It is contending for nothing less high and sacred than the rights of humanity." In the third, July 21, it is asserted that "the events of the past two months have clearly indicated that it is possible and practicable to conduct * * * submarine operations * * * within the so-called war zone in substantial accord with the accepted practices of regulated warfare." This note closes with the statement that "the repetition" of certain acts "must be regarded by the Government of the United States, when they affect American citizens, as deliberately unfriendly."

On May 1, 1915, the day on which the Lusitania sailed on her last voyage, various New York morning papers contained the following advertisement: Notice—Travellers intending to embark on the Atlantic voyage are reminded that a state of war exists between Germany and her allies and Great Britain and her allies; that the zone of war includes the waters adjacent to the British Isles; that in accordance with formal notice given by the Imperial German Government, vessels flying the flag of Great Britain, or of any of her allies, are liable to destruction in those waters; and that travellers sailing in the war zone on ships of Great Britain or her allies do so at their own risk.—Imperial German Embassy, Washington, D. C., April 22, 1915. In its first Lusitania note (May 13, 1915) the United States State Department referred to "the surprising irregularity of a communication from the Imperial German Embassy at Washington addressed to the people of the United States through the newspapers," and it continued, "no warning that an unlawful and inhumane act will be committed can possibly be accepted as an excuse or palliation for that act."

Luxemburg—A state lying between France, Belgium, and Germany, which, in 1814, was formed into a grand duchy under the King of the Netherlands and in 1867 was made independent and like Belgium neutralized by a conference of the powers. When, in 1914, Germany demanded free passage through Belgium for her armies she made the same demand upon Luxemburg; the verbal protest of the Grand Duchess was in vain, for the duchy possessed no means of defense.

Machine Gun Company—A machine gun company in the United States Army has six officers and 172 men. It consists of the headquarters (three officers and twenty-one men), three platoons (each with one officer and forty-six men), and a train (thirteen men). Its armament is twelve machine guns of heavy type and four spare guns. The present war has seen a great increase in the number and use of machine guns, in trench fighting, armored motor cars, aircraft, etc,. and a multiplication of types, including light guns portable by one man (the Lewis gun).

Marine Corps—An independent branch of the military service of the United States, used in garrisoning navy yards and naval stations at home and in performing many duties beyond the seas; landing, for instance, in case of disturbance in foreign countries to protect American interests and to guard our embassies and legations. It serves generally under the direction of the Secretary of the Navy. But the corps may be detached by order of the President for service with the Army

Marine League—The distance from shore over which, by a rule of international law, a State is entitled to exercise jurisdiction. The rule, which was originally based on the fact that a cannon shot carried three miles, is not strictly applied in the case of arms of the sea, like the Delaware and Chesapeake Bays. These are regarded by the United States as a part of its territorial dominion. The jurisdiction which a State may exercise over the waters within a marine league of its shores is limited by the right of innocent passage; that is, the right of foreign vessels to pass through these waters if they conduct themselves peaceably.

Marne—A French river north and east of Paris flowing into the Seine. On September 3, 1914, the Germans crossed the Marne in their drive toward Paris. September 6 the French and British forces, under Gen. Joffre and Gen. Sir John French, drove the Teutons back across the river in a four-day battle. This area was again taken by the Germans, then reconquered early in the Fall of 1918.

Mazurian Lakes—A series of lakes in East Prussia, which was invaded by the Russians in August, 1914. The Russian advance was checked at Tannenberg, August 26-31; in January, 1915, the invasion was resumed, the Russian armies crossing the lake region while the waters were frozen; on February 4 the Russians began a retreat.

Medical Department—In the United States Army this department is composed of the Medical Corps (surgeons, etc., regularly commissioned), the Dental Corps, the Veterinary Corps, the Nurse Corps, and an enlisted force, which may be enlarged to meet the advancing needs of the service.

Metz—The City of Metz (population, 1900, was 58,424), chief community in the Lorraine district, was an important military station of the Romans. Under Frankish rule it was the capital of Austrasia. It lies at the junction of the Moselle and Seille Rivers, eighty miles northwest of Strassburg (capital of Alsace-Lorraine), and 170 miles east of Paris. The new part of the city is built on islands in an arm of the Moselle. The Cathedral of St. Stephen stands on an eminence. It was begun in the thirteenth century. When the Kingdom of the Franks went to pieces Metz fell to the Germans, and was a free imperial city from the start of the thirteenth century until 1552, when it was occupied by France, under Henry II. Metz was a French possession until October 27, 1870, when it was surrendered by Gen. Bazaine to Germany, being at that time capital of the Department of the Moselle. It was at Metz that the Emperor, Charles IV., issued the Golden Bull, in 1356. Metz was the first German city against which the First American Army, under Gen. Pershing, directed its arms, in September, 1918. For years it was considered one of the strong places of Germany, being encircled by a dozen forts. The Lorraine regions contains about 9,000 square miles; about three-fourths was French, prior to the present war; and at the time of the French Revolution it was the Province of Lorraine-et-Barrois, formed out of the old Duchy of Lorraine, the Duchy of Bar, and other districts. The name "Lorraine" is from the Latin "Lotharingia," the "Kingdom of Lothair,"

inherited by Lothair II. in 855, great-grandson of Charles the Great. The lower part of old Lorraine later became Brabant. The dukes of Lorraine had their capital at Nancy. German Lorraine and Metz were formally ceded by France to Germany in 1871.

Mines, Marine—An underwater explosive device used for the injury of shipping at sea; of two types, (1) automatic, which explodes upon contact, and may be either anchored or drifting, and (2) controlled, which can be exploded only by action at the keyboard of the control station.

Mine Sweepers—Vessels engaged in detecting and removing mines laid by the enemy. Ordinarily two small vessels patrol the mined area abreast, dragging a wire cable with an end on each vessel. The mines are caught or swept by the cable and are then destroyed.

Mustard Gas—A compound chemically known as dichlorethyl sulfide. It is called "mustard" because of its strong, pungent odor, and to the Germans it is officially known as Yellow Cross gas, as the shells are all marked with yellow crosses and bands. Although the effects are not often deadly, it is an effective agent on account of its slow and insidious method of poisoning. The odor of mustard indicates danger, but is not in itself uncomfortable until it causes the nose and throat to become irritated. If properly protected there will be no further bad effects. In extreme cases the eyes and lids become inflamed and blistered, and severe inflammation in the lungs results in bronchitis and even pneumonia. The after effects of the poisoning lay one up for several weeks, but seldom result in death. The gas lingers in dugouts for days, and has to be forced out by means of fires and fans. In this connection a captured German document states that "gas poisoning still occurred among those who took off their masks after wearing them for twelve hours."

National Army—The largest element in the army of the United States, consisting of those young men selected for national service under the acts of 1917 and 1918.

National Guard—The organized militia, or national guard, as maintained by the States for local potection in time of peace, was made subject to draft into the national service by the National Defense Act of June 3, 1916. On August 5, 1917, the whole national guard, 450,000 men, was drafted into Federal service and ordered to sixteen cantonments. The national guard was "federalized" by Section 76 of the National Defense Act in these words: "When Congress shall have authorized the use * * * of forces * * * in excess of those of the regular army * * * the President * * * may draft into the military service of the United States * * * any or all members of the national guard," who shall thereupon "stand discharged from the militia."

Naval Militia—An arm of the State militia recognized by the National Defense Act of 1916. At the outbreak of war with Germany this body was brought into the national service and became the national naval volunteers.

National Reserve—Subdivided into four classes of men, eligible and fitted for special duties in time of war: The fleet naval reserve, made up of those who have received naval training and whose war-duty assignment would naturally be on vessels of the fleet. Enrolment in the fleet naval reserve is for a period of four years, but in time of peace a member may be discharged upon request. In time of war a member of the fleet reserve is obligated to serve throughout the war. The naval auxillary reserve is composed of seafaring men with experience on merchant ships. These men are ordered to duty on auxiliary vessels of the navy. To be eligible as an officer in this class the applicant must have had not less than two years' experience as a watch officer on a lake or ocean-going vessel and possess the other usual qualifications. The naval coast defense reserve is composed of citizens of the United States whose technical and practical education has been such as peculiarly to fit them for the many positions in navy yards, administrative offices on patrol vessels, and various other branches of the navy at sea and ashore. A great number of college men, fishermen, old sailors, and men with business experience are enrolled in this branch of the naval reserve force. The naval reserve flying corps is composed of qualified aviators, or persons skilled in the design, operation, or building of aircraft. An officer of this class must be a qualified aviator, though he need not be a licensed air pilot.

Naval War College—An advanced institution, located at Newport, R. I., for the training of selected navy officers in the study of problems of naval warfare and the development of plans for naval operations.

Navy—The relative size in tons of the naval forces of the principal nations of the world on July 1, 1914, at the outbreak of the war, was as follows:

Great Britain	2,158,250	Japan	519,640
Germany	951,713	Italy	285,46
United States	774,353	Russia	270,861
France	665,748	Austria-Hungary	221,52

The United States navy, on July 1, 1914, included these completed ships in service: Eight dreadnaught battleships, twenty-two pre-dreadnaughts, twenty-five cruisers, fifty-one torpedo-boat destroyers, thirteen torpedo boats, and thirty submarines. We had at that date a naval strength of 66,273 officers and enlisted men.

Officers' Reserve Corps—A corps of the regular army established by the National Defense Act of 1916, in answer to obvious needs and suggested by European example. It is for the purpose, as stated in the law, "of securing a reserve of officers available for service as temporary officers in the regular army, as officers of the quartermaster corps and other staff corps and departments, as officers for recruit rendezvous and depots, and as officers of volunteers." These reserves, covering every branch of the service, are made subject to duty only in time of war. The number admitted to the corps may not exceed the number of officers of corresponding grades in the regular army, with the exception that an unlimited number may be appointed to the lowest authorized grade for use by promotion at need.

Officers' Training Camps—Announcement was made two weeks after the declaration of war of the institution of sixteen camps in various parts of the country for the training of officers for the new army. These camps opened on May 15, 1917, with about 40,000 men enrolled.

"Open-door" Policy—Name given to the American policy in China and the Orient by John Hay, Secretary of State, after the Boxer uprising, 1900. His view, to which all of the powers concerned in China finally adhered, was that no exclusive privilege should be sought or acquired by any single nation, but that whatever was granted to one must be allowed to all other powers upon similar terms. American commercial treaties had long been based upon this principle through the "most-favored-nation" clause.

Ordnance Department—The most of what is not supplied to the army by the quartermaster's department comes to it through the ordnance department. These are the two main channels through which is received what is necessary for the prosecution of a war. The quartermaster general subsists and attends to the material wants of the soldier; the chief of ordnance furnishes him with the powder and ball, the guns and military equipment he fights with, and puts at his hand what he needs in prosecuting the business for which he is sustained. Arsenals, armories, munition factories, when these are taken over for Government use, fall under the administration of the ordnance department. This bureau contracts for the manufacture of arms, large and small, horse equipment, gun mounts, etc.

Palestine—A province of the Turkish Empire, on the eastern shore of the Mediterranean, where a British invasion began in the spring of 1917. The fall of Erzerum had ended the plan for a Turkish invasion of Egypt through this region in 1916. British forces from Egypt began operations in Syria; they advanced to within fifty miles of Jerusalem on March 28, 1917; in November, 1917, occurred the taking of Aacalon and Jaffa. Jerusalem was surrendered to the British on December 9, 1917.

Panama Canal—The Clayton-Bulwer treaty, between the United States and Great Britain, in 1850,

provided for an Isthmian canal to be constructed by a private corporation under international control. In 1880 President Hayes announced that any canal between the two oceans must be under American control. Secretary Hay negotiated with England, in 1901, the Hay-Pauncefote treaty, which abrogated the Clayton-Bulwer treaty and recognized the exclusive right of the United States to construct and manage a canal, and placed the canal "politically as well as commercially under the absolute control of the United States." The canal was opened to commerce, informally, August 15, 1914. It is fortified.

Pan-Germanism—The aspiration that all European people of Germanic stock may be united under a single flag. The Pan-German League was organized in 1890.

Piave—A river of considerable size in northern Italy, on which the Italian army took its stand in November, 1917, following the retreat from the Isonzo, and where the Austrians were defeated and driven back in the summer of 1918.

Petrograd—Formerly St. Petersburg; the capital of Russia, situated near the Baltic in the northwest corner of the State. Population (1912) 2,018,596; founded by Peter the Great in 1703. It has always been the city of the aristocracy and bureaucracy and is said to be less Russian than any other city in Russia. Petrograd became the centre of extreme radicalism in Russia, and it was there that the revolutions of March and November, 1917, started.

"Place in the Sun"—Phrase used by William II. on June 18, 1901, at Hamburg, in referring to Germany's acquisition of the Chinese harbor at Kiaochow and other valuable commercial concessions in China. "In spite of the fact that we have no such fleet as we should have, we have conquered for ourselves a place in the sun. It will now be my place to see to it that this place in the sun shall remain our undisputed possession, in order that the sun's rays may fall fruitfully upon our activity and trade in foreign parts."

"Poilu"—The word used by the French people to designate their soldiers in the present war. The term comes from the French word poil, meaning hair, especially the hair or fur of animals or the hair or beard of man. Hence it is commonly supposed that the term poilu came to be applied to the French soldiers because when they were in the trenches they did not shave, as the British soldiers did. The French soldier was homme poilu, bearded man.

Poland—In November, 1916, the Russian Provisional Government appointed a Provisional Council of State for Poland and promised the restoration of that country on racial and geographical borders, with self-government. Meantime, all of Russian Poland had been captured and occupied by the Germans, who set up a Regency Council over the country December, 1916. On September 12, 1917, the Germans granted Poland a temporary constitution. On April 5, 1918, a new cabinet was appointed, headed by M. Stcozkowski. Poland (in Polish-Polska, or "flat land") forms the extreme western part of the late imperial Russian dominions, and juts out into the central part of Europe, south of East Prussia, east of Silesian Prussia, and north of Galician Austria. It had, under Russian government, at the outbreak of hostilities, 49,000 square miles, and 9,000,000 population—a plains state, not quite as large as Iowa. Poland, early in the seventeenth century, contained 375,000 square miles, extending from Hungary and Turkey to the Baltic, with its capital at Warsaw, and including in the kingdom West Prussia, the Red Russian portion of Galicia, the Ukraine, Lithuania, and Livonia. Lithuania was incorporated in 1569.

Polish People, Racially—The Poles are Slavs. Poland, a section of ancient Sarmatia, was a duchy in the sixth century and a kingdom about the year 992. The Samatians originally inhabited all of Russia from the Caspian Sea to the Vistula, and often raided the old Roman empire. They conquered European Scythia, north of the Black Sea. The Scythians were a mixture of Asian Aryans and Mongols, who overran Eastern Europe, but vanished as a governing race about 100 B. C. The Sarmatians were subjugated by the Goths in the third and fourth centuries, but joined the Huns and other barbarians in invading Western Europe in the fifth century. At the height of its power, the kingdom of Poland was 700 miles square. The kings were elected for life by a general diet of the "republic." Internal dissensions aided Russia Austria and Prussia in dividing up Poland among themselves, on three occasions, 1772 to 1795, in which latter year the last Polish king, Stanislaus II., resigned the crown. The respective shares of Poland taken by her three conquerors were, in square miles: Russia, 42,000, 96,000, 43,000; Prussia, 13,500, 22,000, 21,000; Austria, 27,000, none, 18,000. Thus Austria got part of Little Poland, and the greater part of Red Russia and Padolio, which last named became the kingdom of Galicia. Prussia got Great Poland, Polish Prussia, and a small part of Lithuania and Podlachia, and Russia got Samogitia, the rest of Lithuania, Volhynia and Podolio. Samagitia was that section of Lithuania bordering on the Baltic, now part of Kovno, Courland, and East Prussia. In 1791 the Polish Diet changed the constitution, so that kings were no longer to be elected by the people, but the kingship was to be hereditary in the House of Saxony. The Empress of Russia's forces overthrew the new constitution. Stanislaus II. (Augustus Poniatowski) abdicated at Grodno, 1795, and died a state prisoner, at St. Petersburg, February 12, 1798. France, in 1806, got the Prussian part of Poland, and, by the Treaty of Tilsit, it was given to Saxony, to be held as the Duchy of Warsaw.

In 1815 the Congress of Vienna, following the Battle of Waterloo (than called by the Germans the Battle of Belle Alliance), reunited the Duchy of Warsaw to Russia (except the province of Posen, which reverted to Prussia), and the Emperor of Russia assumed the title of King of Poland.

Some time before the fall of Poniatowski, the Polish patriot, Kosciusko, came to America and served throughout the Revolution. He returned to Poland and headed an unsuccessful revolt in 1794, was captured by Russia, was freed by the Emperor Paul in 1796, and died in Switzerland, aged eighty-one, in 1817. Another rebellion occurred in Poland in 1831, which failed, and in 1832, by a ukase, the Kingdom of Poland became an integral part of the Russian Empire. In 1846, the treaty of 1815, under which Cracow had become free, was revoked by Russia, Prussia and Austria, and Cracow was declared Austrian territory. This was protested in vain by England, France, Sweden and Turkey. From 1847 to 1868 the Poles engaged in several revolts. Russian Poland had its own constitution from 1815 to 1830, and a separate government until 1864. In 1868 the country was, by ukase, put absolutely under Russian laws, and the use of the Polish languages in public places was prohibited. This prohibition was extended to the use of Polish in the law courts and other public offices in 1876. In 1885 over 35,000 Poles were expelled from Prussia.

President, Control of Foreign Relations—He is the sole organ of intercourse with foreign nations. He receives ambassadors and other public ministers, nominates the diplomatic representatives of this country, recognizes new states and governments, and negotiates all treaties. But before a treaty can be "made" it must receive the consent of the Senate, "two-thirds of the Senators present concurring," while all diplomatic appointments are also subject to its veto. The power of declaring war belongs to Congress, which also controls the purse. The President is commander in chief of the army and navy. His powers as such are primarily those of military command and include the right to dispose the national forces where they can be used to best advantage. In the War of 1812, in the Mexican War, in the Spanish War, in the Boxer rebellion, and recently in Mexico, American troops were sent to fight on foreign soil. In the words of Chief Justice Taney, the President as commander in chief is "authorized to employ" the military and naval forces of the United States "in the manner he may deem most effectual to harass and conquer and subdue the enemy."

Prize Courts—Courts dealing with property captured in time of war. No title can be secured by the captor of maritime property unless a prize court pass upon it. Prize courts may be special courts, or ordinary courts assigned to this work. At present United States district courts are invested with the power of prize courts, with appeal to the supreme court. The American position is that prize courts administer international law.

Quartermaster Corps—Made up of a large number of officers, at the head of whom stands a quar-

termaster general. The National Defense Act of 1916 provided for an enlisted force of about 8,000 men, a limit which has been rapidly advanced to meet the needs the corps is meant to serve. It is the supply department of the army, providing food, horses, vehicles, transport, clothing, camp equipage—in effect, nearly everything used by the officers and men on the material side, except arms, ammunition, and what may be required for the hospital service.

Regiment—Companies under captains are combined into battalions; and battalions under majors, with headquarters, supply and machine gun companies, are combined into regiments under colonels. The strength of an infantry regiment is 103 officers and 3,652 men; of a light artillery regiment (three-inch guns), fifty-five officers and 1,424 men; of a heavy field artillery regiment (six-inch howitzers), sixty-three officers and 1,703 men; of an engineer regiment, forty officers and 1,617 enlisted men, and of a cavalry regiment, fifty-two officers and 1,539 men. A regiment is both an administrative and tactical unit.

Regular Army—The United States regular army, which has been the nucleus for all national military arrangements, has always been small. In time of peace, since the end of the Indian wars, it has had few duties, and has been scattered in post and garrison in various parts of the continental area and in our insular possessions. Prior to the passage of the National Defense Act of June 3, 1916, it consisted of only 5,014 commissioned officers and 92,973 enlisted men, which included about 6,000 so-called Philippine scouts.

Regular Army Reserves—To obviate the disadvantages and dangers in the past from the practice of raising the regular army to war strength at need by the enlistment of wholly untrained men, a reserve force has been created. Regular army service is now for seven years, three years on active duty and four years on furlough, subject to Government call, unless the soldier has enlisted "for the present emergency" only. In case of great proficiency, an enlisted man may be furloughed to the reserve after one year of active service. The assignment to duty and the use of this valuable body of men are in the hands of the President.

Rheims—A town of northern France, famous for its Gothic cathedral and its associations with Joan of Arc. The cathedral was bombarded by the German army in September, 1914. The German charge that it was used as a range-finding point for French artillery was denied by the French Government. It has been repeatedly bombarded since 1914.

Roumania—A constitutional monarchy on the Black Sea; capital, Bucharest. The evacuation of that city on November 27, 1916, caused the removal of the capital to Jassy. The area is 137,907 square miles and the population in 1913 was 7,509,009. The reigning king, Ferdinand, nephew of Charles I. of the House of Hohenzollern-Sigmaringen, came to the throne October 11, 1914. The queen, Marie, is a British princess, the daughter of the Duke of Saxe-Coburg-Gotha. On August 27, 1916, Roumania declared war upon Austria-Hungary.

Following a German ultimatum of February 6, 1918, Roumania asked for peace, and signed a preliminary treaty with the Central Powers on March 5, 1918, and a permanent treaty on May 6, at Bucharest. Those who put their names to the document were: Foreign Secretary von Kühlmann for Germany; Foreign Secretary Czernin for Austria-Hungary; M. Montschiloff, Vice President of the Sobranje, for Bulgaria; Talaat Pasha, the Grand Vizier for Turkey, and M. Cartentojana for Roumania. The ultimatum came from Field Marshal von Mackensen and demanded that peace negotiations be started within four days or else Roumania would be destroyed as a separate state. The Roumanian Cabinet resigned, and a new one went in, with Gen. Averescu as premier. On March 5 a second ultimatum, directed to the king at Jassy, gave Roumania only twenty-four hours. Thereupon the treaty, as offered by Germany, was signed by the Roumanians, who had been abandoned by the Russians when the latter made a truce with Germany in December, 1917. Roumania also had signed that truce, one result of which was the withdrawal of the army of 150,000 Russians, which had aided 180,000 armed Roumanians in holding the eastern front, from the Black Sea to Bukowina. Roumania's occupation of Bessarabia had further weakened her.

By the treaty, Roumania gave up to Bulgaria the Dobrudja region, lying between the Danube River and the Black Sea and having an area of 4,000 square miles. This district belonged to Bulgaria for years, but was ceded to Roumania in 1878 by the Treaty of Berlin, when Bulgaria was made a self-governing principality, tributary to the Turkish sultan. It has a population of 260,000, including Tartars, Circassians, Turks, Roumanians, Greeks, Armenians and Jews, and is of little value for crops or live stock; but by reason of location, at the mouth of the Danube and extending along the south side of that river for many miles, the Dobrudja strategically controls the stream. The clause in the treaty of 1918, providing that Roumanian imports and exports shall go to or from the Danube by way of Constanza (Kustendje), which is a port on the western side of the Black Sea, sixty miles south of the Danube's mouth, cuts out a large part of the Roumanian commerce on the Danube below the town of Rassova. There is a highway from Rassova to Kustendje, forty miles. It is the main road from Bucharest to the Black Sea. Also by the treaty, Germany and Austria got control of the wheat, petroleum and salt production in Roumania, as well as the railways, and the four chief passes through the Carpathian mountains. Under a supplementary agreement with Roumania, the latter loses to Hungary hold on 170 villages, with 130,000 population, outside the Dobrudja.

Russia—Three countries in Europe bore the name of Russia some hundreds of years ago—Red Russia, comprising the southern part of Poland; White Russia, which was the east part of Lithuania, and Black Russia, composed of the provinces of Kalouga, Moscow, Tula, Rezan, Volodimir or Vladimir, and Iaroslav or Yaroslav. The name "Russia" is commonly derived from the Roxolani, a Slavic tribe. "Muscovy" was the title applied to all Russia in the sixteenth century, derived from "Moscow"—the second syllable being pronounced "koe." Practically all of the Russians are Slavs, belonging to the Slavonic race, which, in prehistoric times came, as is supposed, from Asia. The first identification of them in Europe, by a writer, as Slavs, was by Procopius, of the sixth century, who called the inhabitants of Russia (Scythians and Sarmatians) "spor," the Ante Spors, or Antes, living in East Russia, and the Slavspors or Slavs in West Russia. The Scythians are known to have lived in Northern Europe and Asia for ages. They swept down over Asia Minor, 624 B. C., and held that region twenty-eight years. They carried their conquests into Europe, and as far south as Egypt. The Tartars, or Mongols, or Moguls, were known in antiquity in Europe as Scythians. Under the name of Huns they invaded Europe from Asia in the thirteenth century, under Ogdai, son of Genghis Khan, capturing Pesth, or Budapesth, in Hungary, on Christmas, 1240, crossed the Danube on the ice, and overran Silesia, in southeast Prussia. The Huns were swept out of Europe in 1450. The first capital of Russia was the city of Novgorod, 103 miles south-southeast of St. Petersburg, on the River Volkov, near Lake Ibmen. It was founded by Scandinavians, led by Ruric, in 862 A. D. When the invaders moved south they removed the capital to Kiev, on the right bank of the River Dnieper, 670 miles south of St. Petersburg, and it remained there until the division of the realm, in the middle of the eleventh century. Vladimir, on the River Klyazma, 110 miles east-northeast of Moscow, was the third capital, until 1328, when Moscow, 400 miles southeast of Petrograd, on the River Moskva, became the seat of power. It is in the centre of Russia in Europe. In 1703 Peter the Great built the city named after him on land he seized from Sweden and made it the Russian capital. It lies at the east end of the Gulf of Finland, on the River Neva, at the outlet of Lake Ladoga.

Russian Revolution and Collapse—The Czar, Nicholas, was forced on March 15, 1917, to abdicate. Authority was vested by the Duma in a provisional government. A Russian republic was proclaimed on September 17, 1917. Prince George Lvov held office as Prime Minister and Minister of the Interior from March 15 to July 20. Milyukov was Minister for Foreign Affairs and Kerensky for Justice; with the exception of the latter, who was a moderate Socialist, the Ministry was composed exclusively of Constitutional Democrats. The new government proclaimed free speech, the right to strike, universal suffrage (including woman suffrage), a general amnesty for all political prisoners and exiles, and the maintenance of existing

treaties. A constituent assembly was promised to draw up a permanent constitution. The new government was opposed at every step by the "Soviet," or Council of Workmen's and Soldiers' Delegates, at Petrograd, which called itself the true representative of Russia, to give the revolution a social character. Kerensky, May 13, succeeded Gutchkov as Minister of War. The Bolsheviki rioted at Petrograd. The Bolsheviki leader, Nikolai Lenine; returned from exile. In June, 1917, Kronstadt set up as an independent republic, recognizing only the Petrograd Soviet; the Ukraine declared its independence, and Finland took steps to restore its autonomy. An All-Russian Congress of Workmen's and Soldiers' Delegates, sitting in Petrograd, abolished the Duma as a stronghold of the middle classes. On July 1, Gen. Brussilov started an offensive in Galicia, but it was soon converted into a retreat by Bolsheviki intrigue. Prince Lvov gave way to Kerensky, who set up a new Ministry. The three councils, of workmen, of soldiers, and of peasants, backed Kerensky and voted to keep up the war. Lenine was driven into hiding. Kerensky formed a new Cabinet on August 7, from which all extreme radicals were excluded. On August 26 an extraordinary national congress, convoked by Kerensky, met in Moscow. The capture of Riga by the Germans, September 3, caused a break between the military party and Kerensky. On September 9 Gen. Kornilov, who had succeeded Brussilov as commander in chief, attempted a coup d'état, which failed. A democratic congress called by the Central Council of Workmen's and Soldiers' Delegates met in Moscow on September 27, called for a preliminary parliament ("temporary council of the Russian republic") to act until the constituent assembly should meet in December, and declared against the forming of a coalition Cabinet without the sanction of the congress. Kerensky rejected its control and proceeded immediately to admit to his Cabinet four members of the Constitutional Democratic Party. The preliminary parliament began its sessions in the last days of October, in depression caused by the German capture of Oesel and Dagö, islands at the entrance to the Gulf of Riga. On November 2, Kerensky in an interview stated that Russia had done her work in the war and was worn out; she would not quit the conflict but was in great need of help from the Allies. The government revoked an earlier decision to remove to Moscow, but Petrograd was evacuated by a considerable part of its civil population. Strikes, food riots, and street demonstrations again broke out in the capital. Finally the Bolsheviki won over the Petrograd garrison and the navy, and on November 7 they drove Kerensky from the city. The Winter Palace was defended for a time by women soldiers (the "Battalion of Death"), but soon the government buildings were in the hands of the Bolsheviki under Lenine and Trotzky.

The Bolsheviki proclaimed the following programme: (1) offer of an immediate democratic peace; (2) handing over of the large estates to the peasants; (3) transfer of all authority to the Council of Workmen's and Soldiers' Delegates; (4) an honest convocation of a constituent assembly. Kerensky, escaping from Petrograd, placed himself at the head of an army, but was defeated by the defection of his own troops. For some days students of the military schools and other loyal elements battled in Petrograd against the Bolsheviki. The latter gained control of Moscow, after fighting, and Kiev and other large industrial cities came under their rule. The power of Kerensky collapsed and he disappeared from the scene. The Bolsheviki proclaimed the peasants the owners of the lands and published a number of secret treaties and diplomatic letters of the earlier governments. On November 24 Trotzky presented his proposal for a general armistice. He declared that he spoke as commissioner of foreign affairs for a government in the form of a council of national commissioners, founded on October 26, and headed by Lenine. The efforts of Gen. Dukhonin (assassinated December 14) and of Gens. Kaledines and Kornilov to resist the Bolsheviki failed. The meeting of the constituent assembly, set for December 11, was dispersed. Anti-Bolsheviki newspapers were suppressed, German agents were given free hand. The railways workers, who controlled the transport of troops, were won over. Lenine's policy looked toward an exclusively proletarian republic. In interviews Trotzky denied that his government would make a separate peace, but orders were issued for the reduction of the Russian armies. On December 15, 1917, a truce with Germany was signed, with provision for the immediate opening of peace negotiations, without participation of Russia's allies. After several hitches a basis of peace was reached. The treaty was ratified March 16, 1918, by the Russian provisional government, at Moscow. Russia had formally withdrawn from the war on February 10, though its Bolshevist leaders refused at that time to sign a treaty with the Germans.

In the treaty, Russia promised to cease annoying Ukrainia, Persia, Afghanistan; and the eastern frontiers of Esthonia and Livonia were thus described: "The eastern frontier of Esthonia follows in general the line of the Narova River. The eastern frontier of Livonia runs in general through Peipus Lake and Pskov Lake to the southeasterly corner of the latter, then over Lubahner (Luban) Lake in the direction of Lievenhof, on the Dvina."

The Soviets authorized a decree, published on February 3, 1918, by Lenine, separating Church and State; cutting off the church from public funds, and handing over to the state the legal title to religious properties; the congregations to have the right, however, to use the property exclusively for religious purposes; refusing exemption from duties as citizens on account of religious scruples; cancelling the religious oath and replacing it by a promise; authorizing the civil authorities to perform marriage ceremonies and register births, and abolishing religious teaching in state schools and in private schools with a similar course of studies.

Russia proper, under the German peace treaties of 1918, was stripped of all ports and provinces on the Baltic, retaining only a frontage on the back end of the Gulf of Finland, and she lost also all her frontage on the Black Sea, retaining only the shore of the Caspian. In 1915 European Russia, exclusive of Poland and the Caucasus and Finland, consisted of fifty-one governments and provinces, with an area of 1,867,737 square miles and a population of more than 131,000,000. In that year Poland was estimated to have 12,000,000 population and 43,804 square miles, and the Caucasus, or Ciscaucasia, had nearly 6,000,000 population and 85,768 square miles. Russian Poland was almost as large as Louisiana. The European Caucasus was larger than Idaho. The separation of the Ukraine took away 109,000 square miles and over 21,000,000 population. The wresting of the Baltic provinces took away more than 10,000,000 population and over 167,000 square miles. The loss of the grand duchy of Finland amounted to 144,000 square miles and beyond 3,000,000 population.

Russia's Secret Treaties—On November 24, 1917, the Bolsheviki government revealed certain alleged agreements between the Entente Powers with reference to the settlement at the end of the war. In case Russia gained Constantinople and the Dardanelles, she was to allow the freedom of passage of cargoes proceeding to other than Russian ports. Part of Arabia was to be under a separate Mussulman government, and Britain was to have certain additions to her sphere of influence in Persia. In a second document published on the same day France recognized Russia's freedom to define her western boundaries. In a separate telegram the Russian Minister of Foreign Affairs recognized that France and Great Britain should have the right to define the western boundary of Germany. On November 28 the Bolsheviki government published another document, said to have been signed in London April 26, 1915, by the representatives of Great Britain, France, Russia, and Italy, by which Italy, on the conclusion of the war, was to receive the Trentino, part of the Southern Tyrol, Trieste, Istria, and Dalmatia.

Decree Repudiating Russia's Debts—An official proclamation repudiating Russia's debts, dated February 8, 1918 (new style), approved by the central committee, is as follows: "(1) All loans contracted by former Russian Governments which are specified in a special list are cancelled as from December 1, 1917. The December coupons of these loans will not be paid. (2) All the guarantees for these loans are cancelled. (3) All loans made from abroad are cancelled without exception and unconditionally. (4) The short-term series of state treasury bonds retain their validity. The interest on them will not be payable, but they will circulate on a par with paper money. (5) Indigent persons who hold stock not exceeding

10,000 rubles in internal loans will receive in exchange, according to the nominal value of their holdings certificates in their own name for a new loan of the Russian Socialist Federal Republic of Soviets for an amount not exceeding that of their previous holding. The conditions of this loan are specially defined. (6) Deposits in the state savings banks and the interest upon them are not to be touched. All holdings in the canceled loans belonging to these banks will be replaced by debt entered to their credit in the Great Book of the Russian Socialist Republic. (7) Co-operative and other institutions of general or democratic utility, and possessing holdings in the canceled loans, will be indemnified in accordance with the special regulations laid down by the Supreme Council of Political Economy, in agreement with their representatives, if it is proved that the holdings were acquired before the publication of the present decree. (8) The state bank is charged with the complete liquidation of loans and the immediate registration of all holders of bonds in the state loans and other funds, whether annulled or not. (9) The Soviet of the Workmen's, Soldiers', and Peasants' Deputies, in accord with the local economic councils, will form committees for the purpose of deciding whether a citizen is to be classed as "indigent." These committees will be competent to cancel entirely all savings acquired without working for them, even in the case of sums below 5,000 rubles."

A decree was issued February 7 by the Bolsheviki government ordering the adoption of the Gregorian or "new style," calendar, as from Thursday, Feburary 14, 1918, "the first day after January 31, 1918, (Russian style), being reckoned as February 14."

Sabotage—A French word, used to describe wilful and underhand destruction of machinery, etc. by workmen. It is a method of "industrial warfare," encouraged, the United States Government alleges, by some leaders of the Industrial Workers of the World. Alleged telegraphic exchanges between the German Foreign Office and Count von Bernstorff in January, 1916, made public by the State Department on October 9, 1917, said von Bernstorff was under orders to promote sabotage in the United States. One telegram was: "General staff desires energetic action in regard to proposed destruction of Canadian Pacific railway at several points." A second telegram, dated January 26, 1916, read: "In the United States sabotage can be carried out in every kind of factory for supplying munitions of war. Railway embankments and bridges must not be touched. Embassy must in no circumstances be compromised." The telegrams named several Americans as suitable for assisting.

"Scrap of Paper"—August 4, 1914, the British Ambassador in Berlin, Sir Edward Goschen, justified the entrance of England into the war chiefly on the ground that Germany had violated the neutrality of Belgium, which Great Britain was pledged by treaty to defend. In a despatch to the British Government he reported a conversation with the German Chancellor, Bethmann Hollweg, who said that "the step taken by His Majesty's Government was terrible to a degree; just for a word—'neutrality,' a word which in war time had so often been disregarded—just for a scrap of paper Great Britain was going to make war on a kindred nation who desired nothing better than to be friends with her." When this despatch was published by the British Government, the Associated Press correspondent obtained an interview with the German Chancellor, who said that Sir Edward Goschen had misunderstood what he had said about the scrap of paper. The Chancellor maintained that what he had said was that England entered the war to serve her interests, and that among her motives the Belgian neutrality treaty "had for her only the value of a scrap of paper."

Selective Service—The first selective service or draft law of the present war was passed May 18, 1917. It applied to all men of the ages twenty-one to thirty, inclusive, and it has since been amended, so as to provide for two supplementary drafts (June 5, 1918, and August 24, 1918) in addition to the original draft of June 5, 1917. By a still later enactment, the draft ages were extended to include eighteen to forty-five years, inclusive, and the first registration thereunder, held on September 12, 1918, produced about 13,000,000 registrants. The first registration June 5, 1917,, brought out nearly 10,000,000 young men; the second, on June 5, 1918, yielded 744,865; the third, on August 24, 1918, yielded 157,963. The four registrations thus produced nearly 24,000,000 Americans of military age. The administration is in the hands of the War Department, under the supervision of the President, and with the assistance of local draft boards for each locality, with appeal boards for each congressional district. The President issued his first instructions to the exemption boards July 2, 1917, and the first men drafted were called to service September 5, 1917.

Selective Service, Second Draft—The Provost Marshal General authorized the classification of selectives into five groups, indicating the order in which they were to be called to service:

Class I.—(1) Single men without dependent relatives; (2) married man (or widower) with children, who habitually fails to support his family; (3) married man dependent on wife for support; (4) married man (or widower) with children, not usefully engaged; family supported by income independent of his labor; (5) men not included in any other description in this or other classes; (6) unskilled laborer.

Class II.—(1) Married man or father of motherless children, usefully engaged, but family has sufficient income apart from his daily labor to afford reasonable adequate support during his absence; (2) married man, no children, wife can support herself decently and without hardship; (3) skilled farm labor engaged in necessary industrial enterprise; (4) skilled industrial laborer engaged in necessary agricultural enterprise.

Class III.—(1) Man with foster children dependent on daily labor for support; (2) man with aged, infirm, or invalid parents or grandparents dependent on daily labor for support; (3) man with brothers or sisters incompetent to support themselves, dependent on daily labor for support; (4) county or municipal officer; (5) firemen or policemen; (6) necessary artificers or workmen in arsenals, armories, and navy yards; (7) necessary custom house clerks; (8) persons necessary in transmission of mails; (9) necessary employés in service of United States; (10) highly specialized administrative experts; (11) technical or mechanical experts in industrial enterprise; (12) highly specialized agricultural expert in agricultural bureau of State or nation; (13) assistant or associate manager of necessary industrial enterprise; (14) assistant or associate manager of necessary agricultural enterprise.

Class IV.—(1) Married man with wife (and) or children (or widower with children) dependent on daily labor for support and no other reasonably adequate support available; (2) mariners in sea service of merchants or citizens in United States; (3) heads of necessary industrial enterprises; (4) heads of necessary agricultural enterprises.

Class V.—(1) Officers of States or the United States; (2) regularly or duly ordained ministers; (3) students of divinity; (4) persons in military or naval service; (5) aliens; (6) alien enemies; (7) persons morally unfit; (8) persons physically, permanently, or mentally unfit; (9) licensed pilots.

Serbian War Mission to the United States—The Serbian War Mission left that country about the middle of November, 1917, arrived at Washington December 20, 1917, and presented to President Wilson an autographed letter of King Peter. The commissioners included Dr. Milenko R. Vesnitch, Serbian Envoy to France; Dr. Sima Lozanitch, former Minister of Agriculture and lately Minister at London; Gen. Mihailo Rashitch, Commander in Chief of the Serbian Corps d'Armee in France; Lieut. Col. Mihailo Nenadovitch, Military Attaché of the Serbian Legation in Switzerland; Capt. Milan Jovitchich, Aide-de-Camp to the Crown Prince; Mr. Vladislav Martinats, Secretary to the Serbian Legation at Paris. The envoys were received by the United States Senate on January 5, 1918, and by the House of Representatives on January 8. They visited Mount Vernon, then made a tour of the country, and were entertained at New York.

Service Reserve—United States Public Service Reserve is an official national organization of men who desire to find their place for effective service to the country in the war emergency and to make it easy for the Government to locate them when it needs help from men of their capacities. Its purpose is to enable

those who are not called into the army or navy to play their part. Address Department of Labor, Washington, D. C.

Shells—A general name for explosive projectiles. Shrapnel travels to a given point, bursts, and releases bullets which pass on to spread destruction. A shell, on the other hand, bursts upon striking its object or upon the action of a time fuse. Destruction is effected by the broken bits of metal of which it is composed, and by the earth, stones, and other material which it throws up around it. A shell of the French "75's," it is said, will burst into more than 2,000 pieces, many of them very minute, yet possessing extreme projectile force. Shells are of various diameters and weights and are charged with varying quantities of explosive compounds. Many are charged with gas or injurious chemicals. On the western front there have been guns shooting shells which weigh from 400 to 2,000 pounds, with a carrying power of from six to twenty miles. It is computed that a new sixteen-inch American naval gun has enough projectile capacity with a charge of 900 pounds of powder to send a shell weighing 2,400 pounds a distance of twenty-seven and one-three miles horizontally and to a height in the trajectory of eight and one-third miles. The length of such a shell is about six feet.

Signal Corps—Is directed by a chief signal officer. It has charge of the construction and operation of military cables, telegraphs, and telephones. Wireless machinery and meteorological apparatus have recently come within the sphere of authority of the corps, which has expanded to meet new needs. The balloon and airplane service has been attached to this department of our military administration. The signal corps and its enlisted force are the eyes and ears of the army. They keep a general in communication with his fighting units and enable him to direct a battle, at a distance of some miles from the front.

Sinn Fein—An Irish revolutionary society aiming at both independence and the cultural development of the Irish race. It was equally opposed to the Nationalists and the Unionists, and numbered many men of letters and art. On Easter, 1916, it precipitated a revolt at Dublin, with which Germany tried to co-operate. The outbreak was suppressed. Many arrests by the British in the early summer of 1918 halted, it was alleged, a second Sinn Fein uprising.

Slavs—A race inhabiting eastern and southeastern Europe, where they constitute the great majority of the population. They are not geographically united. The main stock comprises the Russians, Poles, Czechs, Slovaks, and Ruthenes or Little Russians. In the south, and separated from the northern branch by a solid barrier of Germans, Magyars, and Roumanians, live the Southern or Jugoslavs. These, divided into Serbs, Croats, and Slovenes, form one people. The Bulgars, usually included in the Southern Slavs, were originally an Asiatic people, Slavicized. Russians, 100,000,000; Little Russians (Ukrainers), 30,000,000; Poles, 15,000,000; Czechs and Slovaks, 8,500,000; Slovenes, 1,250,000; Croats, 2,500,000; Serbs, 4,000,000; Bulgars, 4,500,000; total, 165,750,000.

Slavonic Races or Languages in Modern Europe—They are the Russian Bulgarians (who are descended from the Finns), Albanians, Serbians, Croatians, Slovenians, Bohemians, Saxons, and Prussians in so far as they are descended from the Lithuanians. By Saxons is meant particularly the present descendants of the ancient, not the modern Saxony. The ancient Saxony comprised the country in Northwest Germany, bordering on the North Sea, at the mouth of the Elbe, and extending from the Elbe, along the North Sea and the Holland frontier, to the Rhine, and down the east bank of that river to the city of Cologne.

Solomon Islands—A group in the Pacific, taken from Germany, September, 1914, by Australian troops.

Staff—A general term used to distinguish the administrative from the fighting units in an army. It includes not only the general staff (created in 1903 and enlarged by the National Defense Act) but military men engaged in the inspector general's, the quartermaster general's, the judge advocate general's, the adjutant general's, the ordnance, the engineering, the signal corps, the medical, and like departments in the army. The headquarters staff is the body of men performing secretarial and administrative duties for a general at headquarters. In general, staff is used in distinction to line; one branch of the service organizes and supplies, the other fights.

Swiss Military System—The Swiss army is a force of militia receiving periodical training upon the principle of universal obligatory military service for men from twenty to forty-eight years of age. Anyone disqualified must bear increased taxes until the age of forty years. The army is divided into three classes according to age: (1) The elite, being men of from twenty to thirty-two years; (2) the landwehr, or men between thirty-three and forty; and (3) a reserve of men from forty to forty-eight years of age. Recruiting schools for the first year of service continue sixty days, for sanitary, veterinary, and transportation troops; sixty-five days for infantry; seventy-five days for artillery and fortress troops, and ninety days for cavalry. After the first year, annual training courses for the elite last eleven days (with fourteen days, however, for artillery and fortress troops). In the landwehr all branches of the service, except cavalry, take a repeating course of eleven days each four years. The more promising recruits are given additional training in schools for non-commissioned officers, and if making a satisfactory record are still further trained for the commissioned grades. Officers serve in the elite until thirty-eight years of age, in the landwehr until forty-four years, and remain in the reserve until they are fifty-three years of age. Those who do not serve in the militia, through disqualification, bear increased taxes.

Submarine Warfare, Stages of—February 4, 1915, German Government proclaims war zone about the British Isles and intention to sink any enemy merchantmen in this zone without warning; May 1 (dated April 22), 1915, German embassy publishes in New York morning papers warning against taking passage on ships which United States Government had told the people they had a perfect right to take. The Lusitania sailed at 12.20 noon May 1 and was sunk May 7. August 19, 1915, sinking of the Arabic, whereupon von Bernstorff gave an oral pledge for his government that hereafter German submarines would not sink "liners" without warning; February, 1916 (after more debatable sinkings) Germany makes proposals looking toward "assuming liability" for the Lusitania victims, but the whole case is soon complicated again by the "armed ship" issue. March 24, 1916, sinking of the Sussex, passenger vessel with Americans on board. May 4, 1916, Germany, in response to the threat of the United States Government to break off diplomatic relations with her, gives her "Sussex pledge." January 31, 1917, Germany notifies United States she will begin "unrestricted submarine war" on the following day; February 3, 1917, the President gives Count Bernstorff his passports and recalls Ambassador Gerard from Berlin; April 6, 1917, American declaration of a state of war.

The American counts against German submarine warfare are (1) that, for the belligerent right of capture, it has substituted outright destruction; (2) that, from the procedure of capture, it has eliminated visit and search, and destruction is carried out with little or no warning to the victims; (3) that, for the duty of the captor to put those on board the captured vessel into a safe place before destroying it, it has substituted intrusting them to the waves in small boats many miles from land; and (4) being in itself a lawless practice it leaves any vessel, neutral or enemy, passenger or freight, at the mercy of any commander of a submarine.

The German defence of its submarine warfare is: (1) the novelty of the submarine; (2) England's extension of the blockade; (3) her own necessity.

Submarine—Called by the Germans U boat, i. e., undersea boat, or submersible. This type of war vessel, while it may travel upon the surface, may also submerge itself and thus hide its movements from an enemy. While beneath the water, observations can be taken by means of a projecting perpendicular arm, called a periscope. The submarine can discharge torpedoes while it is thus hidden from view. Submarines are of various types, the outgrowth of American inventive genius, that of John P. Holland and Simon Lake. They are combated by nets of steel sunk in channels, in which their noses are caught by fleets of destroyers,

trawlers, and specially constructed electric launches, by depth bombs, by low-flying airplanes supplied with bombing appliances, and by other means.

Superdreadnought—Name given to some vessels of the dreadnought type. The displacement is 25,000 tons or more. The speed attained may be twenty-five knots or sea miles (a sea mile is 2,000 yards), and the main battery consists of guns of 13.5 inches calibre or better.

Tanks—Heavy armored motor cars, propelled usually by "caterpillar drive" and used to break through enemy defenses, enfilade his trenches, or to cover attacks upon them. They were first used on September 15, 1916, by the British in their operations on the Somme, and were the decisive factor in Gen. Byng's advance toward Cambrai. They were of great advantage, also, in pushing back the Germans in the Foch drive of 1918.

Terrain—A word of French origin, meaning the ground, and the configuration thereof, where military operations are conducted.

"Tommy"—Or "Tommy Atkins" is the word used to designate the British private soldier. From 1815 the specimen or model forms issued by the government in the official army regulations were often filled in with the name of Thomas Atkins, thus: "Description, service, etc., of Thomas Atkins, private, No. 6 troop," etc. From this practice originated the custom of referring to the private soldier as Thomas Atkins, shortened to Tommy Atkins, and then to Tommy.

Torpedo—A development of great importance in naval warfare. It is associated with the names of Whitehead, an Englishman, and other inventors. The modern so-called automobile torpedo in general use is of the shape of a cigar. It carries in its nose or head a charge of 250 pounds of guncotton, which is exploded by concussion when it strikes the object aimed at. Abaft the explosive chamber is an air chamber containing the compressed air which supplies the motor power. Behind this air chamber is a balance chamber containing the steering apparatus for directing the rudders. Behind this again are the engines to revolve the shaft running to two screw propellers. Each torpedo contains 2,600 separate parts and is a small submarine in itself. A single torpedo costs from $5,000 to $7,000.

Torpedo Boats—Small vessels whose main offensive armament is a torpedo shot through a tube. They rely upon high speed, small size and a few light guns for defense. Their displacement varies from fifty to 300 tons. They travel at a rate running from nineteen to twenty-nine knots.

Treason—The Constitution (Article III., Section 3) reads: "Treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act, or on confession in open court." "Giving aid and comfort" to the enemies of the Unites States had been thus defined: "In general, any act clearly indicating a want of loyalty to the Government and sympathy with its enemies, and which by fair construction is directly in furtherance of their hostile designs." By "overt act" is meant an act, as distinguished from the mere intention to perform it. It includes not only "acts" in the colloquial sense, but also words, spoken or written. The penalty for treason is death, or imprisonment for at least five years and a fine of at least $10,000.

Trench Mortar—A short gun with a vertical fire used to discharge bombs into an enemy intrenchment. The Germans were well supplied with this weapon of offense at the outbreak of the war and the Allies were hard pressed for trench artillery to cope with it. The German trench mortar discharges with a "dull boom" a sausage-shaped projectile, moving so slowly at first that the body of men whom it is designed to strike can often escape its force.

Trench Warfare—The protection of troops demands stronger field intrenchments than have been necessary in previous wars; hence the so-called "trench warfare," which during the last four years has largely taken the place of former tactics. Digging trenches and throwing up breastworks for protection against the enemy's fire is, of course, not a new thing in warfare. A complicated network of trenches now protects the men on both sides. The spade has become one of the soldier's best weapons of defense. The chief improvement in methods of defending intrenched troops is the increased use of machine guns, which must be put out of operation by artillery fire or by rifle fire directed against the gunners before infantry can advance directly against them. There has been also a great increase during the present war in the use of barbed wire in front of the trenches as a means of defense. Through the use of wire and machine guns it is now possible to defend the front line positions with smaller bodies of men than were considered necessary earlier in the war, thus considerably reducing the losses entailed.

Triple Alliance—An agreement by Germany, Austria, and Italy, in 1882, for their mutual defense. The full and exact text of the treaties still remains secret. In 1914 Germany claimed to be bound by the treaties to protect Austria against attack by Russia. Italy, however, denied that Austria was attacked, insisted that Austria was the aggressor, that her designs in the Balkans would endanger Italy's own safety, and not only declined to fight in the triple alliance, but, later, entered the war against her old allies.

Triple Entente—The name given to the diplomatic union of England, France, and Russia, formed to oppose the triple alliance of Germany, Austria, and Italy. Except in the case of Russia and France, there was no written treaty behind it. The first stage of the triple entente was the alliance in 1893 between Russia and France. In 1904 England concluded an entente (understanding) with France. In 1907 the chain was completed by an entente between England and Russia.

Ukrainia, or the Ukraine—Its boundaries, population and area by the German agreement are found under "Ukrainian Peoples Republic." Much of the soil is black, suited to wheat, hence the old name, "Black Russia." There are rich iron and coal deposits. The word Ukraine is Polish, and means "frontier." The whole vast region of fertile plains was ceded to the Cossacks by Poland, in 1672, and was obtained by Russia in 1682, Poland keeping all on the west side of the River Dnieper. By the Polish partition of 1795 Russia got the rest of the Ukraine. Mazeppa was long ago the Ukraine hetman, or chief. The Podolia region was taken from Poland in 1793. Its capital, Kamanetz, has over 35,000 population. The Poltava region consists of plains, watered by the River Dnieper. The city of Poltava has over 53,000 population.

The province of Volhynia, which lies on the northwest border of Galicia and on the eastern side of Poland, is agricultural. In the middle ages Volhynia was a principality, which, united with Lithuania, formed a part of the Polish kingdom. It reverted to Russia during the (1793-5) second and third partitions of Poland. The present capital, Zhitomir, on the Teterev River, contains over 65,000 people. The province of Kharkov, watered by the Donets River, is devoted to grain, wine, tobacco, and cattle. Its capital, the city of Kharkow, has 179,000 population.

Ukrainian People's Republic—Proclaimed free and independent by its Central Rada (parliament) November 20, 1917, with a constitution dating from December 23, 1917, was formally recognized as such in a preliminary treaty of peace, signed at the conference at Brest-Litovsk, February 9, 1918. The parties to the treaty were Germany, Austria-Hungary, Bulgaria, Turkey, on one hand, and the anti-Bolshevik Central Rada of Ukrainia. Section two of that treaty said: "Between Austria-Hungary on the one hand and the Ukrainian People's Republic on the other hand, as far as these two powers border one another, those frontiers will exist which existed before the outbreak of the present war between the Austro-Hungarian monarchy and Russia. Further north the frontier of the republic beginning at Tarnegrad will in general follow the line of Bilgerey to Sroezeberzszyn, Krasnostau, Pugaszce, Radzyn, Meshiretsenci, Sarnaki, Selnik, Wysekelitowsk, Kamietslitowsk, Prushany, and Wydozowskyesee. This will be fixed in detail by

a mixed commission according to ethnographical conditions and with a regard to the desires of the population. Should the Ukrainian People's Republic yet have common frontiers with another of the powers of the quadruple alliance, special agreements will be made thereon."

Under the treaty with the Central Powers, Ukrainia thus was granted the territory of Kholm (Chelm), in Russian Poland. In Little Russia the Ukrainian Republic consisted, by the treaty, of the provinces of Kharkoff (21,041 square miles, population 3,452,000), Kieff (19,676 square miles, population 4,988,000), Podolia (16,224 square miles, population 4,127,600), Poltava (19,265 square miles, population 3,906,200), and Volhynia (27,699 square miles, population 4,241,800). Kholm (5,213 square miles, population 1,087,800) also was included in the treaty, but was claimed by Poland. In addition, the Ukrainians laid claim to the provinces of Chernigov (3,149,000 population, 20,232 square miles), Kherson (3,807,000 population, 27,337 square miles), Taurida (2,133,300 population, 23,312 square miles), and Yekaterinoslav (3,537,300 population, 24,477 square miles). This whole region, containing over 30,000,000 population, and more than 200,000 square miles, comprises "Little Russia," the "Southwestern Territory," and "New Russia," exclusive of the lands of the Don Cossacks. It is bounded on the west by Austria-Hungary, on the south by the Black and Azov Seas, on the east by the Don Cossacks, and on the north by Central Russia, and Lithuania. The Little Russians are 75 per cent. of the population. Odessa is the chief port.

On April 29, 1918, at Kiev, the Congress of Ukrainian Peasants chose Gen. Skoropauski as hetman, or ruler, in succession to the Central Rada. This was a step in the civil war between the Bolsheviki, and the antis, begun December 18, 1917. The Germans invaded Ukrainia, and on May 2, 1918, established a military dictatorship there. In their Independence proclamation of November 20, 1917, the Ukrainians had given the following guarantees: "All the liberties won by the Russian revolution are to be guaranteed, namely, freedom of the press, of speech, of religion, of assembly, of union, of strikes, of inviolability of person and of habitation, the right and the possibility of using local dialects in dealing with all authorities." They had got from Kerensky, in July, 1917, a promise of independence provided they stayed in the Russian Provincial Republic. On May 9, 1918, a new government, pro-German, was formed, with Nicholas Oustenovitch as president. The Russian calendar gave way to the Gregorian, and Ukrainian was made the official language in courts, schools and government offices.

Venice—This city, which was for many months a chief object of Austrian offensive, is the capital of the Italian province of Venice. The city is situated on 117 small islands in a shallow bay of the Adriatic, at the northwestern corner of that sea, nearly opposite the Hungarian port of Trieste, which is at the east side of the head of the Adriatic. The city dates from the middle of the fifth century. At the close of the middle ages it was one of the great maritime powers of the world. It supplied goods to the Crusaders, and handled the trade between Asia and Europe; but began to decline after Vasco da Gama, the Portuguese, discovered the all-sea route to the Far East around the Cape of Good Hope. The Turks, by conquering Constantinople, aided in the decline of Venice. They got Cyprus in 1571, and Crete was lost in 1669. After the decline of its commercial supremacy Venice became the art centre of the world, through the paintings of Titian, Tintoretto, Paul Veronese, and others. The Venetian Republic, which had existed for centuries, was ended in 1797 by Napoleon, who substituted a provisional democratic republic. Under the treaty of Campo Formio, executed in 1797 the town of that name, sixty-six miles from Venice, all that part of the city and province of Venice lying west of the River Adige reverted to Austria, as a duchy, the rest being annexed to what the French called the Cisalpine Republic. That republic, established by Napoleon in 1797, consisted of Lombardy, that part of Venice above named; Modina, the north part of the Papal states, and other Italian lands. The republic became the Italian republic in 1802, and in 1805 was incorporated into the kingdom of Italy. In the last named year Napoleon again got the upper hand of Austria, and it was by the treaty of Pressburg, signed at that place (once the capital of Hungary, on the Danube), that Venice passed to Italy. Austria got all of Venice, by military force, in 1814, at the treaty of Paris. In 1848 Venice rebelled and became the republic of St. Mark, but in 1849 was reconquered by Austria, which held the city and province until 1866, when it was given to Italy.

Verdun—The military key to the west front, which the German Crown Prince tried to take in 1916. It has been, since 1871, the most important of the French defenses on the eastern frontier between the Argonne and the Vosges. During the German advance of 1914 Verdun held out, although the Germans were able to push a deep salient to the south at St. Mihiel. In February, 1916, the armies of the German Crown Prince began assault upon Verdun, which lasted six months, and led to the capture of forts Douaumont and Vaux. Verdun was called "the grave" by German soldiers. A counter offensive by Gen. Nivelle in October, 1916, and August, 1917, enabled the French to reclaim ground they had lost in 1916.

Zeppelin—A type of dirigible balloon, lifted by gas bags held in an aluminum framework, and propelled by gasoline engines; designed by the late Count Ferdinand von Zeppelin, whose experiments with aircraft, about 1906, attracted wide attention. In war the Zeppelins are used for observation purposes, especially at sea; and for raids on enemy country. German aircraft, including Zeppelins, raided England thirty-four times between January 19, 1915, and October 1, 1917, killing outright 865 men, women, and children, and wounding over 2,500.

FRANCE'S TRIBUTE TO FIRST U. S. SOLDIERS WHO FELL IN BATTLE.

The following eulogy was a part of the ceremony at the burial, in northern France, of the first three American soldiers who lost their lives. The words were spoken by a French officer. He said: "In the name of the —th Division, in the name of the French Army, and in the name of France I bid farewell to Private Enright, Private Gresham, and Private Hay of the American Army. Of their own free will they had left a prosperous and happy country to come over here. They knew war was continuing in Europe; they knew that the forces fighting for honor, love of justice and civilization were still checked by the long-prepared forces serving the powers of brutal domination, oppression and barbarity. They knew that efforts were still necessary. They wished to give us their generous hearts, and they have not forgotten old historical memories, while others forget more recent ones. They ignored nothing of the circumstances and nothing had been concealed from them—neither the length and hardships of war, nor the violence of battle, nor the dreadfulness of new weapons, nor the perfidy of the foe. Nothing stopped them. They accepted the hard and strenuous life; they crossed the ocean at great peril; they took their places on the front by our side, and they have fallen facing the foe in a hard and desperate hand-to-hand fight. Honor to them. Their families, friends and fellow-citizens will be proud when they learn of their deaths.

"Men! These graves, the first to be dug in our national soil, and but a short distance from the enemy, are as a mark of the mighty land we and our Allies firmly cling to in the common task, confirming the will of the people and the army of the United States to fight with us to a finish, ready to sacrifice as long as is necessary until final victory for the most noble of causes, that of the liberty of nations, the weak as well as the mighty. Thus the deaths of these humble soldiers appear to us with extraordinary grandeur. We will, therefore, ask that the mortal remains of these young men be left here, left with us forever. We inscribe on the tombs, 'Here lie the first soldiers of the Republic of the United States to fall on the soil of France for liberty and justice.' The passerby will stop and uncover his head. Travellers and men of heart will go out of their way to come here to pay their respective tributes. Private Enright, Private Gresham, Private Hay! In the name of France I thank you. God receive your souls. Farewell!"

Wars of the Last Half Century.

Seven Weeks' War, 1866—In a struggle by Prussia and Austria against Denmark, in April, 1864, the Dannerwerk fortifications in Schleswig were taken by the Prussians, and about the same time the Austrians gained a victory over the Danish Army in the Battle of Oversea. The Duchies of Schleswig and Holstein were wrested from Denmark and given, in jointure, to Austria and Prussia. Prince Frederick of Augustenberg, as a descendant of the ducal family of Holstein, claimed the disputed territory in his own right. Prussia denied this claim. This dispute was the ostensible cause of the war between Austria and Prussia. King William of Prussia and Francis Joseph of Austria, by Treaty of Gastein, August 1, 1865, agreed that Schleswig should be put under the protectorate of Prussia and Holstein assigned to Austria. The Austrian Governor of Holstein continued to support and urge the claims of Prince Frederick. Bismarck asked for war, but in the Prussian Assembly was outvoted, five to one. Nevertheless, a Prussian army was hurried into Holstein. Bismarck offered Venice to Italy, and King Victor Emmanuel made alliance with Prussia. All the smaller German Kingdoms except Oldenberg, Mecklenberg, the Saxon states, and three free cities took sides with Austria.

The Prussian Diet approved of the Austrian demand and declared war. On June 15, 1866, King William called upon Saxony, Hanover, Hesse-Cassel and Nassau to remain neutral, and gave them twelve hours to decide. In two days, Prussians seized Hanover, and in two more Hesse-Cassel was occupied by an army from the Rhine, and a third division was thrown into Dresden and Leipsic. On June 27, 1866, the Hanoverians were defeated, King George V. fleeing to Vienna. The three divisions of the Army of William were commanded by Crown Prince Frederick William; his Cousin, Prince Frederick Charles, and General Bittenfeld. The Austrians were led by General Benedek. On June 27 and 29, 1866, Prince Frederick Charles defeated the Austrian advance in four engagements, but the battles were indecisive. Meanwhile the Crown Prince gained several victories over General Benedek (June 27-30). On July 6, 1866, the decisive battle was fought, known variously as Sadowa and Konigsgratz. Austrian Army, 222,000; Prussian, 221,000. Austrian loss in killed, wounded and prisoners, 44,393; Prussian loss, 8,812. The Treaty of Prague was signed August 23, 1866. By its terms a North-German Union was formed. Hanover and Hesse-Cassel, Nassau, Schleswig-Holstein and Frankfort were incorporated with the new Germany. The four southern states of Baden, Hesse-Darmstadt, Wurtemberg and Bavaria were conceded their independence, but with a secret agreement that their armies were to be at the disposal of Prussia.

Franco-Prussian War, 1870-1871—In September, 1868, by a revolution in Spain, Queen Isabella lost her throne. The Spanish Cortes elected Prince Leopold of Hohenzollern, a relative of the King of Prussia. France, under Louis Napoleon, protested. Leopold declined. France demanded of Berlin (July 13, 1870), that no Prince of the House of Hohenzollern should be a candidate for the Spanish throne. This demand was turned down by King William. On July 19, 1870, France declared war on Prussia. The French armies then numbered 310,000. The Prussians, within eleven days, had over 600,000 soldiers in motion. Their army was under General Steinmetz and Crown Prince of Prussia and his cousin, Prince Frederick Charles. Count Von Moltke was Commander-in-Chief. King William went to the front in person, as did Louis Napoleon, Emperor of the French.

The conflict began August 2, 1870, at Saarbruck, where a French division under Gen. Frassard attacked a smaller body of Uhlans, and drove them back. Louis Napoleon sent a despatch to Eugenie announcing their son's "baptism of fire." On August 4 the Crown Prince defeated Marshal MacMahon at Welssenburg; and again at Worth, August 6. About the same time Steinmetz was victor at Spicheren. On August 14, 1870, Steinmetz and Frederick Charles defeated Marshal Bazaine at Courcelles. At Mars-le-Tour a battle was fought, with losses of about 17,000 on each side. The French claimed this as a victory, but Frederick Charles held his position. On August 18 a great battle was fought at Gravelotte—200,000 Germans against 180,000 French, and Marshal Bazaine was forced back into the fortifications of Metz. Marshal MacMahon, with an army of 125,000, hastened to the relief of Metz, but was intercepted by the Germans, who had the shorter line. On August 31, 1870, in the Battle of Beaumont, the French were defeated and forced to fall back to Sedan. MacMahon's army, then 112,000, was besieged by 200,000 Germans. On September 1, 1870, Sedan surrendered. Louis Napoleon was taken prisoner. The French Army, numbering 84,000, were prisoners of war. Empress Eugenie fled to England September 4, 1870, and on the same day, in Paris, a French Republic was proclaimed. A civic army of 70,000 was raised and command given to Gen. Trochu to defend Paris. On September 23 the Fortress of Toul capitulated. The German armies toward the close of war numbered 800,000. Paris was invested. Leon Gambetta escaped from that city in a balloon and raised an army of 150,000 volunteers, while the forces of Gen. Trochu were increased to 400,000. In the beginning of January, 1871, the army of Trochu was out to pieces, with loss of 60,000. On January 17, 1871, Louis Adolphe Thiers was chosen Chief Executive. On January 28 an armistice was arranged, and on February 26 a preliminary treaty of peace signed at Versailles. The permanent treaty was signed at Frankfort, May 10. By the document, Alsace and Lorraine were ceded to Germany and an indemnity imposed of 5,000,000,000 of francs.

It was estimated that the cost of the struggle to France, up to January, 1875, was 9,885,000,000 francs, including the indemnity to Prussia and interest. The bombardment of Strasburg was begun on August 14, 1870, and the place surrendered September 28. Two German armies, 220,000 men, began the march on Paris on August 28, 1870; the siege commenced September 15. Versailles, a suburb, gave in September 19. Bombardment of Paris began on October 11. The city capitulated January 28, 1871. The German troops entered March 1. The attack on Metz began August 8, and the surrender occurred on September 28. Verdun was attacked first in August, 1870, and surrendered November 8.

Modoc Uprising, 1872—In the Spring of 1872 an order was issued by the United States Government for the Modoc Indians to remove from their lands on the southern shore of Lake Klamoth, Oregon, to a new reservation. The Indians refused to obey. At a conference between them and six members of a United States Government Peace Commission on April 11, 1872, the Indians murdered Gen. Canby and Dr. Thomas, two of the members. The Modocs were then besieged by United States Regulars, and on June 1 Gen. Davis compelled Capt. Jack and his band to surrender. The Chiefs were tried by court martial and executed in October.

Sioux Uprising, 1876—In 1867 the Sioux Indians had, by treaty, agreed to relinquish all the territory south of Nevbrara, west of the 104th meridian and north of the 46th parallel of lattitude, and to retire to a large reservation in Southwestern Dakota by January 1, 1876. The discovery of gold in the Black Hills led the whites to overrun the lands of the Sioux and they in turn broke over their limits. A large force, under Gens. Terry and Crook, was sent to drive them back into their reservation. On June 25, 1876, Gens. Reno and Custer were sent forward to discover the whereabouts of the Indians. Gen. Custer, without waiting for reinforcements, charged on an Indian village on the Little Big Horn River and his whole force was practically annihilated (262 killed and 52 wounded). Gen. Reno held out until reinforced by Gen. Gibbon. On November 24, 1876, the Sioux were defeated at a pass in the Big Horn Mountains, and on June 5, 1877, again routed by the division of Col. Miles. The remaining bands, under Sitting Bull and Crazy Horse, escaped to Canada. It was not until 1880 that Sitting Bull was induced to return to the reservation on the north bank of the Missouri River.

Ashantee War, 1873-1874—By an arrangement between the English and the Dutch, in Africa, there was an exchange of forts, by which the King of Ashantee lost an annual stipend from the Dutch for occupancy by them of his lands. He demanded the English pay. They did not do so. The Ashantees decoyed four Europeans into their town and made them prisoners. In the Fall of 1873 Sir Garnet Wolseley was

despatched with a force; on January 20, 1874, he entered Ashantee land, and on February 4, 1874, reached Coomassie. Here the King of Ashantee renounced his claim of sovereignty and paid an indemnity of 50,000 ounces of gold. The town of Coomassie was burned to the ground.

Serbian-Turkish War, 1876—Serbia declared war on Turkey in June, 1876, Montenegro aiding Serbia. The Union of Bulgaria and Eastern Rumelia inspired King Milan with the idea that either union must be prevented or Serbia should have territorial compensation so that the balance of power might be maintained in the Balkan peninsula. The Serbian Army was defeated by Turkish forces under Abdul-Kermi Pasha, whose advance was stopped by the intervention of Czar Alexander II. of Russia, who insisted on an armistice. Serbia waa beaten in a few months.

Russo-Turkish War of 1877-1878—On April 24, 1877, the Russian Czar declared war on Turkey, "to right the wrongs of Christians." The total Russian forces were about 200,000, and the Turkish about 120,000. At Plevna the Russians were repulsed twice, at the second battle losing 7,300 as against a Turkish loss of 2,000. At the third attempt Plevna was captured, Osman Pasha capitulating in November, 1877, surrendering an army of 40,000. The Russian casualties during the war were close to 20,000. The contest was ended by the Treaty of San Stefano, signed March 3, 1878. The terms of this treaty were modified at the Berlin Conference in June and July, 1878.

Afghanistan War of 1879—The British sent an Embassy to Cabul. Shere Ali, the Ameer of Cabul, forbade their entrance into his country. The British continued, accompanied by a military force, and took possession of Cabul and Candahar. Ali died and was succeeded by his son, Yakoob Khan, who hastened to sign a new treaty (May 5, 1879), by which he came under a protectorate. Shortly afterward a revolt occurred, and the English representatives in Cabul were attacked by insurgents and murdered. A second English expedition entered Cabul on December 24, 1879, Yakoob Khan was deposed and Cabul garrisoned.

Zulu War of 1879—A dispute between the Transvaal Republic and the Zulus over the ownership of a strip of African territory was referred to British Commissioners, who decided in favor of the Zulus, but the British Governor in South Africa, Sir Bartle Frere, did not execute the terms of settlement. Cetewayo, the Zulu King, raised an army, which the English Governor demanded be dispersed. British forces invaded the country and were defeated, January 22, 1879. A new British force, sent out under Lord Chelmsford, routed the Zulus, captured King Cetewayo and brought the war to an end before the middle of Autumn of 1879. It was in this war that the French Prince Imperial, son of Louis (Napoleon III.) and Eugenie, was killed.

Egyptian War, 1882—A revolution having been accomplished by Arabi Pasha in Egypt, both sides appealed to the powers. On May 17, 1882, English and French fleets were ordered to Alexandria. The representatives of Great Britain demanded the dismissal of the New National Ministry and the exile of Arabi Pasha. The first of these demands was complied with, but the Egyptians declined to banish Arabi. Riots broke out in Alexandria. Sir Beauchamp Seymour sent an ultimatum to the Egyptian Nationalists to cease repairing and manning the fortifications, and two days later bombarded Alexandria. An Anglo-Indian army of 30,000, under Sir Garnet Wolseley, fought the Battle of Tel-el-Keber, September 9, 1882. Arabi's forces were defeated, the Provisional Government overthrown, and Arabi was surrendered.

Serbo-Bulgarian War, 1885—King Milan of Serbia declared war on Bulgaria, November 14, 1885. The Berlin Congress of 1878, by its revision of the Treaty of San Stefano, created two states in the Balkan Peninsula, Bulgaria and Eastern Rumelia. Serbian forces were concentrated on the Bulgarian frontier October 1 to 12, owing to disputes as to boundaries. Hostilities ceased November 28, 1885, through the intervention of Austria. The Bulgarian Army numbered 55,000; the Rumelian 35,000, plus a "bandit brigade," composed of Macedonians, Turks, Jews, etc., 3,000.

China-Japanese War, 1894-1895—The cause was the Chinese claim of suzerainty over Korea, which Japan disputed. Japan issued an ultimatum to the Korean Government July 20, 1894. War was formally declared August 1. There had been fighting before that. The Battle of Pingyang was fought September 16, 1894. The Japanese killed or captured 7,000 Chinese. The naval battle of Yalu occurred September 16, 1894. The loss of this fight led to degradation of Prime Minister Li Hung Chang. Port Arthur was captured November 2, 1894. Two Japanese armies of 12,500 each were sent into Manchuria, and a third army of 22,000 went, under Marshal Oyama, to Peking. These armies opposed 60,000 Chinese. The Japanese captured Kaiphing in December, 1894. In January, 1895, 14,000 Chinese attacked the Japanese at Haifung, and were repulsed. Early in February, 1895, over 25,000 Japanese landed on Shantung Peninsula and seized Weihaiwai, Chinese troops, 9,000 in number, fleeing. On February 16, 1895, the Chinese fleet surrendered. Admiral Ting, Commodore Liu and Gen. Ching, of the garrison, all three, committed suicide. On March 1 the Japanese captured Niuchwang, and on March 6 Kinyang. On March 9 they burned the City of Thienchuiangthai. A peace treaty was signed April 17, 1895, guaranteeing the independence of Korea; the south part of Fengtien to belong to Japan, as well as parts of the country between Yalu and Liao; and the Island of Formosa, of Pescadore group. Indemnity of 200,000,000 kuping taels was paid by China. Russia, Germany, and France objected to the ceding to Japan of the Liaotung Peninsula, and Japan accepted 30,000,000 taels instead.

A treaty of peace was signed April 17, 1895. The Japanese lost 4,177 by death in action or by sickness and 56,862 wounded and disabled. Impossible to estimate Chinese losses.

Cuban Insurrection, 1895—There were simultaneous uprisings in Santiago, Santa Clara and Matanzas on February 24, 1895. The Spanish Captain General, Calleja, had at that time a force of about 9,000, and 4,000 recruits were sent to reinforce him. Early in March, 1895, a force of 20,000 men was sent by Spain to Cuba to put down the insurrection. On March 25 Cuba declared its independence, with Dr. Tomas Estrado Palma, President; José Marti, Secretary, and Gen. Gomez, Commander-in-Chief. On May 18, Bartolome Masso was elected President. When the Spanish-American War was at its crisis in the midsummer of 1898 Gen. Garcia, in command of a Cuban patriot army, co-operated with Gen. Shafter in the campaign which ended with the capture of Santiago and the collapse of the Spanish rule.

Greco-Turkish War of 1897—The Island of Crete rebelled against Turkey in February, 1897. The Greek Government sent an army, under Col. Vassas, to Crete's support. Turkey appealed to the powers and foreign fleets bore down on Crete and blockaded the island. Parts of Thessaly had been conceded to Greece by the Berlin Conference of 1878, but never given up to it by Turkey, which now advanced into Thessaly, a formal declaration of war being issued April 17, 1897. The principal battles were Pharsalia and Domokas (fought May 17, 1897), where the Turks, numbering 50,000, stormed fortified position of the Greeks and drove them out toward Lamia and Thermopylæ. The Russian Czar admonished the Sultan of Turkey that if the latter marched on Athens a Bulgarian army would be sent against him. The insurrection in Crete was quieted, the island returned to the Sultan, and the status quo between Turkey and Greece restored.

Philippine Insurrection, 1896, and Philippine War, 1899-1902—Toward the end of the summer of 1896 an insurrection against Spain, led by a Dr. Rizal, was suppressed and Rizal executed. The rebellion was revived under Emilio Aguinaldo.

The Spanish-American War, resulting in the cession of the Philippines, ended temporarily the troubles in the Philippines. On February 4, 1899, Filipinos attacked the American forces near Manila. On the next day Admiral Dewey opened fire on them. The Americans lost 49 killed and 149 wounded. Warfare mainly of a guerilla nature followed, and April 8, 1899, an expedition set out from Manila, consisting of 1,500 troops under Gen. Lawton. On April 10 Santa Cruz was captured, the Americans losing one killed and nine wounded. The Filipinos lost 93 killed and many wounded.

Spanish-American War, 1898—On February 15, 1898, the American battleship Maine, at anchor

in the Harbor of Havana, was sunk by an explosion, 266 Americans being lost. Spain disavowed having anything *to do with the explosion.* A resolution was passed by the House of Representatives, at Washington, April 19, 1898, declaring that the people of Cuba "are and of right ought to be free and independent." Similar resolutions were passed by the Senate, and a concurrent measure was signed by President McKinley. An ultimatum was sent to Spain demanding that she withdraw her forces from Cuba on or before April 23. Spain considered this a declaration of war, diplomatic relations were broken on April 21, a Cuban blockade was declared April 22, Spain spoke for war on April 24, and President McKinley issued a proclamation April 26, declaring that a state of war existed. He called for 125,000 volunteers. On May 1 Commodore Dewey fought the Battle of Manila Bay, destroying the Spanish fleet, and on June 3, at night, Commander R. P. Hobson, of Alabama, took the United States collier Merrimac into Santiago (Cuba) Harbor and sunk her in the channel, partly bottling up the Spanish fleet. On July 3 Commodores Sampson and Schley destroyed Cervera's fleet while it was attempting to escape from Santiago and adjacent waters. A United States Army corps had landed in Cuba on June 21. The Battle of San Juan Hill was fought on July 1, resulting in the capture of Santiago by the Americans. The city surrendered on July 17. A protocol (preliminary to a peace treaty) was signed August 12, 1898; Manila surrendered to the Americans on August 13 and the Treaty of Paris was signed December 12, 1898. By its terms the independence of Cuba was guaranteed, and Porto Rico was ceded to the United States, also the Island of Guam, of the Ladrones. Spain also relinquished the Philippines, receiving from the United States $20,000,000.

Boxer Troubles in China, 1898-1900—The Spanish Minister at Peking on May 24, 1898, made a demand on China for suppression of the Boxers. On May 29, 1898, all foreign ships at Taku, on the west coast of the Gulf of Pechili, landed marines and prepared to march to their legations in Peking. At noon, May 31, 360 men, British, Italian, Russian, French, Americans, and Japanese marines, set out for Peking. On June 10 a relief expedition of 2,500 men, under British Admiral Seymour, was despatched to Peking. The expedition was made up of British, Russians, Germans, French, Italians, Austrians, Japanese and Americans. On June 13 and 14 this force was compelled to return to Tientsin. On June 16 the Chinese fired on the foreign fleet lying before Taku. A battle ensued, lasting several hours, in which two Chinese forts were destroyed and the remainder captured. A British gunboat and a German warship were badly damaged, two British merchant vessels sunk, and a Russian gunboat blown up. The Allies had 20 killed and 57 wounded. The foreign army now massed at Taku. The Americans numbered altogether about 5,000 regulars, Japan 15,000, Great Britain 10,000. Russia, Germany, France, and other nations sent contingents mostly too late to take part in the fighting. In all, the foreign troops amounted to 60,000. In the fighting at Tientsin, July 13 and 14, the Allies lost in killed and wounded nearly 800, and had previously lost more than 600.

A force of 16,000 marched from Tientsin to the relief of Peking August 4. There were Russian, Japanese, English, and American troops. In a battle on August 5, with 30,000 Chinese, the Allies lost over 1,000 killed and wounded and the Chinese over 4,000. At Yangtau, on August 6, the Chinese lost 2,000, Allies 700. Of these, Americans numbered 10 killed and 62 wounded. In eight days this expeditionary force marched seventy miles, losing nearly 13 per cent. of their numbers. The casualties of the Chinese were three times that of the Allies. On August 14 Peking was captured, but the sacred "Forbidden City" was not entered until September 4, when 8,000 allied troops marched in. Two hundred Chinese officials committed suicide because of the desecration of their city.

The Philippine War, 1899-1902—This was preceded in 1896 by an insurrection by the natives against Spain. The rebels were led by Dr. Rizal, and Emilio Aguinaldo is said to have taken a prominent part. The Spanish-American War, resulting in the cession of the Philippines, ended temporarily the troubles there; but soon after the American occupancy another insurrection began at Manila. On February 4, 1899, forces of Filipinos attacked the American forces near the city. On the next day Admiral Dewey opened fire on them from the ships in the harbor. The Battle of Pasig was fought on March 13; Santa Cruz was captured April 25; San Fernando on May 5; the Battle of Bacorr was fought June 13; that of Imus, June 16; that of Colamba, July 26; that of Calluht, August 19; and that of Angeles, August 16.

Major John A. Logan was killed November 11, Gen. Gregoria del Pilar December 10, and Gen. Lawton December 19. On February 25, 1900, William Howard Taft headed a commission to the Philippines; Aguinaldo was captured March 23, 1901; and the Military Governorship ended on July 4, 1902.

South African (or Boer) War, 1899-1902—When there came to be more English than there were Dutch in the Transvaal Republic the English desired franchise rights, which the Dutch failed to give them. Conferences and negotiations through diplomatic channels, mainly correspondence of British Colonial Secretary Chamberlain, were carried on from May 31 to September 22, 1899, the English demanding franchise rights and the use of the English language in the Boer Legislature. On September 22 a note from the British Government declared that it would be "compelled to consider the situation afresh and formulate its own proposition for a final settlement." This note, in conjunction with active military preparations, was accepted by Boers as a virtual declaration of war. On October 7, 1899, the Boers sent their ultimatum. Then the war began. At Glencoe and Elands Laagte, October 20 and 21, the British lost 16 officers and 62 men killed, and 51 officers and 268 men wounded. At Spion Kop, January 23-25, 1900, a British force was almost annihilated, the remnant of 200 surrendering. The siege of Ladysmith lasted from October 30, 1899, to March 1, 1900, finally being relieved by Gen. Buller. The garrison, at first consisted of 12,000 troops, 2,000 civilians, and 4,000 natives. The siege of Mafeking lasted from October 9, 1899, to May 17, 1900. The Boers at Ladysmith numbered 6,000. Gen. Cronje's army was from 7,000 to 8,000, while Gen. Roberts had between 40,000 and 50,000. Cronje capitulated February 27, 1900, his force then numbering 4,000.

The Transvaal Republic, under the name of "Transvaal Province," was formally annexed to the British Empire by proclamation September 1, 1900. The British losses were 48,640—21,657 killed in action, 680 died of wounds, 4,337 of disease, 2,689 missing and prisoners, the remainder invalided home. The expense of the Boer War, up to September, 1900, was half a billion dollars. Johannesburg was captured May 30, 1900; Pretoria on June 4, 1900; Gen. Methuen on March 7, 1902. After the Transvaal Republic was annexed the Orange Free State continued the war, and in November and December, 1900, the British suffered defeats in Dewetsdorp, so that in February, 1901, an additional force of 30,000 English soldiers was sent to South Africa. On March 8, 1902, an armistice of one week was declared. Final negotiations for peace were instituted March 23, 1902, and a basis of settlement reached June 2, 1902.

Russo-Japanese War of 1904-1905—The cause was the occupation by Russia of Port Arthur, which the Japanese had got by their war with China, and the extension of Russian influence into Manchuria and Korea. Negotiations between Russia and Japan were broken off February 5, 1904; and a declaration of war issued February 10. Japan's fighting forces numbered 270,000, of whom 200,000 were trained. Russia, nominally, had an army of almost 1,000,000, but it was unprepared. At the Battle of Yalu, Japan lost 1,100 out of over 40,000, Russian losses were 2,500 out of 7,000. At Nanschan, the Japanese lost 4,500 out of 30,000; the Russian lost fully one-half of the 3,000 engaged. At Tellisen, the Japanese lost 1,200 out of 35,000; the Russians 3,600 out of 25,000. In actions on the eastern front, Russia lost 2,400, the Japanese 1,000. At Port Arthur the Russians had 300,000 and Japanese 220,000. The Japanese lost 8,000, the Russians 10,000. At Mukden the Russian losses were 97,000; the Japanese between 40,000 and 50,000. The Russian battleship Petropavlovsk was sunk April 13, 1904; the Japanese battleship Hatsuse and the cruiser Yoshino on May 15; the Nanshan Hill battles occurred May 21-27; Dalny was captured May 30; Vafangow battle was fought June 14; Kaiping was captured July 8; the attack on Port Arthur was begun July 20; Newchang was evacuated July 25, and Haicheng on August 3; the naval battle

of Port Arthur was on August 10; the Battle of Liaoyang August 26 to September 4; Battle of Sha River, October 12-19; Dogger Bank affair, October 22; 203-Metre Hill was taken November 30; North Keekwan on December 18; Ehrlungshan on December 25; Sungs Hushan on December 31; Port Arthur surrendered January 1-2, 1905; the Battle of Mukden was February 24 to March 12; that of the Sea of Japan, May 27-28; and Sakhalin was captured July 31. The war was ended by the Treaty of Portsmouth, N. H., signed August 23, 1905. By its terms Russia ceded one-half of Saghalien, agreed to surrender its lease of Kwang-tung Peninsula and Port Arthur, to evacuate Manchuria, and to recognize Japan's sphere of influence in Korea. This treaty was preceded by President Roosevelt's peace proposal of June 7.

Italian-Turkish War, 1911-1912—This was the first war in which aeroplanes were put to practical military use, and though only a few were used by the Italians, lessons were learned there which caused France and Germany to take up seriously the development of that type of warfare. The cause of the war was alleged mistreatment of Italians by Turkish officials in Tripoli. Italians had already undertaken colonization in that part of Northern Africa. War was declared by Italy September 29, 1911. Tripoli was bombarded October 3-5, and was captured on the latter date. The Turks were repulsed on land by the Italians on October 30; and on January 7, 1912, seven Turkish gunboats were sunk; Beirut was bombarded on February 24; and Tripoli was annexed February 25. The Island of Rhodes was seized on May 4, 1912; the Battle of Zanzur Oasis occurred on June 9; the town of Sidi Ali was captured on July 14, and a peace treaty was signed on October 18, 1912. The Italian Chamber ratified on February 23, 1912, a bill containing a decree of Tripoli annexation. Italy, by the Treaty of Ouchy, was given sovereignty over Tripoli, and agreed that the natives should have religious freedom.

Balkan-Turkish War, 1912-1913—This is known as the First Balkan War. It was begun on September 30, 1912 by a former alliance of Bulgaria, Serbia, Greece, and Montenegro, against Turkey. Hostilities commenced October 9, 1912. The Battle of Kirk Kilesseh was fought October 24, 1912; the Battle of Lule Burgas, October 29-31; and the City of Saloniea was captured on November 8. Then came the taking of Monastir on November 18, followed by the London Peace Conference, opening on September 16 and terminating ineffectually on January 29, 1913. War was resumed on February 3; Janina was captured on March 6; Adrianople on March 27; Scutari on April 23. The powers then captured the latter city on May 14. The Peace Conference was resumed, and the treaty was signed on May 30, 1913, by which Turkey gave up all its European territory west of a line drawn from Midia, on the Black Sea, to Enos, on the Aegean Sea, and also the Island of Crete. Quarrels among the Balkan League over the division of territory led to what is called the Second Balkan War, fighting in which was begun on May 23, 1913. The first battle was fought at Nokres on June 10, followed by the capture of Kilkish on July 4, and by that of Seres Kavala on July 9. Roumania and Turkey attacked Bulgaria on July 12, and on July 21 the Turks reoccupied Adrianople. On August 10 (July 26, old style), 1913, peace was made by the Treaty of Bucharest, between Bulgaria and Roumania, Greece and Montenegro.

"WITH IRON FIST AND SHINING SWORD."

THE German Emperor, in an address to his Second Army, on the Western Front, on December 22, 1917, said: "It has been a year full of events for the German Army and the German Fatherland. Powerful blows have been delivered, and your comrades in the east have been able to bring about great decisions. There has been no man, no officer, and no General on the whole eastern front, wherever I have spoken to them, who has not frankly admitted that they could not have accomplished what they have if their comrades in the west had not stood to a man. But for the calm and heroic warriors on the western front the enormous deployment of German forces in the east and in Italy never would have been possible. The fighter in the west has exposed heroically his body so that his brothers on the Dvina and the Isonzo might storm from victory to victory. The fearful battles on the bloody hills around Verdun were not in vain. They created new foundations for the conduct of the war. The tactical and strategical connection between the battles on the Aisne, in the Champagne, Artois, and Flanders and at Cambrai, and the events in the east and in Italy is so manifest that it is useless to waste words on it.

"With a centralized direction, the German Army works in a centralized manner. In order that we should be able to deliver these offensive blows one portion of the army had to remain on the defensive, hard as this is for the German soldier. Such a defensive battle, however, as has been fought in 1917 is without parallel. A fraction of the German Army accepted the heavy task, covering its comrades in the east unconditionally, and it had the entire Anglo-French Army against itself. In long preparation the enemy had collected unheard-of technical means and masses of ammunition and guns in order to make his entry into Brussels over your front, as he proudly announced. The enemy has achieved nothing. The most gigantic feat ever accomplished by an army, and one without parallel in history, was accomplished by the German Army. I do not boast. It is a fact and nothing else. The admiration you have earned shall be your reward, and at the same time your pride. Nothing can in any way place in the shade or surpass what you have accomplished, however great and overwhelming it may be.

"The year 1917, with its great battles, has proved that the German people has in the Lord of Creation above an unconditional and avowed ally on whom it can absolutely rely. Without Him all would have been in vain. Every one of you had to exert every nerve to the utmost. I know that every one of you in the unparalleled drumfire did superhuman deeds. The feeling may have been frequently with you: 'If we only had something behind us; if we only had some relief!' It came as the result of the blow in the east, where it is seen that the storms of war are at present silenced. God grant that it may be forever! Yesterday I saw and spoke to your comrades near Verdun, and there, passing through all minds like the scent of the morning breeze, was the thought: 'You are no longer alone.' The great successes and victories of the recent past, the great days of battle in Flanders and before Cambrai, where the first crushing offensive blow delivered upon the arrogant British showed that despite three years of war and suffering our troops still retained their old offensive spirit, have their effect on the entire Fatherland and on the enemy. We do not know what is still in store for us, but you have seen how in this last of the four years of war God's hand has visibly prevailed, punished treachery, and rewarded heroic persistence. From this we can gain firm confidence that the Lord will be with us in the future also. * * *.

"If the enemy does not want peace, then we must bring peace to the world by battering in with the iron fist and shining sword the doors of those who will not have peace."

"FORWARD WITH GOD TO FRESH DEEDS."

On January 1, 1918, the German Emperor, in a New Year's greeting to his troops, said: "The German people in arms has thus everywhere, on land and sea, achieved great deeds. But our enemies still hope, with the assistance of new allies, to defeat you and then to destroy forever the world position won by Germany in hard endeavor. They will not succeed. Trusting in our righteous cause and in our strength, we face the year 1918 with firm confidence and iron will. Therefore, forward with God to fresh deeds and fresh victories!"

The German Crown Prince, in his New Year's greeting to his army, said: "Proud, and with a thankful heart, I behold you, my brave, resolute leaders and my heroic troops. With an unstained shield and a sharp sword we stand on the threshold of the new year around the Imperial War Lord, ready to strike and win. God with us."

UNITED STATES-JAPANESE ACTION IN SIBERIA.

THE Acting Secretary of State, at Washington, issued on August 5, 1918, the following statement on American-Japanese action in Siberia: "In the judgment of the Government of the United States, a judgment arrived at after repeated and very searching considerations of the whole situation—military intervention in Russia would be more likely to add to the present sad confusion there than to cure it, and would injure Russia rather than help her out of her distresses. Such military intervention as has been most frequently proposed, even supposing it to be efficacious in its immediate object of delivering an attack upon Germany from the east, would in its judgment be more likely to turn out to be merely a method of making use of Russia than to be a method of serving her. Her people, if they profited by it at all, could not profit by it in time to deliver them from their present desperate difficulties, and their substance would meantime be used to maintain foreign armies, not to reconstitute their own or to feed their own men, women, and children. We are bending all our energies now to the purpose, the resolute and confident purpose, of winning on the western front, and it would in the judgment of the Government of the United States be most unwise to divide or dissipate our forces. As the Government of the United States sees the present circumstances, therefore, military action is admissible in Russia now only to render such protection and help as is possible to the Czecho-Slovaks against the armed Austrian and German prisoners who are attacking them and to steady any efforts at self-government or self-defense in which the Russians themselves may be willing to accept assistance. Whether from Vladivostok or from Murmansk and Archangel, the only present object for which American troops will be employed will be to guard military stores which may subsequently be needed by Russian forces, and to render such aid as may be acceptable to the Russians in the organization of their own self-defense. With such objects in view the Government of the United States is now co-operating with the Governments of France and Great Britain in the neighborhood of Murmansk and Archangel. The United States and Japan are the only powers which are just now in a position to act in Siberia in sufficient force to accomplish even such modest objects as those that have been outlined. The Government of the United States has, therefore, proposed to the Government of Japan that each of the two Governments send a force of a few thousand men to Vladivostok, with the purpose of co-operating as a single force in the occupation of Vladivostok and in safeguarding, so far as it may, the country to the rear of the westward-moving Czecho-Slovaks; and the Japanese Government has consented.

"In taking this action the Government of the United States wishes to announce to the people of Russia, in the most public and solemn manner, that it contemplates no interference with the political sovereignty of Russia, no intervention in her internal affairs—not even in the local affairs of the limited areas which her military force may be obliged to occupy—and no impairment of her territorial integrity, either now or hereafter, but that what we are about to do has as its single and only object the rendering of such aid as shall be acceptable to the Russian people themselves in their endeavors to regain control of their own affairs, their own territory, and their own destiny. The Japanese Government, it is understood, will issue a similar assurance. These plans and purposes of the Government of the United States have been communicated to the Governments of Great Britain, France, and Italy, and those Governments have advised the Department of State that they assent to them in principle. No conclusion that the Government of the United States has arrived at in this important matter is intended, however, as an effort to restrict the actions or interfere with the independent judgment of the Governments with which we are now associated in the war. It is also the hope and purpose of the Government of the United States to take advantage of the earliest opportunity to send to Siberia a commission of merchants, agricultural experts, labor advisers, Red Cross representatives, and agents of the Young Men's Christian Association accustomed to organizing the best methods of spreading useful information and rendering educational help of a modest kind in order in some systematic way to relieve the immediate economic necessities of the people there in every way for which an opportunity may open. The execution of this plan will follow, and will not be permitted to embarrass the military assistance rendered to the Czecho-Slovaks. It is the hope and expectation of the Government of the United States that the Governments with which it is associated will, wherever necessary or possible, lend their active aid in the execution of these military and economic plans."

COST OF DESTROYED INDUSTRIES IN NORTHERN FRANCE.

(By P. C. Williams, United States Commercial Attache, Paris.)

FIGURES give little idea of the material destroyed. But, because there is no other way, the following statistics are given as representing the cost of construction before the war of a few of the industries of Northern France that are known to have suffered worst; they are furnished by a trustworthy and semi-official source: Spinning of combed wool (2,400,000 spindles), 192,600,000 francs; spinning of cotton (2,800,000 spindles), 184,000,000 francs; spinning of flax (500,000 spindles), 100,000,000 francs; wool weaving (56,000 looms), 92,000,000 francs; weaving of cotton cloth (29,000 looms), 46,000,000 francs; central electric stations and lines of distribution (300,000 kw.), 250,000,000 francs; machinery and electrical manufacturing plants, 500,000,000 francs; sugar refineries, 135,000,000 francs; breweries, 137,000,000 francs; small machine shops, 350,000,000 francs; coal mines, 900,000,000 francs; iron mines, blast furnaces, and steel works, 2,500,000,000 francs.

These figures do not include the value of the land on which buildings stood; nor, with the exception of the coal mines, the blast furnaces, and steel works, do they include the value of the buildings themselves. Neither do they include the value of stocks of raw materials and merchandise in course of manufacture. The loss of these stocks may be considered as complete. In addition, there were many other flourishing trades represented by up-to-date installations. Ice-making plants, glass works, public works, gas and water works, pottery works, oil works, flour mills, printing plants, establishments for dyeing and bleaching textiles, food-conserving plants, chemical and fertilizer works, etc., abounded in the invaded regions of France. Their buildings, tools, and stocks of merchandise represented an enormous outlay of capital. The cost of replacing these industries to-day is conservatively estimated as nearly three times the original cost.

GEN. FOCH TELLS HOW TO WIN IN WARFARE.

(From an article by him in the *London Field*, in June, 1918.)

"Modern war, to arrive at its end—to impose its will on the enemy—recognizes only one means, the destruction of the enemy's organized forces. War undertakes and prepares this destruction by the battle, which brings about the overthrow of the adversary, disorganizes his command, destroys his discipline and liaisons, and nullifies his units so far as their fighting power is concerned. From this it is an obvious corollary that the offensive, whether started at the beginning of the action or whether it follows the defensive, can alone give results, and in consequence must always be adopted, at least at the finish. Every defensive battle, therefore, must be terminated by an offensive action, a victorious counter-attack, or it will lead to no result. Theoretically, the conduct of battle is then the carrying through of the decisive attack to success; theoretically also, to be the stronger at a given point and at a given moment, all one's forces should be applied simultaneously on that point, and that in an unexpected manner. When we pass to practice, we see we must take other things into account; the idea of protection reappears and imposes sacrifices, absorbs forces.

"To fix the direction of the attack, to guard against the plans of the enemy, to prevent him from carrying out the same manœuvre, we must undertake, carry on, and sustain numerous combats, each with a determined aim. But since there remains no doubt that the decisive attack is the very key-stone of the

GEN. FOCH TELLS HOW TO WIN IN WARFARE—*Continued.*

battle, all the other actions which make up the battle must only be envisaged, considered, organized, provided with forces, in the measure in which they prepare, facilitate, and guarantee the development of the decisive attack, characterized by its mass, its surprise, and its speed, and for which, in consequence, it is essential to reserve the maximum force possible of troops of manœuvre. In the manœuvre battle, the reserve (that is to say, the prepared bludgeon), is organized, kept back, carefully instructed to execute the single act of the battle from which results are expected, the decisive attack; the reserve is husbanded with the most extreme parsimony, so that the bludgeon may be strong enough, the blow as violent as possible. Let loose at the finish, without any lurking idea of saving them, with a well-thought-out plan for winning the battle at a point chosen and determined, the reserves are thrown in all together in an action surpassing in violence and energy all the other phases of the battle, an action with the proper characteristics of surprise, of mass and speed. All our forces really participate, either by preparing it, or by carrying it out, in this, our supreme aim.

"Given that, in the manœuvre battle (a superior form, since it leads to the most complete employment of forces), the decisive attack is the necessary and sufficient condition of success, everything else becomes secondary; therefore, the smallest possible numbers must be consecrated to secondary objects, and their employment must be regarded, managed, studied, only in relation to our preparations for the decisive act. Nevertheless, we must recognize that besides the execution of the decisive attack, it is necessary: 1. To arrange its direction, to clarify (he plan; 2. To prepare it; 3. To watch it, to improve it; because of the possibilities open to the enemy (1) of concealing his dispositions; (2) of changing them; (3) of making similar attacks.

"Hence comes the necessity of a series of dispositions (of protection, if you like), having for objects: 1. To reconnoitre the enemy; 2. To immobilize him; 3. To paralyze him and absorb his activity; and all that is imbuded in what is called the frontal combat, or, rather, the 'preparation,' preparation for the decisive battle, which is then something quite different from an ordinary battle. But to reconnoitre the enemy, wherever he shows himself, demands numerous forces; to immobilize him demands great forces; you cannot stop him with nothing; and, to paralyze him, demands still more forces and more time.

"Finally, this frontal fighting, which, to remain faithful to the theory, one would expect to carry out with only feeble effectives, absorbs in practice the greater part of all the forces, as it takes the greater part of the time; whereas our decisive attack employs only the lesser part of the troops, and lasts only a few moments; a double effect of perspective which confirms superficial minds in the idea that the frontal fighting is the battle, because they judge only by quantity (of forces, or time), not by results and the causes of them; an error which therefore leads them to the doctrine of the parallel battle. We must not be deceived by appearances. Although theory fails when it is applied by feeble hands, and when the accessories obscure the main principle, or the details hide the root idea, history and reason show us that in battle there is a single argument which is worth while; the decisive attack which is alone capable of assuring the desired result, the overthrow of the adversary."

U. S. STATEMENT AS TO SEIZURE OF HOLLAND SHIPPING.

THE Secretary of State at Washington issued, April 12, 1918, a statement defending its commandeering of Dutch ships in American harbors, in answer to a protest from Holland, made March 30, 1918. Secretary Lansing said: "The Netherlands Government have issued a statement relative to the recent action of the Government of the United States in putting into its service for the period of the present war emergency certain privately owned vessels of Netherlands registry lying within the territorial jurisdiction of the United States. While this action is referred to as being indefensible from the standpoint of international law, the statement of the Netherlands Government does not argue the question of legality. Nor is this Government disposed to do so. The practice of nations and the opinions of jurists on the right of a belligerent to utilize all vessels which come voluntarily and unconditionally within its jurisdiction are sufficiently well known to render citation of precedent and of authority unnecessary.

"But, as the Netherlands Government themselves suggest, our action must be subjected to a finer test than that of mere legality. It matters very little that our act be legal, if, as alleged, it violates traditional friendship and is inconsistent with ideals of right and justice. The Netherlands Government first declare that the very presence of Dutch ships in our ports resulted from our detention of them with an unfriendly hand. While our right to refuse bunkers and cargo licenses is conceded, friendship, it is said, should have led to the granting of special privileges in favor of the subjects of a friendly state. Our own supply of bunker coal at seaboard has been inadequate for our pressing national needs. The cargoes which were demanded were largely of grain, of which our own reserves are all too low. The bunkers, if granted, would have served to carry this grain to the Netherlands, where, as events have demonstrated, it was not then needed, and where it would only have served to release equivalent foodstuffs for the enemy. Such action upon our part, whatever its intention, would, in fact, have been an act beneficial to the enemy and having no relation to our friendship to the Netherlands. The owners of Dutch ships were, however, unwilling that their ships should perform any other services than those which it was clearly impossible for us to facilitate, and the ships of this maritime nation accordingly lay idle for many months and until the conclusion, on January 25, 1918, of the temporary shipping agreement which was proposed by the Netherlands Commissioners at London and accepted by the United States as a measure to restore to immediate activity that portion of the Netherlands mercantile fleet lying within our waters.

"The statement of the Netherlands Government seems to imply that this agreement was in fact lived up to by the Netherlands Government, yet evidence to the contrary is found in the statement itself, which refers to German objections as having prevented performance by that Government of what is erroneously referred to as America's demand, but what was in reality a Netherlands undertaking, that when a Dutch ship left the United States for the Netherlands a corresponding Dutch vessel should simultaneously leave the Netherlands for the United States. Had not the Netherlands Government, under German threats of violence, which were a matter of common knowledge, felt unable to carry out the temporary shipping agreement, it is inexplicable that the steamships Samariuda and Adonis would not have sailed for a Dutch port with their cargoes of foodstuffs, which under the agreement the Netherlands was to receive, and of which it was asserted her people were in direst need. Indeed, the statement of the Netherlands Minister for Foreign Affairs, made to Parliament on March 12, 1918, if it is correctly reported to us, sets out in considerable detail Germany's objections which prevented performance of this shipping agreement. As recently as March 14, 1918, after the Netherlands Government had been informed that the situation had reached a point where the associated governments could see no alternative but requisitioning, a note was presented on behalf of the Netherlands Government, expressing the hope that Germany's objections might still be overcome, so as to permit at some future date complete performance of this agreement which was to have been put into operation immediately and completely upon its conclusion nearly two months before.

"One year ago the United States abandoned its neutrality and pledged its entire resources of life and treasure to insure the triumph of democracy over autocracy and to assist to save the world from the blight of militarism. As a result of a species of naval warfare directed against belligerents and neutrals alike, which the Netherlands Government have themselves declared to be illegal, there has, during this period, existed a shortage of shipping which threatens to postpone at frightful cost the ultimate victory. This has created an emergency which in magnitude and significance has seldom if ever before been equaled.

During this period there have been lying in ports of the United States and subject to its jurisdiction and control approximately 500,000 tons of ships of Netherlands registry. At any time within a year the United States might have exercised its right to put these ships into a service useful to it. Yet it forebore, and for many months patiently negotiated, first in Washington and then in London, until finally the temporary agreement of January 25 was entered into. No sooner was this agreement concluded than it broke down under German threats of violence, which overruled the will of the Netherlands Government expressed therein. Then and then only did the United States take steps to accomplish, through the exercise of its own right, that which it was hoped could have been accomplished by agreement, and which the Netherlands Government had been willing in part so to accomplish.

"The action taken leaves available to the Netherlands Government by far the greater part of their merchant marine and tonnage, which, according to estimates of their own officials, is ample for the domestic and colonial needs of the Netherlands. Shipping required for these needs will be free from detention on our part, and will be facilitated by the supplying of bunkers. The balance is being put into a highly lucrative service, the owners receiving the remuneration and the associated governments assuming the risks involved. In order to insure to the Netherlands the future enjoyment of her merchant marine intact, not only will ships be returned at the termination of the existing war emergency, but the associated governments have offered to replace in kind rather than in money any vessels which may be lost by war or marine risk; 100,000 tons of bread cereal, which the German Government, when appealed to, refused to supply, have been offered to the Netherlands by the associated governments out of their own inadequate supplies, and arrangements are being perfected to tender to the Netherlands Government other commodities which they desire to promote their national welfare and for which they may freely send their ships.

"The statement of the Netherlands Government explicitly recognizes the traditional friendship of the United States toward their country. It recognizes that we have heretofore sought to act in accordance with the dictates of right and justice, and to champion the interests of smaller nations. It should not, therefore, hastily be presumed that we have now abruptly repudiated that friendship and been false to those ideals. It is, in fact, difficult to believe that such a conclusion could be drawn from this exercise of our rights in a manner which scrupulously safeguards and indeed promotes the national interests of the Netherlands."

THE PROTEST OF THE NETHERLANDS GOVERNMENT.

Following is a translation of the statement issued by the Netherlands Government in the *Staats Courant* of March 30, to which the above statement of the Secretary of State is a reply: 'Declaration of the Dutch Government, with reference to the proclamation and statement annexed of the President of the United States, dated March 20, this year. The Dutch Government and the whole Dutch people have taken note with painful surprise of the proclamation and statement of the President of the United States of March 20 relative to the seizure of part of the Dutch mercantile marine. The seizure en masse of a neutral mercantile fleet, although merely for the duration of the war, is an act which is indefensible from the point of view of international law and, apart from legal considerations, is unjustifiable when taken against a friendly nation. Furthermore, the manner in which the act of violence is defended in the President's statement does not contribute to making it any the less grievous, for the defense has clearly been set up under the influence of an entirely wrong conception of the facts.

"The manner in which the Dutch mercantile fleet has been treated for months past in the United States, the interminable difficulties placed in the way of our vessels' departure from American ports, the continually repeated refusal of bunker coal, the enforced unloading of cargoes already purchased—all of this may not be in conflict with the rights of the United States, with the exception of one case, that of the Zeelandia, which entered an American port with her own bunker coal and has been detained there illegally ever since, but it was nevertheless in conflict with the traditional friendship between the two countries. This, however, is merely said in passing. On this point, however, the statement is silent. According to the Presidential statement Holland is said not to have fulfilled entirely, because of German pressure, the provisional agreement which has been proposed in order that, pending a definite agreement relative to tonnage and the rationing of our country, our vessels lying in American ports should no longer lie there idle but be given an opportunity of making a voyage of ninety days at the most. This is absolutely incorrect, as is the assertion that Germany is said to have threatened to sink the two vessels which were to leave here in return for the two vessels leaving for Holland with America's approval and that Germany made more and more serious threats in order to prevent compliance with the modus vivendi as well as the conclusion of a permanent agreement.

"The true state of affairs is as follows: After the War Trade Board had urged that the Dutch vessels in American ports should make a voyage pending the definite agreement the Dutch Government proposed that some of these ships should travel in the service of the Commission for Relief in Belgium, that work of relief which the Netherlands has always promoted with all energy for the sake of the suffering population of Belgium and northern France. When the report came that Germany raised difficulties against America's demand that each time a Dutch ship should leave here in exchange for the departure of a relief ship from America the Netherlands Government was of the opinion that it was bound in good faith immediately to warn the American authorities in order that the said ships, which were on their way to Argentina, would be able to make for some other destination, which had the direct result that these ships were kept in the service in exact agreement with the provisional arrangement. And concerning the sailing of a part of the ships to the French harbor of Cette, a Swiss interest which finds great favor in Holland, the ship owners entirely agreed as soon as France had guaranteed that the ships would not be detained in Cette also. For this service various vessels had been chartered. The chartering and sailing of all the ships experienced no serious delay on account of the said objections, while for the rest Germany had no influence whatsoever, nor did it attempt to gain any influence in the carrying out of the provisional arrangement, which, moreover, only concerned the shipping between overseas countries; whatsoever really did prevent the carrying out of the provisional agreement was the extremely slow and sometimes missing overseas telegrams to and from the owners. The cause of this is still enveloped in mystery.

"It is a fact that the greater part of the ships had been chartered under the provisional arrangement, through the intervention of the so-called War Trade Board, and a part was already sailing to South America, but was again detained while en route by the American authorities while in the Pacific Ocean. The vessels plying between the west coat of the United States and the Netherlands Indies continued to sail regularly without any direct or indirect interference on the part of the Dutch Government. The vessels now taken in British ports, both in and outside of Europe, and in the Portuguese port of St. Vincent, were prevented from sailing by the British and Portuguese authorities themselves. The assertion that Holland was powerless under German compulsion to fulfill the provisional agreement is, as appears from the foregoing, contrary to the facts. The inaccurate information furnished the President of the United States appears unerring on a point of still greater importance, namely, where mention is made in the statement of the new requirement that the Dutch ships would have to sail through the danger zone and of the seizure following upon Holland's reply. After the inaccurate assertion that Holland was not able to fulfill the provisional arrangement, the statement says, without further ado, that on March 7 last Great Britain made a final proposal to Holland to which Holland replied with a counter-proposal that was not acceptable.' Really, so the statement continues, even if it had come to the effecting of an agreement, the Dutch Government would practically not have been able to carry this out, therefore seizure was decided upon.

"In this explanation is missing, however strange this may be, an extremely important link that is

U. S. STATEMENT AS TO SEIZURE OF HOLLAND SHIPPING—*Continued.*

indispensable in order to put the matter in its true light. What did really take place? On February 22 last, with a view to the threatened need of food here in this country by the summer, the Dutch Government asked the American Government for an advance of 100,000 tons of wheat on the quantity of 400,000 tons to be definitely fixed. On March 6 the associated Governments replied, it is true, affirmatively with regard to the 100,000 tons, although regarding the 400,000 tons no definite answer was given, but to this apparent accommodation the objectional condition was added that the associated Governments should immediately obtain the disposal of the whole of that part of the Dutch mercantile marine that, according to the London draft agreement, would eventually come to them on the conclusion of a definite arrangement. The Dutch Government, being compelled to do so, intended to agree to this as soon as it could obtain the assurance that not only could it firmly rely upon the 100,000 tons advance, but also on the full 400,000 tons of grain as an accepted basis for the definite arrangement. It was able to entertain this stipulation because it was definitely and expressly fixed at the conversations in London, and also since then, that the Dutch vessels would only sail outside of the danger zone, and thus need not in any case perform war services for one of the contending parties, which would not be compatible with neutrality.

"Suddenly, on March 7 last, the London arrangement mentioned was broken when the agreement with us was withdrawn which had been come to on the cardinal point, namely, that the ships of about 500,000 tons, to be given up in exchange for the advance of 100,000 tons of wheat, should not be used in the danger zone. The particularly objectionable character of this lay in the fact that allowing the use of Dutch vessels in the danger zone would lead to a breach of neutrality, not on account of the zone itself —this has nothing whatever to do with neutrality—but because it was clear that sailing through the zone, situated as it is around the associated countries of Europe, would mean at all events for a considerable part the transport of troops and munitions of war from America to her allies in Europe; while, moreover, the Dutch vessels, if they were armed, would run the chance of coming into armed conflict with German war vessels. Holland, as a neutral country, could not allow that her ships should be used in the danger zone unless the associated Governments were able to guarantee that they would not be armed and would not carry troops or war material. On the ground of the foregoing the argument used in the Presidential statement, according to which seizure was necessary, because Holland was not able to fulfill the obligation entered into, cannot be maintained. It is contrary to the actual facts of the case. The only correct presentation is this: The powers interested felt themselves compelled, owing to the loss of ships, to supplement their tonnage by obtaining the use of a very considerable number of ships which did not belong to them but to Holland. It appeared to them that the Dutch Government was not able to grant permission to its ships to sail for associated interests otherwise than upon conditions dictated by neutrality, but in the opinion of the interested Governments not sufficiently in accord with their interests, hence they decided to proceed to the seizure of the Dutch mercantile marine, inasmuch as this was within their power.

"The Dutch Government considers itself obliged, especially in such serious circumstances as the present, to speak with great frankness; it is giving expression to the feeling of the whole of the Dutch people when it says that it sees in the seizure committed an act of violence against which it protests with all the force of its conviction and its injured national feeling. The statement in the President's declaration saying that this action offers Holland, in a great measure, the opportunity of providing itself with bread cereals is only apparently the case. After the experience obtained with regard to Dutch vessels in British and American ports it would really be unwarrantable to allow other ships to sail to these ports without a proper guaranty that this experience would not be repeated. The American Government has always appealed to right and justice. It has always set itself up as the protector of small nations. That it now co-operated in a deed in diametrical opposition to these principles is a manner of acting which cannot be balanced by any expression of friendship or assurances of any mild application of the wrong committed."

CURTAILMENTS BY WAR INDUSTRIES BOARD.

(Up to September 26, 1918.)

PASSENGER Automobiles—For the last six months of 1918 curtailed to 25 per cent. of 1917 production, provided the manufacturer will limit his purchases of materials, equipment and supplies to such as are absolutely necessary to match up stocks on hand.

Pianos, Piano-players, and Parts—For the last four months of 1918 curtailed to one-third the production of the last four months of 1917.

Cutlery—For the last four months of 1918 curtailed to 70 per cent. of the production of the last four months of 1917, which 70 per cent. shall include Government orders.

Stoves—For the last four months of 1918 curtailed to 50 per cent. of the production of the last four months of 1917, which 50 per cent. shall include Government orders.

Black Galvanized and Enameled Ware—For the last four months of 1918 curtailed to 50 per cent. of the production of the last four months of 1917, which 50 per cent. shall include Government orders.

Burial Goods—Curtailed to 2,200 tons of the iron and steel for the twelve months' schedule.

Clothes Wringers—For the last four months of 1918 curtailed to two-thirds of the production of the last four months of 1917.

Corsets—For the last four months of 1918 curtailed to 40 per cent. of the production of the last four months of 1917.

Metal Beds—For the last four months of 1918 curtailed to 50 per cent. of the production of the last four months of 1917, which 50 per cent. shall include Government and Allies' orders, and that no brass beds be built except from stock now on hand and no brass or brass scrap be purchased.

Boilers and Radiators—For the last four months of 1918 curtailed to 40 per cent. of the production of the last four months of 1917 and all production and sale shall be under license from the War Industries Board or for Government buildings.

Breweries—All brewery products cease on and after December 1, 1918.

Baby Buggies—For the last four months of 1918 curtailed 50 per cent. of the production of the last four months of 1917, and that they be given a Class "C" rating for enough metal to match up stocks now on hand, provided discard steel only shall be used.

Composite Roofing—Manufacturers restricted to production and sale to buildings built by the Government and the Allies or under license from the War Industries Board.

Sporting Goods—For the last four months of 1918 curtailed as compared with production for the last four months of 1917, as follows: Tennis balls, 40 per cent.; footballs and equipment, 60 per cent.; baseballs, bats and equipment, 60 per cent.; golf balls and golf clubs, 40 per cent.; no athletic clothing manufactured after the stocks on hand have been used up.

Gas Stoves and Gas Appliances—For the last four months of 1918 curtailed to 50 per cent. of the production for the last four months of 1917, all copper eliminated except that on hand, which should be conserved for repairs to existing installation.

Automobile Pneumatic Tires—War Industries Board will deal with rubber industry as a controlled industry. Using as a basis the production for the eighteen months ending June 30, 1918, the maximum production of each manufacturer for the last four months of 1918 is fixed at 50 per cent. of the average four months' period production during the eighteen months' period.

Tin Plate—For the last three months of 1918 curtailed the use of steel 30 per cent. from consumption of the last three months of 1917, an estimated saving of approximately 150,000 tons of steel.

Soft Drinks and Mineral Waters—Effective November 1, the production of non-alcoholic beverages

CURTAILMENTS BY WAR INDUSTRIES BOARD—*Continued.*

(other than near beers, which have been prohibited after December 1); including the manufacture of fruit juices, water, concentrated extracts, syrups and carbonic acid gas, curtailed on the basis of 50 per cent. per annum based on the production for the calendar year of 1917; that is, no month's production shall exceed 50 per cent. of the production of the corresponding month of the previous year. Grape juice, cider and loganberry juice products of this year's harvest may be produced, but the restriction must apply to the year 1919.

Talking Machines—For the last four months of 1918 curtailed 40 per cent. of the production for the last four months of 1917 in units and on a tonnage basis, with recommendation the industry secure war work before January 1, 1919.

Agricultural Implements and Farm Tractors—Effective October 1 on a twelve months' schedule curtailed in use of iron and steel 25 per cent. from consumption for calendar year ending September 30, 1918.

Bicycles—For the last four months of 1918 curtailed 25 per cent. in iron and steel of the consumption for the last four months of 1917, with elimination of bicycles for children and for racing purposes.

Refrigerators—For the last four months of 1918 curtailed 33⅓ per cent. in iron and steel of the consumption for the last four months of 1917, with order for substitution of zinc plate where possible.

HISTORY OF THE RED CROSS EMBLEM.

(By The American Red Cross.)

In answer to inquiries frequently made, as well as to correct an impression regarding the original significance of the symbol that appears to prevail in some quarters, the following facts concerning the adoption of the Red Cross emblem are presented: The Red Cross was founded through a diplomatic convention held in Geneva, Switzerland, in 1864. The Treaty of Geneva, or, as it is sometimes called, the Red Cross Treaty, provided for a flag for hospitals and convoys and an arm badge for persons. The design proposed was a red cross on a white ground. This was in compliment to the country in which the congress was sitting, the Swiss flag being a white cross on a red ground. The Red Cross flag, therefore, is the national flag of Switzerland with the colors reversed.

Inasmuch as the cross symbolizes the Christian religion, the idea prevails with some persons, who are unfamiliar with the early history of the Red Cross, that the emblem has a distinctly religious significance—that in adopting it the signatories to the treaty had principally in mind the humanitarianism of Christianity. But the universality of the underlying idea, embracing all nations and all religions, divorced it from any such significance. In other words, the particular cross that suggested the Red Cross emblem was heraldic rather than religious. It is true that the Mohammedan antipathy to the cross in any form subsequently caused Turkish representatives to protest against operating under the emblem, and it was specially provided that the organization in Turkey should have a red crescent for a symbol. But Japan and China have the red cross for an emblem; and all the other countries of the world, in short, recognize it in its true non-sectarian and non-religious significance.

At a banquet given for the delegates to the original convention of 1864 there was in the centre of the table a large piece of confection, representing a fortress with its garrison and sanitary workers, distinguished by the Red Cross brassard, pursuing their functions. The tower was surmounted by small silk flags of the Swiss Republic and Canton of Geneva, around the central flag, a red cross on a white field, the emblem of neutrality just adopted. After the first toast this flag was taken from its place by the president of the convention, who, turning to the representative of the United States Sanitary Commission, presented it to him as a token of appreciation of the Commission's labors for the good of humanity.

REPORT ON DEATH OF MAJOR J. P. MITCHEL.

The following statement is authorized by the Secretary of War: The Director of Military Aeronautics received from the Commander of Gerstner Field, Lake Charles, La., the following official report: "The Board found that Major J. P. Mitchel, R. C. A. S., while flying a scout airplane, Signal Corps, No. 41,372, at Gerstner Field, Lake Charles, La., at about 8 A. M. on July 6, 1918, fell out of said airplane at an altitude of about 500 feet when said airplane nosed down sharply and was killed instantaneously. Said airplane was found about half mile south of hangar No. 24, a total wreck, and Major Mitchel's body was found about 500 yards nearer hangar No. 24. The Board also finds that death occurred in line of duty and not the cause of his own misconduct. The accident investigation officer reports that safety belt was found unbuckled and intact with no evidence of any strain having been placed upon it. The fire extinguisher was found seventy yards from body on line with ship. Body bounded ten feet in opposite direction to ship on line with it. The consensus of opinion of witnesses is that he failed to buckle safety belt and upon nosing over for glide was thrown out by the peculiar quick snap of the scout when the stick pushed too far forward.—KIRBY."

A SUBMARINE IN THE HUDSON, DIRECTED BY WASHINGTON.

(By E. H. Mott, in the *New York Sun.*)

In a file of the Goshen *Independent Republican* for 1821, of the issue of November 26, is an obituary notice of Capt. Ezra Lee, a soldier of the Revolution, who had died in Lyme, Conn., aged seventy-two, "on the 29th ult.," in which is recounted his daring exploit in a submarine boat in the North River, in an attack on enemy ships. Stating that "it is a little remarkable that Capt. Lee is the only man of which it can be said that he fought the enemy upon land, upon water, and under water," the account of this pioneer submarine fighter's daring deed is as follows:

"When the British lay in the North River opposite New York, and while Gen. Washington had possession of the city, he was very desirous to be rid of such neighbors. A Mr. Bushnell at Saybrook, Conn., who had the genius of a Fulton, constructed a submarine machine, of a conical form, bound together with iron bands, within which one person might sit, and with cranks and sculls could navigate it to any depth under water. In the upper part was affixed a vertical screw for the purpose of penetrating ship bottoms, and to this was attached a magazine of powder, within which was a clock which, on being set to run any given time, would, when run down, spring a gun lock, and an explosion would follow. This 'marine turtle, so called, was examined by Gen. Washington and approved. To preserve secrecy, it was experimented with in an enclosed yard in over thirty feet of water, and kept during daylight locked in a vessel's hold. The brother of the inventor was to be the person to navigate the machine into action, but on sinking it at the first time he declined the service.

"Gen. Washington, unwilling to relinquish the object, requested Major Gen. Parsons to select a person in whom he could confide voluntarily to engage in the enterprise. The latter, being well acquainted with the heroic spirit, the patriotism and the firm and steady courage of the deceased above mentioned, immediately communicated the plan to the officer, which he accepted, observing that his life was at Gen. Washington's service. After practising with the machine until he understood its powers of balancing and moving under water, a night was fixed upon for the attempt. Gen. Washington and his associates in the secret took their stations upon a roof of a house in Broadway, anxiously awaiting results. Morning came and

A SUBMARINE IN THE HUDSON, DIRECTED BY WASHINGTON—*Continued.*

no intelligence could be had of the intrepid navigator, nor could the boat attending him give any account of him after parting with him the first part of the night. While these anxious spectators were about to give him up as lost, several barges were seen to start suddenly from Governor's Island (then in possession of the British) and proceed toward some object near the Asia, ship of the line. As suddenly they were seen to put about and steer for the island with springing oars. In two or three minutes an explosion took place from the surface of the water, resembling a water spout, which aroused the whole city and region. The enemy ships took the alarm, signals were rapidly given, the ships cut their cables and proceeded to the Hook with all possible despatch, sweeping their bottoms with chains, and with difficulty prevented their affrighted crews from leaping overboard.

"During this scene of consternation the deceased came to the surface, opened the brass head of his aquatic machine, rose up and gave a signal for a boat to come to him, but they could not reach him until he again descended under water to avoid the enemy's shot from the island, who had discovered him and commenced firing in his wake. Having forced himself against a strong current under water until without the reach of shot, he was taken in tow and landed at the Battery amid a great crowd, and reported himself to Gen. Washington, who expressed his entire satisfaction that the object was effected without the loss of lives. Capt. Lee was under the Asia's bottom more than two hours, endeavoring to penetrate her copper, but in vain. He frequently came up under her stern galleries searching for exposed plank and could hear the sentinel's cry. Once he was discovered by the watch on deck and heard them speculate upon him, concluding that a drifting log had paid them a visit. He returned to her keel and examined it fore and aft, and then proceeded to some other ships. To the impossibility of penetrating their copper hundreds owed their lives. The longest space of time he could remain under water was two hours."

This is all that the chronicler of this venturesome soldier thought it worth while to say about his daring and unprecedented submarine attacks on enemy ships, although a detail of the manner in which Capt. Lee managed to supply himself with air for breathing purposes while prowling about among the copper bottoms of the ships, endeavoring for two hours to find a vulnerable spot in which to insert the explosive prow of his machine, would have been at least enlightening. The chronicler mentions, however, that "the deceased during the war had the confidence and esteem of the Commander in Chief, and was frequently employed by him on secret missions of importance. He fought with him at Trenton and Monmouth. At Brandywine the hilt of his sword was shot away."

HOW PLANTS AND TREES REGENERATE.

(By Professor Jacques Loeb of the Rockefeller Institute for Medical Research, in the Proceedings of the National Academy of Sciences, Washington.)

It is well known that isolated pieces of a plant or a lower animal may regenerate into a whole organism again. In order to replace the current vague speculations concerning this phenomenon by a scientific theory in the sense of the physicist, quantitative experiments are required. The writer has for the past two years made such experiments which have led to a remarkably simple law controlling the quantity of regeneration in an isolated piece of an organism. This law can be expressed as follows: The mass of tissue regenerated by an isolated piece of an organism is under equal conditions and in equal time in direct proportion to the mass of growth material contained in the sap (or blood) of the isolated piece. The experiments on which this law is based were carried out on an organism unusually favorable for investigations of this kind, namely, the Bermuda "life plant." When leaves of this plant are isolated from the stem they will regenerate shoots in some or many of their notches. If a piece of stem is cut out from a plant it will form shoots from its two most apical buds. My experiments have yielded the result that the mass of shoots formed in the latter case is in direct proportion to the mass of a leaf attached to the stem; and to the mass of the isolated leaf in the former case. When we cut out two sister leaves of *Bryophyllum*, *i. e.*, a pair of leaves taken from the same node of a plant, and keep them under the same condition of moisture, temperature, and light, the two sister leaves possessing equal mass will produce approximately equal masses of shoots in equal times, although the number of shoots produced by the two sister leaves may vary considerably.

Summary—By measuring the influence of the mass of a leaf attached to an isolated piece of stem upon the process of regeneration in the piece, it has been possible to prove that the quantity of regeneration is in equal time and under equal conditions in direct proportion to the mass of the leaf. Since nothing except substances produced and sent out by the leaf can vary in direct proportion to its mass, it follows that the quantity of regeneration in an isolated piece of an organism is under equal conditions determined by the mass of material necessary for growth circulating in the sap (or blood) of the piece. If we measure the rate of regeneration by the mass of material regenerated in a given time, the law of regeneration becomes a special case of the law of chemical mass action. That this mass action on a bud is only possible in a piece of stem after it is isolated, the writer explains on the assumption that the apex of an intact plant sends constantly inhibitory substances into the stem preventing the buds contained in the stem from growing and consuming the material required for growth. When a piece of stem is isolated, the supply of these inhibitory substances from the growing region ceases and the most apical bud being the first to become free from the inhibitory substance will then come under the influence of the acting masses of the substances in the sap and regeneration will occur. The mystifying phenomenon of an isolated piece restoring its lost organs thus turns out to be the result of two plain chemical factors: the law of mass action and the production and giving off of inhibitory substances in the growing regions of the organism.

TERRESTRIAL TEMPERATURE AND ATMOSPHERIC ABSORPTION.

(By C. G. Abbot, Astrophysical Observatory, Smithsonian Institution. Read before the National Academy of Sciences, Washington.)

Is the earth's surface a perfect radiator? Its surface is about three-fourths water. Of the remainder much is moist soil or moist vegetation. The radiative power of the earth must therefore be near that of water. My colleague, Mr. Aldrich, finds that of the rays emitted by lamp-black paint at 100°C. a layer of water 1 cm. thick transmits none and reflects as follows:

	0°	30°	55°	63°	70°	72°
Incidence						
Reflection	2%	3%	7%	10%	17%	22%

As the absorption is 1— (Refl.+ Trans.) he computes that of rays reaching a water surface from a hollow hemispherical inclosing lamp-black-painted surface at 100°, the absorption would be 90%. Experiments on lamp-black paint having shown nothing strongly selective about its radiation in this region of spectrum, we seem justified in concluding, in accord with Kirchoff's law, that water is a 90% perfect radiator in this region of spectrum. As is water, so is the earth's surface. Hence we conclude that the earth's surface sends out 0.50 calories per cm2 per minute on the average. From recent experiments Fowle has computed that in clear weather, when precipitable water in the atmosphere is 1 cm., the atmospbere transmits 28% to space of the radiation emitted by the earth's surface. In the tropics where a load of atmospheric humidity equal to precipitable water of 3 cm. or more is common, the transmission would not exceed 20% on clear days. A. Angström has shown that on cloudy nights practically all radiation from the earth's surface to space is cut off.

THE AMERICAN FLAG.

(By the Adjutant General of the United States Army.)

THERE is no Federal law now in force pertaining to the manner of displaying, hanging or saluting the United States flag or prescribing any ceremonies that should be observed in connection therewith. In fact, there are but two Federal laws on the statute books that have any bearing upon this subject, one the act of Congress approved Feb. 20, 1905 (33 Stat. L., p. 725), providing that a trademark cannot be registered which consists of or comprises, inter alia, "the flag, coat of arms or other insignia of the United States, or any simulation thereof," and the other the act of Congress approved February 8, 1917 (Public—No. 305—64th Cong.), providing certain penalties for the desecration, mutilation or improper use of the flag within the District of Columbia. Several States of the Union have enacted laws which have more or less bearing upon the general subject, and it seems probable that many counties and municipalities have also passed ordinances concerning the matter, to govern action within their own jurisdiction. Warning against desecration of the American flag by aliens has been issued by the Department of Justice, which has sent the following notice to Federal attorneys and marshals: "Any alien enemy tearing down, mutilating, abusing or desecrating the United States flag in any way will be regarded as a danger to the public peace or safety within the meaning of regulation 12 of the proclamation of the President issued April 6, 1917, and will be subject to summary arrest and punishment." It is the practice in the army, each day in the year, to hoist the flag briskly at sunrise, irrespective of the condition of the weather, and to lower it slowly and ceremoniously at sunset, indicating the commencement and cessation of the activities of the day, and to display it at half-staff on Memorial Day (May 30) from sunrise until noon and at full staff from noon until sunset, and also on other days specially designated for that purpose by the proper authority, the flag always being first hoisted to the top of the staff before being lowered to the half-staff position.

There has been some question among civilians concerning the exact location of a flag hung at "half-staff." Theoretically, the flag is always hung on a separate staff, much shorter than the staffs usually erected on buildings, and as a consequence a flag hung at half-staff would be located much higher on the ordinary flagstaff than under the present practice, but still the custom of placing the half-staffed flag in about the center of the flagpole, whatever its length may be, is rather generally observed throughout the country, and this department sees no real objection to this custom. Considerable discussion has arisen throughout the country concerning the proper manner of hanging and displaying the flag for decorative purposes. As already stated, there is no Federal law governing the subject, and individual opinion differs as to the procedure that should or should not be followed. It has been suggested that as far as possible the hanging of the flag should be restricted to suspending it from a flag pole, in the regular way, and not to displaying it otherwise; that for purposes of decoration only the national colors should be arranged in the form of bunting and not to be used in the form of the flag; that if it is nevertheless the desire to use the flag for decorative purposes it should always be hung flat, whether on the inside or the outside of buildings, with the union to the north or east, so that there will be a general uniformity in the position of the union of each flag displayed; that the flag should rarely be displayed in a horizontal position or laid flat; that under no circumstances should it be hung where it can easily be contaminated or soiled, or be draped over chairs or benches to be used for seating purposes, and that no object or emblem of any kind should be placed above or upon it. This department sees no objection to flying the flag at night on civilian property, provided it is not so flown for advertising purposes.

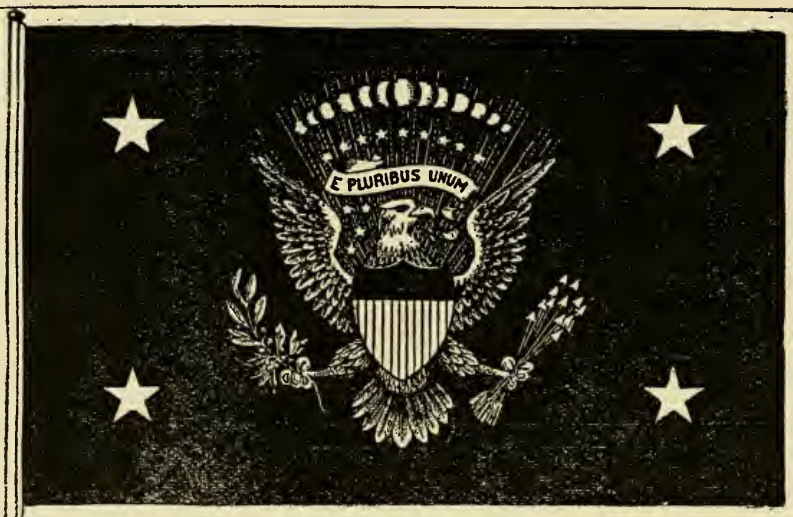
Days for Displaying Flag—It is becoming the practice throughout the country, among civilians, to display the national flag on all patriotic occasions, especially on the following days: Lincoln's Birthday, Washington's Birthday, Mothers' Day, Memorial Day, Flag Day, Independence Day. In certain localities other special days are observed in the same manner. It seems to be appropriate that where several flags or emblems are displayed on a pole, or otherwise, the United States flag should always be hoisted first and hung or displayed at the top; that in any parade the United States flag should always have the place of honor, and that the flag should never be hung or displayed with the union down except as a signal of distress at sea. Existing regulations governing the army provide that when officers and enlisted men pass the national flag, not encased, they will render honors as follows: If in civilian dress and covered, they will uncover, holding the headdress opposite the left shoulder with the right hand; if uncovered, they will salute with the right hand salute. A flag unfurled and hung in a room in which officers or enlisted men of the army are present will be saluted by them the first time they may have occasion to pass it, but not thereafter. The hand salute is as follows: Raise the right hand smartly till the tip of the forefinger touches the lower part of the headdress above the right eye, thumb and fingers extended and joined, palm to left, forearm inclined to about 45 degrees, hand and wrist straight; at the same time look toward the person saluted; drop the arm smartly to the side.

No anthem, hymn or musical air has been recognized by any Federal law as the national anthem, hymn or air, but army and navy regulations provide that the musical composition familiarly known as The Star-Spangled Banner shall be designated as the national air of the United States of America. It should be stated, however, that these regulations are binding only upon the personnel of the military and naval service. Whenever the national air is played at any place where persons belonging to the military or naval service are present, all officers and enlisted men not in formation are required to stand at attention, facing toward the music, excepting when the flag is being lowered at sunset, on which occasion they are required to face toward the flag. If in civilian dress and uncovered, they are required to stand and salute at the first note of the air, retaining the position of salute until the last note of the air is played. If in civilian dress and covered, they are required to stand and uncover at the first note of the air, holding the headdress opposite the left shoulder until the last note is played, excepting in inclement weather, when the headdress may be held slightly raised. The custom of rising and remaining standing and uncovered while The Star-Spangled Banner is being played is growing in favor among civilians.

Old or worn-out flags should not be used either for banners or for any secondary purpose. When a flag is in such a condition that it is no longer a fitting emblem for display, it should not be cast aside nor used in any way that might be viewed as disrespectful to the national colors, but should be destroyed as a whole, privately, preferably by burning or by some other method lacking in any suggestion of irreverence or disrespect due the emblem representing our country. It should be borne in mind that the views set forth here are merely suggestive and that it is not the intention of the department to give them out as authoritative.

HISTORY OF THE FLAG AND ITS CHANGES IN DESIGN.

According to the Smithsonian Institution there were many forms of early flags, especially Colonial types used by the individual colonies and militia regiments, before the flag of the United States was established by the Continental Congress on June 14, 1777, now celebrated as Flag Day. This act required that the flag of the United States be of thirteen horizontal stripes, alternate red and white, and that the union be thirteen white stars on a blue field, representing a new constellation, but it did not define how many points the stars should have, how they should be arranged, nor make provision for additional ones. One of the first occasions for public display of the "Stars and Stripes" is said to have been on August 6, 1777, when the new flag was hoisted over the troops at Fort Schuyler, Rome, N. Y. John Paul Jones is said to have been the first to fly the "Stars and Stripes" over the high



THE PRESIDENT'S FLAG.

seas, on the Ranger, in November, 1777. The National Museum has an early naval 12-star type flag said to have been flown by John Paul Jones during the War of the Revolution. From the time of the Revolution the stars and stripes in the flag have varied. There were 13 stars during the Revolution, 15 in the War of 1812, 29 in the Mexican War, 33 to 35 in the Civil War, 45 in the Spanish War, and 48 to-day. The stripes were changed first from 13 to 15, and then back again to 13. It may be surprising to know that our national flag is among the oldest flags of the nations, being older than the present British Jack, the French Tricolor and the flag of Spain, and many years older than the flags of Germany and Italy, some of which are either personal flags or those of the reigning families.

The American flag of the highest historic and sentimental value to the whole country is in the National Museum collections. It is the original "Star-Spangled Banner" which flew over Fort McHenry in Baltimore Harbor during the bombardment on September 13-14, 1814, and was the inspiration of Francis Scott Key's immortal poem, now sung as our national anthem. It is of the 15 star and stripe type adopted after the admission of Vermont and Kentucky by an act approved by President Washington, January 13, 1794. The "Star-Spangled Banner" measures about 30 feet square, though it was probably somewhat longer, and is much battered and torn, with one star missing, possibly shot away. From 1795 this form continued as the standard flag until President Monroe's Administration, when Congress enacted that it should thereafter be of thirteen stripes and twenty stars, with the addition of a star for each new State, commencing July 4, 1818.

It seems that for many years the army did not carry the Stars and Stripes in battle, though it had been in general use as a garrison flag. The land forces during this period and before carried what was known as national colors or standards of blue, with the coat of arms of the United States, comprising an eagle surmounted by a number of stars, emblazoned thereon, with the designation of the body of troops. In 1834, War Department regulations gave the artillery the right to carry the Stars and Stripes. The infantry and cavalry still used the national standards, which remained the colors of the infantry until 1841 and of the cavalry until 1887, when that branch of the army was ordered to carry the Stars and Stripes. From its adoption in 1777, however, naval vessels universally displayed the National Flag. The history of the flag thus indicates that the Stars and Stripes was not officially carried by American troops in battle until the period of the Mexican War, 1846-47. In that war a flag of 13 stars and stripes was carried by the battalion of volunteers from Maryland and the District of Columbia, and the flag of Company I, Fourth Regiment of Indiana Infantry, of 13 stripes, with an eagle in the field. Ten flags of the National Museum collection pertain to the Civil War. Other flags include some of the Spanish-American War, a flag used by Admiral Charles Wilkes, U. S. Navy; a miniature flag carried by Captain C. F. Hall in the Arctic, 1864-1869; the American colors carried by Rear-Admiral Peary in his Arctic explorations in 1909; the flag carried by the Smithsonian African Expedition under the direction of Col. Theodore Roosevelt, in 1909-10; and numerous examples of the National Ensign which has flown in notable engagements and during countless worthy achievements.

DESCRIPTION OF THE FLAG.

The official flag of the United States bears forty-eight white stars in a blue field, arranged in six rows of eight stars each. Two stars were added in 1912 by the admission of Arizona and New Mexico to the Union. The garrison flag of the Army is made of bunting, thirty-six feet fly and twenty feet hoist, thirteen stripes, and in the upper quarter, next the staff, is the field or "union" of stars, equal to the number of States, on blue field, over one-third length of the flag, extending to the lower edge of the fourth red stripe from the top. The storm flag is twenty feet by ten feet, and the recruiting flag nine feet nine inches by four feet four inches. The "Union Jack" is blue with a star for every State in white. The Coast Guard flag, authorized by act of Congress, March 2, 1799, was originally prescribed to "consist of sixteen perpendicular stripes, alternate red and white, the union of the ensign bearing the arms of the United States in dark blue on a white field." The sixteen stripes represented the number of States which had been admitted to the Union at that time, and no change has been made since. June 14, the anniversary of the adoption of the flag, is celebrated as Flag Day in a large part of the Union.

When the National and State or other flags fly together the National flag should be on the right. When used on a bier or casket at a funeral the stars should be placed at the head. In no case should

the flag be allowed to touch the ground. The statutes of the United States forbid the use of the flag in registered trade-marks, and the use of the flag for advertising purposes is illegal. The President's flag consists of a blue field with four white stars, one in each corner, similar to the Admiral's flag, and in the centre a white spread-eagle with red, white, and blue shield on the body, the design being very similar to the seal of the United States. This spread-eagle design is based upon the seal which has been used in the White House for many years as the personal seal of the President. The flag of Admiral of U. S. Navy is blue with four white stars—two horizontal and two perpendicular in centre. The flag of Vice-Admiral of U. S. Navy is blue with three white stars—triangular. The flag of the Secretary of the Navy is blue with two white stars (perpendicular) at either end and white anchor in centre. The use of the 13-star boat flag has been discontinued, and in its place is a 48-star flag. The consular flag is blue with large white C in centre, surrounded by thirteen white stars. The flag of the Panama Canal consists of a blue square bearing the letters "P. C." in white.

The flag of New York State is blue charged with the arms of the State. The flag of New York City consists of three perpendicular lines, blue, white, and orange (the blue nearest the flagstaff); on the white bar is the seal of the city, without the legend.

FLAG DESECRATION.

New York forbids the use of the flag for advertising purposes and punishes public mutilation, trampling or casting contempt upon flag as a misdemeanor. The New York statute also provides for a forfeiture of a penalty of $50 for each offense, to be recovered in a civil action, which may be brought by or in name of any citizen and two or more penalties may be sued for and recovered in one action. Money so recovered, less reasonable cost and expense, is paid into State Treasury. Provisions of New York statute are not to be construed as applying to a certificate, diploma, warrant or commission of appointment to office, ornamental picture, article of jewelry, stationery for use in private correspondence, or newspaper or periodical; nor to advertising put out by U. S. in its governmental capacity, i. e., to obtain recruits or to advertise its governmental activities. These activities are in no way related to commerce.

SERVICE FLAGS—WHO MAY DISPLAY—MEANING OF STARS.

(By Lieut.-Col. Judge Advocate Nathan W. MacChesney of the National Army.)

THE service flag is not an official flag of the United States Government. The idea was, so far as we are advised, an entirely novel one, the credit for the conception of which appears to be due to R. L. Queisser of Cleveland, Ohio, who designed and patented the present flag. It has, however, taken such firm root in popular sentiment and has been of such beneficial influence that it is officially recognized, and everyone who is entitled to fly it is encouraged and urged to do so. Mr. Queisser was formerly captain of the machine gun company, 5th Ohio Infantry (now 145th United States Infantry), from which he was retired because of an accident.

Who Are Entitled to Representation—(a) The basic idea of the service flag is that there shall be a star to represent each person serving with the colors. Perhaps the best guide as to what persons shall be entitled to this honor is the legislation enacted by Congress for the benefit of those in the military service. Those whom Congress has thus recognized may properly, it would seem, be accepted as entitled to representation on the service flag, since they are "persons in military service," as defined by the highest legislative body of the Nation; and conversely those to whom Congress has not seen fit to extend such recognition ought not to be represented on the service flag, which is limited, both in its conception and by common usage, to those in the military service. This legislation is found in the war-risk insurance act and the soldiers' and sailors' civil relief act.

The war-risk insurance act states (Art. I, sec. 22):

"(7) The terms 'man' and 'enlisted man' mean a person, whether male or female, and whether enlisted, enrolled, or drafted into active service in the military or naval forces of the United States, and include non-commissioned and petty officers and members of training camps authorized by law.

"(12) The term 'military or naval forces' means the Army, the Navy, the Marine Corps, the Coast Guard, the Naval Reserves, the National Naval Volunteers, and any other branch of the United States service while serving pursuant to law with the Army or the Navy."

The soldiers' and sailors' civil relief act provides:

"Sec. 101. (1) That the term 'persons in military service,' as used in this act, shall include the following persons and no others: All officers and enlisted men of the Regular Army, the Regular Army Reserve, the Officers' Reserve Corps, and the Enlisted Reserve Corps; all officers and enlisted men of the National Guard and National Guard Reserve recognized by the Militia Bureau of the War Department; all forces raised under the act entitled 'An act to authorize the President to increase temporarily the Military Establishment of the United States,' approved May 18, 1917 (the selective service act); all officers and enlisted men of the Navy, the Marine Corps, and the Coast Guard; all officers and enlisted men of the Naval Militia, Naval Reserve Force, Marine Corps Reserve, and National Naval Volunteers recognized by the Navy Department; all officers of the Public Health Service detailed by the Secretary of the Treasury for duty either with the Army or the Navy; any of the personnel of the Lighthouse Service and of the Coast and Geodetic Survey transferred by the President to the service and jurisdiction of the War Department or of the Navy Department; members of the Nurse Corps, Army field clerks, field clerks Quartermaster Corps, civilian clerks and employees on duty with the military forces detailed for service abroad in accordance with the provisions of existing law; and members of any other body who have heretofore or may hereafter become a part of the military or naval forces of the United States. The term 'military service,' as used in this definition, shall signify active service in any branch of service heretofore mentioned or referred to, but reserves and persons on the retired list shall not be included in the term 'persons in military service' until ordered to active service. The term active service' shall include the period during which a person in military service is absent from duty on account of sickness, wounds, leave, or other lawful cause."

Recognition of Women—(b) Women.—As will be noted, all persons included in the several military forces above enumerated are, without regard to their sex, deemed to be "persons in military service," and no good reason is perceived why a woman performing active service in any of the foregoing branches should not be accorded the honor of representation on the service flag.

(c) Reserves.—Clearly, persons in any of the reserve forces are not entitled to representation until they are called into and enter upon active duty.

(d) State forces.—Members of the National Guard not federalized, State militia or reserves, and home guards are not entitled to representation on the service flag by reason of such service. If and when called into the Federal military or naval service for active duty, they then properly may be represented. The United States Guards are not a State force, but are a part of the Federal Military Establishment, organized under the selective service act of May 18, 1917, and are entitled to representation.

(e) Men in training.—Men attending the officers' training camps of the United States Army or Navy at cantonments, camps, or forts are in the active military service and entitled to representation. Students taking military instruction at colleges and universities may have either a civilian or a reserve military status. If they are members of training units organized by the War Department in institutions maintaining prescribed course of military in-

struction, and have taken the oath of enlistment, they are in the reserve forces of the Army of the United States and liable to active duty at the call of the President, but until such call to active duty they are not entitled to representation on the service flag, having only a reserve status. Students under 18, and therefore not legally eligible for such enlistment, who have enrolled in training units, and all members of training organizations not recognized by the War Department or who have not taken the oath of enlistment, have only a civilian status and are not entitled to representation on the service flag.

(f) Other patriotic service.—It is recognized that members of the reserves, State forces, training corps, and like organizations are performing service which is or may become very valuable to the country at this time. Many others, such as members of the local and district boards of the Selective Service System, and of the medical and legal advisory boards attached thereto, of the Red Cross, of the various official war boards and commissions, Y. M. C. A., K. C., and Jewish Welfare Board secretaries and clergy, aid societies, etc., are doing most necessary and helpful work. There should be no desire anywhere to minimize its importance and value or to detract in any wise from the credit they should be given therefor; but, the service flag being limited to persons in the military service, it is believed that persons rendering service collaterally connected with or of assistance to the military or naval service, but not a part of it, should not be represented on the service flag, either by the regulation star or by any distinguishing symbol in lieu thereof, such as a red cross, Y. M. C. A. triangle, &c. Undoubtedly such persons are performing a splendid service, for which they should receive full recognition and appreciation, but such representation would be contrary to the spirit and purpose of the service flag, which was designed to be, and has been accepted by the people of this country as a means of showing our homage to those who have entered the military and naval service in this crisis, our appreciation of the sacrifice they are making and the pride taken therein by members of their families and organizations with which they are affiliated, and a visible token to them and to us that while away in their country's service they are not forgotten by their loved ones at home. Representation of others thereon, however worthy the work they are performing, would be deemed by many as in some measure detracting from or lessening the honor designed to be accorded to those engaged in the military or naval service. The addition of anything except the authorized stars is also discountenanced as being apt to confuse and as militating against the basic purpose of the service flag.

(g) There has also been some indication of a desire to adapt the service-flag idea by transposition of the colors, use of different symbols, change of form or design, etc., to purposes and uses other than the original one—for instance, for service in the missionary field, charitable and social welfare work, etc. This also is deemed very inadvisable, at least until after the termination of the war, for like reasons. Appropriation of this idea to any other purpose than that for which it was designed and to which it is limited by established popular sentiment can not have other than a harmful effect and must be condemned. The good effect of the service flag must be conserved by strict observance of its proper use and preservation of its special significance.

Men in Allies' Service—(h) Men in Allies' service.—The use of the service flag is customarily limited to those in the military or naval service of the United States, but no objection is seen to extending the honor of representation thereon to those in the service of our allies, at least where they enlisted before our entrance into the war or were so situated that they could not enter the military service of their own country.

(i) Noncombatant service.—It is believed that to limit representation on the service flag to those in combatant organizations is impractical and undesirable. It is exceedingly difficult to define with accuracy the "fighting" personnel and to draw the line of demarkation between those "who must face danger for their country" and those who may not be called upon to do so. The essence of military service is that those who enter it subject themselves to orders to perform any duty, combatant or otherwise, wherever directed, whether in the front line or elsewhere. Men in noncombatant branches are frequently called upon for combatant service or for duty which exposes them to danger, and men in combatant branches are not infrequently assigned to noncombatant duty. Further, all are subject to transfer from one branch to another, if deemed for the best interests of the service, and such transfers are often made, especially in the case of officers. The great majority in noncombatant service are there because their training, education, experience, or other circumstances make them more valuable there. The Army and Navy are vast organizations and competent men in administrative, supply, medical, and other noncombatant services are no less essential than in the combatant service, the efficiency of which in large measure depends upon the adequacy and efficiency of the former. To draw invidious distinctions between them is in most instances unjust. None appreciate this more fully than the men in combatant service, who understand how others in the military service regard it as a hardship and misfortune not to have their opportunity of distinguishing themselves at the front. It is believed that it would be unjust, even if practical, to determine who will be protected from danger throughout the war, to disregard the sacrifice they are making and their willingness for any service, and to penalize them by such visible stigma as omission from the service flag. All those who serve in the zone of the advance in the war will receive the war-service chevrons as the official distinction for undergoing such hazards, and those not called upon to perform service there should, it would seem, at least receive such recognition as is given by representation on the service flag.

Members of the Household—(j) When flown from a home a husband, son, father, or brother may properly be represented on the service flag, even though he did not actually leave from that household directly to go into the service, but in case of any more distant relatives they should actually be members of the household where the flag is displayed and have left for the service directly from such household. Domestic employees, roomers, or boarders should not be represented.

(k) When flown by a club or other society only those who are actually members, active or honorary, of such club or society should be represented. Stars should not be placed thereon for husbands, sons, fathers, or brothers, or other relatives of members merely because of such relationship.

(l) When flown by a business concern it should represent only members of the firm and employés going directly to the service from such place of business, with some continuous relation existing and where there is an expectation of return to the employment. Since the stars should represent only those who are an integral part of the business or organization which flies the flag, the service flag of a building should not contain stars to represent tenants who have gone into the service from such building any more than the service flag of a mercantile concern should represent its customers, of a professional concern its clients, or of a hotel its guests.

Schools and Colleges—(m) Schools and colleges may properly represent trustees, members of the faculty, graduates, and undergraduates.

(n) Organization flags.—There is some sentiment in favor of distinguishing flags representing members of a family from those representing members of organizations by limiting the individual stars to the family flags, the organization to use a single star with a numeral to indicate the number who have gone and to represent individually, by silver and gold stars as hereinafter indicated, only those who are invalided, wounded, or killed. This would enable anyone clearly to determine in any doubtful case whether the persons represented are members of the family or employés, and, in cases where there are a large number, would show more distinctly how many have gone from such organizations.

Manner of Representation—(a) A blue star is used to represent each person, man or woman, in military or naval service of the United States.

Several methods have been suggested for representation of those invalided, wounded, or killed in the service. The following is believed to state the consensus of opinion and accepted usage:

(b) For those killed in action a gold star will be substituted for the blue star or superimposed on it in such manner as to entirely cover it. The idea of the gold star is that of the honor and glory accorded

the person for his supreme sacrifice in offering up for his country his "last full measure of devotion," and the pride of the family in it, rather than the sense of personal loss, which would be represented by a mourning symbol, even though white were to be used instead of black.

(c) For those wounded in action a silver star will be substituted for the blue star or superimposed on it in such manner as to entirely cover it. Use of the star in this manner would be limited to those entitled to the official wound chevron which is awarded to those receiving wounds in action with the enemy or disabled by a gas attack, necessitating treatment by a medical officer.

(d) For those who subsequently die from such wounds or gas disablement, the gold star will be superimposed on the silver in such manner as to leave a margin of silver around the gold.

(e) For those disabled or invalided home by injury or disease incurred in line of duty in the military or naval service, a silver star will be superimposed on the blue star in such manner as to leave a margin of blue around the silver. While there is some sentiment in favor of limiting this to those who are thus injured or disabled overseas in the zone of the advance, it is believed it may properly be extended to those who are so injured or diseased at a training camp or before reaching France. However, those rejected at a training camp as physically unfit, before any substantial service, and those incurring injury or disease otherwise than in line of duty, especially if the result of their own misconduct, clearly are not entitled to this additional distinction.

(f) For those who subsequently die as the result of such accident or disease contracted in line of duty, and who were thus previously represented by a silver star superimposed on the blue with a blue margin, a gold star will be substituted for this silver star or superimposed in such manner as to entirely cover it, leaving, however, the margin of blue.

(g) The width of the silver or blue margin will depend upon the size of the star. It should be sufficient to be visible from the beholder's usual distance, if possible; and hence should be more than a mere thin edge, if practicable.

It is believed that the foregoing will enable anyone observing it to read the message of the flag, which, without being unduly complicated, will show clearly whether the person represented was wounded or killed in action, died of wounds or of disease or injury.

(h) Missing.—Where men are reported missing, the presumption is that they have been taken prisoner, unless the circumstances clearly indicate the contrary, and unless authentic information is received that they have been wounded or killed they should continue to be represented by the blue service star.

(i) Men discharged.—Where discharged not for the good of the service, or upon request or resignation, but from wounds or physical incapacity contracted in line of duty, entitling them to representation by the silver star, they will continue to be represented by the silver star for the duration of the war even though discharged, as the least tribute we can give in appreciation of their sacrifice. Where discharged for other causes, such as good of the service, dependency, request or resignation, physical incapacity not acquired in the service or in line of duty, they would appear thereafter no more entitled to representation than other persons not in the military service.

The Roll of Honor—The rules with reference to the roll of honor are essentially the same as those with reference to the service flag, since both have the same object in view.

It should properly be limited to those entitled to representation on the service flag. It should be headed by those who have made the supreme sacrifice, under the designation "In memoriam," or in gold lettering, if desired, with a statement of the date, place, and manner of death. The names of the others in service may be subdivided under the various branches of the service, such as Army, Navy, Marine Corps, &c., or followed by the name of the organization in which serving and place where located.

Persons serving in civilian capacities in connection with the war, but not entitled to representation on the service flag, should be carried under a separate list, wholly distinct from those serving with the colors, under some distinctive appropriate title, such as "Patriotic service," "Government service," "State service," if such is the fact, or under the particular work in which they are engaged, as Red Cross, Y. M. C. A., K. C., War Boards, &c.

WHO MAY WEAR AN ARMY OR NAVY UNIFORM.

(By Lieut. Col. MacChesney.)

A great many inquiries are also received with reference to the right to wear the uniform. This is covered by the national-defense act of June 3, 1916 (39 Stat., 216), which provides:

"Sec. 125. Protection of the uniform.—It shall be unlawful for any person not an officer or enlisted man of the United States Army, Navy, or Marine Corps to wear the duly prescribed uniform of the United States Army, Navy, or Marine Corps, or any distinctive part of such uniform, or a uniform any part of which is similar to a distinctive part of the duly prescribed uniform of the United States Army, Navy, or Marine Corps: *Provided*, That the foregoing provision shall not be construed so as to prevent officers and enlisted men of the National Guard from wearing, in pursuance of law and regulations, the uniform lawfully prescribed to be worn by such officers or enlisted men of the National Guard; nor to prevent members of the organization known as the Boy Scouts of America, or the Naval Militia, or such other organizations as the Secretary of War may designate, from wearing their prescribed uniforms; nor to prevent persons who in time of war have served honorably as officers of the United States Army, Navy, or Marine Corps, Regular or Volunteer, and whose recent service was terminated by an honorable discharge, muster out, or resignation, from wearing, upon occasions of ceremony, the uniform of the highest grade they have held by brevet or other commission in such Regular or Volunteer service; nor to prevent any person who has been honorably discharged from the United States Army, Navy, or Marine Corps, Regular or Volunteer, from wearing his uniform from the place of his discharge to his home, within three months after the date of such discharge; nor to prevent the members of military societies composed entirely of honorably discharged officers or enlisted men, or both, of the United States Army, Navy, or Marine Corps, Regular or Volunteer, from wearing, upon occasions of ceremony, the uniform duly prescribed by such societies to be worn by the members thereof; nor to prevent the instructors and members of the duly organized cadet corps of a State university, State college, or public high school offering a regular course in military instruction from wearing the uniform duly prescribed by the authorities of such university, college, or public high school for wear by the instructors and members of such cadet corps; nor to prevent the instructors and members of the duly organized cadet corps of any other institution of learning offering a regular course in military instruction, and at which an officer or enlisted man of the United States Army, Navy, or Marine Corps is lawfully detailed for duty as instructor in military science and tactics, from wearing the uniform duly prescribed by the authorities of such institution of learning for wear by the instructors and members of such cadet corps; nor to prevent civilians attendant upon a course of military or naval instruction, authorized and conducted by the military or naval authorities of the United States, from wearing, while in attendance upon such course of instruction, the uniform authorized and prescribed by such military or naval authorities for wear during such course of instruction; nor to prevent any person from wearing the uniform of the United States Army, Navy, or Marine Corps in any playhouse or theater or in moving-picture films while actually engaged in representing therein a military or naval character not tending to bring discredit or reproach upon the United States Army, Navy, or Marine Corps:

WHO CAN WEAR AN ARMY OR NAVY UNIFORM—*Continued.*

Provided further, That the uniforms worn by officers or enlisted men of the National Guard, or by the members of the military societies, or the instructors and members of the cadet corps referred to in the preceding proviso, shall include some distinctive mark or insignia to be prescribed by the Secretary of War to distinguish such uniforms from the uniforms of the United States Army, Navy, and Marine Corps: *And provided further*, That the members of the military societies and the instructors and members of the cadet corps hereinbefore mentioned shall not wear the insignia of rank prescribed to be worn by officers of the United States Army, Navy, or Marine Corps, or any insignia of rank similar thereto.

"Any person who offends against the provisions of this section shall, on conviction, be punished by a fine not exceeding $300, or by imprisonment not exceeding six months, or by both such fine and imprisonment."

The constant attempt to imitate the uniform of the Army of the United States by persons doing work helpful in the war, but which does not constitute them a part of the military service, is a direct violation of law and is punishable in the manner stated.

It has been held by some of the authorities that the use of khaki or olive-drab cloth is within the inhibition of this statute when made up in the style of a uniform. In any event it should be discouraged as particularly reprehensible at this time.

Members of the Officers' Reserve Corps and of the Enlisted Reserve Corps are held not to be entitled to wear the uniform during the period of the war until they are called into active service.

LUMBER PRODUCTION IN THE UNITED STATES.

(Calendar Year 1916—by the Forest Service, U. S. Department of Agriculture.)
[000 omitted.]

KIND.	No. of Feet Sawed. Board Meas.	Computed Total Prod. in Feet b. m.	KIND.	No. of Feet Sawed. Board Meas.	Computed Total Prod. in Feet b. m.

The total cut of lumber in the U. S. in 1915 was estimated at 38,000,000,000 board feet. It ranged from 40 to 46 billion feet a year, 1904 to 1914.

Laths produced in 1916 totalled 3,163,029,000 board feet, of which 396,935,000 feet were cut in Maine, and 354,551,000 feet in Louisiana.

Wilson and the War.

A CHRONOLOGICAL arrangement of the President's chief proclamations, addresses to Congress, messages, speeches, and other public utterances, together with the various peace offers and messages, and documents from other sources, which, joined together, form a summary view of the great events of the year

WHY THE RAILROADS WERE FEDERALIZED.

ON taking over the railroads, Mr. Wilson, December 27, 1917, said, in a statement to the American people: "The Government of the United States is the only great government now engaged in the war which has not already assumed control of this sort. It was thought to be in the spirit of American institutions to attempt to do everything that was necessary through private management, and if zeal and ability and patriotic motive could have accomplished the necessary unification of administration it would certainly have been accomplished, but no zeal or ability could overcome insuperable obstacles, and I have deemed it my duty to recognize that fact in all candor now that it is demonstrated and to use without reserve the great authority reposed in me. A great national necessity dictated the action, and I was therefore not at liberty to abstain from it."

WILSON'S FOURTEEN POINTS OF PEACE.

ON January 8, 1918, President Wilson, in an address to a joint session of Congress, named fourteen points as essential in a consideration of peace. His speech, in full, will be found on pages 17-18 of the 1918 WORLD ALMANAC AND CYCLOPEDIA. The fourteen points he stated as follows:

I. Open covenants of peace, openly arrived at; after which there shall be no private international understandings of any kind, but diplomacy shall proceed always frankly and in the public view.

II. Absolute freedom of navigation upon the seas, outside territorial waters, alike in peace and in war, except as the seas may be closed in whole or in part by international action for the enforcement of international covenants.

III. The removal, so far as possible, of all economic barriers and the establishment of an equality of trade conditions among all the nations consenting to the peace and associating themselves for its maintenance.

IV. Adequate guarantees given and taken that national armaments will be reduced to the lowest point consistent with domestic safety.

V. A free, open-minded, and absolutely impartial adjustment of all colonial claims, based upon a strict observance of the principle that in determining all such questions of sovereignty the interests of the populations concerned must have equal weight with the equitable claims of the Government whose title is to be determined.

VI. The evacuation of all Russian territory, and such a settlement of all questions affecting Russia as will secure the best and freest co-operation of the other nations of the world in obtaining for her an unhampered and unembarrassed opportunity for the independent determination of her own political development and national policy, and assure her of a sincere welcome into the society of free nations under institutions of her own choosing; and, more than a welcome, assistance also of every kind that she may need and may herself desire. The treatment accorded Russia by her sister nations in the months to come will be the acid test of their good will, of their comprehension of her needs as distinguished from their own interests, and of their intelligent and unselfish sympathy.

VII. Belgium, the whole world will agree, must be evacuated and restored without any attempt to limit the sovereignty which she enjoys in common with all other free nations. No other single act will serve as this will serve to restore confidence among the nations in the laws which they have themselves set and determined for the government of their relations with one another. Without this healing act the whole structure and validity of international law is forever impaired.

VIII. All French territory should be freed and the invaded portions restored; and the wrong done to France by Prussia in 1871 in the matter of Alsace-Lorraine, which has unsettled the peace of the world for nearly fifty years, should be righted, in order that peace may once more be made secure in the interest of all.

IX. A readjustment of the frontiers of Italy should be effected along clearly recognizable lines of nationality.

X. The peoples of Austria-Hungary, whose place among the nations we wish to see safeguarded and assured, should be accorded the freest opportunity of autonomous development.

XI. Roumania, Serbia and Montenegro should be evacuated; occupied territories restored; Serbia accorded free and secure access to the sea, and the relations of the several Balkan states to one another determined by friendly counsel along historically established lines of allegiance and nationality; and international guarantees of the political and economic independence and territorial integrity of the several Balkan states should be entered into.

XII. The Turkish portions of the present Ottoman Empire should be assured a secure sovereignty, but the other nationalities which are now under Turkish rule should be assured an undoubted security of life and an absolutely unmolested opportunity of autonomous development, and the Dardanelles should be permanently opened as a free passage to the ships and commerce of all nations under international guarantees.

XIII. An independent Polish state should be erected which should include the territories inhabited by indisputably Polish populations, which should be assured a free and secure access to the sea, and whose political and economic independence and territorial integrity should be guaranteed by international covenant.

XIV. A general association of nations must be formed, under specific covenants, for the purpose of affording mutual guarantees of political independence and territorial integrity to great and small states alike.

Mr. Wilson's declaration of fourteen peace points was made a day after the British Prime Minister, David Lloyd George, had stated in a public address to the trades unions what his country considered a basis for peace discussion.

PREMIER GEORGE'S DECLARATION.

"WE are not fighting a war of aggression against the German people. Their leaders have persuaded them that they are fighting a war of self-defense against a league of rival nations bent on the destruction of Germany. The destruction or disruption of Germany has never been a war aim with us. Most reluctantly and quite unprepared we were forced to join in their war in self-defense, in defense of violated law in Europe. The British people have never aimed at the breaking up of the German peoples or the disintegration of their state. Our wish is not to destroy Germany's great position in the world, but to turn her aside from schemes of military domination to devote her strength to the beneficent task of the world. We are not fighting to destroy Austria-Hungary or to deprive Turkey of its capital or the rich lands of Asia Minor and Thrace, which are predominantly Turkish. We are not fighting to destroy the German constitution, although we consider a military, autocratic constitution a dangerous anachronism. Our viewpoint is that the adoption of a democratic constitution by Germany would be the most convincing evidence that her old spirit of military domination had indeed died in this war, and it would make it much easier for us to conclude a broad, democratic peace with her. But that is a question for the German people to decide.

PREMIER GEORGE'S DECLARATION—*Continued.*

"It is more than a year since the President of the United States advised the belligerents by suggestion that each side should state clearly the aims for which they were fighting. We replied. The Central Powers did not, and they have maintained complete silence as to the objects for which they are fighting. Even on so crucial a matter as their intention regarding Belgium they have declined to give any trustworthy indication. The days of the Treaty of Vienna are long past. We can no longer submit the future of European civilization to the arbitrary decisions of a few negotiators striving to secure by chicanery or persuasion the interests of this or that dynasty or nation. Therefore, government with the consent of the governed must be the basis of any territorial settlement. For that reason also, unless treaties be upheld, it is obvious that no treaty of peace can be worth the paper on which it is written.

"The first requirements always made by the British and their allies have been the complete restoration, political, territorial and economic, of the independence of Belgium, and such reparation as can be made for the devastation of its towns and provinces. It is no demand for war indemnity, but insistence that before there can be any hope of stable peace this great breach of public law in Europe must be repudiated and, so far as is possible, repaired. Reparation means recognition. Unless international right is recognized by insistence on payment for injury done in defiance of its canons, it can never be a reality. Next comes the restoration of Serbia, Montenegro and the occupied parts of France, Italy and Roumania. The complete withdrawal of alien armies and reparation for injustice done is the fundamental condition of a permanent peace.

"We mean to stand by the French democracy to the death in the demand they make for a reconsideration of the great wrong of '71, when Alsace-Lorraine was torn away. This sore has poisoned the peace of Europe for half a century, and until cured healthy conditions cannot be restored. Nobody who knows Prussia and her designs toward Russia can doubt her ultimate intention. Whatever phrases she uses to delude Russia, she does not mean to surrender any of the Russian provinces and cities now occupied. Under one name or another they will henceforth be part of the Prussian dominions, ruled by the Prussian sword, and the rest of the Russians will be enticed or bullied into complete economic and ultimate political enslavement.

TO STAND BY ALLIES.

"Democracy in this country will stand to the last by the democracies of France and Italy. We should be proud to fight to the end side by side with the new Russian democracy. So would America, France and Italy. But if the present rulers of Russia act independently we have no means to arrest the catastrophe. Russia can only be saved by her own people. An independent Poland, comprising all genuinely Polish elements who desire to participate, is an urgent necessity for the stability of Western Europe.

"Though we agree with President Wilson that the breaking up of Austria-Hungary is no part of our war aims, we feel that unless genuine self-government on true democratic principles is granted those Austro-Hungarian nationalities who have long desired it, it is impossible to hope for the removal of those causes of unrest in that part of Europe which have so long threatened its general peace. On the same grounds we regard as vital the legitimate claims of the Italians for union with those of their own race and tongue. We also mean to press that justice be done to the men of Roumanian blood and speech in their legitimate aspirations. If these conditions were fulfilled Austria-Hungary would become a power whose strength would conduce to the permanent peace and freedom of Europe instead of the instrument of a pernicious Prussian military autocracy. Outside of Europe we believe that the same principles should be applied.

FUTURE OF TURKEY.

"While we do not challenge the maintenance of the Turkish Empire in the homelands of the Turkish race, with its capital Constantinople—the passage between the Mediterranean and Black Sea being internationalized and neutralized—Arabia, Armenia, Mesopotamia, Syria and Palestine are, in our judgment, entitled to recognition of their separate national conditions. What the exact form of that recognition should be need not here be discussed, beyond stating that it will be impossible to restore to their former sovereignty the territories to which I have referred. Much has been said about the arrangements we have made with our allies on this and other subjects. I can only say that as new circumstances, such as the Russian collapse and the separate Russian negotiations, have changed the conditions in which the arrangements were made, we are always ready to discuss them with our allies.

"Respecting the German colonies, they are held at the disposal of a conference whose decision must have primary regard to the wishes and interests of their native inhabitants. The governing consideration in all these cases must be that the inhabitants shall be placed under control of an administration acceptable to themselves, one of whose main purposes will be to prevent their exploitation for the benefit of European capitalists or governments. Finally, there must be reparation for injuries done in violation of international law. The peace conference must not forget our seamen and the services they have rendered and the outrages they have suffered. To secure the conditions I have enumerated, the British Empire is prepared to make even greater sacrifices."

GERMANY'S ANSWER TO WILSON'S 14 POINTS.

To these declarations by the United States and Great Britain, replies were made on Thursday, January 24, by the German Chancellor, Count von Hertling, and by the Austro-Hungarian Minister for Foreign Affairs, Count Czernin, the former in the main committee of the Reichstag, at Berlin; the latter at Vienna.

Count Hertling said: "Gentlemen, when last I had the honor to speak before your committee—that was on January 3—we were faced by an incident which had occurred at Brest-Litovsk. At that time I expressed the opinion that we should await the settlement of this incident in all equanimity. The facts have corresponded with this expectation. The Russian delegation have again arrived at Brest-Litovsk, and negotiations have been resumed and continued. The negotiations are progressing slowly. They are exceedingly difficult. I have already referred, on a previous occasion, to the exact circumstances from which these difficulties arise. Indeed, many times there were reasons to doubt whether the Russian delegation were in earnest with their peace negotiations, and all sorts of wireless messages, which are going around the world with remarkably strange contents, tended to strengthen this doubt. Nevertheless I hold firmly to the hope that we shall come to a favorable conclusion in the near future with the Russian delegation at Brest-Litovsk. Our negotiations with the representatives of Ukrainia stand favorably. Here also there still are some difficulties to be overcome; but the prospects, as I regard them, are favorable. We hope in the near future to arrive at a settlement with Ukrainia which will be to the interest of both sides, and which should also be advantageous as far as their economic aspect is concerned.

SEPARATE PEACE WITH RUSSIA.

"One result, gentlemen, could already be recorded on January 4, at 10 o'clock in the evening. As you all know, the Russian delegation, at the end of December, made the proposal to send an invitation to all the participators in the war asking them to take part in the negotiations. As a basis for this the Russian delegation submitted certain proposals of a very general character. We at the time agreed to the proposal for inviting participators in the war to the negotiations, with the condition, however, that this invitation should be limited to a clearly defined period. On January 4, at 10 o'clock in the evening, this period expired.

No answer had been received. The result is that we are bound no longer in any way so far as the Entente is concerned, that we have a clear road in front of us for separate negotiations with Russia, and also that, obviously, we are no longer bound in any way, as far as the Entente is concerned, to the proposals for a general peace which have been submitted by the Russian delegation. Instead of the then anticipated reply which failed to come, two announcements have, as we all know, been made in the meantime by enemy statesmen—the speech by the English Minister, Mr. Lloyd George, of January 5, and the message of President Wilson of the day after. I freely admit that Mr. Lloyd George has changed his tone. He no longer uses abuse, and thus appears to wish again to establish his claim to negotiating abilities of which I previously despaired.

"All the same, I cannot go as far as the many opinions from neutral countries which claim to read in the speech of Mr. Lloyd George a sincere desire for peace, and even a friendly spirit. It is true that he declares that he does not wish to destroy Germany, and that he has never wanted to destroy her. He even finds expressions of respect for our economic, political, and cultural position, but among them there is no lack of other utterances, and between the lines there is always present that it is his duty to sit in judgment on guilty Germany for all sorts of crimes. This is a spirit, gentlemen, with which, naturally, we can have nothing to do, and in which as yet we can observe no trace of a sincere desire for peace. We are supposed to be culprits over whom the Entente is now sitting in judgment. That forces me to pass in review the conditions and incidents which preceded the war, even at the risk of once again repeating what has long since been known. The establishment of the German Empire in the year 1871 put an end to the old state of dismemberment. By uniting its peoples the German Empire, in short, attained that position which corresponded with its economic and cultural achievements, and the claims founded thereon. Prince Bismarck crowned his life's work by the alliance with Austria.

GERMAN POLICY OF PEACE.

"It was a purely defensive alliance, and was from the very first day regarded and desired as such by the high contracting parties. In the course of decades never has the slightest thought of its misuse for aggressive purposes cropped up. The defensive alliance between Germany and the closely allied Danube monarchy, united with us by the tradition of centuries and common interests, should especially serve to maintain peace. But Prince Bismarck was often reproached with being haunted by the nightmare of coalitions, and the events of the times that followed have shown that it was not a mere terrifying phantom. The danger of enemy coalitions which threatened the allied Central Powers often made an appearance. The dream of coalitions became a reality, owing to the hemming-in policy of King Edward. The German Empire, struggling upward and increasing in strength, stood in the way of English imperialism. This British imperialism only too readily found support in the French longing for revenge and in the Russian struggle for expansion. And so plans for the future developed which were dangerous to us. Germany has always been faced with the danger of war on two fronts, owing to her geographical position. It now became more and more visible. An alliance was concluded between Russia and France, whose inhabitants were more than double those of the German Empire and Austria-Hungary.

ARMING IN ALLEGED SELF-DEFENSE.

"France—Republican France—lent to Czaristic Russia milliards for the construction of strategic railways in the Kingdom of Poland, which were to facilitate an advance against us. The French Republic called up its last man for three years' military service. Thus France, together with Russia, created for herself an armed force up to the limits of her capacity. Both pursued aims which our enemies now characterize as imperialistic. It would have been neglect of duty if Germany had merely looked on quietly, and if we also had not attempted to create for ourselves an armament with the object of protecting ourselves against future enemies. I may perhaps remind you of the fact that I, myself, as a member of the Reichstag, have often spoken about these things, and that on the occasion of new army budgets I have always pointed out that the German nation, in agreeing to those armaments, merely wished to pursue a policy of peace, and that those armaments were forced upon us for defense against the danger threatening us from our enemies. It does not seem as if these words were in any way heeded by foreign countries.

"And now as to Alsace-Lorraine—Alsace-Lorraine, which is once again referred to by Mr. Lloyd George. Once again he speaks of the injustice which Germany committed against France in the year 1871. Alsace-Lorraine—I do not say this to you; you do not need this information; but abroad there still seems to be ignorance about these things—Alsace-Lorraine, as is known, includes for the greater part purely German territory which was detached from the German Empire by centuries of continuous violations and breaches of right until finally, in 1789, the French Revolution swallowed up what was left. At that time they became French provinces.

"When, therefore, in the war of 1870 we demanded back the regions which had been wantonly wrested from us, that was not conquest of foreign territory but was in reality what to-day is called dis-annexation, and this dis-annexation was expressly recognized by the French National Assembly and the constitutional representatives of the French nation at that time, March 29, 1871; and in England, gentlemen, people at that time spoke very differently from what they do to-day. I can refer to a classical witness. He is no other than the celebrated English historian and author, Thomas Carlyle, who in a letter to the *Times*, in December, 1870, wrote as follows:

" 'No nation ever had such a bad neighbor as Germany has possessed in France during the last 400 years. Germany would be mad if she did not think of erecting a frontier wall between herself and such a neighbor—[I draw attention to the fact that for my part I am not repeating the very sharp terms which Carlyle used against France in this connection]—and if she does not erect for herself such a frontier wall when she has the opportunity to do so, I know of no natural law and of no Heaven-sent decree on the strength of which France, alone among the dwellers of the earth, should not be obliged to return a portion of stolen territories when the owners from whom they were wrested had a favorable opportunity to get them back.' And prominent English press organs expressed themselves in the same sense. I may mention, for instance, the *Daily News*.

"And now, gentlemen, I come to President Wilson. Here also I admit that the tone has changed. It appears that the unanimous rejection at the time of the attempt of Mr. Wilson, in the reply to the Papal note, to sow discord between the German Government and the German nation has done its work. It was possibly this unanimous rejection which led Mr. Wilson on to the right road, and perhaps a beginning has been made because now there is, at least, no longer any question of the suppression of the German nation by an autocratic Government, and the former attacks against the House of Hohenzollern are not repeated. I will not go into the distorted representations of German policy which are even yet to be found in Mr. Wilson's message, but I will discuss in detail the points which Mr. Wilson brings forward. There are no fewer than fourteen points in which he formulates his peace programme, and I beg you to have patience if I bring forward these fourteen points for discussion, as briefly as possible."

The Chancellor then dealt seriatim with the fourteen points:

(I.) "History records that we were the first to be able to declare ourselves in agreement with the most extensive publicity of diplomatic agreements. I remind you of the fact that our defensive alliance with Austria-Hungary has been known to all the world since the year 1889, while the offensive agreements of our enemies have had to be disclosed during the course of this war, chiefly by the publication of the Russian secret documents. The full publicity also given to the negotiations at Brest-Litovsk proves that we were

in a position readily to consent to this proposal, and to declare the publication of negotiations as a general political principle.

(II.) "Complete freedom of navigation on the seas in war and peace is also put forward by Germany as one of the first and most important demands for the future. Here, therefore, there is no difference of opinion whatever. The restriction mentioned by Mr. Wilson toward the end is incomprehensible and seems superfluous. It should therefore be suppressed. It would, however, be important in a high degree for the future freedom of the seas if claims to strongly fortified naval bases on important international shipping routes, such as England maintains at Gibraltar, Malta, Hongkong, on the Falkland Islands, and at many other points were renounced.

(III.) "With this we wholly agree. We also condemn an economic war, which would inevitably bring with it causes for future warlike complications.

(IV.) "As has already been declared by us on a previous occasion, the subject of the limitation of armaments is a matter quite suitable for discussion. The financial situation of all the European states after war should further its satisfactory solution in a most effective manner. It will be seen that as to the first four points of the programme agreement could be reached without difficulty.

(V.) "The practical carrying out of the principle laid down by Mr. Wilson will in this world of realities meet with some difficulties. In any case, I believe that for the time being it may be left to the greatest colonial empire—England—to determine as to how she will come to terms with her ally regarding this proposal. We shall have to talk about this point of the programme at the time of the reconstruction of the colonial possessions of the world, which has also been demanded unconditionally by us.

(VI.) "The Entente states having refused to join in the negotiations within the period agreed upon by Russia and the four allied powers, I must decline, in the name of the latter, any subsequent interference. The question here involved is one which alone concerns Russia and the four allied powers. I cherish the hope that, under the conditions of the recognition of the right of self-determination for the nations within the western boundaries of the former Russian Empire it will be possible to be on good relations with these nations as well as with the rest of Russia, for whom we urgently wish a return of guarantees which will secure a peaceful order of things and the welfare of the country.

(VII.) "As far as the Belgian question is concerned, it has been declared repeatedly by my predecessors in office that at no time during the war has the forcible annexation of Belgium by the German Empire formed a point in the programme of German politics. The Belgian question belongs to a complicity of questions the details of which will have to be regulated during the peace negotiations. As long as our enemies do not unreservedly adopt the attitude that the integrity of the territory of the Allies offers the only possible foundation for peace negotiations I must adhere to the standpoint which, up to the present, has always been taken, and must decline any discussion of the Belgian question until the general discussion takes place.

(VIII.) "The occupied parts of France are a valuable pawn in our hands. Here also forcible annexation forms no part of the official German policy. The conditions and modalities of the evacuation, which must take into consideration the vital interests of Germany, must be agreed between Germany and France. I can only once again expressly emphasize that there can never be any question of the separation of the imperial provinces. We will never permit ourselves to be robbed of Alsace-Lorraine by our enemies under the pretext of any fine phrases—of Alsace-Lorraine which, in the mean time, has become more and more closely allied internally with German life, which is developing more and more economically in a highly satisfactory manner, and where more than 87 per cent. of the people speak the German mother tongue.

(IX.), (X.), (XI.) "As regards the questions dealt with by President Wilson under these clauses, namely, the frontier question, the future development of the Austro-Hungarian monarchy and the future of the Balkan states, they embrace questions of paramount importance to the political interests of our ally Austria-Hungary. Where German interests are concerned we will guard them to the utmost, but the reply to President Wilson's proposals in connection with these points I would prefer to leave in the first instance to the Foreign Minister of the Austro-Hungarian monarchy. A close connection with the allied Danube monarchy is the vital point of our policy to-day and must be a guiding line for the future. The faithful comradeship in arms which has proved itself so brilliantly during the war must continue to have its effect also in peace, and we on our part will bring everything to bear in order to bring about for Austria-Hungary a peace which takes into account her justified claims.

(XII.) "Also in connection with the affair mentioned by President Wilson under point twelve, which concerns our brave and powerful ally Turkey, I would like in no way to forestall the attitude of Turkish statesmen. The integrity of Turkey and the security of her capital, which is closely connected with the questions of the straits, are important and vital interests also of the German Empire. Our ally can in this respect rely on our most explicit assistance.

(XIII.) "It was not the Entente—who found nothing but meaningless words for Poland, and before the war never mediated on her behalf with Russia—but the German Empire and Austria-Hungary who freed Poland from the Czaristic regime which was oppressing her national individuality. Therefore, it must be left to Germany and Austria-Hungary and Poland to come to an agreement about the future organization of that country. We are, as has been proved by the negotiations and declarations of the last year, well under way with the task.

(XIV.) "As regards point fourteen I am sympathetic, as is shown by my previous political activity toward any thought which for the future excludes all possibility and probability of wars and tends to promote a peace and harmonious co-operation between the nations. If the conception of the League of Nations mentioned by President Wilson demonstrates, under further development, and after trial, that it really was conceived in a spirit of complete justice to all and with complete freedom from prejudice, the Imperial Government will be gladly prepared—after all the other questions in suspense have been settled—to investigate the principles of such a national union.

"Gentlemen, you are conversant with the speeches of Mr. Lloyd George and the proposals of President Wilson. I must repeat what I said at the beginning. We must now ask ourselves whether out of those speeches and proposals a really earnest and honest desire for peace appears before us. They contain certain principles for a general world peace which we also admit, and could form points of departure and aims for negotiation. Where, however, concrete questions are concerned—points which are of decisive importance to us and to our allies—there the wish for peace is less perceptible. Our enemies do not wish to destroy Germany; but they cast furtive and covetous glances toward parts of our lands and those of our allies. They speak with respect of Germany's position; but the idea that we are culprits who must do penance and promise reformation repeatedly makes itself apparent. This is the usual tone of the victor to the vanquished. This also is the tone of the man who points to all our former statements of willingness for peace as mere signs of weakness.

"From this standpoint, from this deception, the leaders of the Entente will first have to free themselves. In order to make this easier for them I would like to remind them exactly how the situation really stands. May they believe me when I state that our military situation was never more favorable than it is now. Our highly gifted army leaders face the future with undiminished confidence in victory. Throughout the whole army, in the officers and in the men, lives the unbroken joy of battle. I remind you of the words which I spoke on November 29 in the House. Our repeatedly expressed willingness for peace and the spirit of reconciliation which was revealed by our proposals must not be regarded by the Entente as a license permitting an indefinite lengthening of the war. Should our enemies force us to prolong the war, they will have to bear the consequences resulting therefrom. If the leaders of the enemy powers are really inclined

toward peace, let them revise their programme once again, or, as Mr. Lloyd George said, introduce another consideration.

"If they do that and come forward with fresh proposals, then we will examine them carefully, because our aim is no other than the re-establishment of a lasting general peace. But this lasting general peace is not possible so long as the integrity of the German Empire, the security of her vital interests and the dignity of our Fatherland are not guaranteed. Until that time we must quietly stand by each other and wait. As to the purpose, gentlemen, we are all one. Regarding the methods and the modalities, there may be differences of opinion. But let us shelve all those differences. Let us not fight about formulas which always fall short in the mad course of the world events, but, above dividing party controversies, let us keep our eyes on the one mutual aim, the welfare of the Fatherland. Let us hold together, the government and the nation, and victory will be ours. A good peace will and must come.

"The German nation bears in an admirable manner the suffering and the burdens of the war, which is now in its fourth year. In connection with these burdens and sufferings I think especially of the sufferings of the small artisans and the lowly paid officials, but you all, men and women, will hold on and see it through. With your political knowledge you do not allow yourselves to be fooled by catch-phrases. You know how to distinguish between the realities of life and the promising dreams. Such a nation cannot go under. God is with us, and will be with us also in the future."

AUSTRIA'S ANSWER TO THE UNITED STATES.

COUNT CZERNIN'S reply to President Wilson's proposals was made in the Austrian Parliament during his report on the progress of peace negotiations with the peoples of Russia. As to the American conditions, he said: "Once we have reached peace with Russia, a general peace cannot long be prevented, in my opinion, despite all the efforts of Entente statesmen. We have heard that it was not understood in places why I declared in the first speech after the resumption of the negotiations that it was not a question of general peace but of a separate peace with Russia in Brest-Litovsk. That was a necessary statement by clear fact which Trotzky has inevitably recognized and was necessary because we were treating on a different basis—that is, in a more limited scope—when the question was one of separate peace with Russia rather than a general peace. Although I have no illusions that the effort of a general peace might mature overnight, I am still convinced it is maturing and is only a question of our holding through, whether we are to have a general honorable peace or not.

THE REPLY TO AMERICA.

"I have been strengthened in this view by the peace offer which the President of the United States of America has made. To the whole world this is a peace offer, for in fourteen points Mr. Wilson develops the basis on which he attempts to bring about general peace. It is evident that no such offer can be an elaboration acceptable in all details. Should this be the case, negotiations would be unnecessary, for then peace might be made by simple acceptance—by a simple yes and amen. That, of course, is not the case. But I do not hesitate to say that I find in the last proposals of President Wilson considerable approach to the Austro-Hungarian point of view, and among his proposals are some to which we can agree with pleasure. If I shall now be allowed to discuss these proposals in greater detail I must say two things in advance: As far as those proposals relate to our allies—and in them there is mention of the German holding of Belgium and of the Turkish Empire—I declare that, faithful to the duties of the alliance which I have accepted, I am determined to go to every extreme in defense of our allies. The state of the property of our allies before the war we shall defend as our own. This is the point of view of the allies in complete reciprocity. Secondly, I should say that I must refuse politely but definitely any advice as to our internal government. We have a Parliament in Austria, elected by common, equal, direct and secret suffrage. There is no more democratic Parliament on earth, and this Parliament, in conjunction with other constitutionally authorized factors, alone has the right to decide the internal affairs of Austria. I speak only of Austria because I am speaking in the Austrian delegation and not about the general affairs of the Hungarian state. I should not consider that constitutional. We do not interfere in American affairs, and we wish as little foreign guardianship by any other state. Having said this in advance, I allow myself to answer the remaining points as follows:

"I have nothing to say on the point which discusses abolishing secret diplomacy and complete publicity of negotiations. As for the question of publicity of negotiations, nothing can be said against this method from my point of view as far as it is based on complete reciprocity, although I have serious doubts whether it is always the most practical and quickest way to reach a result. Diplomatic treaties are nothing but business affairs. I can easily think of cases, for instance, when commercial treaties are being made between states, and when it would be undesirable that the incomplete results should be told to the whole world beforehand. In such negotiations both sides naturally begin by making as large as possible demands and by using one desire after another as compensation until that balance of interest is present which must be reached to make the conclusion of a treaty possible. Should such negotiations be conducted before the eyes of the general public, it could not be avoided that the public should passionately take sides for every single one of the demands, so that the renunciation of such a demand, even if made only for tactical reasons, would be considered a defeat. Should the public take sides especially strongly for one desideratum, then the conclusion of a treaty might become impossible, or the treaty, should it be concluded, might be felt as a defeat perhaps on both sides. This would not further peaceful relations, and the points of friction between the states would be increased. But what is valid for commercial treaties would be just as valid for political ones which treat of political business.

"If abolishing secret diplomacy means that there are to be no secret treaties—that treaties shall not be made without the knowledge of the public—I have nothing to say against the realization of this. How the realization of this principle and its safeguard is to be considered I know not. When the Governments of two states agree, they will always be able to make secret treaties without any one discovering it. But these are minor points. I do not stick to formulas and will never be responsible for the failure of reasonable arrangement because of more or less formalities. We can, therefore, dismiss Point 1.

FREEDOM OF THE SEAS.

"Point 2 relates to the freedom of the seas. In this postulate President Wilson has spoken from the heart of all, and I subscribe to this desire of America's completely, especially because the President adds the clause 'outside territorial waters'—that is, freedom of open seas. But I cannot subscribe to the violation of the sovereign rights of our faithful Turkish ally. Its point of view on this question will be ours. Point 3, definitely against future economic war, is so just and so reasonable and has been so often demanded by us that I have nothing to add to it. Point 4, demanding general disarmament, explains in especially good and clear style the necessity of forcing free competition in armaments after war to a point which the domestic safety of states demands. President Wilson explains this clearly. I permitted myself to develop the same, a few months ago, in a Budapest speech. It is part of my political creed.

"As far as Russia is concerned, we are proving with deeds that we are ready to create a friendly, neighborly relationship. As far as Italy, Serbia, Roumania and Montenegro are concerned, I can only repeat the point of view which I have expressed already in the Hungarian delegation. I refuse to figure as surety

AUSTRIA'S ANSWER TO THE UNITED STATES—*Continued.*

for enemy war adventures. I refuse to make one-sided concessions to our enemies who remain stubbornly on the point of view of war to final victory, concessions which would forever injure the monarchy and give immeasurable advantage to our enemies and drag on the war indefinitely."

PRESIDENT WILSON'S REJOINDER TO CENTRAL POWERS.

PRESIDENT WILSON, on February 11, 1918, addressed to Congress his reply to the answers of von Hertling and Czernin, as follows: "On the 8th of January I had the honor of addressing you on the objects of the war as our people conceive them. The Prime Minister of Great Britain had spoken in similar terms on the 5th of January. To these addresses the German Chancellor replied on the 24th, and Count Czernin for Austria on the same day. It is gratifying to have our desire so promptly realized that all exchanges of view on this great matter should be made in the hearing of all the world. Count Czernin's reply, which is directed chiefly to my own address of the 8th of January, is uttered in a very friendly tone. He finds in my statements a sufficiently encouraging approach to the views of his own government to justify him in believing that it furnishes a basis for a more detailed discussion of purposes by the two governments. He is represented to have intimated that the views he was expressing had been communicated to me beforehand and that I was aware of them at the time he was uttering them, but in this I am sure he was misunderstood. I had received no intimation of what he intended to say. There was, of course, no reason why he should communicate privately with me. I am quite content to be one of his public audience.

GERMAN REPLY VAGUE AND UNSATISFACTORY.

"Count von Hertling's reply is, I must say, very vague and very confusing. It is full of equivocal phrases and leads, it is not clear, where. But it is certainly in a very different tone from that of Count Czernin, and apparently of an opposite purpose. It confirms, I am sorry to say, rather than removes, the unfortunate impression made by what we had learned of the conferences at Brest-Litovsk. His discussion and acceptance of our general principles lead him to no practical conclusions. He refuses to apply them to the substantive items which must constitute the body of any final settlement. He is jealous of international action and of international counsel. He accepts, he says, the principle of public diplomacy, but he appears to insist that it be confined—at any rate in this case—to generalities; and that the several particular questions of territory and sovereignty, the several questions upon whose settlement must depend the acceptance of peace by the twenty-three states now engaged in the war, must be discussed and settled, not in general council, but severally by the nations most immediately concerned by interest or neighborhood. He agrees that the seas should be free, but looks askance at any limitation to that freedom by international action in the interest of the common order. He would without reserve be glad to see economic barriers removed between nation and nation, for that could in no way impede the ambitions of the military party with whom he seems constrained to keep on terms. Neither does he raise objection to a limitation of armaments. That matter will be settled of itself, he thinks, by the economic conditions which must follow the war. But the German colonies, he demands, must be returned without debate. He will discuss with no one but the representatives of Russia what disposition shall be made of the peoples and the lands of the Baltic provinces; with no one but the government of France the 'conditions' under which French territory shall be evacuated; and only with Austria what shall be done with Poland. In the determination of all questions affecting the Balkan states he defers, as I understand him, to Austria and Turkey; and with regard to the agreements to be entered into concerning the non-Turkish peoples of the present Ottoman empire, to the Turkish authorities themselves. After a settlement all around, effected in this fashion by individual barter and concession, he would have no objection, if I correctly interpret his statement, to a league of nations which would undertake to hold the new balance of power steady against external disturbance.

"It must be evident to everyone who understands what this war has wrought in the opinion and temper of the world that no general peace, no peace worth the infinite sacrifices of these years of tragical suffering, can possibly be arrived at in any such fashion. The method the German Chancellor proposes is the method of the Congress of Vienna. We cannot and will not return to that. What is at stake now is the peace of the world. What we are striving for is a new international order based upon broad and universal principles of right and justice—no mere peace of shreds and patches. Is it possible that Count von Hertling does not see that, does not grasp it, is in fact living in his thought in a world dead and gone? Has he utterly forgotten the Reichstag resolutions of the 19th of July, or does he deliberately ignore them? They spoke of the conditions of a general peace, not of national aggrandizement or of arrangements between state and state.

WORLD'S PEACE DEPENDS ON WORLD'S SATISFACTION.

"The peace of the world depends upon the just settlement of each of the several problems to which I adverted in my recent address to the Congress. I, of course, do not mean that the peace of the world depends upon the acceptance of any particular set of suggestions as to the way in which those problems are to be dealt with. I mean only that those problems each and all affect the whole world; that unless they are dealt with in a spirit of unselfish and unbiased justice, with a view to the wishes, the natural connections, the racial aspirations, the security, and the peace of mind of the peoples involved, no permanent peace will have been attained. They cannot be discussed separately or in corners. None of them constitutes a private or separate interest from which the opinion of the world may be shut out. Whatever affects the peace affects mankind; and nothing settled by military force, if settled wrong, is settled at all. It will presently have to be reopened. Is Count von Hertling not aware that he is speaking in the court of mankind; that all the awakened nations of the world now sit in judgment on what every public man, of whatever nation, may say on the issues of a conflict which has spread to every region of the world? The Reichstag resolutions of July themselves frankly accepted the decisions of that court. There shall be no annexations, no contributions, no punitive damages. Peoples are not to be handed about from one sovereignty to another by an international conference or an understanding between rivals and antagonists. National aspirations must be respected; peoples may now be dominated and governed only by their own consent. 'Self-determination' is not a mere phrase. It is an imperative principle of action, which statesmen will henceforth ignore at their peril. We cannot have general peace for the asking, or by the mere arrangement of a peace conference. It cannot be pieced together out of individual understandings between powerful states. All the parties of this war must join in the settlement of every issue anywhere involved in it; because what we are seeking is a peace that we can all unite to guarantee and maintain, and every item of it must be submitted to the common judgment whether it be right and fair—an act of justice, rather than a bargain between sovereigns.

MUST REMOVE CAUSES OF WAR.

"The United States has no desire to interfere in European affairs or to act as arbiter in European territorial disputes. She would disdain to take advantage of any internal weakness or disorder to impose her own will upon another people. She is quite ready to be shown that the settlements she has suggested are not the best or the most enduring. They are only her own provisional sketch of principles and of the way in which they should be applied. But she entered this war because she was made a partner, whether she would or not, in the sufferings and indignities inflicted by the military masters of Germany against the

PRESIDENT WILSON'S REJOINDER TO CENTRAL POWERS—*Continued.*

peace and security of mankind; and the conditions of peace will touch her as nearly as they will touch any other nation to which is entrusted a leading part in the maintenance of civilization. She cannot see her way to peace until the causes of this war are removed, its renewal rendered as nearly as may be impossible.

"This war had its roots in the disregard of the rights of small nations and of nationalities which lacked the union and the force to make good their claim to determine their own allegiances and their own forms of political life. Covenants must now be entered into which will render such things impossible for the future; and those covenants must be backed by the united force of all the nations that love justice and are willing to maintain it at any cost. If territorial settlements and the political relations of great populations which have not the organized power to resist are to be determined by the contracts of the powerful governments which consider themselves most directly affected, as Count von Hertling proposes, why may not economic questions also? It has come about in the altered world in which we now find ourselves that justice and the rights of peoples affect the whole field of international dealing, as much as access to raw materials and fair and equal conditions of trade. Count von Hertling wants the essential bases of commercial and industrial life to be safeguarded by common agreement and guaranty; but he cannot expect that to be conceded him if the other matters to be determined by the articles of peace are not handled in the same way, as items in the final accounting. He cannot ask the benefit of common agreement in the one field, without according it in the other. I take it for granted that he sees that separate and selfish compacts with regard to trade and the essential materials of manufacture would afford no foundation for peace. Neither, he may rest assured, will separate and selfish compacts with regard to provinces and peoples.

"Count Czernin seems to see the fundamental elements of peace with clear eyes, and does not seek to obscure them. He sees that an independent Poland, made up of all the indisputably Polish peoples who lie contiguous to one another, is a matter of European concern and must of course be conceded; that Belgium must be evacuated and restored, no matter what sacrifices and concessions that may involve; and that national aspirations must be satisfied, even within his own empire, in the common interest of Europe and mankind. If he is silent about questions which touch the interest and purposes of his allies more nearly than they touch those of Austria only, it must of course be because he feels constrained, I suppose, to defer to Germany and Turkey in the circumstances. Seeing and conceding, as he does, the essential principles involved and the necessity of candidly applying them, he naturally feels that Austria can respond to the purpose of peace as expressed by the United States with less embarrassment than could Germany. He would probably have gone much further had it not been for the embarrassments of Austria's alliances and of her dependence upon Germany. After all, the test of whether it is possible for either government to go any further in this comparison of views is simple and obvious. The principles to be applied are these:

FOUR PRINCIPLES TO BE APPLIED.

"First, that each part of the final settlement must be based upon the essential justice of that particular case and upon such adjustments as are most likely to bring a peace that will be permanent;

"Second, that peoples and provinces are not to be bartered about from sovereignty to sovereignty as if they were mere chattels and pawns in a game, even the great game, now forever discredited, of the balance of power; but that—

"Third, every territorial settlement involved in this war must be made in the interest and for the benefit of the populations concerned, and not as a part of any mere adjustment or compromise of claims amongst rival states; and—

"Fourth, that all well-defined national aspirations shall be accorded the utmost satisfaction that can be accorded them without introducing new or perpetuating old elements of discord and antagonism that would be likely in time to break the peace of Europe and consequently of the world.

SUCH TERMS CAN BE DISCUSSED.

"A general peace erected upon such foundations can be discussed. Until such a peace can be secured we have no choice but to go on. So far as we can judge, these principles that we regard as fundamental are already everywhere accepted as imperative, except among the spokesmen of the military and annexationist party in Germany. If they have anywhere else been rejected, the objectors have not been sufficiently numerous or influential to make their voices audible. The tragical circumstance is that this one party in Germany is apparently willing and able to send millions of men to their death to prevent what all the world now sees to be just. I would not be a true spokesman of the people of the United States if I did not say once more that we entered this war upon no small occasion, and that we can never turn back from a course chosen upon principle. Our resources are in part mobilized now, and we shall not pause until they are mobilized in their entirety. Our armies are rapidly going to the fighting front, and will go more and more rapidly. Our whole strength will be put into this war of emancipation—emancipation from the threat and attempted mastery of selfish groups of autocratic rulers—whatever the difficulties and present partial delays. We are indomitable in our power of independent action, and can in no circumstances consent to live in a world governed by intrigue and force. We believe that our own desire for a new international order, under which reason and justice and the common interests of mankind shall prevail, is the desire of enlightened men everywhere. Without that new order the world will be without peace, and human life will lack tolerable conditions of existence and development. Having set our hand to the task of achieving it, we shall not turn back.

"I hope that it is not necessary for me to add that no word of what I have said is intended as a threat. That is not the temper of our people. I have spoken thus only that the whole world may know the true spirit of America; that men everywhere may know that our passion for justice and for self-government is no mere passion of words, but a passion which, once set in action, must be satisfied. The power of the United States is a menace to no nation or people. It will never be used in aggression or for the aggrandizement of any selfish interest of our own. It springs out of freedom and is for the service of freedom."

PRESIDENT ADMONISHES ARMY AND NAVY TO OBSERVE SABBATH.

THE White House, Washington, January 20, 1918. The President, Commander in Chief of the Army and Navy, following the reverent example of his predecessors, desires and enjoins the orderly observance of the Sabbath by the officers and men in the military and naval service of the United States. The importance for man and beast of the prescribed weekly rest, the sacred rights of Christian soldiers and sailors, a becoming deference to the best sentiment of a Christian people, and a due regard for the Divine Will demand that Sunday labor in the army and navy be reduced to the measure of strict necessity. Such an observance of Sunday is dictated by the best traditions of our people and by the convictions of all who look to Divine Providence for guidance and protection, and, in repeating in this order the language of President Lincoln, the President is confident that he is speaking alike to the hearts and to the consciences of those under his authority.—WOODROW WILSON.

ACHIEVEMENTS OF 1918 MUST DECIDE THE WAR.

MR. WILSON, in a message to the Farmers' Congress, at Urbana, Ill., January 31, 1918, urging record-breaking crop production, wrote: "I need not tell you, for I am sure you realize as keenly as I do, that we are as a nation in the presence of a great task which demands supreme sacrifice and endeavor of every

one of us. We can give everything that is needed with the greater willingness, and even satisfaction, because the object of the war in which we are engaged is the greatest that free men have ever undertaken. It is to prevent the life of the world from being determined and the fortunes of men everywhere affected by small groups of military masters, who seek their own interest and the selfish dominion throughout the world of the governments they unhappily for the moment control. You will not need to be convinced that it was necessary for us as a free people to take part in this war. It had raised its evil hand against us. The rulers of Germany had sought to exercise their power in such a way as to shut off our economic life so far as our intercourse with Europe was concerned, and to confine our people within the Western Hemisphere while they accomplished purposes which would have permanently impaired and impeded every process of our national life and have put the fortunes of America at the mercy of the imperial government of Germany.

"This was no threat. It had become a reality. Their hand of violence had been laid upon our own people and our own property in flagrant violation not only of justice but of the well-recognized and long-standing covenants of international law and treaty. We are fighting, therefore, as truly for the liberty and self-government of the United States as if the war of our own Revolution had to be fought over again; and every man in every business in the United States must know by this time that his whole future fortune lies in the balance. Our national life and our whole economic development will pass under the sinister influences of foreign control if we do not win. We must win, therefore, and we shall win. I need not ask you to pledge your lives and fortunes with those of the rest of the nation to the accomplishment of that great end. You will realize, as I think statesmen on both sides of the water realize, that the culminating crisis of the struggle has come and that the achievements of this year on the one side or the other must determine the issue. It has turned out that the forces that fight for freedom, the freedom of men all over the world as well as our own, depend upon us in an extraordinary and unexpected degree for sustenance, for the supply of the materials by which men are to live and to fight, and it will be our glory when the war is over that we have supplied those materials and supplied them abundantly, and it will be all the more glory because in supplying them we have made our supreme effort and sacrifice.

"In the field of agriculture we have agencies and instrumentalities, fortunately, such as no other government in the world can show. The Department of Agriculture is undoubtedly the greatest practical and scientific agricultural organization in the world. The labor problem is one of great difficulty, and some of the best agencies of the nation are addressing themselves to the task of solving it, so far as it is possible to solve it. Farmers have not been exempted from the draft. I know that they would not wish to be. I take it for granted they would not wish to be put in a class by themselves in this respect. But the attention of the War Department has been very seriously centred upon the task of interfering with the labor of the farms as little as possible, and under the new draft regulations I believe that the farmers of the country will find that their supply of labor is very much less seriously drawn upon than it was under the first and initial draft, made before we had our present full experience in these perplexing matters. The supply of labor in all industries is a matter we must look to and are looking to with diligent care.

"And let me say that the stimulation of the agencies I have enumerated has been responded to by the farmers in splendid fashion. I dare say that you are aware that the farmers of this country are as efficient as any other farmers in the world. They do not produce more per acre than the farmers in Europe. It is not necessary that they should do so. It would perhaps be bad economy for them to attempt it. But they do produce by two to three or four times more per man, per unit of labor and capital, than the farmers of any European country. They are more alert and use more labor-saving devices than any other farmers in the world. And their response to the demands of the present emergency has been in every way remarkable. Last spring their planting exceeded by 12,000,000 acres the largest planting of any previous year, and the yields from the crops were record-breaking yields. In the fall of 1917 a wheat acreage of 42,170,000 was planted, which was 1,000,000 larger than for any preceding year, 3,000,000 greater than the next largest, and 7,000,000 greater than the preceding five-year average.

SHOULD EXCEED PAST ACHIEVEMENTS.

"But I ought to say to you that it is not only necessary that these achievements should be repeated, but that they should be exceeded. I know what this advice involves. It involves not only labor but sacrifice, the painstaking application of every bit of scientific knowledge and every tested practice that is available. It means the utmost economy, even to the point where the pinch comes. It means the kind of concentration and self-sacrifice which is involved in the field of battle itself, where the object always looms greater than the individual. And yet the Government will help and help in every way that is possible. The impression which prevails in some quarters that while the Government has sought to fix the prices of foodstuffs it has not sought to fix other prices which determine the expenses of the farmer is a mistaken one. As a matter of fact, the Government has actively and successfully regulated the prices of many fundamental materials underlying all the industries of the country, and has regulated them, not only for the purchases of the Government, but also for the purchases of the general public, and I have every reason to believe that the Congress will extend the powers of the Government in this important and even essential matter, so that the tendency to profiteering, which is showing itself in too many quarters, may be effectively checked. In fixing the prices of foodstuffs the Government has sincerely tried to keep the interests of the farmer as much in mind as the interests of the communities which are to be served, but it is serving mankind as well as the farmer, and everything in these times of war takes on the rigid aspect of duty.

"I will not appeal to you to continue and renew and increase your efforts; I do not believe that it is necessary to do so. I believe that you will do it without any word or appeal from me, because you understand as well as I do the needs and opportunities of this great hour when the fortunes of mankind everywhere seem about to be determined and when America has the greatest opportunity she has ever had to make good her own freedom and in making it good to lend a helping hand to men struggling for their freedom everywhere. You remember that it was farmers from whom came the first shots at Lexington, that set aflame the revolution that made America free. I hope and believe that the farmers of America will willingly and conspicuously stand by to win this war also. The toil, the intelligence, the energy, the foresight, the self-sacrificing, and devotion of the farmers of America will, I believe, bring to a triumphant conclusion this great last war for the emancipation of men from the control of arbitrary government and the selfishness of class legislation and control; and then, when the end has come, we may look each other in the face and be glad that we are Americans and have had the privilege to play such a part."

AMERICA'S MESSAGE TO RUSSIA.

EARLY in March, 1918, the following message from President Wilson to the people of Russia was made public. It had been cabled by Secretary Lansing to the United States Consul General at Moscow, for delivery to the Soviet Congress. Mr. Wilson said: "May I not take advantage of the meeting of the Congress of the Soviets to express the sincere sympathy which the people of the United States feel for the Russian people at this moment when the German power has been thrust in to interrupt and turn back the whole struggle for freedom and substitute the wishes of Germany for the purposes of the people of Russia? Although the Government of the United States is unhappily not now in a position to render the direct and effective aid it would wish to render, I beg to assure the people of Russia, through the congress, that it will avail

itself of every opportunity to secure for Russia once more complete sovereignty and independence in her own affairs and full restoration to her great role in the life of Europe and the modern world. The whole heart of the people of the United States is with the people of Russia in the attempt to free themselves forever from autocratic government and become the masters of their own life."

The progress of events in Russia thenceforward was toward a general state of chaos, there being no stable central government which could heed the American advice.

"I ACCEPT THE CHALLENGE"—"FORCE TO THE UTMOST."

WILSON'S answer to Germany, after the Russian breakdown. The address was delivered on the night of April 6, 1918, at Baltimore, at the opening there of the Third Liberty Loan campaign.

The President said: "Fellow citizens: This is the anniversary of our acceptance of Germany's challenge to fight for our right to live and be free, and for the sacred rights of free men everywhere. The Nation is awake. There is no need to call to it. We know what the war must cost, our utmost sacrifice, the lives of our fittest men and, if need be, all that we possess. The loan we are met to discuss is one of the least parts of what we are called upon to give and to do, though in itself imperative. The people of the whole country are alive to the necessity of it, and are ready to lend to the utmost, even where it involves a sharp skimping and daily sacrifice to lend out of meagre earnings. They will look with reprobation and contempt upon those who can and will not, upon those who demand a higher rate of interest, upon those who think of it as a mere commercial transaction. I have not come, therefore, to urge the loan. I have come only to give you, if I can, a more vivid conception of what it is for.

"The reasons for this great war, the reason why it had to come, the need to fight it through, and the issues that hang upon its outcome, are more clearly disclosed now than ever before. It is easy to see just what this particular loan means because the cause we are fighting for stands more sharply revealed than at any previous crisis of the momentous struggle. The man who knows least can now see plainly who the cause of justice stands and what the imperishable thing is he is asked to invest in. Men in America may be more sure than they ever were before that the cause is their own, and that, if it should be lost, their own great nation's place and mission in the world would be lost with it.

"I call you to witness, my fellow countrymen, that at no stage of this terrible business have I judged the purposes of Germany intemperately. I should be ashamed in the presence of affairs so grave, so fraught with the destinies of mankind throughout all the world, to speak with truculence, to use the weak language of hatred or vindictive purpose. We must judge as we would be judged. I have sought to learn the objects Germany has in this war from the mouths of her own spokesmen, and to deal as frankly with them as I wished them to deal with me. I have laid bare our own ideals, our own purposes, without reserve or doubtful phrase, and have asked them to say as plainly what it is that they seek.

WE HAVE OURSELVES PROPOSED NO INJUSTICE, NO AGGRESSION.

"We have ourselves proposed no injustice, no aggression. We are ready, whenever the final reckoning is made, to be just to the German people, deal fairly with the German power, as with all others. There can be no difference between peoples in the final judgment, if it is indeed to be a righteous judgment. To propose anything but justice, even-handed and dispassionate justice, to Germany at any time, whatever the outcome of the war, would be to renounce and dishonor our own cause. For we ask nothing that we are not willing to accord.

"It has been with this thought that I have sought to learn from those who spoke for Germany whether it was justice or dominion and the execution of their own will upon the other nations of the world that the German leaders were seeking. They have answered—answered in unmistakable terms. They have avowed that it was not justice but dominion and the unhindered execution of their own will.

"The avowal has not come from Germany's statesmen. It has come from her military leaders, who are her real rulers. Her statesmen have said that they wished peace, and were ready to discuss its terms whenever their opponents were willing to sit down at the conference table with them. Her present Chancellor has said—in indefinite and uncertain terms, indeed, and in phrases that often seem to deny their own meaning, but with as much plainness as he thought prudent—that he believed that peace should be based upon the principles which we had declared would be our own in the final settlement. At Brest-Litovsk her civilian delegates spoke in similar terms; professed their desire to conclude a fair peace and accord to the peoples with whose fortunes they were dealing the right to choose their own allegiances. But action accompanied and followed the profession. Their military masters, the men who act for Germany and exhibit her purpose in execution, proclaimed a very different conclusion. We can not mistake what they have done—in Russia, in Finland, in the Ukraine, in Roumania. The real test of their justice and fair play has come. From this we may judge the rest. They are enjoying in Russia a cheap triumph in which no brave or gallant nation can long take pride. A great people, helpless by their own act, lies for the time at their mercy. Their fair professions are forgotten. They nowhere set up justice, but everywhere impose their power and exploit everything for their own use and aggrandizement; and the peoples of conquered provinces are invited to be free under their dominion!

WHAT THEY WOULD DO.

"Are we not justified in believing that they would do the same things at their western front if they were not there face to face with armies whom even their countless divisions can not overcome? If, when they have felt their check to be final, they should propose favorable and equitable terms with regard to Belgium and France and Italy, could they blame us if we concluded that they did so only to assure themselves of a free hand in Russia and the East?

"Their purpose is undoubtedly to make all the Slavic peoples, all the free and ambitious nations of the Baltic peninsula, all the lands that Turkey has dominated and misruled, subject to their will and ambition and build upon that dominion an empire of force upon which they fancy that they can then erect an empire of gain and commercial supremacy—an empire as hostile to the Americas as to the Europe which it will overawe—an empire which will ultimately master Persia, India, and the peoples of the Far East, in such a programme our ideals, the ideals of justice and humanity and liberty, the principles of the free self-determination of nations upon which all the modern world insists, can play no part. They are rejected for the ideals of power, for the principle that the strong must rule the weak, that trade must follow the flag, whether those to whom it is taken welcome it or not, that the peoples of the world are to be made subject to the patronage and overlordship of those who have the power to enforce it.

"That programme once carried out, America and all who care or dare to stand with her must arm and prepare themselves to contest the mastery of the world, a mastery in which the rights of common men, the rights of women and of all who are weak, must for the time being be trodden under foot and disregarded, and the old, age-long struggle for freedom and right begin again at its beginning. Everything that America has lived for and loved and grown great to vindicate and bring to a glorious realization will have fallen in utter ruin and the gates of mercy once more pitilessly shut upon mankind!

"The thing is preposterous and impossible; and yet is not that what the whole course and action of the German armies has meant wherever they have moved? I do not wish, even in this moment of utter dis-

"I ACCEPT THE CHALLENGE."—"FORCE TO THE UTMOST."—*Continued.*

illusionment, to judge harshly or unrighteously. I judge only what the German arms have accomplished with unpitying thoroughness throughout every fair region they have touched.

"What, then, are we to do? For myself, I am ready, ready still, ready even now, to discuss a fair and just and honest peace at any time that it is sincerely purposed—a peace in which the strong and the weak shall fare alike. But the answer, when I proposed such a peace, came from the German commanders in Russia, and I cannot mistake the meaning of the answer.

"I ACCEPT THE CHALLENGE."

"I accept the challenge. I know that you accept it. All the world shall know that you accept it. It shall appear in the utter sacrifice and self-forgetfulness with which we shall give all that we love and all that we have to redeem the world and make it fit for free men like ourselves to live in. This now is the meaning of all that we do. Let everything that we say, my fellow countrymen, everything that we henceforth plan and accomplish, ring true to this response till the majesty and might of our concerted power shall fill the thought and utterly defeat the force of those who flout and misprize what we honor and hold dear. Germany has once more said that force, and force alone, shall decide whether justice and peace shall reign in the affairs of men, whether right as America conceives it or dominion as she conceives it shall determine the destinies of mankind.

"There is, therefore, but one response possible from us: Force, force to the utmost, force without stint or limit, the righteous and triumphant force which shall make right the law of the world, and cast every selfish dominion down in the dust."

"PUT THE WHOLE FORCE OF U. S. INTO THIS STRUGGLE."

THE President, on April 6, 1918, sent the following reply to King George of England, to the latter's greeting on the anniversary of America's entrance into the war. Mr. Wilson cabled: "Permit me to express the warm gratification with which your generous message has been received and to assure you that it is with the greatest satisfaction that the people of the United States find themselves side by side in this final war for free self-government with such steadfast and indomitable associates. Permit me also to assure Your Majesty that we shall continue to do everything possible to put the whole force of the United States into this great struggle."

The King had said in his message: "On the occasion of the anniversary of the momentous decision of the United States to enter this war for the guarding of international right and justice I desire to convey to you, Mr. President, and through you to the American people the friendly greetings of the entire British nation. At this critical hour when our enemies are sparing no sacrifice and counting no cost to the achievement of victory, the French and British troops stand united as never before in their heroic resistance to these endeavors. They are buoyed up with the thought that the great democracy of the west in the same spirit and with the same objects as their own is putting forth every effort to throw its supreme force into the struggle which will once for all decide destinies of free nations of the earth. The deeds of Americans on land and sea have already indicated to the enemy that his hope is vain. Every day that passes as American troops pour in ever increasing numbers into France diminishes the chances of his success. The American people may rest assured that the British Empire, now tried by nearly four years of war, will cheerfully make yet further sacrifices. The thought that the United States under your leadership are with us heart and soul emboldens us in the determination with God's help finally to destroy the designs of the enemy and to re-establish on earth the rule of right and justice."

U. S. ASSURES GREECE HER RIGHTS IN PEACE NEGOTIATIONS.

FOLLOWING is the text of a statement issued in Athens, in April, 1918, by the American Minister to Greece: "The people of the United States view with admiration the unselfishness and courage with which the Greek people, animated by that love of liberty and devotion to right which they have inherited from a long line of heroic ancestors, are fighting to preserve the freedom for which their patriotic forefathers valiantly fought. Claiming similar ideals and moved by the same principles of right and justice the government and people of the United States are determined that the fullest possible measure of assistance shall be rendered to Greece, and that her integrity shall be preserved and her rights secured in any final negotiations for peace that shall take place."

THE PRESIDENT PARDONS A SOLDIER SENTENCED TO DIE.

IF pardoning, on May 4, 1918, Private Jeff Cook, Company G, Sixteenth Infantry, who had been found guilty of sleeping at his sentry post, in France, President Wilson wrote on the papers in the case: "In view of the youth of Private Cook, and the fact that his offense seems to have been wholly free from disloyalty or conscious disregard of his duty, I hereby grant him a full and unconditional pardon, and direct that he report to his company for further military duty.

TELLS OF THE NEEDS OF DISCIPLINE.

"The needs of discipline in the army with propriety impose grave penalties upon those who imperil the safety of their fellows, and endanger their country's cause by lack of vigilance, or by infractions of rules in which safety has been found to rest. I am persuaded, however, that this young man will take the restored opportunity of his forfeited life as a challenge to devoted service for the future, and that the soldiers of the army of the United States in France will realize too keenly the high character of the cause for which they are fighting, and the confidence which their country reposes in them to permit the possibility of further danger from any similar shortcoming."

PRESIDENT'S PROCLAMATION, MAY 30, 1918, AS A DAY OF PRAYER.

WHEREAS, the Congress of the United States, on the second day of April last, passed the following resolution:

Resolved by the Senate (the House of Representatives concurring), that, it being a duty peculiarly incumbent in a time of war humbly and devoutly to acknowledge our dependence on Almighty God and to implore His aid and protection, the President of the United States be, and he is hereby, respectfully requested to recommend a day of public humiliation, prayer, and fasting, to be observed by the people of the United States with religious solemnity and the offering of fervent supplications to Almighty God for the safety and welfare of our cause, His blessings on our arms, and a speedy restoration of an honorable and lasting peace to the nations of the earth;

And whereas it has always been the reverent habit of the people of the United States to turn in humble appeal to Almighty God for His guidance in the affairs of their common life;

Now, therefore, I, Woodrow Wilson, President of the United States of America, do hereby proclaim Thursday, the thirtieth day of May, a day already freighted with sacred and stimulating memories, a day of public humiliation, prayer, and fasting, and do exhort my fellow citizens of all faiths and creeds to as-

PRESIDENT'S PROCLAMATION, MAY 30, 1918, AS A DAY OF PRAYER—*Continued.*

semble on that day in their several places of worship and there, as well as in their homes, to pray Almighty God that He may forgive our sins and shortcomings as a people and purify our hearts to see and love the truth, to accept and defend all things that are just and right, and to purpose only those righteous acts and judgments which are in conformity with His will; beseeching Him that He will give victory to our armies as they fight for freedom, wisdom to those who take counsel on our behalf in these days of dark struggle and perplexity, and steadfastness to our people to make sacrifice to the utmost in support of what is just and true, bringing us at last the peace in which men's hearts can be at rest because it is founded upon mercy, justice, and good will.

In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

Done in the District of Columbia this eleventh day of May, in the year of our Lord nineteen hundred and eighteen and of the independence of the United States the one hundred and forty-second.

By the President, Woodrow Wilson. Robert Lansing, Secretary of State.

WILSON'S RED CROSS ADDRESS.

(In which he declared, Saturday night, May 18, 1918, at New York, that the German peace approaches were insincere and that there would be no limit on the size of the American army going to France. The occasion was the opening of the Red Cross $100,000,000 campaign.)

The President said: "I have not come here to-night to review for you the work of the Red Cross; I am not competent to do so, because I have not had the time or the opportunity to follow it in detail. I have come here simply to say a few words to you as to what it all seems to me to mean. It means a great deal. There are two duties with which we are face to face. The first duty is to win the war, and the second duty, that goes hand in hand with it, is to win it greatly and worthily, showing the real quality of our power not only, but the real quality of our purpose and of ourselves. Of course, the first duty, the duty that we must keep in the foreground of our thought until it is accomplished, is to win the war. I have heard, gentlemen recently say that we must get 5,000,000 men ready. Why limit it to 5,000,000 I have asked the Congress of the United States to name no limit, because the Congress intends I am sure, as we all intend, that every ship that can carry men or supplies shall go laden upon every voyage with every man and every supply she can carry.

"And we are not to be diverted from the grim purpose of winning the war by any insincere approaches upon the subject of peace. I can say with a clear conscience that I have tested those intimations, and have found them insincere. I now recognize them for what they are, an opportunity to have a free hand, particularly in the East, to carry out purposes of conquest and exploitation. Every proposal with regard to accommodation in the West involves a reservation with regard to the East. Now, so far as I am concerned, I intend to stand by Russia as well as France. The helpless and the friendless are the very ones that need friends and succor, and if any man in Germany thinks we are going to sacrifice anybody for our own sake, I tell them now they are mistaken. For the glory of this war, my fellow citizens, so far as we are concerned, is that it is, perhaps for the first time in history, an unselfish war. I could not be proud to fight for a selfish purpose, but I can be proud to fight for mankind. If they wish peace, let them come forward through accredited representatives and lay their terms on the table. We have laid ours, and they know what they are. But behind all this grim purpose, my friends, lies the opportunity to demonstrate not only force, which will be demonstrated to the utmost, but the opportunity to demonstrate character, and it is that opportunity that we have most conspicuously in the work of the Red Cross. Not that our men in arms do not represent our character, for they do; and it is a character which those who see and realize appreciate and admire, but their duty is the duty of force. The duty of the Red Cross is the duty of mercy and succor and friendship.

"Have you formed a picture in your imagination of what this war is doing for us and for the world? In my own mind I am convinced that not a hundred years of peace could have knitted this nation together as this single year of war has knitted it together, and, better even than that if possible, it is knitting the world together. Look at the picture: In the centre of the scene four nations engaged against the world, and at every point of vantage showing that they are seeking selfish aggrandizement; and against them twenty-three governments representing the greater part of the population of the world drawn together into a new sense of community of interest, a new sense of community of purpose, a new sense of unity of life The Secretary of War told me an interesting incident the other day. He said that when he was in Italy a member of the Italian government was explaining to him the many reasons why Italy felt near to the United States. He said, 'If you want to try an interesting experiment go up to any one of these troop trains and ask in English how many of them have been in America, and see what happens.' He tried the experiment. He went up to a troop train and he said, 'How many of you boys have been in America?' and he said it seemed to him as if half of them sprang up and said: 'Me from San Francisco,' 'Me from New York—all over.' There was part of the heart of America in the Italian army—people that had been knitted to us by association, who knew us, who had lived among us, who had worked shoulder to shoulder with us, and now, friends of America, were fighting for their native Italy. Friendship is the only cement that will ever hold the world together. And this intimate contact of the great Red Cross with the peoples who are suffering the terrors and deprivations of this war is going to be one of the greatest instrumentalities of friendship that the world ever knew, and the centre of the heart of it all, if we sustain it properly, will be this land that we so dearly love.

"My friends, a great day of duty has come, and duty finds a man's soul as no kind of work can ever find it. May I say this? The duty that faces us all now is to serve one another, and no man can afford to make a fortune out of this war. There are men among us who have forgotten that, if they ever saw it. Some of you are old enough—I am old enough—to remember men who made fortunes out of the Civil War, and you know how they were regarded by their fellow citizens. That was a war to save one country; this is a war to save the world. And your relation to the Red Cross is one of the relations which will relieve you of the stigma. You can not give anything to the government of the United States; it will not accept it. There is a law of Congress against accepting even services without pay. The only thing that the government will accept is a loan, and duties performed; but it is a great deal better to give than to lend or to pay, and your great channel for giving is the American Red Cross. Down in your hearts you cannot take very much satisfaction in the last analysis in lending money to the government of the United States, because the interest which you draw will burn your pockets. It is a commercial transaction, and some men have even dared to cavil at the rate of interest, not knowing the incidental commentary that constitutes upon their attitude. But when you give, something of your heart, something of your soul, something of yourself goes with the gift, particularly when it is given in such form that it never can come back by way of direct benefit to yourself. You know there is the old cynical definition of gratitude, as 'the lively expectation of favors to come.' Well, there is no expectation of favors to come in this kind of giving. These things are bestowed in order that the world may be a fitter place to live in, that men may be succored, that homes may be restored, that suffering may be relieved, that the face of the earth may have the blight of destruction taken away from it, and that wherever force goes there shall go mercy and helpfulness. And when you give, give absolutely all that you can spare, and do not consider yourself liberal in the giving. If you give with self-adulation, you are not giving at all—you are giving to your own vanity. But if you give until it hurts, then your heart blood goes into it. Think what we have here! We call it the American Red Cross,

PRESIDENT WILSON'S RED CROSS ADDRESS—*Continued.*

but it is merely a branch of a great international organization, which is not only recognized by the statutes of each of the civilized governments of the world, but it is recognized by international agreement and treaty as the recognized and accepted instrumentality of mercy and succor.

"And one of the deepest stains that rests upon the reputation of the German army is that they have not respected the Red Cross. That goes to the root of the matter. They have not respected the instrumentality they themselves participated in setting up as the thing which no man was to touch because it was the expression of common humanity. We are members, by being members of the American Red Cross, of a great fraternity and comradeship which extends all over the world; and this cross which these ladies bear to-day is an emblem of Christianity itself. It fills my imagination, ladies and gentlemen, to think of the women all over this country who are busy to-night and are busy every night and every day doing the work of the Red Cross, busy with a great eagerness to find out the most serviceable thing to do, busy with a forgetfulness of all the old frivolities of their social relationships, ready to curtail the duties of the household in order that they may contribute to this common work that all their hearts are engaged in, and in doing which their hearts become acquainted with each other. When you think of this you realize how the people of the United States are being drawn together into a great intimate family whose heart is being used for the service of the soldiers not only, but for the service of civilians where they suffer and are lost in a maze of distress and distractions. And you have, then, this noble picture of justice and mercy as the two servants of liberty. For only where men are free do they think the thoughts of comradeship; only where they are free do they think the thoughts of sympathy; only where they are free are they mutually helpful; only where they are free do they realize their dependence upon one another and their comradeship in a common interest and common necessity. I heard a story told the other day that was ridiculous, but it is worth repeating, because it contains the germ of truth. An Indian was enlisted in the army. He returned to the reservation on a furlough. He was asked what he thought of it. He said: 'No much good. Too much salute, not much shoot.' Then he was asked: 'Are you going back?' 'Yes.' 'Well, do you know what you are fighting for?' 'Yes, me know; fight to make whole damn world Democratic Party.' He had evidently misunderstood some innocent sentence of my own. But after all, although there is no party purpose in it, he got it right as far as the word 'party;' to make the whole world democratic in the sense of community of interest and of purpose; and if you ladies and gentlemen could read some of the touching despatches which come through official channels (for even through those channels there come voices of humanity that are infinitely pathetic); if you could catch some of those voices that speak the utter longing of oppressed and helpless peoples all over the world, to hear something like the Battle Hymn of the Republic, to hear the feet of the great hosts of liberty coming to set them free, to set their minds free, set their lives free, set their children free—you would know what comes into the heart of those who are trying to contribute all the brains and power they have to this great enterprise of liberty.

"I summon you to the comradeship. I summon you in this next week to say how much and how sincerely and how unanimously you sustain the heart of the world."

U. S. REJOICES TO BE COMRADE WITH FRANCE.

THE President sent, May 21, 1918, the following message to the French people through Mr. James Kerney, Paris representative of the Committee on Public Information: "The people of the United States rejoice to find themselves comrades with the people of France in a war in which every man who loves the right must be proud to take part. For more than a hundred years they have desired the opportunity which has now come to them to give the French people some proof of their gratitude and friendship. There is added now in their hearts a deep and ardent admiration of the heroism and devotion which the people of France have exhibited in this terrible final grapple between liberty and cruel force. Their hearts go with their armies to the bloody fields of gallant France. They are your brothers in a great and sacred common cause.—Woodrow Wilson."

"WITH EVER INCREASING RESOLUTION AND FORCE."

ON May 23, 1918, the President sent the following message to the Italian people: "I am sure that I am speaking for the people of the United States in sending to the Italian people warm fraternal greetings upon this the anniversary of the entrance of Italy into this great war in which there is being fought out once for all the irrepressible conflict between free self-government and the dictation of force. The people of the United States have looked with profound interest and sympathy upon the efforts and sacrifices of the Italian people, are deeply and sincerely interested in the present and future security of Italy, and are glad to find themselves associated with a people to whom they are bound by so many personal and intimate ties in a struggle whose object is liberation, freedom, the rights of men and nations to live their own lives and determine their own fortunes, the rights of the weak as well as of the strong, and the maintenance of justice by the irresistible force of free nations leagued together in the defense of mankind. With ever increasing resolution and force we shall continue to stand together in this sacred common cause. America salutes the gallant kingdom of Italy and bids her godspeed.—Woodrow Wilson."

The King of Italy, on the same day, cabled to Mr. Wilson: "On the occasion of Italy's entrance into the war, which your country is commemorating, I have the pleasure of sending to you, Mr. President, and to the American people my warm greetings and those of the Italian nation. It is now three years since Italy unsheathed her sword in the defense of the same ideals to which the mighty North American Republic later brought the powerful aid of its moral and physical support. The conscience of the nation rebelling against any attempt to overwhelm, no matter whence it might come, drove Italy to the side of the peoples who are fighting for the sacred principles of right which we want to have embodied in the liberation of our brothers laboring under the foreign yoke and in the vindication of our legitimate right to live in safety, without which no stable peace can be secured for the future. On the fields of battle in France the brotherhood of the North American and Italian armies has found its consecration. May this be the happy augury of the ever closer collaboration for the future of the two peoples on the active path of civic progress.—Vittorio Emanuele."

"FULL VINDICATION OF THE CAUSE OF FREEDOM."

MR. WILSON, answering, May 25, 1918, a cable message of gratitude from the King of Belgium, said: "Your Majesty's generous message has been read with deep pleasure and appreciation, and I beg to assure you that nothing that the American Red Cross or the body of my fellow citizens have done has been done more truly from the heart than the aid, all too little, which they have been able to render the gallant and suffering people of Belgium. We feel our common dependence with them upon the full vindication of the cause of freedom."

The King had cabled: "I would not fail to take the opportunity afforded me by the second appeal for funds in favor of the American Red Cross to express to you all my people's gratitude for the splendid generosity displayed by the American nation toward the army and the civil population of Belgium. Both the material help given and the friendship of your great nation will always be remembered. I am glad to say how useful the work done by Col. Bicknell, Major Van Schaick, and the commission for Belgium has already been and to pay a tribute to their valuable and efficient activity. The relationship between our peoples, cemented in this time of suffering, will strengthen confidence, sympathy, and good will and increase the devotion of every citizen of the allied countries to the sacred cause of liberty and justice."

"AT THE CRISIS OF THE WAR."

IN asking Congress, at a joint session, May 27, 1918, for further war taxes, the President said: "The consideration that dominates every other now, and makes every other seem trivial and negligible, is the winning of the war. We are not only in the midst of the war, we are at the very peak and crisis of it. Hundreds of thousands of our men, carrying our hearts with them and our fortunes, are in the field, and ships are crowding faster and faster to the ports of France and England with regiment after regiment, thousand after thousand, to join them until the enemy shall be beaten and brought to a reckoning with mankind. There can be no pause or intermission. The great enterprise must, on the contrary, be pushed with greater and greater energy. The volume of our might must steadily and rapidly be augmented until there can be no question of resisting it. If that is to be accomplished, gentlemen, money must sustain it to the utmost. Our financial programme must no more be left in doubt or suffered to lag than our ordnance programme or our ship programme or our munitions programme or our programme for making millions of men ready. These others are not programmes, indeed, but mere plans upon paper, unless there is to be an unquestionable supply of money. That is the situation, and it is the situation which creates the duty, no choice or preference of ours. There is only one way to meet that duty. We must meet it without selfishness or fear of consequences. Politics is adjourned. The elections will go to those who think least of it; to those who go to the constituencies without explanations or excuses, with a plain record of duty faithfully and disinterestedly performed. I, for one, am always confident that the people of this country will give a just verdict upon the service of the men who act for them when the facts are such that no man can disguise or conceal them. There is no danger of deceit now. An intense and pitiless light beats upon every man and every action in this tragic plot of war that is now upon the stage. If lobbyists hurry to Washington to attempt to turn what you do in the matter of taxation to their protection or advantage, the light will beat also upon them. There is abundant fuel for the light in the records of the Treasury with regard to profit of every sort. The profiteering that can not be got at by the restraints of conscience and love of country can be got at by taxation. There is such profiteering now and the information with regard to it is available and indisputable.

* * * * *

"Have you not felt the spirit of the Nation rise and its thought become a single and common thought since these eventful days came in which we have been sending our boys to the other side? I think you must read that thought, as I do, to mean this, that the people of this country are not only united in the resolute purpose to win this war, but are ready and willing to bear any burden and undergo any sacrifice that it may be necessary for them to bear in order to win it. We need not be afraid to tax them, if we lay taxes justly. They know that the war must be paid for and that it is they who must pay for it, and if the burden is justly distributed and the sacrifice made a common sacrifice from which none escape who can bear it at all, they will carry it cheerfully and with a sort of solemn pride. I have always been proud to be an American, and was never more proud than now, when all that we have said and all that we have foreseen about our people is coming true. The great days have come when the only thing that they ask for or admire is duty greatly and adequately done; when their only wish for America is that she may share the freedom she enjoys; when a great, compelling sympathy wells up in their hearts for men everywhere who suffer and are oppressed; and when they see at last the high uses for which their wealth has been piled up and their mighty power accumulated and, counting neither blood nor treasure now that their final day of opportunity has come, rejoice to spend and to be spent through a long night of suffering and terror in order that they and men everywhere may see the dawn of a day of righteousness and justice and peace. Shall we grow weary when they bid us act?

"May I add this word, gentlemen? Just as I was leaving the White House I was told that the expected drive on the western front had apparently begun. You can realize how that solemnized my feeling as I came to you and how it seemed to strengthen the purpose which I have tried to express in these lines. I have admired the work of this session. The way in which the two houses of the Congress have co-operated with the Executive has been generous and admirable, and it is not in any spirit of suggesting duty neglected, but only to remind you of the common cause and the common obligation, that I have ventured to come to you, to-day."

"INDIVIDUAL THRIFT A PATRIOTIC DUTY."

THE President said, May 30, 1918, in an appeal to the people to buy Liberty bonds and War Savings Stamps: "This war is one of nations—not of armies—and all of our one hundred million people must be economically and industrially adjusted to war conditions if this nation is to play its full part in the conflict. The problem before us is not, primarily, a financial problem, but rather a problem of increased production of war essentials and the saving of the materials and the labor necessary for the support and equipment of our army and navy. Thoughtless expenditure of money for non-essentials uses up the labor of men, the products of the farm, mines, and factories, and overburdens transportation, all of which must be used to the utmost and at their best for war purposes. The great results which we seek can be obtained only by the participation of every member of the Nation, young and old, in a national concerted thrift movement. I therefore urge that our people everywhere pledge themselves, as suggested by the Secretary of the Treasury, to the practice of thrift; to serve the Government to their utmost in increasing production in all fields necessary to the winning of the war; to conserve food and fuel and useful materials of every kind; to devote their labor only to the most necessary tasks; and to buy only those things which are essential to individual health and efficiency; and that the people, as evidence of their loyalty, invest all that they can save in Liberty bonds and War Savings Stamps. The securities issued by the Treasury Department are so many of them within the reach of every one that the door of opportunity in this matter is wide open to all of us.

"To practice thrift in peace times is a virtue and brings great benefit to the individual at all times: with the desperate need of the civilized world to-day for materials and labor with which to end the war, the practice of individual thrift is a patriotic duty and a necessity."

WILSON'S ADDRESS TO MEXICAN EDITORS.

FOLLOWING is the text of the President's speech, at the White House, June 7, 1918, to a party of Mexican editors: "Gentlemen, I have never received a group of men who were more welcome than you are, because it has been one of my distresses during the period of my Presidency that the Mexican people did not more thoroughly understand the attitude of the United States toward Mexico. I think I can assure you, and I hope you have had every evidence of the truth of my assurance, that that attitude is one of sincere friendship. And not merely the sort of friendship which prompts one not to do his neighbor any harm, but the sort of friendship which earnestly desires to do his neighbor service. My own policy, the policy of my own administration, toward Mexico was at every point based upon this principle, that the internal settlement of the affairs of Mexico was none of our business; that we had no right to interfere with or to dictate to Mexico in any particular with regard to her own affairs. Take an aspect of our relations which at one time may have been difficult for you to understand: When we sent troops into Mexico, our sincere desire was nothing else than to assist you to get rid of a man who was making the settlement of your affairs for the time being impossible. We had no desire to use our troops for any other purpose, and I was in hopes that

ly assisting in that way and then immediately withdrawing I might give substantial proof of the truth of the assurances that I had given your government through President Carranza.

"And at the present time it distresses me to learn that certain influences, which I assume to be German in their origin, are trying to make a wrong impression throughout Mexico as to the purpose of the United States, and not only a wrong impression, but to give an absolutely untrue account of things that happen. You know the distressing things that have been happening just off our coasts. You know of the vessels that have been sunk. I yesterday received a quotation from a paper in Guadalajara which stated that thirteen of our battleships had been sunk off the capes of the Chesapeake. You see how dreadful it is to have people so radically misinformed. It was added that our Navy Department was withholding the truth with regard to these sinkings. I have no doubt that the publisher of the paper published that in perfect innocence without intending to convey wrong impressions, but it is evident that allegations of that sort proceed from those who wish to make trouble between Mexico and the United States.

"Now, gentlemen, for the time being, at any rate—and I hope it will not be a short time—the influence of the United States is somewhat pervasive in the affairs of the world, and I believe that it is pervasive because the nations of the world which are less powerful than some of the greatest nations are coming to believe that our sincere desire is to do disinterested service. We are the champions of those nations which have not had a military standing which would enable them to compete with the strongest nations in the world, and I look forward with pride to the time, which I hope will soon come, when we can give substantial evidence, not only that we do not want anything out of this war, but that we would not accept anything out of it, that it is absolutely a case of disinterested action. And if you will watch the attitude of our people, you will see that nothing stirs them so deeply as assurances that this war, so far as we are concerned, is for idealistic objects. One of the difficulties that I experienced during the first three years of the war—the years when the United States was not in the war—was in getting the Foreign Offices of European nations to believe that the United States was seeking nothing for herself, that her neutrality was not selfish, and that if she came in, she would not come in to get anything substantial out of the war, any material object, any territory, or trade, or anything else of that sort. In some of the Foreign Offices there were men who personally knew me and they believed, I hope, that I was sincere in assuring them that our purposes were disinterested, but they thought that these assurances came from an academic gentleman removed from the ordinary sources of information and speaking the idealistic purposes of the cloister. They did not believe that I was speaking the real heart of the American people, and I knew all along that I was. Now I believe that everybody who comes into contact with the American people knows that I am speaking their purposes.

RUSSIA.

"The other night in New York, at the opening of the campaign for funds for our Red Cross, I made an address. I had not intended to refer to Russia, but I was speaking without notes and in the course of what I said my own thought was led to Russia, and I said that we meant to stand by Russia just as firmly as we would stand by France or England or any other of the Allies. The audience to which I was speaking was not an audience from which I would have expected an enthusiastic response to that. It was rather too well dressed. It was not an audience, in other words, made of the class of people whom you would suppose to have the most intimate feeling for the sufferings of the ordinary man in Russia, but that audience jumped into the aisles, the whole audience rose to its feet, and nothing that I had said on that occasion aroused anything like the enthusiasm that that single sentence aroused. Now, there is a sample, gentlemen. We can not make anything out of Russia. We can not make anything out of standing by Russia at this time—the most remote of the European nations, so far as we are concerned, the one with which we have had the least connections in trade and advantage—and yet the people of the United States rose to that suggestion as to no other that I made in that address. That is the heart of America, and we are ready to show you by any act of friendship that you may propose our real feelings toward Mexico.

"Some of us, if I may say so privately, look back with regret upon some of the more ancient relations that we have had with Mexico long before our generation; and America, if I may so express it, would now feel ashamed to take advantage of a neighbor. So I hope that you can carry back to your homes something better than the assurances of words. You have had contact with our people. You know your own personal reception. You know how gladly we have opened to you the doors of every establishment that you wanted to see and have shown you just what we were doing, and I hope you have gained the right impression as to why we were doing it. We are doing it, gentlemen, so that the world may never hereafter have to fear the only thing that any nation has to dread, the unjust and selfish aggression of another nation. Some time ago, as you probably all know, I proposed a sort of Pan-American agreement. I had perceived that one of the difficulties of our relationship with Latin America was this: The famous Monroe Doctrine was adopted without your consent, without the consent of any of the Central or South American states.

"If I may express it in the terms that we so often use in this country, we said, 'We are going to be your big brother, whether you want us to be or not.' We did not ask whether it was agreeable to you that we should be your big brother. We said we were going to be. Now, that was all very well so far as protecting you from aggression from the other side of the water was concerned, but there was nothing in it that protected you from aggression from us, and I have repeatedly seen the uneasy feeling on the part of representatives of the states of Central and South America that our self-appointed protection might be for our own benefit and our own interests and not for the interest of our neighbors. So I said, 'Very well, let us make an arrangement by which we will give bond. Let us have a common guarantee, that all of us will sign, of political independence and territorial integrity. Let us agree that if any one of us, the United States included, violates the political independence or the territorial integrity of any of the others, all the others will jump on her. I pointed out to some of the gentlemen who were less inclined to enter into this arrangement than others that that was in effect giving bonds on the part of the United States that we would enter into an arrangement by which you would be protected from us.

"Now, that is the kind of agreement that will have to be the foundation of the future life of the nations of the world, gentlemen. The whole family of nations will have to guarantee to each nation that no nation shall violate its political independence or its territorial integrity. That is the basis, the only conceivable basis, for the future peace of the world, and I must admit that I was ambitious to have the states of the two continents of America show the way to the rest of the world as to how to make a basis of peace. Peace can come only by trust. As long as there is suspicion there is going to be misunderstanding, and as long as there is misunderstanding there is going to be trouble. If you can once get a situation of trust then you have got a situation of permanent peace. Therefore, every one of us, it seems to me, owes it as a patriotic duty to his own country to plant the seeds of trust and of confidence instead of the seeds of suspicion and variety of interest. That is the reason that I began by saying to you that I have not had the pleasure of meeting a group of men who were more welcome than you are, because you are our near neighbors. Suspicion on your part or misunderstanding on your part distresses us more than we would be distressed by similar feelings on the part of those less nearby.

"When you reflect how wonderful a storehouse of treasure Mexico is, you can see how her future must depend upon peace and honor, so that nobody shall exploit her. It must depend upon every nation that has any relations with her, and the citizens of any nation that has relations with her, keeping within the bounds of honor and fair dealing and justice, because so soon as you can admit your own capital and the capital of the world to the free use of the resources of Mexico, it will be one of the most wonderfully rich and prosperous countries in the world. And when you have the foundations of established order, and the world has come to its senses again, we shall, I hope, have the very best connections that will assure us all a permanent cordiality and friendship."

MEXICAN OIL LANDS COMPLAINT.

WHEN the text of the President's address to the Mexican editors was telegraphed to Mexico City, some of the newspapers there complained that the sentiments did not agree with those contained in a note which the American Ambassador, Henry P. Fletcher, had delivered to the Mexican Government on April 2, 1918, protesting against the new Mexican tax on oil lands and on oil contracts prior to May 1, 1917, under a decree of February 19, 1918. To this complaint the State Department at Washington made answer in a public statement, saying: "An examination of the note proves that all that the United States asks for its citizens who have made investments in Mexico, relying on the good faith and justice of the Mexican Government and Mexican laws, is justice and fair dealing. There is no disposition on the part of the United States Government to interfere in the internal affairs of Mexico. However, the seizure of property at the will of the sovereign without due legal process equitably administered and without provision for just compensation has always been regarded as a denial of justice and a cause for diplomatic representation. The President in his speech referring to Mexico's future said: 'It must depend upon every nation that has any relations with her, and the citizens of any nation that has relations with her, keeping within the bounds of honor and fair dealing and justice, because so soon as you can admit your own capital and the capital of the world to the free use of the resources of Mexico it will be one of the most wonderfully rich and prosperous countries in the world.' The President further pointed out that the basis for the future relations of nations was trust, and said: 'As long as there is suspicion there is going to be misunderstanding, and as long as there is misunderstanding there is going to be trouble. If you can once get a situation of trust then you have got a situation of permanent peace.' The United States always desires to accord to the Mexican Government and people justice and fair dealing, and it is confident that it will be accorded the same justice and the same fair dealing in return."

Secretary Lansing at the same time made public Ambassador Fletcher's note to President Carranza, in which the former asserted that the imposition of a tax on the surface of oil lands, together with the separate and additional tax on the rents, royalties and production derived therefrom, was a move toward, if not actual, confiscation of American oil interests in Mexico.

"NO INTRIGUES OF THE ENEMY CAN EVER DIVIDE OUR UNITY."

IN a telegram, June 10, 1918, to the American Federation of Labor convention, at St. Paul, President Wilson said: "Please convey to the thirty-eighth annual convention of the American Federation of Labor my congratulations upon the patriotic support which the members of your organization have given to the war programme of the nation in the past year, not only in the trenches and on the battlefield, where so many of our younger men are now in uniform, but equally in the factories and shipyards and workshops of the country, where the army is supported and supplied by the loyal industry of your skilled craftsmen. We are facing the hardships of the crucial months of the struggle. The nation can face them confidently, assured, now, that no intrigues of the enemy can ever divide our unity by means of those industrial quarrels, and class dissensions which he has tried so diligently to foment. In these days of trial and self-sacrifice the American workingman is bearing his share of the national burden nobly. In the new world of peace and freedom which America is fighting to establish his place will be as honored and his service as gratefully esteemed."

"JUSTICE IS OF THE ESSENCE OF NATIONAL DEFENSE."

IN a telegram, June 10, 1918, to the convention at St. Paul of the American Alliance for Labor and Democracy, President Wilson said: "The war can be lost in America as well as on the fields of France, and ill-considered or unjustified interruptions of the essential labor of the country may make it impossible to win it. No controversy between capital and labor should be suffered to interrupt it until every instrumentality set up by the Government for its amicable settlement has been employed and its intermediation heeded to the utmost; and the Government has set up instrumentalities wholly fair and adequate. And this duty to avoid such interruptions of industry wherever they can be avoided without the actual sacrifice of essential rights rests upon the employer as imperatively as upon the workman. No man can afford to do injustice at any time, but at this time justice is of the essence of national defense, and contests for any sort of advantage that at other times would be justified may now jeopard the very life of the Nation."

WILSON ON WOMAN SUFFRAGE—FAVORING THE SAME.

THE President, in answering, June 13, 1918 (through Mrs. Carrie Chapman Catt, head of the National American Woman Suffrage Association, the memorial of the French Union for Woman Suffrage Union Francaise Nour le Suffrage des Dames), presented to him February 1, 1918, said: "I have read your message with the deepest interest and I welcome the opportunity to say that I agree without reservation that the full and sincere democratic reconstruction of the world for which we are striving, and which we are determined to bring about at any cost, will not have been completely or adequately attained until women are admitted to the suffrage, and that only by that action can the nations of the world realize for the benefit of future generations the full ideal force of opinion, or the full humane forces of action. The services of women during this supreme crisis of the world's history have been of the most signal usefulness and distinction. The war could not have been fought without them, or its sacrifices endured. It is high time that some part of our debt of gratitude to them should be acknowledged and paid, and the only acknowledgment they ask is their admission to the suffrage. Can we justly refuse it? As for America, it is my earnest hope that the Senate of the United States will give an unmistakable answer to this question by passing the suffrage amendment to our Federal Constitution before the end of this session."

"FORCES OF FREEDOM MADE OVERWHELMING."

PRESIDENT WILSON cabled as follows, June 14, 1918, to President Poincaré of France, answering the latter's congratulations on Gen. Pershing's achievements: "I am sure that I am expressing the feeling of the people of the United States as well as my own when I say that it is with increasing pride and gratification that they have seen their forces under Gen. Pershing more and more actively co-operating with the forces of liberation on French soil. It is their fixed and unalterable purpose to send men and materials in steady and increasing volume until any temporary inequality of force is entirely overcome and the forces of freedom made overwhelming, for they are convinced that it is only by victory that peace can be achieved and the world's affairs settled upon a basis of enduring justice and right. It is a constant satisfaction to them to know that in this great enterprise they are in close and intimate co-operation with the people of France."

ASKS EMPLOYERS TO RECRUIT LABOR THROUGH FEDERAL AGENCIES.

THE President, in a public statement, June 17, 1918, asked employers to recruit labor only through the United States Employment Service of the Department of Labor, said: "For more than a year it has been our pride that not our armies and navies only but our whole people is engaged in a righteous war. We have said repeatedly that industry plays as essential and honorable a role in this great struggle as do

ASKS EMPLOYERS TO RECRUIT LABOR THROUGH FEDERAL AGENCIES—*Continued.*

our military armaments. We all recognize the truth of this, but we must also see its necessary implications —namely, that industry, doing a vital task for the nation, must receive the support and assistance of the nation. We must recognize that it is a natural demand—almost a right of anyone serving his country, whether employer or employee, to know that his service is being used in the most effective manner possible. In the case of labor this wholesome desire has been not a little thwarted owing to the changed conditions which war has created in the labor market. There has been much confusion as to essential products. There has been ignorance of conditions—men have gone hundreds of miles in search of a job and wages which they might have found at their doors. Employers holding government contracts of the highest importance have competed for workers with holders of similar contracts, and even with the government itself, and have conducted expensive campaigns for recruiting labor in sections where the supply of labor was already exhausted. California draws its unskilled labor from as far east as Buffalo, and New York from as far west as the Mississippi. Thus labor has been induced to move fruitlessly from one place to another, congesting the railways and losing both time and money.

"Such a condition is unfair alike to employer and employee, but most of all to the nation itself, whose existence is threatened by any decrease in its productive power. It is obvious that this situation can be clarified and equalized by a central agency—the United States Employment Service of the Department of Labor, with the counsel of the War Labor Policies Board—as the voice of all the industrial agencies of the government. Such a central agency must have sole direction of all recruiting of civilian workers in war work; and, in taking over this great responsibility, must at the same time have power to assure to essential industry an adequate supply of labor, even to the extent of withdrawing workers from non-essential production. It must also protect labor from insincere and thoughtless appeals made to it under the plea of patriotism, and assure it that when it is asked to volunteer in some priority industry the need is real.

"Therefore, I, Woodrow Wilson, President of the United States of America, solemnly urge all employers engaged in war work to refrain after August 1, 1918, from recruiting unskilled labor in any manner, except through this central agency. I urge labor to respond as loyally as heretofore to any calls issued by this agency for voluntary enlistment in essential industry. And I ask them both alike to remember that no sacrifice will have been in vain, if we are able to prove beyond all question that the highest and best form of efficiency is the spontaneous co-operation of a free people."

GERMANY'S IDEAS IN JUNE, 1918, AS TO PEACE TERMS.

THE following statement in the Reichstag, June 24, by Foreign Secretary von Kühlmann, in a debate on the budget, was followed July 4 by President Wilson's "no compromise" declarations to the diplomatic corps at Mount Vernon. Dr. von Kühlmann said in his speech on the budget:

"At no moment of our later history was there less occasion for us to start or contribute to the starting of a conflagration than the moment in which it occurred. In a former debate I pointed out that the absolute integrity of the German Empire and its allies formed the necessary prerequisite condition for entering into a peace discussion or negotiations. That is our position to-day. From England the reproach is constantly made that we are not prepared on a hint from England to state our attitude publicly on the Belgian question. On this point the fundamental views of the Imperial Government differ from those ascribed to us by English statesmen. We regard Belgium as one question in the entire complex. We must, however, decline to make, as it were, a prior concession by giving a statement on the Belgian question which would bind us without in the least binding the enemy. Despite the brilliant successes of our arms, there has been nowhere clearly recognizable among our enemies any readiness for peace. The German Government has repeatedly laid down its standpoint in declarations intended for the widest publicity. Our enemies have nothing to show that can in any degree compare with the German peace offer, with the resolution of this house, or with the reply to the Papal note.

"The declarations of our enemies, especially of English statesmen, allow as yet no peaceful ray of light to fall on the darkness of this war. I do not believe that any responsible man in Germany, not even the Kaiser or the member of the Imperial Government, even for a moment believed they could win the domination in Europe by starting this war. The idea of world domination in Europe is a Utopia, as proved by Napoleon. The nation which tried it would, as happened to France, bleed to death in useless battle and would be most grievously injured and lowered in her development. One may here apply von Moltke's phrase, 'Woe to him who sets Europe afire.' Mr. Balfour, moreover, by way of precaution, has added that we must in no way imagine that any agreement on the Belgian question exhausts the stock of English or Entente wishes. He prudently abstained from describing those points in which he intends to announce more far-reaching claims or desires. The supposition is not unjustified by previous experiences that while these words on the one hand were addressed to Paris, on the other hand covetous desires floated across the Mediterranean to the parts of Palestine and Mesopotamia at present occupied by the British troops. I hear already the justification which will be duly given for such desires, namely, that England could not possibly make such sacrifices of blood and treasure without reserving for herself most of the gains.

"As regards the probable course of events, the Imperial Chancellor and I have previously declared that in the present stage of development far-going advances on the road to peace can hardly any longer be expected from public statements which we shout to each other from the speakers' tribune. We too can adopt the words spoken by Mr. Asquith. (Mr. Asquith said Great Britain would listen to peace proposals not in ambiguous terms.) We likewise can make the same declaration, knowing that it is also our policy. Once the moment arrives—when, I cannot prophesy—that the nations which are at present locked in battle will exchange peace views, one of the preliminary conditions must be a certain degree of mutual confidence in each other's honesty and chivalry. For so long as every overture is regarded by others as a peace offensive, as a trap or as something false for the purpose of sowing disunion between the allies, so long as every attempt at a rapprochement is at once violently denounced by the enemies of a rapprochement in the various countries, so long will it be impossible to see how any exchange of ideas leading to peace can be begun. Our position on the battlefields, our enormous military resources and the situation and determination at home permit us to use such language. We hope that our enemies will perceive that, in view of our resources, the idea of victory for the Entente is a dream, an illusion, and that they will in due course find a way to approach us with peace offers which will correspond with the situation and satisfy Germany's vital needs. I consider it necessary to say quite simply and in a way easy for all to understand what our positive desires are.

"We wish for the German people and our allies a free, strong, independent existence within the boundaries drawn for us by history. We desire overseas possessions corresponding to our greatness and wealth; the freedom of the sea, carrying our trade to all parts of the world. These, in brief, are our roughly sketched aims, the realization of which is absolutely vital and necessary for Germany.

"I believe that one can say without fear of contradiction, as the result of revelations, that the deeper we go into the causes of this war the clearer it becomes that the power which planned and desired the war was Russia; that France played the next worse role as instigator, and that England's policy has very dark pages to show. England's attitude in the days before the outbreak of the war was bound to strengthen Russia's desire for war. Of this there are proofs enough in the documents already published. On the other hand, Germany did not for an instant believe that this war could lead to the domination of Europe, much less to the domination of the world. On the contrary, the German policy before the war showed good pros-

GERMANY'S IDEAS IN JUNE, 1918, AS TO PEACE TERMS—*Continued.*

pects of being able satisfactorily to realize its essential aims, namely, the settlement of affairs in the East and colonial problems by peaceful negotiations."

Of the general outlook von Kühlmann said: "When one makes a wide survey of events one must ask. Will the war, according to human calculation, last beyond autumn and winter or beyond next year? There is a common idea among the public that the length of the war is something absolutely new, as if authoritative quarters had in our time never reckoned on a very long war. This idea is incorrect."

Von Kühlmann quoted the words which Field Marshal von Moltke uttered in the Reichstag on May 14, 1890, that if war were to break out its duration and end could not be calculated. He continued to quote from von Moltke as follows: "The greatest powers in Europe, armed as never before, enter conflict with one another. Not one of them can, in one or two campaigns, be so completely beaten that it will declare itself vanquished and be compelled to conclude peace on hard terms, and that it would not raise itself up again to renew the battle even if only after a year. It can become a Seven Years', a Thirty Years' War, and woe to him who first throws a match into the barrel of powder."

"Since the old master of German strategy made this statement," continued von Kühlmann, "conditions have altered only in the sense that the powers taking part in the war have further enormously increased their armaments and that, not only as then appeared probable, the powers of Europe but also the great overseas powers like Japan and America have joined in the conflict."

"THERE CAN BE NO COMPROMISE."

(PRESIDENT WILSON'S speech to the Diplomatic Corps, July 4, 1918, at the exercises at Washington's tomb, Mt. Vernon.)

"I am happy to draw apart with you to this quiet place of old counsel in order to speak a little of the meaning of this day of our nation's independence. The place seems very still and remote. It is as serene and untouched by the hurry of the world as it was in those great days long ago when Gen. Washington was here and held leisurely conference with the men who were to be associated with him in the creation of a nation. From these gentle slopes they looked out upon the world and saw it whole, saw it with the light of the future upon it, saw it with modern eyes that turned away from a past which men of liberated spirits could no longer endure. It is for that reason that we cannot feel, even here, in the immediate presence of this sacred tomb, that this is a place of death. It was a place of achievement. A great promise that was meant for all mankind was here given plan and reality. The associations by which we are here surrounded are the inspiring associations of that noble death which is only a glorious consummation. From this green hillside we also ought to be able to see with comprehending eyes the world that lies about us and should conceive anew the purposes that must set men free.

"It is significant, significant of their own character and purpose and of the influences they were setting afoot, that Washington and his associates, like the barons at Runnymede, spoke and acted, not for a class, but for a people. It has been left for us to see to it that it shall be understood that they spoke and acted, not for a single people only, but for all mankind. They were thinking, not of themselves and of the material interests which centred in the little groups of landholders and merchants and men of affairs with whom they were accustomed to act, in Virginia and the colonies to the north and south of her, but of a people which wished to be done with classes and special interests and the authority of men whom they had not themselves chosen to rule over them. They entertained no private purpose, desired no peculiar privilege. They were consciously planning that men of every class should be free and America a place to which men out of every nation might resort who wished to share with them the rights and privileges of free men. And we take our cue from them, do we not? We intend what they intended. We here in America believe our participation in this present war to be only the fruitage of what they planted. Our case differs from theirs only in this: That it is our inestimable privilege to concert with men out of every nation what shall make not only the liberties of America secure but the liberties of every other people as well. We are happy in the thought that we are permitted to do what they would have done had they been in our place. There must now be settled once for all what was settled for America in the great age upon whose inspiration we draw to-day. This is surely a fitting place from which calmly to look out upon our task, that we may fortify our spirits for its accomplishment. And this is the appropriate place from which to avow, alike to the friends who look on and to the friends with whom we have the happiness to be associated in action, the faith and purpose with which we act.

"This, then, is our conception of the great struggle in which we are engaged. The plot is written plain upon every scene and every act of the supreme tragedy. On the one hand, stand the peoples of the world—not only the peoples actually engaged, but many others also who suffer under mastery but can not act; peoples of many races and in every part of the world—the people of stricken Russia still, among the rest, though they are for the moment unorganized and helpless. Opposed to them, masters of many armies, stand an isolated, friendless group of governments who speak no common purpose, but only selfish ambitions of their own by which none can profit but themselves, and whose peoples are fuel in their hands; governments which fear their people and yet are for the time their sovereign lords, making every choice for them and disposing of their lives and fortunes as they will, as well as of the lives and fortunes of every people who fall under their power—governments clothed with the strange trappings and the primitive authority of an age that is altogether alien and hostile to our own. The past and the present are in deadly grapple and the peoples of the world are being done to death between them. There can be but one issue. The settlement must be final. There can be no compromise. No halfway decision would be tolerable. No halfway decision is conceivable. These are the ends for which the associated peoples of the world are fighting and which must be conceded them before there can be peace:

"I. The destruction of every arbitrary power anywhere that can separately, secretly, and of its single choice disturb the peace of the world; or, if it cannot be presently destroyed, at the least its reduction to virtual impotence.

"II. The settlement of every question, whether of territory, of sovereignty, of economic arrangement, or of political relationship, upon the basis of the free acceptance of that settlement by the people immediately concerned, and not upon the basis of the material interest or advantage of any other nation or people which may desire a different settlement for the sake of its own exterior influence or mastery.

"III. The consent of all nations to be governed in their conduct toward each other by the same principles of honor and of respect for the common law of civilized society that govern the individual citizens of all modern states in their relations with one another; to the end that all promises and covenants may be sacredly observed, no private plots or conspiracies hatched, no selfish injuries wrought with impunity, and a mutual trust established upon the handsome foundation of a mutual respect for right.

"IV. The establishment of an organization of peace which shall make it certain that the combined power of free nations will check every invasion of right and serve to make peace and justice the more secure by affording a definite tribunal of opinion to which all must submit and by which every international readjustment that cannot be amicably agreed upon by the peoples directly concerned shall be sanctioned.

"These great objects can be put into a single sentence. What we seek is the reign of law, based upon the consent of the governed and sustained by the organized opinion of mankind. These great ends can not be achieved by debating and seeking to reconcile and accommodate what statesmen may wish, with their projects for balances of power and of national opportunity. They can be realized only by the determination of what the thinking peoples of the world desire, with their longing hope for justice and for social

"THERE CAN BE NO COMPROMISE"—*Continued.*

freedom and opportunity. I can fancy that the air of this place carries the accents of such principles with a peculiar kindness. Here were started forces which the great nation against which they were primarily directed at first regarded as a revolt against its rightful authority but which it has long since seen to have been a step in the liberation of its own people, as well as of the people of the United States; and I stand here now to speak—speak proudly and with confident hope—of the spread of this revolt, this liberation, to the great stage of the world itself.

"The blinded rulers of Prussia have roused forces they knew little of—forces which, once roused, can never be crushed to earth again; for they have at their heart an inspiration and a purpose which are deathless and of the very stuff of triumph!"

WILSON'S "FOUR-MINUTE" MESSAGE TO THE NATION—JULY 4, 1918.

(READ by four-minute men to patriotic meetings in 5,300 communities in every part of the United States.)

"You are met, my fellow citizens, to commemorate the signing of that Declaration of Independence which marked the awakening of a new spirit in the lives of nations. Since the birth of our republic, we have seen this spirit grow. We have heard the demand and watched the struggle for self-government spread and triumph among many peoples. We have come to regard the right to political liberty as the common right of humankind. Year after year, within the security of our borders, we have continued to rejoice in the peaceful increase of freedom and democracy throughout the world. And yet now, suddenly, we are confronted with a menace which endangers everything that we have won and everything that the world has won. In all its old insolence, with all its ancient cruelty and injustice, military autocracy has again armed itself against the pacific hopes of men. Having suppressed self-government among its own people by an organization maintained in part by falsehood and treachery, it has set out to impose its will upon its neighbors and upon us. One by one, it has compelled every civilized nation in the world either to forego its aspirations or to declare war in their defense. We find ourselves fighting again for our national existence. We are face to face with the necessity of asserting anew the fundamental right of free men to make their own laws and choose their own allegiance, or else permit humanity to become the victim of a ruthless ambition that is determined to destroy what it cannot master.

"Against its threat the liberty-loving people of the world have risen and allied themselves. No fear has deterred them, and no bribe of material well-being has held them back. They have made sacrifices such as the world has never known before, and their resistance in the face of death and suffering has proved that the aim which animates the German effort can never hope to rule the spirit of mankind. Against the horror of military conquest, against the emptiness of living in mere bodily contentment, against the desolation of becoming part of a state that knows neither truth nor honor, the world has so revolted that even people long dominated and suppressed by force have now begun to stir and arm themselves.

"Centuries of subjugation have not destroyed the racial aspirations of the many distinct peoples of Eastern Europe, nor have they accepted the sordid ideals of their political and military masters. They have survived the slow persecutions of peace as well as the agonies of war and now demand recognition for their just claims to autonomy and self-government. Representatives of these races are with you to-day, voicing their loyalty to our ideals and offering their services in the common cause. I ask you, fellow citizens, to unite with them in making this our Independence Day the first that shall be consecrated to a declaration of independence for all the peoples of the world."

MRS. WILSON'S GREETING TO AMERICAN WOMEN.

THE wife of the President, July 4, 1918, sent the following message to the women of the United States: "The greeting which I am glad to send to the women of our beloved country, who are playing so large and so noble a part in this day of our supreme test, can have but a single thought for its theme—the thought that is in all our hearts. That thought is that we are sustaining not a government but the very principle of our nation's life. The morale of the war is in the thoughts and aspirations and hopes of the women as well as of the men. They stand at the very centre of every issue involved, as the men do, and in that sense the war is theirs. It is a war for what is humane and right. They can put all that is best of them into the struggle. And they are doing so. I deeply admire them, and am proud to stand with them. A new glory attaches to the Fourth of July because we are striving to make the whole world free."

INDEPENDENCE DAY GREETINGS.

ON July 4, President Wilson sent to, and received from, all of the allied and pro-ally neutrals, Independence Day messages. President Poincaré cabled from Paris: "The government of the republic, at one with all the national representatives and the whole country, ordained that to-morrow the Independence Day of the United States shall also be a French holiday. Paris will give your glorious name to one of its one of its handsomest avenues, and acclaim to the skies the parade of the valiant American soldiers. In every department, in every town, large and small, these manifestations of fraternity will be echoed. Two peoples in communion of thought will, one and all, remember the fights of old that won liberty for America and hope for the forthcoming victories which will secure for the world a just and fruitful peace based on the law of nations and fortified by the approval of human conscience. Permit me, Mr. President, cordially to extend to you on the eve of that great day of union and confidence the wishes and felicitations of France for the United States and yourself."

To which Mr. Wilson replied: "With a full heart I welcome your message of congratulation upon the American Day of Independence. It is fitting that this glorious anniversary should witness the fraternity of free peoples in the cause of national self-determination. The happy fruitage of the ancient association of our lands in the common cause of liberty is to-day fitly seen in the union of our countries in the splendid task of upholding their rights in the face of barbaric aggression. My countrymen are alike gratified and filled with pride at the tribute of brotherly affection which the French people are offering them so generously at every point of intercourse. I most hopefully reciprocate your prayerful wish that this may all presage the ultimate triumph of the rights of France and America not only but also the rights of humanity."

To King Albert's greeting in behalf of Belgium, Mr. Wilson cabled: "Your message is very welcome to the American government and people. It comes at a time when the seeds of nation-wide compassion have yielded the ripe harvest of brotherly union in the common cause of defending the freedom and the right of human communities to live for themselves and shape their own destinies. May the clouds that overshadow our countries soon pass away, and the sun of world-righteousness arise, spreading its healing beams over the enfranchised lands and peoples of the earth. To this the liberty-loving world is dedicating its noblest efforts without stint or reservation, and may God defend the right."

To Premier Eleutarios of Greece, Mr. Wilson answered: "Your message of congratulation on America's natal day of freedom comes to blend the glorious traditions of our own struggle to conserve for our own land and people the priceless heritage of freedom with the splendid history of the great Greek people, whose indomitable aspirations for national self-government have reawakened and inspired their sons from of old to renewed endeavor in the great work of world-wide regeneration and enfranchisement. It is fitting that Greeks and Americans should stand side by side and strive for the triumph of their common cause to the end that the spirit of freedom shall not perish among men. In the name of the government and people of America I extend the hand of fellowship to your land and its people."

"THE SEA SEEMS VERY NARROW."

IN a cable message of greeting to President Poincarè, on Bastile Day, 1918, Mr. Wilson said: "America greets France on this day of stirring memories with a heart full of warm friendship and of devotion to the great cause in which the two peoples are now so happily united. July 14th, like our own July 4th, has taken a new significance, not only for France, but for the world. As France celebrated our Fourth of July, so do we celebrate her fourteenth, keenly conscious of a comradeship of arms and of purpose of which we are deeply proud. The sea seems very narrow to-day, France is so close neighbor to our hearts. The war is being fought to save ourselves from intolerable things, but it is also being fought to save mankind. We extend our hands to each other, to the great peoples with whom we are associated; and to the peoples everywhere who love right and prize justice as a thing beyond price, and consecrate ourselves once more to the noble enterprise of peace and justice, realizing the great conceptions that have lifted France and America high among the free peoples of the world. The French flag flies to-day from the staff of the White House, and America is happy to do honor to that flag."

To this President Poincarè replied, by cable: "The French national holiday following the American Independence Day has afforded the two peoples another occasion to combine their sentiments and hopes. The message you were pleased to send me in honor of the 14th of July has reached the heart of France. Once more Paris has acclaimed Gen. Pershing's magnificent troops, which are already giving on the battlefields such striking evidence of their grand military quality. The great memories that united our two countries are drawing from the war we are waging together a strength and vividness that nothing can impair. Right and liberty have obliterated space and the ocean to bring even nearer together our two beloved nations in the splendor of the same ideal."

A "RE-ENFRANCHISED BELGIUM."

MR. WILSON, in a message to King Albert of Belgium, July 21, 1918, said: "On this day, sacred in the annals of Belgium, the hearts of my countrymen beat in sympathy with the Belgian people, with whom we are linked in the resolute struggle to conserve the rights and liberties of free communities. Your country has been torn asunder before by alien oppression and by attempted domination, and beneath the searing blasts of oppression has learned to prize and develop the qualities that stimulate a true-hearted people to assume among the powers that high place that rightly belongs to free and independent nations. I join with my countrymen in extending to Your Majesty and to the people of Belgium, who have so nobly given their lives and treasure for the safeguarding of national freedom and equal justice, heartfelt greetings on this auspicious day, in the confidence that it presages for re-enfranchised Belgium a still greater and more glorious place in the proud annals of human achievement in the paths of liberty."

WILSON'S DENUNCIATION OF MOB VIOLENCE.

THE President, on July 26, 1918, made a statement to the nation on mob violence, as follows: "My fellow countrymen: I take the liberty of addressing you upon a subject which so vitally affects the honor of the nation and the very character and integrity of our institutions that I trust you will think me justified in speaking very plainly about it. I allude to the mob spirit which has recently here and there very frequently shown its head amongst us, not in any single region, but in many and widely separated parts of the country. There have been many lynchings, and every one of them has been a blow at the heart of ordered law and humane justice. No man who loves America, no man who really cares for her fame and honor and character, or who is truly loyal to her institutions, can justify mob action while the courts of justice are oper and the governments of the States and the nation are ready and able to do their duty. We are at this very moment fighting lawless passion. Germany has outlawed herself among the nations because she has disregarded the sacred obligations of law and has made lynchers of her armies. Lynchers emulate her disgraceful example. I, for my part, am anxious to see every community in America rise above that level with pride and a fixed resolution which no man or set of men can afford to despise.

"We proudly claim to be the champions of democracy. If we really are, in deed and in truth, let us see to it that we do not discredit our own. I say plainly that every American who takes part in the action of a mob or gives it any sort of countenance is no true son of this great democracy, but its betrayer, and does more to discredit her by that single disloyalty to her standards of law and of right than the words of her statesmen or the sacrifices of her heroic boys in the trenches can do to make suffering peoples believe her to be their savior. How shall we commend democracy to the acceptance of other peoples if we disgrace our own by proving that it is, after all, no protection to the weak? Every mob contributes to German lies about the United States what her most gifted liars cannot improve upon by the way of calumny. They can at least say that such things cannot happen in Germany except in times of revolution, when law is swept away. I therefore very earnestly and solemnly beg that the governors of all the states, the law officers of every community, and, above all, the men and women of every community in the United States, all who revere America and wish to keep her name without stain or reproach, will co-operate—not passively merely, but actively and watchfully—to make an end of this disgraceful evil. It cannot live where the community does not countenance it.

"I have called upon the nation to put its great energy into this war and it has responded—responded with a spirit and a genius for action that has thrilled the world. I now call upon it, upon its men and women everywhere, to see to it that its laws are kept inviolate, its fame untarnished. Let us show our utter contempt for the things that have made this war hideous among the wars of history by showing how those who love liberty and right and justice and are willing to lay down their lives for them upon foreign fields stand ready also to illustrate to all mankind their loyalty to the things at home which they wish to see established everywhere as a blessing and protection to the peoples who have never known the privileges of liberty and self-government. I can never accept any man as a champion of liberty either for ourselves or for the world who does not reverence and obey the laws of our beloved land, whose laws we ourselves have made. He has adopted the standards of the enemies of his country whom he affects to despise."

"WE SOLEMNLY PURPOSE A DECISIVE VICTORY OF ARMS."

IN his draft proclamation of August 31, 1918, the President said: "Fifteen months ago the men of the country from twenty-one to thirty-one years of age registered. Three months ago and again this month those who had just reached the age of twenty-one were added. It now remains to include all men between the ages of eighteen and forty-five. This is not a new policy. A century and a quarter ago it was deliberately ordained by those who were then responsible for the safety and defense of the nation that the duty of military service should rest upon all able-bodied men between the ages of eighteen and forty-five. We now accept and fulfil the obligation which they established, an obligation expressed in our national statutes from that time until now.

"We solemnly purpose a decisive victory of arms and deliberately to devote the larger part of the military man power of the nation to the accomplishment of that purpose. The younger men have from the first been ready to go. They have furnished voluntary enlistments out of all proportion to their numbers. Our military authorities regard them as having the highest combatant qualities. Their youthful enthusiasm, their virile eagerness, their gallant spirit of daring, make them the admiration of all who see them in

"WE SOLEMNLY PURPOSE A DECISIVE VICTORY OF ARMS"—*Continued.*

action. They covet not only the distinction of serving in this great war, but also the inspiring memories which hundreds of thousands of them will cherish through the years to come of a great day and a great service for their country and for mankind. By the men of the older group now called on, the opportunity now opened to them will be accepted with the calm resolution of those who realize to the full the deep and solemn significance of what they do. Having made a place for themselves in their respective communities, having assumed at home the graver responsibilities of life in many spheres, looking back upon honorable records in civil and industrial life, they will realize, as perhaps no others could, how entirely their own fortunes and the fortunes of all whom they love are put at stake in this war for right, and will know that the very records they have made render this new duty the commanding duty of their lives.

"They know how surely this is the nation's war, how imperatively it demands the mobilization and massing of all our resources of every kind. They will regard this call as the supreme call of their day and will answer it accordingly. Only a portion of those who register will be called upon to bear arms. Those who are not physically fit will be excused; those exempted by allen allegiance; those who should not be relieved of their present responsibilities; above all, those who cannot be spared from the civil and industrial tasks at home upon which the success of our armies depends as much as upon the fighting at the front. But all must be registered in order that the selection for military service may be made intelligently and with full information. This will be our final demonstration of loyalty, democracy and the will to win, our solemn notice to all the world that we stand absolutely together in a common resolution and purpose. It is the call to duty to which every true man in the country will respond with pride and with the consciousness that in doing so he plays his part in vindication of a great cause at whose summons every true heart offers its supreme service."

"A WAR TO MAKE NATIONS AND PEOPLES SECURE."

IN his Labor Day message, of September 1, 1918, appealing to the working people to stand behind those "in the far fields of actual battle," Mr. Wilson said: "What is the war for? Why are we enlisted? Why should we be ashamed if we were not enlisted? At first it seemed hardly more than a war of defense against the military aggression of Germany. Belgium had been violated, France invaded, and Germany was afield again, as in 1870 and 1866, to work out her ambitions in Europe, and it was necessary to meet her force with force. But it is clear now that it is much more than a war to alter the balance of power in Europe. Germany, it is now plain, was striking at what free men everywhere desire and must have—the right to determine their own fortunes, to insist upon justice, and to oblige governments to act for them and not for the private and selfish interests of a governing class. It is a war to make the nations and peoples of the world secure against every such power as the German autocracy represents. It is a war of emancipation. Not until it is won can men anywhere live free from constant fear or breathe freely while they go about their daily tasks and know that governments are their servants, not their masters.

"This is, therefore, the war of all wars which labor should support and support with all its concentrated power. The world cannot be safe, men's lives cannot be secure, no man's rights can be confidently and successfully asserted against the rule and mastery of arbitrary groups and special interests so long as governments like that which, after long premeditation, drew Austria and Germany into this war are permitted to control the destinies and the daily fortunes of men and nations, plotting while honest men work, laying the fires of which innocent men, women and children are to be the fuel."

PRESIDENT WARNS BRIDGEPORT STRIKERS TO WORK.

THE President, on September 13, 1918, sent the following letter to the members of District Lodge No. 55, International Association of Machinists, and other striking workmen of Bridgeport, Conn.: "I am in receipt of your resolutions of September 6, announcing that you have begun a strike against your employers in Bridgeport, Conn. You are members of the Bridgeport branches of the International Union of Machinists. As such, and with the approval of the national officers of your union, you signed an agreement to submit the questions as to the terms of your employment to the National War Labor Board, and to abide the award, which in accordance with the rules of procedure approved by me, might be made. The members of the board were not able to reach a unanimous conclusion on all the issues presented, and as provided in its constitution, the questions upon which they did not agree were carried before an arbitrator, the unanimous choice of the members of the board. The arbitrator thus chosen has made an award which more than 90 per cent. of the workers affected accept. You who constitute less than 10 per cent. refuse to abide the award, although you are the best paid of the whole body of workers affected, and are, therefore, least entitled to press a further increase of wages because of the high cost of living. But, whatever the merits of the issue, it is closed by the award. Your strike against it is a breach of faith calculated to reflect on the sincerity of national organized labor in proclaiming its acceptance of the principles and machinery of the National War Labor Board.

"If such disregard of the solemn adjudication of a tribunal to which both parties submitted their claims be temporized with, agreements become mere scraps of paper. If errors creep into awards, the proper remedy is submission to the award with an application for rehearing to the tribunal. But to strike against the award is disloyalty and dishonor. The Smith & Wesson Company, of Springfield, Mass., engaged in Government work, has refused to accept the mediation of the National War Labor Board and has flaunted its rules of decision approved by Presidential proclamation. With my consent the War Department has taken over the plant and business of the company to secure continuity in production and to prevent industrial disturbance. It is of the highest importance to secure compliance with reasonable rules and procedure for the settlement of industrial disputes. Having exercised a drastic remedy with recalcitrant employers, it is my duty to use means equally well adapted to the end with lawless and faithless employés. Therefore, I desire that you return to work and abide by the award. If you refuse, each of you will be barred from employment in any war industry in the community in which the strike occurs for a period of one year. During that time the United States Employment Service will decline to obtain employment for you in any war industry elsewhere in the United States, as well as under the War and Navy Departments, the Shipping Board, the Railroad Administration, and all other government agencies, and the draft boards will be instructed to reject any claim of exemption based on your alleged usefulness on war production. Sincerely yours, Woodrow Wilson."

The strikers thereupon returned to work, after a stormy meeting, at which the National War Labor Board was denounced.

WILSON'S PROCLAMATION ENDING BEER BREWING ON DEC. 1, 1918.

(Dated September 16, 1918.)

"WHEREAS, under and by virtue of an act of Congress, entitled 'An act to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel,' approved by the President on August 10, 1917, it is provided in section 15, among other things, as follows:

" 'Whenever the President shall find that limitation, regulation, or prohibition of the use of foods, fruits, food materials, or feeds in the production of malt or vinous liquors for beverage purposes, or that

WILSON'S PROCLAMATION ENDING BEER BREWING ON DEC. 1, 1918—*Continued.*

reduction of the alcoholic content of any such malt or vinous liquors, is essential, in order to assure an adequate and continuous supply of food, or that the national security and defense will be subserved thereby, he is authorized, from time to time, to prescribe and give public notice of the extent of the limitation, regulation, prohibition, or reduction so necessitated. Whenever such notice shall have been given and shall remain unrevoked, no person shall, after a reasonable time prescribed in such notice, use any foods, fruits, food materials, or feeds in the production of malt or vinous liquors, or import any such liquors except under license issued by the President and in compliance with rules and regulations determined by him governing the production and importation of such liquors and the alcoholic content thereof;'

"Now, therefore, I, Woodrow Wilson, President of the United States of America, by virtue of the powers conferred on me by said act of Congress, do hereby find and determine that it is essential, in order to assure an adequate and continuous supply of food, in order to subserve the national security and defense, and because of the increasing requirements of war industries for the fuel productive capacity of the country, the strain upon transportation to serve such industries, and the shortage of labor caused by the necessity of increasing the armed forces of the United States, that the use of sugar, glucose, corn, rice, or any other foods, fruits, food materials, and feeds in the production of malt liquors, including near beer, for beverage purposes be prohibited. And by this proclamation I prescribe and give public notice that on and after October 1, 1918, no person shall use any sugar, glucose, corn, rice, or any other foods, fruits, food materials, or feeds, except malt now already made, and hops, in the production of malt liquors, including near beer, for beverage purposes, whether or not such malt liquors contain alcohol; and on and after December 1, 1918, no person shall use any sugar, glucose, corn, rice, or any other foods, fruits, food materials, or feeds, including malt, in the production of malt liquors, including near beer, for beverage purposes, whether or not such malt liquors contain alcohol. In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

"Done in the District of Columbia, this sixteenth day of September, in the year of our Lord one thousand nine hundred and eighteen, and of the independence of the United States of America the one hundred and forty-third. Woodrow Wilson.

"By the President, Robert Lansing, Secretary of State."

MILITARY ORDER OF THE LOYAL LEGION OF THE UNITED STATES.

Commander-in-Chief—Lieut.-Gen. Samuel B. M. Young, U. S. A. *Recorder-in-Chief*—Brevet Lieut.-Col. John P. Nicholson.

The Military Order of the Loyal Legion of the United States was organized by officers and ex-officers of the Army, Navy and Marine Corps of the United States who took part in the war of 1861-65. Total membership of the Loyal Legion is 6,598.

ELIGIBILITY TO MEMBERSHIP AS FOLLOWS:

Original companions of the first class—Commissioned officers and honorably discharged commissioned officers of the United States Army, Navy and Marine Corps, regular or volunteer, including officers of assimilated or corresponding rank by appointment of the Secretary of War or Navy, who were actually engaged in the suppression of the Rebellion prior to the 15th day of April, 1865, or who served under the President's call of the 15th day of April, 1861; or who, having served as non-commissioned officers, warrant officers or enlisted men, during the War of the Rebellion, have since been or may hereafter be commissioned as officers in the United States Regular or Volunteer Army, Navy or Marine Corps. All midshipmen in the United States Navy and all cadets of the United States Army, who, while pursuing their course in the United States Naval Academy or the United States Military Academy at West Point, actually rendered service.

Hereditary companions of the first class—The direct male lineal descendants, who shall have attained the age of 21 years, of deceased original companions of the first class, and of deceased officers not members of the order, but who were eligible as such, and whose direct descent shall in every case be traced anew from the original founder of the membership in the order, or from the deceased eligible officer, and not otherwise.

Any original companion having no direct lineal male descendant, may, by writing, filed with the Recorder of his Commandery, nominate a companion of the second class from among the collateral male members of his family, descending only from his own brother or sister, and the person so nominated when he shall have attained the age of 21 years shall become eligible to membership for life in the second class.

Second class—The sons, and if there be no sons, the grandsons, of living companions of the first class, whether original, in succession, or by inheritance, who shall have attained the age of 21 years, shall be eligible to membership.

Third class—Companions of the third class are those gentlemen who in civil life during the Rebellion were specially distinguished for conspicuous and consistent loyalty to the National Government and were active and eminent in maintaining the supremacy of the same; and who, prior to the 15th day of April, 1890, were elected members of the order pursuant to the then existing provisions of the Constitution, the power to elect such having ceased at that date.

THE AUSTRIAN PEACE PROPOSAL OF SEPTEMBER, 1918.

PRESIDENT WILSON'S declaration, reiterated in his draft proclamation of August 31, 1918, that America solemnly purposed a decisive victory of arms was followed by a renewed Austrian peace proposal, made public on September 15, 1918. At the same time was made public a peace offer from Germany to Belgium. The Austrian proffer as transmitted to the American State Department, September 16, 1918, by the Swedish Minister, W. A. F. Ekengren, in charge of Austro-Hungarian affairs, was as follows:

Legation of Sweden, at Washington, D. C., September 16, 1918. Excellency: I have the honor to communicate to you the following note addressed by the imperial and royal government of Austria-Hungary to the royal government of Sweden and received by me on this day by telegraph:

"Although it was declined by the enemy powers, the peace proposal made on December 12, 1916, by the four Allied Powers, which never desisted from the conciliatory intent that had prompted it, nevertheless was the beginning of a new phase in the history of this war. From that day the question of peace after two and a half years of fierce struggle suddenly became the main topic of discussion in Europe, nay, in the world, and has been steadily gaining prominence ever since. From that day nearly every belligerent state has repeatedly voiced its opinion on the subject of peace.

"The discussion, however, was not carried on along the same lines. Viewpoints varied according to the military and political conditions, and so, thus far at least, no tangible or practical result has been achieved. Notwithstanding those fluctuations a lessening of the distance between the viewpoints of the two parties could be noted, though no attempt will be made to deny the great divergencies of opinion which divide the two enemy camps and which it has heretofore been impossible to reconcile. One may be, nevertheless, permitted to notice that some of the extreme war aims have been departed from, and that the fundamental basis of a universal peace is to some extent agreed upon. There is no doubt that on either side the desire of the peoples to reach an understanding and bring about peace is becoming more and more manifest. The same impression is created when the manner in which the peace proposal of the four allied powers was received in the past is compared with the subsequent utterances of their adversaries, whether they came from responsible statesmen or from personages holding no office, but likewise wielding political influence. By way of illustration confined to a few instances, the allies in their reply to President Wilson's note advanced claims which meant nothing less than the dismemberment of Austria-Hungary, the mutilation and radical changes in the political structure of Germany, and also the annihilation of European Turkey. With time, those terms that could not be enforced without a crushing victory were modified or partly abandoned by some of the official declarations of the Entente.

"Thus Mr. Balfour, in the course of last year, plainly declared to the English Parliament that Austria-Hungary was to solve her domestic problems by herself and that Germany could not be given another constitution through foreign influence. Mr. Lloyd George afterward announced in the beginning of this year that the Allies were not fighting for the dismemberment of Austria-Hungary or to despoil the Ottoman Empire of its Turkish provinces, or, again, to bring internal reforms to Germany. We may also add that in December, 1917, Mr. Balfour categorically repudiated the assumption that British policy had pledged itself to create an independent state including the German territory lying on the left bank of the Rhine. As for the utterances of the Central Powers, they leave no doubt that those states are merely fighting to defend the integrity and safety of their territories. Much greater than in respect to concrete war aims is the evidence that the principles upon which peace could be concluded and a new order of things established in Europe and throughout the world have in a way drawn nearer to one another. On this point President Wilson in his addresses of February 12 and July 4, 1918, formulated principles that have raised no objection from his Allies and whose wide application will shortly meet the objections from the four Allied Powers provided to be general and consistent with the vital interests of the states concerned. To agree upon general principles, however, would not suffice; an agreement should also be reached as to their interpretation and application to the several concrete questions of war and peace.

"To an unprejudiced observer there can be no doubt that in all the belligerent states, without exception, the desire for a compromise peace has been enormously strengthened; that the conviction is increasing that the further continuance of the bloody struggle must transform Europe into ruins and into a state of exhaustion that will check its development for decades to come—and this without any guarantee of thereby bringing about the decision by arms which four years of efforts, hardships, and immense sacrifices have failed to bring about. Now, by what means, in what manner can the way be paved that will finally lead to such a compromise? Can any one in earnest expect that goal to be attained by adhering to the method heretofore followed in the discussion of the peace problem? We dare not answer that question in the affirmative. The discussion as conducted until now from one rostrum to another by the statesmen of the several countries was substantially but a series of monologues. It lacked sequence above all. Speeches delivered, arguments expounded by the orators of the opposite parties, received no direct immediate reply. Again, the publicity of those utterances, the places where they were delivered, excluded every possible serviceable result. In such public utterances the eloquence used is of the high-pitched kind which is intended to thrill the masses. Whether, intentionally or not, the gap between conflicting ideas is thus widened. Misunderstandings that can not easily be eradicated spring up, and a simple, straightforward exchange of ideas is hampered as soon as mentioned, and even before an official answer can be made by the adversary every declaration of the statesmen in power is taken up for passionate and immoderate discussion by irresponsible persons, but the statesmen themselves are obsessed by a fear that they may unfavorably influence public opinion in their country and thereby compromise the chances of the war, and also of prematurely disclosing their true intentions. That is why they use thunderlike (the French text has 'donnantes' which is here meaningless; tonnantes, with the given meaning herewith was probably the word sent and distorted in transmission) speech and persist in upholding unflinching points of view. If therefore it were intended to seek the basis for a compromise apt to make an end of the war whose prolongation would mean nothing but suicide, and to save Europe from that catastrophe resort should be had in any event to some other method which would permit of continuous and direct converse between the representatives of the governments and between them only. Such an exchange of views would take in the conflicting views of the several belligerent states to the same extent as the general principles on which to build up peace and the relations between states, and might first lead to an understanding as to those principles. The fundamental principles once agreed upon, an effort should be made in the course of the informal negotiations to apply them concretely to the several peace questions and thereby bring about their solution. We indulge the hope that none of the belligerents will object to this proposed exchange of views. There would be no interruption of military operations. The conversation would go no further than deemed useful by the participants; the parties concerned could be put to no disadvantage thereby. The exchange of views, far from doing any harm, could be but beneficial to the cause of peace; what might fail at the first attempt could be tried over again; something will at least have been done toward elucidating the problems. How many are the deep-rooted misunderstandings that might be dispelled! How many the new ideas that would break their way out! Humane sentiments so long pent up could burst forth from all hearts, creating a warmer atmosphere while safeguarding every essential point and dispel many a discussion which at this time seems important. We are convinced that it is the duty of all belligerents to mankind to take up together the questions whether there is no way, after so many years of a struggle which, notwithstanding all the sacrifices it has cost, is still undecided and the whole course of which seems to demand a compromise, of bringing this awful war to an end. The imperial and royal government therefore comes again to the governments of all the belligerent states with a proposal shortly to send to a neutral country, upon a previous agreement as to the date and

THE AUSTRIAN PEACE PROPOSAL OF SEPTEMBER, 1918.—*Continued.*

place delegates who would broach a confidential nonbinding conversation over the fundamental principles of a peace that could be concluded. The delegates would be commissioned to communicate to one another the views of their respective governments on the aforesaid principles and very freely and frankly interchange information on every point for which provision should be made.

"The Imperial and royal government has the honor to apply for your kindly good offices and to request that the royal government of Sweden kindly communicate the present communication, which is addressed to all the belligerent states simultaneously, to the government of the United States of America and of Great Britain. Burian."

WILSON'S REJECTION OF AUSTRIA'S OFFER.

THE following note was sent to the Swedish minister in Washington on September 17, 1918:

"Sir: I have the honor to acknowledge the receipt of your note, dated September 16, communicating to me a note from the imperial government of Austria-Hungary containing a proposal to the governments of all the belligerent states to send delegates to a confidential and unbinding discussion on the basic principles for the conclusion of peace. Furthermore, it is proposed that the delegates would be charged to make known to one another the conception of their governments regarding those principles and to receive analogous communications, as well as to request and give frank and candid explanations on all those points which need to be precisely defined.

"In reply I beg that the substance of your communication has been submitted to the President, who now directs me to inform you that the Government of the United States feels that there is only one reply which it can make to the suggestion of the imperial Austro-Hungarian government. It has repeatedly, and with entire candor, stated the terms upon which the United States would consider peace and can and will entertain no proposal for a conference upon a matter concerning which it has made its position and purpose so plain.

"Accept, sir, the renewed assurances of my highest consideration. ROBERT LANSING."

The American rejection, it was officially stated in Washington, was in preparation within thirty minutes of the time President Wilson received the peace offer.

GERMANY'S PEACE OFFER TO BELGIUM.

THE terms of a peace offer by Germany to Belgium, made public September 15, 1918, were as follows:

1. That Belgium shall remain neutral until the end of the war.
2. That thereafter the entire economic and political independence of Belgium shall be reconstituted.
3. That the pre-war commercial treaties between Germany and Belgium shall again be put into operation after the war for an indefinite period.
4. That Belgium shall use her good offices to secure the return of the German colonies.
5. That the Flemish question shall be considered, and the Flemish minority, which aided the German invaders, shall not be penalized.

The proposal contained no word respecting reparation or indemnities, no admission that Germany wronged Belgium. The German minister to Finland, instructed by the German government, notified the Finnish government that in order to preserve Finland and Sweden from the danger of warlike complications German troops would not enter East Karelia; and if Great Britain and the other Entente powers should evacuate Karelia and the Murman Coast, Germany bound herself to withdraw her troops from those regions within a period not specified.

WILSON'S APPEAL TO NEUTRALS TO END RUSSIAN REIGN OF TERROR.

THE President sent, through the Secretary of State, on September 21, 1918, an appeal to all neutrals to intervene to end terrorism in Russia. The message sent to neutrals through America's diplomatic representatives was as follows:

"This government is in receipt of information from reliable sources revealing that the peaceable Russian citizens of Moscow, Petrograd, and other cities are suffering from an openly avowed campaign of mass terrorism and are subject to wholesale executions. Thousands of persons have been shot without even a a form of trial; ill-administered prisons are filled beyond capacity and every night scores of Russian citizens are recklessly put to death; and irresponsible bands are venting their brutal passions in the daily massacre of untold innocents.

"In view of the earnest desire of the people of the United States to befriend the Russian people and lend them all possible assistance in their struggle to reconstruct their nation upon principles of democracy and self-government, and acting therefore solely in the interest of the Russian people themselves, this government feels that it can not be silent or refrain from expressing its horror at this existing state of terrorism. Furthermore, it believes that in order successfully to check the further increase of the indiscriminate slaughter of Russian citizens all civilized nations should register their abhorrence of such barbarism.

"You will inquire, therefore, whether the government to which you are accredited will be disposed to take some immediate action, which is entirely divorced from the atmosphere of belligerency and the conduct of war, to impress upon the perpetrators of these crimes the aversion with which civilization regards their present wanton acts."

SONS OF THE AMERICAN REVOLUTION.

A SOCIETY of descendants of Revolutionary patriots and others was organized in San Francisco, Cal., after the centennial parade of July 4, 1876, entitled "Sons of Revolutionary Sires," from whence was organized in 1889 the California Society Sons of the American Revolution and became part of the National Society in that year. State societies exist in forty-six States, the District of Columbia, Hawaii, the Philippines, and France. The total membership of the organization is about 16,000. *President-General*—Louis Annin Ames, New York City. *Vice-Presidents-General*—Charles F. Read, Boston, Mass.; Thomas W. Williams, East Orange, N. J.; Albert M. Henry, Detroit, Mich.; C. Robert Churchill, New Orleans, La.; Thomas A. Perkins, San Francisco, Cal. *Treasurer-General*—John H. Burroughs, New York City. *Secretary-Registrar-General*—A. Howard Clark, Smithsonian Institute, Washington, D. C.

The Empire State Society of the Sons of the American Revolution has headquarters at No. 220 Broadway, New York City. The membership is 1,575. *President*—Louis Annin Ames. *Vice-Presidents*—Martin S. Allen, Walter B. Hopping, and William H. Kelly. *Secretary*—Capt. Charles A. Du Bois. *Treasurer*—James De La Montanye. *Registrar*—Teunis D. Huntting.

ARMY AND NAVY UNION, NATIONAL CORPS.

AUSTRIAN PEACE NOTE OF OCT. 7, 1918.

"THE Austro-Hungarian Monarchy, which has waged war always and solely as a defensive war, and repeatedly given documentary evidence of its readiness to stop the shedding of blood and to arrive at a just and honorable peace, hereby addresses itself to His Lordship the President of the United States of America, and offers to conclude with him and his allies an armistice on every front on land, at sea and in the air, and to enter immediately upon negotiations for a peace for which the fourteen points in the message of President Wilson to Congress of January 8, 1918, and the four points contained in President Wilson's address of February 12, 1918, should serve as a foundation and in which the viewpoints declared by President Wilson in his address of September 27, 1918, will also be taken into account."

WILSON'S REPLY TO AUSTRIA, URGING LIBERTY FOR SLAVS.

THE text of the American reply to Austria, handed to the Swedish Minister, October 19, 1918, follows:

"Sir: I have the honor to acknowledge the receipt of your note of the 7th instant, in which you transmit a communication of the Imperial and Royal Government of Austria-Hungary to the President. I am now instructed by the President to request you to be good enough, through your Government, to convey to the Imperial and Royal Government the following reply: The President deems it his duty to say to the Austro-Hungarian Government that he cannot entertain the present suggestions of that Government because of certain events of utmost importance which, occurring since the delivery of his address of the 8th of January last, have necessarily altered the attitude and responsibility of the Government of the United States. Among the fourteen terms of peace which the President formulated at the time occurred the following:

"10. The peoples of Austria-Hungary, whose place among the nations we wish to see safeguarded and assured, should be accorded the freest opportunity of autonomous development.

"Since that sentence was written and uttered to the Congress of the United States, the Government of the United States has recognized that a state of belligerency exists between the Czecho-Slovaks and the German and Austro-Hungarian Empires, and that the Czecho-Slovak National Council is a de facto belligerent Government clothed with proper authority to direct the military and political affairs of the Czecho-Slovaks. It has also recognized in the fullest manner the justice of the nationalistic aspirations of the Jugo-Slavs for freedom.

"The President is therefore no longer at liberty to accept the mere 'autonomy' of these peoples as a basis of peace, but is obliged to insist that they and not he shall be the judges of what action on the part of the Austro-Hungarian Government will satisfy their aspirations and their conception of their rights and destiny as members of the family of nations. Accept, sir, the renewed assurances of my highest consideration. ROBERT LANSING."

GERMAN PEACE NOTE OF OCT. 20, 1918.

"IN accepting the proposal for an evacuation for occupied territories the German Government has started from the assumption that the procedure of this evacuation and of the conditions of an armistice should be left to the judgment of the military advisers, and that the actual standard of power on both sides in the field has to form the basis for arrangements safeguarding and guaranteeing this standard. The German Government suggests to the President that an opportunity should be brought about for fixing the details. It trusts that the President of the United States will approve of no demand which would be irreconcilable with the honor of the German people and with opening a way to a peace of justice.

"The German Government protests against the reproach of illegal and inhumane actions made against the German land and sea forces and thereby against the German people. For the covering of a retreat destructions will always be necessary, and they are carried out in so far as is permitted by international law. The German troops are under the most strict instruction to spare private property and to exercise care for the population to the best of their ability. Where transgressions occur in spite of these instructions the guilty are being punished. The German Government further denies that the German Navy in sinking ships has ever purposely destroyed lifeboats with their passengers. The German Government proposes with regard to all those charges that the facts be cleared up by neutral commissions.

"In order to avoid anything that might hamper the work of peace, the German Government has caused orders to be despatched to all submarine commanders precluding the torpedoing of passenger ships, without, however, for technical reasons, being able to guarantee that these orders will reach every single submarine at sea before its return. As a fundamental condition for peace the President prescribes the destruction of every arbitrary power that can separately, secretly and of its own single choice disturb the peace of the world. To this the German Government replies: Hitherto the representation of the people in the German Empire has not been endowed with an influence on the formation of the Government. The Constitution did not provide for a concurrence of representation of the people in decisions of peace and war. These conditions have just now undergone a fundamental change. A new Government has been formed in complete accordance with the wishes (principle) of the representation of the people, based on equal, universal, secret, direct franchise.

"The leaders of the great parties of the Reichstag are members of this Government. In the future no Government can take or continue in office without possessing the confidence of a majority of the Reichstag. The responsibility of the Chancellor of the empire to the representation of the people is being legally developed and safeguarded. The first act of the new Government has been to lay before the Reichstag a bill to alter the Constitution of the empire so that the consent of the representation of the people is required for decisions on war and peace. The permanence of the new system is, however, guaranteed not only by constitutional safeguards but also by the unshakable determination of the German people, whose vast majority stands behind these reforms and demands their energetic continuance.

"The question of the President—with whom he and the Governments associated against Germany are dealing—is therefore answered in a clear, unequivocal manner by the statement that the offer of peace and an armistice has come from a Government which is free from any arbitrary and irresponsible influence and is supported by the approval of an overwhelming majority of the German people. SOLF."

WILSON NOT FOR FREE TRADE.

THE President, in a letter, October 28, 1918, to Senator F. M. Simmons of North Carolina, Chairman of the Senate Committee on Finance, denied that Article 3 in his Fourteen Peace Points address to Congress on January 8, 1918, meant American Free Trade. The President said in his letter: "The words I used in my address to the Congress of January 8, 1918, were: 'The removal, so far as possible, of all economic barriers and the establishment of an equality of trade conditions among all the nations consenting to the peace and associating themselves for its maintenance.' I, of course, meant to suggest no restriction upon the free determination by any nation of its own economic policy, but only that, whatever tariff any nation might deem necessary for its own economic service, be that tariff high or low, it should apply equally to all foreign nations; in other words, that there should be no discriminations against some nations that did not apply to others. This leaves every nation free to determine for itself its own internal policies and limits only its right to compound these policies of hostile discriminations between one nation and another.

WILSON NOT FOR FREE TRADE—*Continued.*

Weapons of economic discipline and punishment should be left to the joint action of all nations for the purpose of punishing those who will not submit to a general programme of justice and equality.

"The experiences of the past among nations have taught us that the attempt by one nation to punish another by exclusive and discriminatory trade agreements has been a prolific breeder of that kind of antagonism which oftentimes result in war, and that if a permanent peace is to be established among nations every obstacle that has stood in the way of international friendship should be cast aside. It was with that fundamental purpose in mind that I announced this principle in my address of January 8. To pervert this great principle for partisan purposes and to inject the bogy of free trade, which is not involved at all, is to attempt to divert the mind of the Nation from the broad and humane principle of a durable peace by introducing an internal question of quite another kind. American business has in the past been unaffected by a policy of the kind suggested and it has nothing to fear now from a policy of simple international justice. It is indeed lamentable that the momentous issues of this solemn hour should be seized upon in an effort to bend them to partisan service. To the initiated and discerning the motive is transparent and the attempt fails. Sincerely yours,

WOODROW WILSON."

WILSON'S APPEAL FOR A DEMOCRATIC CONGRESS.

(Issued by the President, October 24, 1918.)

"My Fellow-Countrymen: The Congressional elections are at hand. They occur in the most critical period our country has ever faced or is likely to face in our time. If you have approved of my leadership and wish me to continue to be your unembarrassed spokesman in affairs at home and abroad, I earnestly beg that you will express yourselves unmistakably to that effect by returning a Democratic majority to both the Senate and the House of Representatives. I am your servant and will accept your judgment without cavil. But my power to administer the great trust assigned to me by the Constitution would be seriously impaired should your judgment be adverse, and I must frankly tell you so because so many critical issues depend upon your verdict. No scruple or taste must in grim times like these be allowed to stand in the way of speaking the plain truth.

"I have no thought of suggesting that any political party is paramount in matters of patriotism. I feel too deeply the sacrifices which have been made in this war by all our citizens, irrespective of party affiliations, to harbor such an idea. I mean only that the difficulties and delicacies of our present task are of a sort that makes it imperatively necessary that the nation should give its undivided support to the Government under a unified leadership, and that a Republican Congress would divide the leadership. The leaders of the minority in the present Congress have unquestionably been pro-war, but they have been anti-Administration. At almost every turn since we entered the war they have sought to take the choice of policy and the conduct of the war out of my hands and put it under the control of instrumentalities of their own choosing. This is no time either for divided counsel or for divided leadership. Unity of command is as necessary now in civil action as it is upon the field of battle. If the control of the House and the Senate should be taken away from the party now in power an opposing majority could assume control of legislation and oblige all action to be taken amid contest and obstruction.

"The return of a Republican majority to either House of the Congress would, moreover, be interpretative on the other side of the water as a repudiation of my leadership. Spokesmen of the Republican Party are urging you to elect a Republican Congress in order to back up and support the President, but, even if they should in this impose upon some credulous voters on this side of the water, they would impose on no one on the other side. It is well understood there as well as here that Republican leaders desire not so much to support the President as to control him. The peoples of the Allied countries with whom we are associated against Germany are quite familiar with the significance of elections. They would find it very difficult to believe that the voters of the United States had chosen to support their President by electing to the Congress a majority controlled by those who are not in fact in sympathy with the attitude and action of the Administration.

"I need not tell you, my fellow-countrymen, that I am asking your support not for my own sake or for the sake of a political party, but for the sake of the nation itself, in order that its inward duty of purpose may be evident to all the world. In ordinary times I would not feel at liberty to make such an appeal to you. In ordinary times divided counsels can be endured without permanent hurt to the country. But these are not ordinary times. If in these critical days it is your wish to sustain me with undivided minds, I beg that you will say so in a way which it will not be possible to misunderstand, either here at home or among our associates on the other side of the sea. I submit my difficulties and my hopes to you.

"WOODROW WILSON."

THE KAISER RESOLVES "TO OFFER PEACE TO ENEMY."

EMPEROR WILLIAM, October 6, 1918, issued a proclamation to the German army and navy, saying: "For months past the enemy with enormous exertions and almost without pause in the fighting has stormed against your lines. In weeks of the struggle, often without repose, you have had to persevere and resist a numerically far superior enemy. Therein lies the greatness of the task which has been set for you and which you are fulfilling. Troops of all the German states are doing their part and are heroically defending the Fatherland on foreign soil. Hard is the task. My navy is holding its own against the united enemy naval forces and is unwaveringly supporting the army in its difficult struggle. The eyes of those at home rest with pride and admiration on the deeds of the army and navy. I express to you the thanks of myself and the Fatherland. The collapse of the Macedonian front has occurred in the midst of the hardest struggle. In accord with our allies I have resolved once more to offer peace to the enemy, but I will only extend my hand for an honorable peace. We owe that to the heroes who have laid down their lives for the Fatherland, and we make that our duty to our children. Whether arms will be lowered is still a question. Until then we must not slacken. We must, as hitherto, exert all our strength unwearingly to hold our ground against the onslaught of our enemies. The hour is grave but, trusting in your strength and in God's gracious help, we feel ourselves to be strong enough to defend our beloved Fatherland.

"WILHELM."

WILSON'S LIBERTY LOAN SPEECH AT NEW YORK.

(Delivered at the Metropolitan Opera House, September 27, 1918. Contains the five points foundation for a League of Nations.)

MR. WILSON said: "My fellow citizens, I am not here to promote the loan. That will be done—ably and enthusiastically done—by the hundreds of thousands of loyal and tireless men and women who have undertaken to present it to you and to our fellow-citizens throughout the country; and I have not the least doubt of their complete success; for I know their spirit and the spirit of the country. My confidence is confirmed too by the thoughtful and experienced co-operation of the bankers here and everywhere, who are lending their invaluable aid and guidance. I have come, rather, to seek an opportunity to present to you some thoughts which I trust will serve to give you, in perhaps fuller measure than before, a vivid sense of the great issues involved, in order that you may appreciate and accept with added enthusiasm

the grave significance of the duty of supporting the Government by your men and your means to the utmost point of sacrifice and self-denial. No man or woman who has really taken in what this war means can hesitate to give to the very limit of what they have; and it is my mission here to-night to try to make it clear once more what the war really means. You will need no other stimulation or reminder of your duty.

"At every turn of the war we gain a fresh consciousness of what we mean to accomplish by it. When our hope and expectation are most excited we think more definitely than before of the issues that hang upon it and of the purposes which must be realized by means of it. For it has positive and well-defined purposes which we did not determine and which we cannot alter. No statesman or assembly created them: no statesman or assembly can alter them. They have arisen out of the very nature and circumstances of the war. The most that statesmen or assemblies can do is to carry them out or be false to them. They were, perhaps, not clear at the outset; but they are clear now. The war has lasted more than four years and the whole world has been drawn into it. The common will of mankind has been substituted for the particular purposes of individual States. Individual statesmen may have started the conflict, but neither they nor their opponents can stop it as they please. It has become a peoples' war, and peoples of all sorts and races, of every degree of power and variety of fortune, are involved in its sweeping processes of change and settlement. We came into it when its character had become fully defined and it was plain that no nation could stand apart or be indifferent to its outcome. Its challenge drove to the heart of everything we cared for and lived for. The voice of the war had become clear and gripped our hearts. Our brothers from many lands, as well as our own murdered dead under the sea, were calling to us, and we responded, fiercely and of course.

"The air was clear about us. We saw things in their full, convincing proportions as they were; and we have seen them with steady eyes and unchanging comprehension ever since. We accepted the issues of the war as facts, not as any group of men either here or elsewhere had defined them, and we can accept no outcome which does not squarely meet and settle them. Those issues are these:

"Shall the military power of any nation or group of nations be suffered to determine the fortunes of peoples over whom they have no right to rule except the right of force?

"Shall strong nations be free to wrong weak nations and make them subject to their purpose and interest?

"Shall peoples be ruled and dominated, even in their own internal affairs, by arbitrary and irresponsible force or by their own will and choice?

"Shall there be a common standard of right and privilege for all peoples and nations or shall the strong do as they will and the weak suffer without redress?

"Shall the assertion of right be haphazard and by casual alliance or shall there be a common concert to oblige the observance of common rights?

"No man, no group of men, chose these to be the issues of the struggle. They are the issues of it; and they must be settled—by no arrangement or compromise or adjustment of interests, but definitely and once for all and with a full and unequivocal acceptance of the principle that the interest of the weakest is as sacred as the interest of the strongest. This is what we mean when we speak of a permanent peace, if we speak sincerely, intelligently, and with a real knowledge and comprehension of the matter we deal with. We are all agreed that there can be no peace obtained by any kind of bargain or compromise with the Governments of the Central Empires, because we have dealt with them already and have seen them deal with other Governments that were parties to this struggle, at Brest-Litovsk and Bucharest. They have convinced us that they are without honor and do not intend justice. They observe no covenants, accept no principle but force and their own interest. We cannot 'come to terms' with them. They have made it impossible. The German people must by this time be fully aware that we cannot accept the word of those who forced this war upon us. We do not think the same thoughts or speak the same language of agreement.

"It is of capital importance that we should also be explicitly agreed that no peace shall be obtained by any kind of compromise or abatement of the principles we have avowed as the principles for which we are fighting. There should exist no doubt about that. I am, therefore, going to take the liberty of speaking with the utmost frankness about the practical implications that are involved in it. If it be indeed and in truth the common object of the Governments associated against Germany and of the nations whom they govern, as I believe it to be, to achieve by the coming settlements a secure and lasting peace, it will be necessary that all who sit down at the peace table shall come ready and willing to pay the price, the only price, that will procure it; and ready and willing, also, to create in some virile fashion the only instrumentality by which it can be made certain that the agreements of the peace will be honored and fulfilled. That price is impartial justice in every item of the settlement, no matter whose interest is crossed; and not only impartial justice but also the satisfaction of the several peoples whose fortunes are dealt with. That indispensable instrumentality is a League of Nations formed under covenants that will be efficacious. Without such an instrumentality, by which the peace of the world can be guaranteed, peace will rest in part upon the word of outlaws, and only upon that word. For Germany will have to redeem her character, not by what happens at the peace table but by what follows.

"And, as I see it, the constitution of that League of Nations and the clear definition of its objects must be a part, is in a sense the most essential part, of the peace settlement itself. It cannot be formed now. If formed now, it would be merely a new alliance confined to the nations associated against a common enemy. It is not likely that it could be formed after the settlement. It is necessary to guarantee the peace; and the peace cannot be guaranteed as an afterthought. The reason, to speak in plain terms again, why it must be guaranteed is that there will be parties to the peace whose promises have proved untrustworthy, and means must be found in connection with the peace settlement itself to remove that source of insecurity. It would be folly to leave the guarantee to the subsequent voluntary action of the Governments we have seen destroy Russia and deceive Roumania. But these general terms do not disclose the whole matter. Some details are needed to make them sound less like a thesis and more like a practical programme. These, then, are some of the particulars, and I state them with the greater confidence because I can state them authoritatively as representing this Government's interpretation of its own duty with regard to peace:

"First, the impartial justice meted out must involve no discrimination between those to whom we wish to be just and those to whom we do not wish to be just. It must be a justice that plays no favorites and knows no standard but the equal rights of the several peoples concerned;

"Second, no special or separate interest of any single nation or any group of nations can be made the basis of any part of the settlement which is not consistent with the common interest of all;

"Third, there can be no leagues or alliances or special covenants and understandings within the general and common family of the League of Nations;

"Fourth, and more specifically, there can be no special, selfish economic combinations within the league and no employment of any form of economic boycott or exclusion except as the power of economic penalty by exclusion from the markets of the world may be vested in the League of Nations itself as a means of discipline and control;

"Fifth, all international agreements and treaties of every kind must be made known in their entirety to the rest of the world.

"Special alliances and economic rivalries and hostilities have been the prolific source in the modern world of the plans and passions that produce war. It would be an insincere as well as an insecure peace that did not exclude them in definite and binding terms. The confidence with which I venture to speak

WILSON'S LIBERTY LOAN SPEECH AT NEW YORK—*Continued.*

for our people in these matters does not spring from our traditions merely and the well-known principles of international action which we have always professed and followed. In the same sentence in which I say that the United States will enter into no special arrangements or understandings with particular nations let me say also that the United States is prepared to assume its full share of responsibility for the maintenance of the common covenants and understandings upon which peace must henceforth rest. We still read Washington's immortal warning against 'entangling alliances' with full comprehension and an answering purpose. But only special and limited alliances entangle; and we recognize and accept the duty of a new day in which we are permitted to hope for a general alliance which will avoid entanglements and clear the air of the world for common understandings and the maintenance of common rights. I have made this analysis of the international situation which the war has created, not, of course, because I doubted whether the leaders of the great nations and peoples with whom we are associated were of the same mind and entertained a like purpose but because the air every now and again gets darkened by mists and groundless doubtings and mischievous perversions of counsel and it is necessary once and again to sweep all the irresponsible talk about peace intrigues and weakening morale and doubtful purpose on the part of those in authority utterly, and if need be unceremoniously, aside and say things in the plainest words that can be found, even when it is only to say over again what has been said before, quite as plainly if in less unvarnished terms.

"As I have said, neither I nor any other man in governmental authority created or gave form to the issues of this war. I have simply responded to them with such vision as I could command. But I have responded gladly and with a resolution that has grown warmer and more confident as the issues have grown clearer and clearer. It is now plain that they are issues which no man can pervert unless it be wilfully. I am bound to fight for them, and happy to fight for them as time and circumstance have revealed them to me as to all the world. Our enthusiasm for them grows more and more irresistible as they stand out in more and more vivid and unmistakable outline. And the forces that fight for them draw into closer and closer array, organize their millions into more and more unconquerable might, as they become more and more distinct to the thought and purpose of the peoples engaged. It is the peculiarity of this great war that while statesmen have seemed to cast about for definitions of their purpose and have sometimes seemed to shift their ground and their point of view, the thought of the mass of men, whom statesmen are supposed to instruct and lead, has grown more and more unclouded, more and more certain of what it is that they are fighting for. National purposes have fallen more and more into the background and the common purpose of enlightened mankind has taken their place. The counsels of plain men have become on all hands more simple and straightforward and more unified than the counsels of sophisticated men of affairs, who still retain the impression that they are playing a game of power and playing for high stakes. That is why I have said that this is a peoples' war, not a statesmen's. Statesmen must follow the clarified common thought or be broken.

"I take that to be the significance of the fact that assemblies and associations of many kinds made up of plain workaday people have demanded, almost every time they came together, and are still demanding, that the leaders of their Governments declare to them plainly what it is, exactly what it is, that they are seeking in this war, and what they think the items of the final settlement should be. They are not yet satisfied with what they have been told. They still seem to fear that they are getting what they ask for only in statesmen's terms,—only in the terms of territorial arrangements and divisions of power, and not in terms of broad-visioned justice and mercy and peace and the satisfaction of those deep-seated longings of oppressed and distracted men and women and enslaved peoples that seem to them the only things worth fighting a war for that engulfs the world. Perhaps statesmen have not always recognized this changed aspect of the whole world of policy and action. Perhaps they have not always spoken in direct reply to the questions asked because they did not know how searching those questions were and what sort of answers they demanded.

"But I, for one, am glad to attempt the answer again and again, in the hope that I may make it clearer and clearer that my one thought is to satisfy those who struggle in the ranks and are, perhaps above all others, entitled to a reply whose meaning no one can have any excuse for misunderstanding, if he understands the language in which it is spoken or can get some one to translate it correctly into his own. And I believe that the leaders of the Governments with which we are associated will speak, as they have occasion, as plainly as I have tried to speak. I hope that they will feel free to say whether they think that I am in any degree mistaken in my interpretation of the issues involved or in my purpose with regard to the means by which a satisfactory settlement of those issues may be obtained. Unity of purpose and of counsel are as imperatively necessary in this war as was unity of command in the battlefield; and with perfect unity of purpose and counsel will come assurance of complete victory. It can be had in no other way. 'Peace drives' can be effectively neutralized and silenced only by showing that every victory of the nations associated against Germany brings the nations nearer the sort of peace which will bring security and reassurance to all peoples and make the recurrence of another such struggle of pitiless force and bloodshed forever impossible, and that nothing else can. Germany is constantly intimating the 'terms' she will accept; and always finds that the world does not want terms. It wishes the final triumph of justice and fair dealing."

WILSON'S REPLY TO GERMANY'S PEACE PROFFER OF OCT. 12, 1918.

On October 14, 1918, Secretary Lansing handed to Frederick Oederlin, Charge d'Affaires of Switzerland, ad interim in charge of German interests in the United States, the following answer to the Teutonic acceptance: "Sir, in reply to the communication of the German Government, dated the 12th inst., which you handed me to-day, I have the honor to request you to transmit the following answer:

"The unqualified acceptance by the present German Government and by a large majority of the German Reichstag of the terms laid down by the President of the United States of America in his address to the Congress of the United States on January 8, 1918, and in his subsequent addresses, justifies the President in making a frank and direct statement of his decision with regard to the communications of the German Government of October 8 and 12, 1918. It must be clearly understood that the process of evacuation and the conditions of an armistice are matters which must be left to the judgment and advice of the military advisers of the Government of the United States and the Allied Governments, and the President feels it his duty to say that no arrangement can be accepted by the Government of the United States which does not provide absolutely satisfactory safeguards and guarantees of the maintenance of the present military supremacy of the armies of the United States and of the Allies in the field. He feels confident that he can safely assume that this will also be the judgment and decision of the Allied Governments.

"The President feels that it is also his duty to add that neither the Government of the United States nor, he is quite sure, the Governments with which the Government of the United States is associated as a belligerent will consent to consider an armistice so long as the armed forces of Germany continue the illegal and inhumane practices which they persist in. At the very time that the German Government approaches the Government of the United States with proposals of peace, its submarines are engaged in sinking passenger ships at sea, and not the ships alone, but the very boats in which their passengers and crews seek to make their way to safety; and in their present enforced withdrawal from Flanders and France the German armies are pursuing a course of wanton destruction which has always been regarded as in direct

WILSON'S REPLY TO GERMANY'S PEACE PROFFER OF OCT. 12, 1918—*Continued.*

violation of the rules and practices of civilized warfare. Cities and villages, if not destroyed, are being stripped of all they contain not only, but often of their very inhabitants. The nations associated against Germany cannot be expected to agree to a cessation of arms while acts of inhumanity, spoliation, and desolation are being continued which they justly look upon with horror and with burning hearts.

"It is necessary also, in order that there may be no possibility of misunderstanding, that the President should very solemnly call the attention of the Government of Germany to the language and plain intent of one of the terms of peace which the German Government has now accepted. It is contained in the address of the President, delivered at Mount Vernon on July 4 last. It is as follows:

" 'The destruction of every arbitrary power anywhere that can separately, secretly, and of its single choice disturb the peace of the world; or, if it cannot be presently destroyed, at least its reduction to virtual impotency.'

"The power which has hitherto controlled the German nation is of the sort here described. It is within the choice of the German nation to alter it. The President's words, just quoted, naturally constitute a condition precedent to peace, if peace is to come by the action of the German people themselves. The President feels bound to say that the whole process of peace will, in his judgment, depend upon the definiteness and the satisfactory character of the guarantees which can be given in this fundamental matter. It is indispensable that the governments associated against Germany should know beyond a peradventure with whom they are dealing. The President will make a separate reply to the Royal and Imperial Government of Austria-Hungary. Accept, sir, the renewed assurances of my high consideration.

"ROBERT LANSING."

The White House, after answering the German proffer, made the following announcement: "The Government will continue to send over 250,000 men, with their supplies, every month, and there will be no relaxation of any kind."

"IN THE NAME OF THE GERMAN PEOPLE."

The text of Germany's peace note of October 12, 1918, as received by Secretary Lansing, is: "In reply to the questions of the President of the United States of America the German Government hereby declares: The German Government has accepted the terms laid down by President Wilson in his address of January 8 and in his subsequent addresses on the foundation of a permanent peace of justice. Consequently its object in entering into discussions would be only to agree upon practical details of the application of these terms. The German Government believes that the Governments of the powers associated with the Government of the United States also take the position taken by President Wilson in his address. The German Government, in accordance with the Austro-Hungarian Government, for the purpose of bringing about an armistice, declares itself ready to comply with the propositions of the President in regard to evacuation.

"The German Government suggests that the President may occasion the meeting of a mixed commission for making the necessary arrangements concerning the evacuation. The present German Government, which has undertaken the responsibility for this step toward peace, has been formed by conferences and in agreement with the great majority of the Reichstag. The Chancellor, supported in all of his actions by the will of this majority, speaks in the name of the German Government and of the German people.

"SOLF, State Secretary of Foreign Office."

FOR WHOM DO YOU SPEAK?

The text of the United States' reply to Germany's peace request, as handed October 8, 1918, by Secretary of State Lansing to Frederick Oederlin, Charge d'Affaires of the Swiss Legation, in charge of German interests, follows. "Sir: I have the honor to acknowledge, on behalf of the President, your note of October 6, inclosing the communication from the German Government to the President; and I am instructed by the President to request you to make the following communication to the Imperial German Chancellor:

"Before making reply to the request of the Imperial German Government, and in order that that reply shall be as candid and straightforward as the momentous interests involved require, the President of the United States deems it necessary to assure himself of the exact meaning of the note of the Imperial Chancellor. Does the Imperial Chancellor mean that the Imperial German Government accept the terms laid down by the President in his address to the Congress of the United States on January last and in subsequent addresses, and that its object in entering into discussions would be only to agree upon the practical details of their application?

"The President feels bound to say with regard to the suggestion of an armistice that he would not feel at liberty to propose a cessation of arms to the governments with which the Government of the United States is associated against the Central Powers so long as the armies of those powers are upon their soil. The good faith of any discussion would manifestly depend upon the consent of the Central Powers immediately to withdraw their forces everywhere from invaded territory. The President also feels that he is justified in asking whether the Imperial Chancellor is speaking merely for the constituted authorities of the empire who have so far conducted the war. He deems the answer to these questions vital from every point of view. Accept, sir, the renewed assurances of my high consideration. "ROBERT LANSING."

PRINCE MAXIMILIAN'S NOTE ASKING WILSON FOR PEACE.

THE text of the note forwarded by the German Chancellor, Prince Maximilian, to President Wilson through the Swiss Government, October 6, 1918, follows: "The German Government requests the President of the United States to take in hand the restoration of peace, acquaint all the belligerent states of this request, and invite them to send plenipotentiaries for the purpose of opening negotiations. It accepts the programme set forth by the President of the United States in his message to Congress on January 8 and in his later pronouncements, especially his speech of September 27, as a basis for peace negotiations. With a view to avoiding further bloodshed, the German Government requests the immediate conclusion of an armistice on land and water and in the air."

AUSTRIA ASKS FOR QUICK PEACE ACTION.

ON October 29 Austria-Hungary, through her new Foreign Minister, Count Andrassy, sent a note to Secretary of State Lansing requesting an immediate armistice on all fronts, and the commencement of peace negotiations, saying: "Immediately after having taken direction of the Ministry of Foreign Affairs, and after the despatch of the official answer to your note of October 18, 1918, by which you were able to see that we accept all the points and principles laid down by President Wilson in his various declarations, and are in complete accord with the efforts of President Wilson to prevent future wars and to create a league of nations, we have taken preparatory measures, in order that Austrians and Hungarians may be able, according to their own desire and without being in any way hindered, to make a decision as to their future organization, and to rule it. Since the accession to power of Emperor King Charles his immovable purpose has been to bring an end to the war. More than ever this is the desire of the Sovereign of all the Austrian-Hungarian peoples, who acknowledge that their future destiny can only be accomplished in

AUSTRIA ASKS FOR QUICK PEACE ACTION—*Continued.*

a pacific world, by being freed from all disturbances, privations, and sorrows of war. This is why I address you directly, Mr. Secretary of State, praying that you will have the goodness to intervene with the President of the United States in order that in the interest of humanity, as in the interest of all those who live in Austria-Hungary, an immediate armistice may be concluded on all fronts, and for an overture that immediate negotiations for peace will follow."

In a semi-official note explaining to the Austrian people the above plea for quick action the Government at Vienna said: "Austria was obliged to conform to the methods of President Wilson, who had successively replied to the three members of the Triple Alliance, and act apart from her allies. The Monarchy, which has formally adopted President Wilson's line of action, shares his opinion, as was shown by the Emperor's manifesto to the peoples which, in proclaiming the federalization of the Monarchy, exceeded President Wilson's programme. However, the complete re-organization of Austria can only be carried out after an armistice. If Austria-Hungary has declared herself ready to enter into negotiations for an armistice and for peace, without awaiting the result of negotiations with other states, that does not necessarily signify an offer of a separate peace. It means that she is ready to act separately in the interests of the re-establishment of peace."

AUSTRIA'S "BE SO KIND" PEACE PLEA.

(Transmitted October 28 by the Austro-Hungarian Foreign Minister, Count Julius Andrassy, through the Swedish Government, to the American Government.)

"In reply to the note of President Wilson of the 19th of this month, addressed to the Austro-Hungarian Government, and giving the decision of the President to speak directly with the Austro-Hungarian Government on the question of an armistice and of peace, the Austro-Hungarian Government has the honor to declare that, equally with the preceding proclamations of the President, it adheres also to the same point of view contained in the last note upon the rights of the Austro-Hungarian peoples, especially those of the Czecho-Slovaks and the Jugo-Slavs. Consequently, Austria-Hungary accepting all the conditions the President has laid down for the entry into negotiations for an armistice and peace, no obstacle exists, according to the judgment of the Austro-Hungarian Government, to the beginning of these negotiations.

"The Austro-Hungarian Government declares itself ready, in consequence, without awaiting the result of other negotiations, to enter into negotiations upon peace between Austria-Hungary and the states in the opposing group and for an immediate armistice upon all Austro-Hungarian fronts. It asks President Wilson to be so kind as to begin overtures on this subject."

BURIAN ON "ENEMY'S OBSTINACY."

BARON BURIAN, the Austro-Hungarian Foreign Minister, in a statement to the Austrian and Hungarian Premiers, July 6, 1918, in regard to President Wilson's Mount Vernon address of July 4, said: "The enemy's obstinacy regarding his territorial demands concerning Alsace-Lorraine, Trieste, the Trentino, and the German colonies appears to be insurmountable. There lies the limit of our readiness for peace. We are prepared to discuss everything except our own territory. The enemy not only wants to cut from Austria-Hungary what he would like for himself, but the inner structure, that of the monarchy itself, too, is to be attacked, and the monarchy dissolved, if possible, into component parts. Our opponents start from a completely mechanical misjudgment of the character of the Austro-Hungarian monarchy, and prefer in their satisfaction to overlook, in the present difficult international problems, the fact that these states with their various nationalities are no accidental structure, but a product of historical and ethnographical necessities, which carry in themselves the fundamental principle of life and race. They, therefore, possess, and this applies fully to Austria and Hungary, the necessary elasticity and adaptability to the changing events of the times, the ability to reform themselves according to the necessity of their standard of development and to solve all internal crises without uncalled-for foreign interference."

WILSON URGES SENATE TO GRANT WOMAN SUFFRAGE.

IN the course of an address in the Senate, at Washington, September 30, 1918, asking action in favor of suffrage for women, the President said: "Are we alone to refuse to learn the lesson? Are we alone to ask and take the utmost that our women can give—service and sacrifice of every kind—and still say we do not see what title that gives them to stand by our sides in the guidance of the affairs of their nation and ours? We have made partners of the women in this war; shall we admit them only to a partnership of suffering and sacrifice and toil and not to a partnership of privilege and right? This war could not have been fought, either by the other nations engaged or by America, if it had not been for the services of the women—services rendered in every sphere—not merely in the fields of effort in which we have been accustomed to see them work, but wherever men have worked and upon the very skirts and edges of the battle itself. We shall not only be distrusted but shall deserve to be distrusted if we do not enfranchise them with the fullest possible enfranchisement, as it is now certain that the other great free nations will enfranchise them. We cannot isolate our thought and action in such a matter from the thought of the rest of the world. We must either conform or deliberately reject what they propose and resign the leadership of liberal minds to others.

"The women of America are too noble and too intelligent and too devoted to be slackers whether you give or withhold this thing that is mere justice; but I know the magic it will work in their thoughts and spirits if you give it them. I propose it as I would propose to admit soldiers to the suffrage, the men fighting in the field for our liberties and the liberties of the world, were they excluded. The tasks of the women lie at the very heart of the war, and I know how much stronger that heart will beat if you do this just thing and show our women that you trust them as much as you in fact and of necessity depend upon them. Have I said that the passage of this amendment is a vitally necessary war measure, and do you need further proof? Do you stand in need of the trust of other peoples and of the trust of our own women? Is that trust an asset or is it not? I tell you plainly, as the Commander-in-Chief of our armies and of the gallant men in our fleets, as the present spokesman of this people in our dealings with the men and women throughout the world who are now our partners, as the responsible head of a great Government which stands and is questioned day by day as to its purposes, its principles, its hopes, whether they be serviceable to men everywhere or only to itself, and who must himself answer these questionings or be shamed, as the guide and director of forces caught in the grip of war and by the same token in need of every material and spiritual resource this great nation possesses—I tell you plainly that this measure which I urge upon you is vital to the winning of the war and to the energies alike of preparation and of battle.

"And not to the winning of the war only. It is vital to the right solution of the great problems which we must settle, and settle immediately, when the war is over. We shall need then in our vision of affairs, as we have never needed them before, the sympathy and insight and clear moral instinct of the women of the world. The problems of that time will strike to the roots of many things that we have not hitherto questioned, and I for one believe that our safety in those questioning days, as well as our comprehension of matters that touch society to the quick, will depend upon the direct and authoritative participation of women in our counsels. We shall need their moral sense to preserve what is right and fine and worthy in our system of life as well as to discover just what it is that ought to be purified and reformed. Without their counsellings we shall be only half wise."

GERMANY'S OFFER OF OCT. 27, 1918.

(Signed by the German Foreign Minister, Dr. Solf.)

"THE German Government has taken cognizance of the answer of the President of the United States. The President is aware of the far-reaching changes which have been carried out and are being carried out in the German constitutional structure, and that peace negotiations are being conducted by a people's Government, in whose hands rests, both actually and constitutionally, the power to make the deciding conclusions. The military powers are also subject to it. The German Government now awaits proposals for an armistice, which shall be the first step toward a just peace as the President has described it in his proclamation. SOLF."

PRESIDENT'S REPLY TO GERMAN NOTE OF OCT. 20, 1918.

THE President's note to Germany as given out Oct. 23, by Secretary Lansing follows: "From the Secretary of State to the Charge d'Affaires ad interim in charge of German interests in the United States, Department of State, October 23, 1918: Sir: I have the honor to acknowledge the receipt of your note of October 22, transmitting a communication under date of October 20 from the German Government, and to advise you that the President has instructed me to reply thereto as follows:

"Having received the solemn and explicit assurance of the German Government that it unreservedly accepts the terms of peace laid down in his address to the Congress of the United States on January 8, 1918, and the principles of settlement enunciated in his subsequent addresses, particularly the address of September 27, and that it desires to discuss the details of their application, and that this wish and purpose emanated, not from those who have hitherto dictated German policy and conducted the present war on Germany's behalf but from Ministers who speak for the majority of the Reichstag and for an overwhelming majority of the German peoples; and having received also the explicit promise of the present German Government that the humane rules of civilized warfare will be observed both on land and sea by the German armed forces, the President of the United States feels that he cannot decline to take up with the Governments with which the Government of the United States is associated the question of an armistice.

"He deems it his duty to say again, however, that the only armistice he would feel justified in submitting for consideration would be one which should leave the United States and the powers associated with her in a position to enforce any arrangements that may be entered into and to make a renewal of hostilities on the part of Germany impossible. The President has, therefore, transmitted his correspondence with the present German authorities to the Governments with which the Government of the United States is associated as a belligerent, with the suggestion that, if those Governments are disposed to effect peace upon the terms and principles indicated, their military advisers and the military advisers of the United States be asked to submit to the Governments associated against Germany the necessary terms of such an armistice as will fully protect the interests of the peoples involved and insure to the associated Governments the unrestricted power to safeguard and enforce the details of the peace to which the German Government has agreed, provided they deem such an armistice possible from the military point of view. Should such terms of armistice be suggested, their acceptance by Germany will afford the best concrete evidence of her unequivocal acceptance of the terms and principles of peace from which the whole action proceeds.

"The President would deem himself lacking in candor did he not point out in the frankest possible terms the reason why extraordinary safeguards must be demanded. Significant and important as the constitutional changes seem to be which are spoken of by the German Foreign Secretary in his note of October 20, it does not appear that the principle of a Government responsible to the German people has yet been fully worked out or that any guarantees either exist or are in contemplation that the alterations of principle and of practice now partially agreed upon will be permanent. Moreover, it does not appear that the heart of the present difficulty has been reached. It may be that future war has been brought under the control of the German people, but the present war has not been, and it is with the present war that we are dealing. It is evident that the German people have no means of commanding the acquiescence of the military authorities of the empire in the popular will; that the power of the King of Prussia to control the policy of the empire is unimpaired; that the determinating initiative still remains with those who have hitherto been the masters of Germany.

"Feeling that the whole peace of the world depends now on plain speaking and straightforward action, the President deems it his duty to say, without any attempt to soften what may seem harsh words, that the nations of the world do not and cannot trust the word of those who have hitherto been the masters of German policy, and to point out once more that in concluding peace and attempting to undo the infinite injuries and injustices of this war the Government of the United States cannot deal with any but veritable representatives of the German people, who have been assured of a genuine constitutional standing as the real rulers of Germany. If it must deal with the military masters and the monarchical autocrats of Germany now, or if it is likely to have to deal with them later in regard to the international obligations of the German Empire, it must demand, not peace negotiations, but surrender. Nothing can be gained by leaving this essential thing unsaid. Accept, sir, the renewed assurances of my high consideration.

"ROBERT LANSING.

"Mr. Frederick Oederlin, Charge d'Affaires of Switzerland, ad interim, in charge of German interests in the United States."

PRINCE MAX ON "DESPOTIC CUSTOMS" OF "WESTERN DEMOCRACIES."

PRINCE MAX, in an address at Baden, at the Grand Duchy's Constitution centennial anniversary, August 22, 1918, said: "The war has dug down deep and brought out treasures of psychic force within our people which many a doubter before the war would have deemed possible only to a heroic past. But in the course of every severe and long war there have always been moral epidemics. It would be bold to believe that any warring nation can remain untouched from such influence. These dangers threaten us also, but they can be subdued if the intellectual leaders will remain conscious of their task; they that are—namely, in Plato's words, the guardians and physicians of the souls of the nations. These nations would be bad off who believed that the torch of Christian sentiment should be lowered during the war in the hope that it could be raised again after peace with new life and pride. Such a nation would have lost its position as torchbearer of civilization. In every country there are demagogues who are little bothered by such cares.

"Yes, the hostile governments see their national task in preserving, even after peace, a feeling of hatred and revenge and would establish it by agreements which are bound to produce, after the coming peace, a continuation of the war with other means. Indeed, he would be a bad adviser of the German nation who would urge us to take an example from Clemenceau and Lloyd George and their new heathenism. It is a comfort for us to know that your Royal Highness, true to the great maternal example of our honorable Grand Duchess Louise, regards it the task of all leading forces in Germany to faithfully guard, even in war, the moral values which have been chosen and put to test during an intellectual struggle of a thousand years and in which we believed in peace time with every fiber of our being. Our nature and our historical development show us the path to this position as guardian. The Constitution of Germany makes possible our own self-determination. We are not forced to regard every transitory outburst of popular

PRINCE MAX ON "DESPOTIC CUSTOMS" OF "WESTERN DEMOCRACIES—*Continued.*

passion and every rise and fall of sentiment as an undeceivable revelation of a popular will to which we must sacrifice our own conscience.

"Mob rule, lynch justice, boycott of those who think other than you do, pogrom against foreigners, and whatever may be the names of all the despotic customs of the Western democracies will, we hope, always remain as foreign to our nature as our language. It may be that the Englishmen, French and Americans really believe in the distorted picture that has been presented to them by their agitating propaganda. We know our enemies as they do not know us and do not wish to know us. We are able to make distinctions and therefore it is our duty to judge correctly and not fail to hear voices of angry opposition from the depths of these hostile nations, directed against the low and rude sentiments of our enemies. Such freedom of judgment has always been given us. In a civil war lasting for centuries we had to pass through and overcome periods of intolerance. The settlement of internal and religious differences in Germany has become on a small scale an intellectual preparation for a co-operation of the nations. Surely the unity of the German Empire could only be successful, because faith in this ideal was never extinguished even in the most gloomy periods of German history. Therefore all those who honestly hold dear the distant aims of a community of nations should not lose faith in their great hopes, even though the present attitude of our enemies may make the words 'league of nations' appear ever so suspicious to us.

"In England, France and America the determination to destroy us is becoming more shamefully apparent than ever. Their old long-shattered illusions are again rising. But they shall be shattered again. It is not necessary for us to encourage ourselves to remain united. Every act, every speech of the hostile Governments calls out to us: 'Close your ranks; the storm which is threatening our national life is severe and will last long. Who doubts that we will victoriously withstand it?'"

TURKEY ASKS U. S. TO BRING HER PEACE.

THE Spanish Ambassador at Washington, on October 14, 1918, handed to Secretary Lansing the following note from the Turkish Charge d'Affaires at Madrid, dated, October 12, 1918: "The undersigned, Charge d'Affaires of Turkey, has the honor, acting upon instructions from his Government, to request the Royal Government to inform the Secretary of State of the United States of America by telegraph that the Imperial Government requests the President of the United States of America to take upon himself the task of the re-establishment of peace; to notify all belligerent states of this demand and to invite them to delegate plenipotentiaries to initiate negotiations. It (the Imperial Government) accepts as a basis for the negotiations the programme laid down by the President of the United States in his message to Congress of January 8, 1918, and in his subsequent declarations, especially the speech of September 27. In order to put an end to the shedding of blood, the Imperial Ottoman Government requests that steps be taken for the immediate conclusion of a general armistice on land, on sea, and in the air."

LANSING ON PRUSSIANISM.

SECRETARY OF STATE ROBERT LANSING, in an address at Columbia University, New York, N. Y., on commencement day, June 9, 1918, said: "It is the supreme task of civilization to put an end to Prussianism. To listen to proposals for a Prussian peace, to compromise with the butchers of individuals and of nations so that they would by agreement gain a benefit from their crimes would be to compound an international felony, which this Republic will never do. Force is the one way to end Prussianism, for it is the only thing which the Prussian respects. This war for democracy must be waged to a successful conclusion to make liberty and justice supreme on the earth. It will be a bitter struggle, with lights and shadows, for the foe is strong and stubborn; but in the end we shall triumph, for we must triumph or abandon all that is worth while in this world. May every American so live and so serve that when the day of victory over the Prussians dawns, as it will dawn, he may, by right of faithful service, share in the glory. To that bright hour let us look forward with confidence, for the Supreme Ruler of the Universe could not decree otherwise. He has imposed upon us and our brave comrades in arms the task of freeing mankind from the curse of avarice and inhumanity which besets us. He has put upon us the burden of making this world a fit dwelling place for civilized men. Let us not shrink from the task or seek to avoid the burden. Convinced of the righteousness of our cause and of our destiny let us make war with all our energy. Let us keep our banners unfurled and our trumpets sounding to battle until victory is achieved.

"Prussia wickedly sought war and Prussia shall have war and more war and more war until the very thought of war is abhorrent to the Prussian mind. So I read the spirit of America. So I read the supreme purpose of the Allies. Victory lies before us and beyond victory a just and enduring peace. Until that peace is sure America cannot and will not put aside the sword."

At the commencement exercises at Union College, Schenectady, N. Y., June 10, 1918, Secretary Lansing said: "Paganism, tinctured with modern materialism and a degenerate type of Christianity, broods to-day over Germany. Christian ministers have proclaimed Jehovah to be the national deity of the empire, a monopolized German God, who relies on the physical might of His people to destroy those who oppose His will as that will is interpreted by His chosen race. Thus the Prussian leaders would harmonize modern thought with their ancient religion of physical strength through brutalizing Christianity. In view of the spirit of hypocrisy and bad faith manifesting an entire lack of conscience, we ought not to be astonished that the Berlin Foreign Office never permitted a promise or a treaty engagement to stand in the way of a course of action which the German Government deemed expedient. I need not cite as proof of this fact the flagrant violations of the treaty neutralizing Belgium and the recent treaty of Brest-Litovsk. This discreditable characteristic of the German foreign policy was accepted by German diplomats as a matter of course and as a natural if not a praiseworthy method of dealing with other Governments. Frederick the Great, with cynical frankness, once said: 'If there is anything to be gained by it, we will be honest. If deception is necessary, let us be cheats.' That is in brief the immoral principle which has controlled the foreign relations of Prussia for over 150 years.

"It is a fact not generally known that within six weeks after the Imperial Government had, in the case of the Sussex, given to this Government its solemn promise that it would cease ruthless slaughter on the high seas, Count Bernstorff, appreciating the worthlessness of the promise, asked the Berlin Foreign Office to advise him in ample time before the campaign of submarine murder was renewed, in order that he might notify the German merchant ships in American ports to destroy their machinery because he anticipated that the renewal of that method of warfare would in all probability bring the United States into the war. How well the Ambassador knew the character of his Government, and how perfectly frank he was! He asked for the information without apology or indirection. The very bluntness of his message shows that he was sure that his superiors would not take offense at the assumption that their word was valueless and had only been given to gain time, and that, when an increase in Germany's submarine fleet warranted the promise would be broken without hesitation or compunction."

TERMS OF ARMISTICE GRANTED TO TURKEY BY ALLIES.

THE terms of the Allies armistice to Turkey, as given out at London, November 1, 1918, were as follows:

I. The opening of the Dardanelles and the Bosporus and the access to the Black Sea. Allied occupation of the Dardanelles and Bosporus forts.

II. The positions of all mine fields, torpedo tubes and other obstructions in Turkish waters are to be indicated, and assistance given to sweep or remove them, as may be required.

III. All available information concerning mines in the Black Sea is to be communicated.

IV. All Allied prisoners of war and Armenian interned persons and prisoners are to be collected in Constantinople and handed over unconditionally to the Allies.

V. Immediate demobilization of the Turkish army, except such troops as are required for surveillance on the frontiers and for the maintenance of internal order. The number of effectives and their disposition to be determined later by the Allies after consultation with the Turkish Government.

VI. The surrender of all war vessels in Turkish waters or waters occupied by Turkey. These ships will be interned in such Turkish port or ports as may be directed, except such small vessels as are required for police and similar purposes in Turkish territorial waters.

VII. The Allies to have the right to occupy any strategic points in the event of any situation arising which threatens the security of the Allies.

VIII. Free use by allied ships of all ports and anchorages now in Turkish occupation and denial of their use by the enemy. Similar conditions are to apply to Turkish mercantile shipping in Turkish waters for the purposes of trade and the demobilization of the army.

IX. Allied occupation of the Taurus tunnel system.

X. Immediate withdrawal of Turkish troops from northern Persia to behind the pre-war frontier already has been ordered and will be carried out.

XI. A part of Transcaucasia already has been ordered to be evacuated by Turkish troops. The remainder to be evacuated if required by the Allies after they have studied the situation.

XII. Wireless, telegraph, and cable stations to be controlled by the Allies. Turkish Government messages to be excepted.

XIII. Prohibition against the destruction of any naval, military or commercial material.

XIV. Facilities are to be given for the purchase of coal, oil, fuel, and naval material from Turkish sources after the requirements of the country have been met. None of the above materials are to be exported.

XV. The surrender of all Turkish officers in Tripolitania and Cyrenaica to the nearest Italian garrison. Turkey agrees to stop supplies and communication with these officers if they do not obey the order to surrender.

XVI. The surrender of all garrisons in Hedjaz, Assir, Yemen, Syria and Mesopotamia to the nearest allied commander, and withdrawal of Turkish troops from Galicia, except those necessary to maintain order, as will be determined under Clause 6.

XVII. The use of all ships and repair facilities at all Turkish ports and arsenals.

XVIII. The surrender of all ports occupied in Tripolitania and Cyrenaica, including Misurata, to the nearest allied garrison.

XIX. All Germans and Austrians, naval, military or civilian, to be evacuated within one month from Turkish dominions, and those in remote districts as soon after that time as may be possible.

XX. Compliance with such orders as may be conveyed for the disposal of equipments, arms, and ammunition, including the transport of that portion of the Turkish army which is demobilized under Clause 5.

XXI. An allied representative to be attached to the Turkish Ministry of Supplies in order to safeguard allied interests, this representative to be furnished with all aid necessary for this purpose.

XXII. Turkish prisoners are to be kept at the disposal of the Allied Powers. The release of Turkish civilian prisoners and prisoners over military age is to be considered.

XXIII. An obligation on the part of Turkey to cease all relations with the Central Powers.

XXIV. In case of disorder in the six Armenian villayets the Allies reserve to themselves the right to occupy any part of them.

XXV. Hostilities between the Allies and Turkey shall cease from noon, local time, Thursday, October 31, 1918.

THE KAISER AGREES TO CONSTITUTIONAL REFORMS.

ON the occasion of the Constitutional amendment coming into force, said an official telegram from Berlin, Emperor William addressed to Prince Maximilian of Baden, the German Imperial Chancellor, a decree, on October 28, indorsing the decisions of the Reichstag and avowing his firm determination to co-operate in their full development. The Emperor's decree read: "Your Grand Ducal Highness: I return herewith for immediate publication the bill to amend the Imperial Constitution and the law of March 17, 1879, relative to the representation of the Imperial Chancellor, which has been laid before me for signature. On the occasion of this step, which is so momentous for the future history of the German people, I have a desire to give expression to my feelings. Prepared for by a series of Government acts, a new order comes into force which transfers the fundamental rights of the Kaiser's person to the people. Thus comes to a close a period which will stand in honor before the eyes of future generations. Despite all struggles between invested authority and aspiring forces, it has rendered possible to our people that tremendous development which imperishably revealed itself in the wonderful achievements of this war.

"In the terrible storms of the four years of war, however, old forms have been broken up, not to leave their ruins behind, but to make a place for new, vital forms. After the achievements of these times, the German people can claim that no right which may guarantee a free and happy future shall be withheld from them. The proposals of the Allied Governments, which are now adopted and extended, owe their origin to this conviction. I, however, with my exalted allies, indorse these decisions of Parliament in firm determination, so far as I am concerned, to co-operate in their full development, convinced that I am thereby promoting the weal of the German people. The Kaiser's office is one of service to the people. May, then, the new order release all the good powers which our people need in order to support the trials which are hanging over the Empire and with a firm step win a bright future from the gloom of the present.

"WILHELM, I. R."

TEXT OF ARMISTICE GRANTED TO AUSTRIA BY ALLIES.

FOLLOWING is the cabled text of the Allies armistice to Austria as given out by the State Department at Washington. It went into effect at 3 P. M., November 4, 1918.

MILITARY CLAUSES.

I. The immediate cessation of hostilities by land, by sea, and air.

II. Total demobilization of the Austro-Hungarian Army and immediate withdrawal of all Austro-Hungarian forces operating on the front from the North Sea to Switzerland.

Within Austro-Hungarian territory, limited as in Clause 3, below, there shall only be maintained as an organized military force reduced to pre-war effectives.

Half the divisional, corps and army artillery and equipment shall be collected at points to be indicated

by the Allies and United States of America for delivery to them, beginning with all such material as exists in the territories to be evacuated by the Austro-Hungarian forces.

III. Evacuation of all territories invaded by Austria-Hungary since the beginning of the war.

Withdrawal within such periods as shall be determined by the Commander-in-Chief of the Allied forces on each front of the Austro-Hungarian armies behind a line fixed as follows: From Pic Umbrail to the north of the Stelvio it will follow the crest of the Rhetian Alps up to the sources of the Adige and the Eisach, passing thence by Mounts Rescheu and Brenner and the heights of Oetz and Zoaller. The line thence turns south, crossing Mount Toblach and meeting the present frontier Carnic Alps. It follows this frontier up to Mount Tarvis, and after Mount Tarvis the watershed of the Julian Alps by the Col of Predil, Mount Mangart, the Tricorno (Terglou), and the watershed of the Cols di Podberdo, Podlaniscam, and Idria. From this point the line turns southeast toward the Schneeberg, excludes the whole basin of the Save and its tributaries. From Schneeberg it goes down toward the coast in such a way as to include Castua, Mattuglia, and Volosca in the evacuated territories. It will also follow the administrative limits of the present province of Dalmatia, including the north Lisarica sud Trivania, and to the south territory limited by a line from the (Semigrand) Cape Planca to the summits of the watersheds eastward, so as to include in the evacuated area all the valleys and water courses flowing toward Sebenico, such as the Cicola, Kerka, Butisnica, and their tributaries. It will also include all the islands in the north and west of Dalmatia from Premuda, Selve, Ulbo, Scherda, Maon, Paga, and Puntadura, in the north, up to Meleda, in the south, embracing Santandrea, Busi, Lisa, Lesina, Tercola, Curzola, Cazza, and Lagosta, as well as the neighboring rocks and islets and passages, only excepting the islands of Great and Small Zirona, Bua, Solta, and Brazza.

All territory thus evacuated shall be occupied by the forces of the Allies and the United States of America.

All military and railway equipment of all kinds, including coal belonging to or within those territories, to be left in situ and surrendered to the Allies, according to special orders given by the Commander-in-Chief of the forces of the associated powers on the different fronts. No new destruction, pillage, or requisition to be done by enemy troops in the territories to be evacuated by them and occupied by the forces of the associated powers.

IV. The Allies shall have the right of free movement over all road and rail and water ways in Austro-Hungarian territory and of the use of the necessary Austrian and Hungarian means of transportation. The armies of the associated powers shall occupy such strategic points in Austria-Hungary at times as they may deem necessary to enable them to conduct military operations or to maintain order.

They shall have the right of requisition on payment for the troops of the associated powers wherever they may be.

V. Complete evacuation of all German troops within fifteen days, not only from the Italian and Balkan fronts but from all Austro-Hungarian territory. Internment of all German troops which have not left Austria-Hungary within the date.

VI. The administration of the evacuated territories of Austria-Hungary will be intrusted to the local authorities, under the control of the Allied and associated armies of occupation.

VII. The immediate repatriation without reciprocity of all Allied prisoners of war and internal subjects of civil populations evacuated from their homes, on conditions to be laid down by the Commander-in-Chief of the forces of the associated powers on the various fronts. Sick and wounded who cannot be removed from evacuated territory will be cared for by Austro-Hungarian personnel who will be left on the spot with the medical material required.

NAVAL CONDITIONS.

I. Immediate cessation of all hostilities at sea and definite information to be given as to the location and movements of all Austro-Hungarian ships. Notification to be made to neutrals that freedom of navigation in all territorial waters is given to the naval and mercantile marine of the Allied and associated powers, all questions of neutrality being waived.

II. Surrender to the Allies and the United States of fifteen Austro-Hungarian submarines completed between the years 1910 and 1918, and of all German submarines which are in or may hereafter enter Austro-Hungarian territorial waters. All other Austro-Hungarian submarines to be paid off and completely disarmed and to remain under the supervision of the Allies and the United States.

III. Surrender to the Allies and the United States with their complete armament and equipment of three battleships, three light cruisers, nine destroyers, twelve torpedo boats, one mine layer, six Danube monitors, to be designated by the Allies and the United States of America. All other surface warships, including river craft, are to be concentrated in Austro-Hungarian naval bases to be designated by the Allies and the United States of America, and are to be paid off and completely disarmed and placed under the supervision of the Allies and the United States of America.

IV. Freedom of navigation to all warships and merchant ships of the Allied and associated powers to be given in the Adriatic and up the River Danube and its tributaries in the territorial waters and territory of Austria-Hungary. The Allies and associated powers shall have the right to sweep up all mine fields and obstructions, and the positions of these are to be indicated. In order to insure the freedom of navigation on the Danube, the Allies and the United States of America shall be empowered to occupy or to dismantle all fortifications or defense works.

V. The existing blockade conditions set up by the Allied and associated powers are to remain unchanged, and all Austro-Hungarian merchant ships found at sea are to remain liable to capture, save exceptions which may be made by a commission nominated by the Allies and the United States of America.

VI. All naval aircraft are to be concentrated and impactionized in Austro-Hungarian bases to be designated by the Allies and the United States of America.

VII. Evacuation of all the Italian coasts and of all ports occupied by Austria-Hungary outside their national territory and the abandonment of all floating craft, naval materials, equipment and materials for inland navigation of all kinds.

VIII. Occupation by the Allies and the United States of America of the land and sea fortifications and the islands which form the defenses and of the dockyards and arsenal at Pola.

IX. All merchant vessels held by Austria-Hungary belonging to the Allies and associated powers to be returned.

X. No destruction of ships or of materials to be permitted before evacuation, surrender, or restoration.

XI. All naval and mercantile marine prisoners of the Allied and associated powers in Austro-Hungarian hands to be returned without reciprocity.

CONGRATULATIONS TO ITALY.

THE PRESIDENT, November 4, 1918, sent the following message by cable to the King of Italy: "May I not say how deeply and sincerely the people of the United States rejoice that the soil of Italy is delivered from her enemies? In their name I send Your Majesty and the great Italian people the most enthusiastic congratulations." Secretary Lansing sent this message to Baron Sonnino, Italian Minister for Foreign Affairs, now in Versailles: "At the moment of the complete victory of the Italian arms I take this means of conveying to you my most sincere congratulations. The Government of the United States admires the valor of the Italian armies and unites with the Italian nation in this hour of rejoicing and of triumph."

THE TURKISH ARMISTICE.

THE armistice granted by the Allies and accepted by Turkey, as made public November 1, 1918, at London, consisted of the following terms:

I. The opening of the Dardanelles and the Bosporus and access to the Black Sea. Allied occupation of the Dardanelles and Bosporus forts.

II. The positions of all mine fields, torpedo tubes and other obstructions in Turkish waters are to be indicated and assistance given to sweep or remove them, as may be required.

III. All available information concerning mines in the Black Sea is to be communicated.

IV. All Allied prisoners of war and Armenian interned persons and prisoners are to be collected in Constantinople and handed over unconditionally to the Allies.

V. Immediate demobilization of the Turkish Army, except such troops as are required for surveillance on the frontiers and for the maintenance of internal order. The number of effectives and their disposition to be determined later by the Allies after consultation with the Turkish Government.

VI. The surrender of all war vessels in Turkish waters or waters occupied by Turkey. These ships will be interned in such Turkish port or ports as may be directed, except such small vessels as are required for police and similar purposes in Turkish territorial waters.

VII. The Allies to have the right to occupy any strategic points in the event of any situation arising which threatens the security of the Allies.

VIII. Free use by Allied ships of all ports and anchorages now in Turkish occupation and denial of their use by the enemy. Similar conditions are to apply to Turkish mercantile shipping in Turkish waters for the purposes of trade and the demobilization of the army.

IX. Allied occupation of the Taurus tunnel system.

X. Immediate withdrawal of Turkish troops from northern Persia to behind the pre-war frontier already has been ordered and will be carried out.

XI. A part of Transcaucasia already has been ordered to be evacuated by Turkish troops. The remainder to be evacuated if required by the Allies after they have studied the situation.

XII. Wireless, telegraph and cable stations to be controlled by the Allies. Turkish Government messages to be excepted.

XIII. Prohibition against the destruction of any naval, military or commercial material.

XIV. Facilities are to be given for the purchase of coal, oil fuel and naval material from Turkish sources, after the requirements of the country have been met. None of the above materials are to be exported.

XV. The surrender of all Turkish officers in Tripolitania and Cyrenaica to the nearest Italian garrison. Turkey agrees to stop supplies and communication with these officers if they do not obey the order to surrender.

XVI. The surrender of all garrisons in Hedjaz, Assir, Yemen, Syria and Mesopotamia to the nearest Allied commander, and withdrawal of Turkish troops from Cilicia, except those necessary to maintain order, as will be determined under clause 6.

XVII. The use of all ships and repair facilities at all Turkish ports and arsenals.

XVIII. The surrender of all ports occupied in Tripolitania and Cyrenaica, including Misurata, to the nearest Allied garrison.

XIX. All Germans and Austrians, naval, military or civilian, to be evacuated within one month from Turkish dominions, and those in remote districts as soon after that time as may be possible.

XX. Compliance with such orders as may be conveyed for the disposal of equipments, arms and ammunition, including the transport of that portion of the Turkish Army which is demobilized under clause 6.

XXI. An Allied representative to be attached to the Turkish Ministry of Supplies in order to safeguard Allied interests. This representative to be furnished with all aid necessary for this purpose.

XXII. Turkish prisoners are to be kept at the disposal of the Allied Powers. The release of Turkish civilian prisoners and prisoners over military age is to be considered.

XXIII. An obligation on the part of Turkey to cease all relations with the Central Powers.

XXIV. In case of disorder in the six Armenian vilayets the Allies reserve to themselves the right to occupy any part of them.

XXV. Hostilities between the Allies and Turkey shall cease from noon, local time, Thursday, the 31st of October, 1918.

On November 1 a fleet of Allied mine sweepers began to clear the Dardanelles, after which the Allied fleet passed through the Bosporus to the Black Sea.

GERMANY NOTIFIED HER PEACE PLEA IS GRANTED.

ON November 4, 1918, the State Department, at Washington, made public the following note from Secretary Lansing to the German Government, through the Swiss Legation: "In my note of October 23, 1918, I advised you that the President had transmitted his correspondence with the German authorities to the Governments with which the Government of the United States is associated as a belligerent, with the suggestion that if those Governments were disposed to accept peace upon the terms and principles indicated, their military advisers and the military advisers of the United States be asked to submit to the Governments associated against Germany the necessary terms of such an armistice as would fully protect the interests of the peoples involved and insure to the Associated Governments the unrestricted power to safeguard and enforce the details of the peace to which the German Government had agreed, provided they deem such an armistice possible from the military point of view. The President is now in receipt of a memorandum of observations by the Allied Governments on this correspondence, which is as follows:

"'The Allied Governments have given careful consideration to the correspondence which has passed between the President of the United States and the German Government. Subject to the qualifications which follow, they declare their willingness to make peace with the Government of Germany on the terms of peace laid down in the President's address to Congress of January, 1918, and the principles of settlement enunciated in his subsequent addresses. They must point out, however, that Clause 2, relating to what is usually described as the freedom of the seas, is open to various interpretations, some of which they could not accept. They must, therefore, reserve to themselves complete freedom on this subject when they enter the peace conference. Further, in the conditions of peace laid down in his address to Congress of January 8, 1918, the President declared that invaded territories must be restored as well as evacuated and freed. The Allied Governments feel that no doubt ought to be allowed to exist as to what this provision implies. By it they understand that compensation will be made by Germany for all damage done to the civilian population of the Allies and their property by the aggression of Germany by land, by sea and from the air.'

"I am instructed by the President to say that he is in agreement with the interpretation set forth in the last paragraph of the memorandum above quoted. I am further instructed by the President to request you to notify the German Government that Marshal Foch has been authorized by the Government of the United States and the Allied Governments to receive properly accredited representatives of the German Government and to communicate to them terms of an armistice. Accept, sir, the renewed assurances of my highest consideration. ROBERT LANSING."

The President's second point, on which decision was reserved, read: "Absolute freedom of navigation upon the seas outside territorial waters alike in peace and war, except as the seas may be closed in whole or in part by international action for the enforcement of international covenants."

UNITED STATES TO SUPPORT ROUMANIA.

SECRETARY LANSING sent, November 5, 1918, the following note to Roumania through the Washington representative of that Government:

"Sir: The Government of the United States has constantly had in mind the future welfare and integrity of Roumania as a free and independent country and prior to the existence of a state of war between the United States and Austria-Hungary a message of sympathy and appreciation was sent by the President to the King of Roumania. Conditions have changed since that time and the President accordingly desires me to inform you that the Government of the United States is not unmindful of the aspirations of the Roumanian people without as well as within the boundaries of the kingdom. It has witnessed their struggles and sufferings and sacrifices in the cause of freedom from their enemies and their oppressors With the spirit of national unity and the aspirations of the Roumanians everywhere the Government of the United States deeply sympathizes and will not neglect at the proper time to exert its influence that the just political and territorial rights of the Roumanian people may be obtained and made secure from all foreign aggression. Accept, sir, the renewed assurances of my high consideration. ROBERT LANSING."

PROTEST GERMAN RUINATION OF BELGIAN MINES.

SECRETARY LANSING published, November 7, 1918, the following note from him to the German Government, through the Swiss Minister at Washington: "In its note of October 20 the German Government announced that 'the German troops are under the strictest instructions to spare private property and to exercise care for the population to the best of their ability.' Information has now reached the Government of the United States to the effect that the German authorities in Belgium have given notice to the coal mining companies that all men and animals should be brought out of the pits; that all raw materials in the possession of the companies should be delivered to the Germans and that the mines will be destroyed at once.

"Acts so wanton and malicious, involving as they do the destruction of a vital necessity to the civilian population of Belgium and the consequent suffering and loss of human life which will follow, cannot fail to impress the Government and the people of the United States as wilfully cruel and inhuman. If these acts, in flagrant violation of the declaration of October 20, are perpetrated it will confirm the belief that the solemn assurances of the German Government are not given in good faith. In the circumstances the Government of the United States to which the declaration of October 20 was made, enters an emphatic protest against the measures contemplated by the German authorities, for whose conduct the Government of Germany is wholly responsible."

THE GERMAN NEW GOVERNMENT'S APPEAL TO NATION.

CHANCELLOR FRIEDRICH EBERT, on assuming office as successor to Prince Maximilian of Baden, issued the following manifesto, November 9, 1918: "The new Government has taken charge of business in order to preserve the German people from civil war and famine and in order to enforce its just claims of self-determination. This task only can be accomplished if all authorities in all civil offices in towns and in landed districts lend a helpful hand. I know it will be hard for many to co-operate with the new men who now have to lead the business of the empire. But I appeal to their love for our people. If the organization of public life stops in this serious hour, then Germany would be the prey of anarchy and most terribly miserable. Therefore, lend, together with me, your help to our country by continuing work in a fearless and unrelenting manner—everybody in his position until the hour has come that relieves us of our duty.

"Citizens: Former Chancellor Prince Max of Baden, with the assent of all the Secretaries of State, has charged me to carry on the business of Chancellor. I am going to form a new Government with parties and shall report with brief delay about results to the public. The new Government will be a Government of the people. Its endeavor must be to bring to the people peace as quickly as possible and to confirm the liberty which it has gained. Citizens, I ask for the assistance of you all in the heavy task which awaits you. You know how seriously war threatens provisionment of the people, which is the first condition of political life.

"Political revolution ought not to disturb approvisionment of land districts nor production of food nor its transportation into towns, but to foster it. Scarcity of food means looting and plundering, with misery for all. The poorest would suffer in the most heavy fashion. Workingmen in industries would be hit most severely. Whosoever takes away food or other objects of necessity or means of transportation necessary for their distribution commits the heaviest sin against all. Citizens, I urge you all to leave streets and provide for quiet and order."

BRITISH RED CROSS SOCIETY.

(Condensed from the London Times.)

The Red Cross movement originated during the war in Italy, in 1859, but did not take organized shape until a meeting held at Geneva, Switzerland, October 26, 1863. Delegates were present representing Austria, Spain, France, Great Britain, Holland, Prussia and six other German States, Sweden, Switzerland, Belgium, Denmark, Italy, and Portugal. A badge (a white armlet with a red cross on it) was made a compulsory sign of the organization. A National Society for Aid to the Sick and Wounded in War was formed in England in 1870, which soon became known as the "Red Cross Society." At a conference, in 1898, of members of the "Red Cross Society," the St. John Ambulance Association, and the Army Nursing Service Reserve, it was resolved to unite in forming a body to be known as the "Central British Red Cross Council." This was organized in 1899, at the outbreak of the Boer War.

After that war it was felt that a still closer union of agencies giving voluntary help to the Army Service ought to be achieved, and so, on July 17, 1905, a meeting was held at Buckingham Palace, under the Presidency of Queen Alexandra, with the object of founding one society which should represent and co-ordinate all the Red Cross work in the empire. The British Red Cross Society was therefore inaugurated at this meeting. It included the old National Society for Aid to the Sick and Wounded in War and also the more recent Central British Red Cross Council, on which representatives from the National Aid Society, the Order of St. John and the St. Andrew's Ambulance Association, the Army Nursing Service Reserve, the War Office, and the Admiralty had sat. The old National Aid Society ceased to exist, and became entirely merged in the new British Red Cross Society. In 1906 a second Geneva Convention was drawn up which is frequently confused with that of 1864. Sir John Furley, who had been so closely identified with this movement and who is, indeed, doyen of the international delegates of the Red Cross Societies, was sent out by the Foreign Office as one of the delegates to the conference. The Conference drew up thirty-three articles dealing with the wounded and sick, medical units and establishments, personnel, material, convoys of evacuation, the distinctive emblem, the application and carrying out of the convention, the prevention of abuses and infractions, and general provisions. As a compliment to Geneva the heraldic emblem of the red cross on white ground, formed by reversing the colors of the city, was retained as the emblem and distinctive sign of the medical service of armies.

On the outbreak of the present war the British Red Cross Society at once called together its various agencies to the help of the War Office, and in October, 1914, the Order of St. John decided to co-operate with the society for the purposes of the war. A joint committee of the two societies was therefore formed with this object.

Wilson Announces to Congress Close of the War—Terms of German Armistice.

THE President, on Monday, November 11, 1918, announced to Congress, in joint session, the armistice terms to Germany, and the consequent close of the war, in the following address:

"Gentleman of the Congress: In these times of rapid and stupendous change it will in some degree lighten my sense of responsibility to perform in person the duty of communicating to you some of the larger circumstances of the situation with which it is necessary to deal. The German authorities, who have at the invitation of the Supreme War Council, been in communication with Marshal Foch, have accepted and signed the terms of armistice which he was authorized and instructed to communicate to them. These terms are as follows:

THE ARMISTICE.

I. MILITARY CLAUSES ON WESTERN FRONT.

"I. Cessation of operations by land and in the air six hours after the signature of the armistice.

"II. Immediate evacuation of invaded countries: Belgium, France, Alsace-Lorraine, Luxemburg, so ordered as to be completed within fourteen days from the signature of the armistice. German troops which have not left the above-mentioned territories within the period fixed will become prisoners of war. Occupation by the allied and United States forces jointly will keep pace with evacuation in these areas. All movements of evacuation and occupation will be regulated in accordance with a note annexed to the stated terms.

"III. Repatriation, beginning at once and to be completed within fourteen days, of all inhabitants of the countries above mentioned, including hostages and persons under trial or convicted.

"IV. Surrender in good condition by the German armies of the following equipment: Five thousand guns (2,500 heavy, 2,500 field), 30,000 machine guns. Three thousand minenwerfers. Two thousand airplanes (fighters, bombers—firstly, D, seventy-three's and night bombing machines). The above to be delivered in situ to the Allies and the United States troops in accordance with the detailed conditions laid down in the annexed note.

"V. Evacuation by the German armies of the countries on the left bank of the Rhine. These countries on the left bank of the Rhine shall be administered by the local authorities under the control of the allied and United States armies of occupation. The occupation of these territories will be determined by allied and United States garrisons holding the principal crossings of the Rhine—Mayence, Cobienz, Cologne—together with bridgeheads at these points in thirty kilometer radius on the right bank and by garrisons similarly holding the strategic points of the regions. A neutral zone shall be reserved on the right of the Rhine between the stream and a line drawn parallel to it forty kilometers to the east from the frontier of Holland to the parallel of Gernsheim and as far as practicable a distance of thirty kilometers from the east of the stream from this parallel upon the Swiss frontier. Evacuation by the enemy of the Rhine lands shall be so ordered as to be completed within a further period of eleven days—in all, nineteen days after the signature of the armistice. [Here the President interrupted his reading to remark that there evidently had been an error in transmission, as the arithmetic was very bad. The "further period" of eleven days is in addition to the fourteen days allowed for evacuation of invaded countries, making twenty-five days given to the Germans to get entirely clear of the Rhine lands.] All movements of evacuation and occupation will be regulated according to the note annexed.

"VI. In all territory evacuated by the enemy there shall be no evacuation of inhabitants; no damage or harm shall be done to the persons or property of the inhabitants. No destruction of any kind to be committed. Military establishments of all kinds shall be delivered intact as well as military stores of food, munitions, equipment not removed during the periods fixed for evacuation. Stores of food of all kinds for the civil population, cattle, etc., shall be left in situ. Industrial establishments shall not be impaired in any way and their personnel shall not be moved. Roads and means of communication of every kind, railroad, waterways, main roads, bridges, telegraphs, telephones, shall be in no manner impaired.

"VII. All civil and military personnel at present employed on them shall remain. Five thousand locomotives, 50,000 wagons, and 10,000 motor lorries in good working order with all necessary spare parts and fittings shall be delivered to the Associated Powers within the period fixed for the evacuation of Belgium and Luxemburg. The railways of Alsace-Lorraine shall be handed over within the same period, together with all pre-war personnel and material. Further material necessary for the working of railways in the country on the left bank of the Rhine shall be left in situ. All stores of coal and material for the upkeep of permanent ways, signals and repair shops left entire in situ and kept in an efficient state by Germany during the whole period of armistice. All barges taken from the Allies shall be restored to them. A note appended regulates the details of these measures.

"VIII. The German command shall be responsible for revealing all mines or delay-acting fuse disposed on territory evacuated by the German troops, and shall assist in their discovery and destruction. The German command shall also reveal all destructive measures that may have been taken (such as poisoning or polluting of springs, wells, etc.) under penalty of reprisals.

"IX. The right of requisition shall be exercised by the Allies and the United States armies in all occupied territory. The upkeep of the troops of occupation in the Rhine land (excluding Alsace-Lorraine) shall be charged to the German Government.

"X. An immediate repatriation without reciprocity according to detailed conditions, which shall be fixed, of all allied and United States prisoners of war. The allied powers and the United States shall be able to dispose of these prisoners as they wish.

"XI. Sick and wounded who cannot be removed from evacuated territory will be cared for by German personnel, who will be left on the spot with the medical materials required.

II. DISPOSITION RELATIVE TO THE EASTERN FRONTIERS OF GERMANY.

"XII. All German troops at present in any territory which before the war belonged to Russia, Roumania or Turkey, shall withdraw within the frontiers of Germany as they existed on August 1, 1914.

"XIII. Evacuation by German troops to begin at once, and all German instructors, prisoners, and civilian as well as military agents now on the territory of Russia (as defined before 1914) to be recalled.

"XIV. German troops to cease at once all requisitions and seizures and any other undertaking with a view to obtaining supplies intended for Germany in Roumania and Russia (as defined on August 1, 1914).

"XV. Abandonment of the treaties of Bucharest and Brest-Litovsk and of the supplementary treaties.

"XVI. The Allies shall have free access to the territories evacuated by the Germans on their eastern frontier either through Danzig or by the Vistula in order to convey supplies to the populations of those territories or for any other purpose.

III. CLAUSE CONCERNING EAST AFRICA.

"XVII. Unconditional capitulation of all German forces operating in East Africa within one month.

IV. GENERAL CLAUSES.

"XVIII. Repatriation, without reciprocity, within a maximum period of one month, in accordance with detailed conditions hereafter to be fixed, of all civilians interned or deported, who may be citizens of other allied or associated States than those mentioned in Clause Three, Paragraph Nineteen, with the reservation that any future claims and demands of the Allies and the United States of America remain unaffected.

"XIX. The following financial conditions are required: Reparation for damage done. While such armistice lasts no public securities shall be removed by the enemy which can serve as a pledge to the Allies for the recovery or reparation for war losses. Immediate restitution of the cash deposit in the National Bank of Belgium, and in general immediate return of all documents, specie, stocks, shares, paper money, together with plant for the issue thereof, touching public or private interests in the invaded countries. Restitution of the Russian and Roumanian gold yielded to Germany or taken by that power. This gold to be delivered in trust to the Allies until the signature of peace.

V. NAVAL CONDITIONS.

"XX. Immediate cessation of all hostilities at sea and definite information to be given as to the location and movements of all German ships. Notification to be given to neutrals that freedom of navigation in all territorial waters is given to the naval and mercantile marines of the allied and associated powers, all questions of neutrality being waived.

"XXI. All naval and mercantile marine prisoners of the allied and associated powers in German hands to be returned without reciprocity.

"XXII. Surrender to the Allies and the United States of America of one hundred and sixty German submarines (including all submarine cruisers and mine laying submarines), with their complete armament and equipment in ports which will be specified by the Allies and the United States of America. All other submarines to be paid off and completely disarmed and placed under the supervision of the allied powers and the United States of America.

"XXIII. The following German surface warships, which shall be designated by the Allies and the United States of America, shall forthwith be disarmed and thereafter interned in neutral ports, or for the want of them, in allied ports, to be designated by the Allies and the United States of America, and placed under the surveillance of the Allies and the United States of America, only caretakers being left on board, namely: Six battle cruisers, ten battleships, eight light cruisers, including two mine layers, fifty destroyers of the most modern type. All other surface warships (including river craft), are to be concentrated in German naval bases to be designated by the Allies and the United States of America, and are to be paid off and completely disarmed and placed under the supervision of the Allies and the United States of America. All vessels of the auxiliary fleet, trawlers, motor vessels, etc., are to be disarmed.

"XXIV. The Allies and the United States of America shall have the right to sweep up all mine fields and obstructions laid by Germany outside German territorial waters and the positions of these are to be indicated.

"XXV. Freedom of access to and from the Baltic to be given to the naval and mercantile marines of the allied and associated powers. To secure this the Allies and the United States of America shall be empowered to occupy all German forts, fortifications, batteries and defense works of all kinds in all the entrances from the Cattegat into the Baltic, and to sweep up all mines and obstructions within and without German territorial waters, without any question of neutrality being raised, and the positions of all such mines and obstructions are to be indicated.

"XXVI. The existing blockade conditions set up by the allied and associated powers are to remain unchanged, and all German merchant ships found at sea are to remain liable to capture.

"XXVII. All naval aircraft are to be concentrated and immobilized in German bases to be specified by the Allies and the United States of America.

"XXVIII. In evacuating the Belgian coasts and ports, Germany shall abandon all merchant ships, tugs, lighters, cranes and all other harbor materials, all materials for inland navigation, all aircraft and all materials and stores, all arms and armaments, and all stores and apparatus of all kinds.

"XXIX. All Black Sea ports are to be evacuated by Germany; all Russian war vessels of all descriptions seized by Germany in the Black Sea are to be handed over to the Allies and the United States of America; all neutral merchant vessels seized are to be released; all warlike and other materials of all kinds seized in those ports are to be returned and German materials as specified in Clause Twenty-eight are to be abandoned.

"XXX. All merchant vessels in German hands belonging to the allied and associated powers are to be restored in ports to be specified by the Allies and the United States of America without reciprocity.

"XXXI. No destruction of ships or of materials to be permitted before evacuation, surrender, or restoration.

"XXXII. The German Government will notify the neutral Governments of the world, and particularly the Governments of Norway, Sweden, Denmark, and Holland, that all restrictions placed on the trading of their vessels with the allied and associated countries, whether by the German Government or by private German interests, and whether in return for specific concessions, such as the export of shipbuilding materials or not, are immediately cancelled.

"XXXIII. No transfers of German merchant shipping of any description to any neutral flag are to take place after signature of the armistice.

VI. DURATION OF ARMISTICE.

"XXXIV. The duration of the armistice is to be thirty days, with option to extend. During this period, on failure of execution of any of the above clauses, the armistice may be denounced by one of the contracting parties on forty-eight hours' previous notice.

VII. THE LIMIT FOR REPLY.

"XXXV. This armistice to be accepted or refused by Germany within seventy-two hours of notification.

"The war thus comes to an end; for, having accepted these terms of armistice, it will be impossible for the German command to renew it.

"It is not now possible to assess the consequences of this great consummation. We know only that this tragical war, whose consuming flames swept from one nation to another until all the world was on fire, is at an end, and that it was the privilege of our own people to enter it at its most critical juncture in such fashion and in such force as to contribute, in a way of which we are all deeply proud, to the great result. We know, too, that the object of the war is attained; the object upon which all free men had set their hearts; and attained with a sweeping completeness which even now we do not realize. Armed imperialism such as the men conceived who were but yesterday the masters of Germany is at an end, its illicit ambitions engulfed in black disaster. Who will now seek to revive it? The arbitrary power of the military caste of Germany which once could secretly and of its own single choice disturb the peace of the world is discredited and destroyed. And more than that—much more than that—has been accomplished. The great nations which associated themselves to destroy it have now definitely united in the common purpose to set up such a peace as will satisfy the longing of the whole world for disinterested justice, embodied

in settlements which are based upon something much better and more lasting that the selfish competitive interests of powerful states. There is no longer conjecture as to the objects the victors have in mind. They have a mind in the matter, not only, but a heart also. Their avowed and concerted purpose is to satisfy and protect the weak as well as to accord their just rights to the strong.

"The humane temper and intention of the victorious Governments have already been manifested in a very practical way. Their representatives in the Supremo War Council at Versailles have by unanimous resolution assured the peoples of the Central Empires that everything that is possible in the circumstances will be done to supply them with food and relieve the distressing want that is in so many places threatening their very lives; and steps are to be taken immediately to organize these efforts at relief in the same systematic manner that they were organized in the case of Belgium. By the use of the idle tonnage of the Central Empires it ought presently to be possible to lift the fear of utter misery from their oppressed populations and set their minds and energies free for the great and hazardous tasks of political reconstruction which now face them on every hand. Hunger does not breed reform; it breeds madness and all the ugly distempers that make an ordered life impossible.

"For with the fall of the ancient Governments, which rested like an incubus on the peoples of the Central Empires, has come political change not merely, but revolution; and revolution which seems as yet to assume no final and ordered form, but to run from one fluid change to another, until thoughtful men are forced to ask themselves, with what governments and of what sort are we about to deal in the making of the covenants of peace? With what authority will they meet us, and with what assurance that their authority will abide and sustain securely the international arrangements into which we are about to enter? There is here matter for no small anxiety and misgiving. When peace is made, upon whose promises and engagements besides our own is it to rest?

"Let us be perfectly frank with ourselves and admit that these questions cannot be satisfactorily answered now or at once. But the moral is not that there is little hope of an early answer that will suffice. It is only that we must be patient and helpful and mindful above all of the great hope and confidence that lie at the heart of what is taking place. Excesses accomplish nothing. Unhappy Russia has furnished abundant recent proof of that. Disorder immediately defeats itself. If excesses should occur, if disorder should for a time raise its head, a sober second thought will follow and a day of constructive action, if we help and do not hinder. The present and all that it holds belong to the nations and the peoples who preserve their self-control and the orderly processes of their Governments, the future to those who prove themselves the true friends of mankind. To conquer with arms is to make only a temporary conquest; to conquer the world by earning its esteem is to make permanent conquest. I am confident that the nations that have learned the discipline of freedom and that have settled with self-possession to its ordered practice are now about to make conquest of the world by the sheer power of example and of friendly helpfulness.

"The peoples who have but just come out from under the yoke of arbitrary government and who are now coming at last into their freedom will never find the treasures of liberty they are in search of if they look for them by the light of the torch. They will find that every pathway that is stained with the blood of their own brothers leads to the wilderness, not to the seat of their hope. They are now face to face with their initial test. We must hold the light steady until they find themselves. And in the mean time, if it be possible, we must establish a peace that will justly define their place among the nations, remove all fear of their neighbors and of their former masters, and enable them to live in security and contentment when they have set their own affairs in order. I, for one, do not doubt their purpose or their capacity. There are some happy signs that they know and will choose the way of self-control and peaceful accommodation. If they do, we shall put our aid at their disposal in every way that we can. If they do not, we must await with patience and sympathy the awakening and recovery that will assuredly come at last.

A supplementary declaration to the armistice terms was signed to the effect that, in the event of the six German battle cruisers, ten battleships, eight light cruisers, and fifty destroyers, not being handed over, owing to a mutinous state, the Allies reserved the right to occupy Heigoland as an advance base to enable them to enforce the terms.

THE AMENDED ARMISTICE.

Changes in the armistice terms with Germany, which stiffened them in some vital respects, were made before their final signature. They were not known at Washington when the President read the armistice to Congress. They relate chiefly to the amount of material and time of surrender and do not affect the general purport of the conditions.

MUST GIVE UP ALL U BOATS.

The most interesting change relates to submarines. Originally Germany was ordered to turn over 160 U boats, but the revised edition of the terms provides that all submarines of every description must be surrendered to the Allies, and they must be on their way to the ports designated by the Allies within two weeks after getting the order.

Instead of 60,000 railroad cars—for that is how the word wagons following locomotives is interpreted—the revised terms call for 150,000.

It was the matter of transport demands that brought the protest from Foreign Minister Solf. The blockade continuing in force he did not see how food would reach Germany, and the demand for 5,000 locomotives and 150,000 cars further alarmed him. This, in connection with the order that Germany should feed the troops of occupation, gave him the idea that the starvation of Germany was intended.

Dr. Solf did not know that our intentions were not those of Germany when she made similar demands on Belgium, and that the Allies meant to use the German ships to bring food and the locomotives and cars to distribute it under the directions of Hoover who will soon be on his way to take up the task.

FULL TEXT OF ALLIED TERMS.

Here are the amended terms as announced by the State Department:

Article 3. Fifteen days instead of fourteen are allowed for the repatriation, beginning at once, of all the inhabitants removed from invaded countries, including hostages and persons under trial or convicted.

Article 4. Providing for the surrender of munitions and equipment reduces the number of machine guns to be delivered from 30,000 to 25,000, the number of airplanes from 2,000 to 1,709.

Article 5. Providing for the evacuation by the Germans of the countries, on the left bank of the Rhine, stipulates that these countries shall be administered by "the local troops of occupation" instead of "by the local authorities under the control of the Allied and United States Armies, and the occupation is to be "carried out by" instead of "determined by" Allied and United States garrisons holding strategic points and the principal crossings of the Rhine. Thirteen days instead of twenty-five are allowed for completion of the evacuation.

Article 6. Providing that no damage or harm shall be done to persons and property in territory evacuated by the Germans has a sentence added specifically stipulating that no person shall be prosecuted for offenses of participation in war measures prior to the signing of the armistice.

Article 7. Providing for the abandonment or delivery in good order to the associated powers of all roads and means of communication and transportation in evacuated territory, calls for 150,000 wagons (railroad cars) instead of 50,000, 5,000 motor lorries instead of 10,000, and requires that all civilian and military personnel at present employed on such means of communication and transporta-

TERMS OF GERMAN ARMISTICE—*Continued.*

tion including waterways, shall remain. Thirty-one instead of twenty-five days are allowed for handing over the material. Thirty-six days are allowed for the handing over of the railways of Alsace-Lorraine, together with the pre-war personnel.

RIGHT OF REQUISITION.

Article 8. Forty-eight hours is given the German command to reveal destructive measures, such as polluted springs and wells, and to reveal and assist in discovering and destroying mines or delayed action fuses on evacuated territory. No time limit was fixed originally.

Article 9. Providing for the right of requisition by the United States and Allied armies in occupied territory, has the clause added "subject to regulation of accounts with those whom it may concern."

Article 10. Providing for the repatriation without reciprocity of all Allied and United States prisoners of war, including persons under trial or convicted, has the following added: "This condition annuls the previous conventions on the subject of the exchange of prisoners of war, including the one of July, 1918, in course of ratification. However, the repatriation of German prisoners of war interned in Holland and in Switzerland shall continue as before. The repatriation of German prisoners of war shall be regulated at the conclusion of the preliminaries of peace."

Article 12. Providing for the withdrawal of German troops from territory which belonged before the war to Russia, Roumania and Turkey, is rewritten. Territory which belonged to Austria-Hungary is added to that from which the Germans must withdraw immediately, and as to territory which belonged to Russia it is provided that the German troops now there shall withdraw within the frontiers of Germany "as soon as the Allies, taking into account the internal situation of those territories, shall decide that the time for this has come."

Article 15. "Renunciation" is substituted for "abandonment" in stipulating that the Treaties of Bucharest and Brest-Litovsk are nullified.

Article 16. Providing free access for the Allies into territory evacuated through the German eastern frontier, is changed so as to declare such access is for the purpose of conveying supplies to the populations, and for the purpose of maintaining order," instead of "or for any other purpose."

COLONIES IN EAST AFRICA.

Article 17. Originally providing for the "unconditional capitulation" within one month of all German forces operating in East Africa, is substituted by a clause requiring only "evacuation by all German forces operating in East Africa within a period to be fixed by the Allies."

Article 18. Providing for the repatriation of all civilians belonging to the Allies or associated powers other than those enumerated in Article 3, is amended to eliminate a reservation that any future claims or demands by the Allies and the United States shall remain unaffected.

Article 22. Providing for the surrender of 160 German submarines, is changed to read "all submarines now existing," with the added stipulation that "those which cannot take these (take the sea) shall be disarmed of the material and personnel and shall remain under the supervision of the Allies and the United States." Further provisions are added requiring that all the conditions of the article shall be carried into effect within fourteen days, that submarines ready for sea shall be prepared to leave German ports immediately upon orders by wireless, and the remainder at the earliest possible moment.

Article 23. Providing for the disposition of German surface warships, had additional clauses requiring that vessels designated for internment shall be ready to leave German ports within seven days upon directions by wireless, and that the military armament of all vessels of the auxiliary fleet shall be put on shore.

Article 26. Providing that the Allied blockade remains unchanged has this sentence added: "The Allies and the United States should give consideration to the provisioning of Germany during the armistice to the extent recognized as necessary."

Article 28. Providing conditions of evacuation of the Belgian coast (from which the Germans actually had been driven before the armistice was signed) was changed in minor particulars.

Article 34. Providing that the duration of the armistice shall be thirty days, and that if its clauses are not carried into execution, it may be renounced upon forty-eight hours' warning, has the following added: "It is understood that the execution of Articles 3 and 18 shall not warrant the denunciation of the armistice on the ground of insufficient execution within a period fixed except in the case of bad faith in carrying them into execution. In order to assure the execution of this convention under the best conditions the principle of a permanent international armistice commission is admitted. This commission shall act under the authority of the Allied military and naval commanders in chief."

KING GEORGE THANKS AMERICA FOR VICTORY.

King George, on the signing of the armistice, sent a message of congratulation to President Wilson and of thanks to the people of the United States for their aid in the war. President Wilson replied expressing warm appreciation. The King's message follows:

"At this moment of universal gladness I send you, Mr. President, and the people of your great Republic, a message of congratulation and deep thanks in my own name and that of the people of this Empire. It is indeed a matter of solomn thanksgiving that the peoples of our two countries, akin in spirit as in speech, should to-day be united in this greatest of democracy's achievements. I thank you and the people of the United States for the high and noble part which you have played in this glorious chapter of history and freedom."

President Wilson's cablegram to King George follows:

"Your generous and gracious message is most warmly appreciated, and you may rest assured that our hearts on this side of the Atlantic are the more completely filled with joy and satisfaction because we know the great partnership of interests and of sentiments to which we belong. We are happy to be associated in this time of triumph with the government and people upon whom we are so sure we can count for co-operation in the delicate and difficult tasks which remain to be performed in order that the high purposes of the war may be realized and established in the reign of equitable justice and lasting peace."

ARMISTICE ORDERS TO ALLIED ARMIES.

ORDERS announcing that the armistice between the Allied Powers and Germany had been signed and giving directions as to the future conduct of Allied soldiers along the line were sent to every corps on the morning of November 11, 1918. They were transmitted to the units in the front ranks. The orders follow:

"I. You are informed that hostilities will cease along the whole front at 11 o'clock A.M., Nov. 11, 1918, Paris time. II. No Allied troops will pass the line reached by them at that hour in date until further orders. III. Division commanders will immediately sketch the location of their front line. This sketch will be returned to headquarters by the courier bearing these orders. IV. All communication with the enemy, both before and after the termination of hostilities, is absolutely forbidden. In case of violation of this order, severest disciplinary measures will be immediately taken. Any officer offending will be sent to Headquarters under guard. V. Every emphasis will be laid on the fact that the arrangement is an armistice only, and not a peace. VI. There must not be the slightest relaxation of vigilance. Troops must be prepared at any moment for further operations. VII. Special steps will be taken by all commanders to insure strictest discipline and that all troops be held in readiness fully prepared for any eventuality. VIII. Division and Brigade Commanders will personally communicate these orders to all organizations."

GERMANY APPEALS TO AMERICA AFTER SURRENDER.

FOLLOWING is the text of an appeal by German Foreign Secretary Solf to President Wilson, sent by wireless from Berlin to Secretary Lansing, and made public at London, November 11, 1918: "Convinced of the common aims and ideals of democracy, the German Government has addressed itself to the President of the United States, with the request to reestablish peace. This peace was meant to correspond with the principles the President always has maintained. The aim was to be a just solution of all questions in dispute, followed by a permanent reconciliation of all nations. Furthermore, the President declared he did not wish to make war on the German people and did not wish to impede its peaceful development. The German Government has received the conditions of the armistice. After the blockade, those conditions, especially the surrender of means of transport and the sustenance of the troops of occupation, would make it impossible to provide Germany with food, and would cause the starvation of millions of men, women, and children, all the more as the blockade is to continue.

"We had to accept the conditions, but feel it is our duty to draw the President's attention most solemnly and in all earnestness to the fact that enforcement of the conditions must produce among the German people feelings contrary to those upon which alone the reconstruction of the community of nations can rest, guaranteeing a just and durable peace. The German people, therefore, in this fateful hour, address themselves again to the President with the request that he use his influence with the Allied Powers in order to mitigate these fearful conditions."

Wireless appeals, purporting to come from the women of Germany, asking the women of America to endeavor to secure modification of the armistice terms on the ground that otherwise millions of German women and children would die of hunger, were picked up November 13 by the Military Intelligence Station at Houlton, Me. The messages, addressed to Mrs. Woodrow Wilson and Jane Addams, were flashed by the German radio station at Nauen, long used as the disseminating point for German propaganda. They were made public by the War Department, as follows:

"BERLIN, November 12, 1918—To Mrs. Woodrow Wilson, White House, Washington, D. C. Madam: According to the terms of the armistice Germany has to surrender a very large part of the rolling stock of her railways. At the same time she has to feed the troops of her former enemies in the occupied provinces of Germany. The German women and children have been starving for years. They will die from hunger by the millions if the terms of the armistice are not changed. We need the rolling stock of the railways to bring the food from the farms to the cities. It will be impossible to feed the soldiers of the occupying armies if we cannot get large amounts of food from oversea. The women and children all the world over have been the innocent sufferers of this terrible war, but nowhere more than in Germany. Let it be through you, madam, to implore our sisters in the United States of America, who are mothers like ourselves, to ask their Government and the Allied Governments to change the terms of the armistice so that the long suffering of the women and children of Germany may not end in unspeakable disaster. For the National Council of Women of Germany. GERTRUD BAEUMER, ALICE SALOMON. Poz, November 13."

"To Jane Addams, Hull House, Chicago: German women, foreseeing entire famishment and mutiny for their country, urge their American sisters to intercede relief of truce conditions regarding terms of demobilization blockade, wagons, locomotives. We are all free voters of a free republic now. Greeting you heartily.—ANITA AUGSBURG."

UNITED STATES PROMISES GERMANY FOOD.

There was made public November 13 the text of a note from Secretary Lansing to Germany, through the Swiss Minister, in answer to the Solf appeal: 'I have the honor to acknowledge the receipt of your note of to-day, transmitting to the President the text of a cable inquiring whether this Government is ready to send foodstuffs into Germany without delay if public order is maintained in Germany and an equitable distribution of food is guaranteed. I should be grateful if you would transmit the following reply to the German Government:

"At a joint session of the two houses of Congress on November 11 the President of the United States announced that the representatives of the associated Governments in the Supreme Council at Versailles have by unanimous resolution assured the peoples of the Central Empires that everything that is possible in the circumstances will be done to supply them with food and relieve the distressing want that is in so many places threatening their very lives, and that steps are to be taken immediately to organize these efforts at relief in the same systematic manner that they were organized in the case of Belgium. Furthermore, the President expressed the opinion that by the use of the idle tonnage of the Central Empires it ought presently to be possible to lift the fear of utter misery from their oppressed populations and set their minds and energies free for the great and hazardous tasks of political reconstruction which now face them on every hand.

"Accordingly the President now directs me to state that he is ready to consider favorably the supplying of foodstuffs to Germany and to take up the matter immediately with the Allied Governments, provided he can be assured that public order is being and will continue to be maintained in Germany and that an equitable distribution of food can be clearly guaranteed. Accept, sir, the renewed assurance of my highest consideration. ROBERT LANSING."

THE 1918 THANKSGIVING PROCLAMATION.

PRESIDENT WILSON on November 17 issued a proclamation, designating November 28 as Thanksgiving Day. By the President of the United States of America. A Proclamation: "It has long been our custom to turn in the autumn of the year in praise and thanksgiving to Almighty God for His many blessings and mercies to us as a Nation. This year we have special and moving cause to be grateful and to rejoice. God has in His good pleasure given us peace. It has not come as a mere cessation of arms, a mere relief from the strain and tragedy of war. It has come as a great triumph of right. Complete victory has brought us, not peace alone but the confident promise of a new day as well, in which justice shall replace force and jealous intrigue among the nations. Our gallant armies have participated in a triumph which is not marred or stained by any purpose of selfish aggression. In a righteous cause they have won immortal glory and have nobly served their Nation in serving mankind.

"God has indeed been gracious. We have cause for such rejoicing as revives and strengthens in us all the best traditions of national history. A new day shines about us in which our hearts take new courage and look forward with new hope to new and greater duties. While we render thanks for these things, let us not forget to seek the Divine guidance in the performance of these duties, and Divine mercy and forgiveness for all errors of act or purpose, and pray in all that we do we shall strengthen the ties of friendship and mutual respect upon which we must assist to build the new structure of peace and good will among the nations.

"Wherefore, I, Woodrow Wilson, President of the United States of America, do hereby designate Thursday, the twenty-eighth day of November next, as a day of thanksgiving and prayer, and invite the people throughout the land to cease upon that day from their ordinary occupations, and in their several homes and places of worship to render thanks to God, the Ruler of Nations. In witness whereof I have hereunto set my hand and caused the Seal of the United States to be affixed. Done in the District of Columbia this sixteenth day of November, in the year of our Lord one thousand nine hundred and eighteen, and of the independence of the United States of America the one hundred and forty-third. By the President, WOODROW WILSON. ROBERT LANSING, Secretary of State."

HOW FOCH RECEIVED GERMAN TRUCE DELEGATES.

A special cable despatch to the NEW YORK WORLD, dated London, November 28, said: "A member of the German armistice delegation communicates to the Vossische Zeitung the following account of the meeting with Marshal Foch and the Allies' delegates: 'When, on November 8, we reached the French lines, coming by motor car from Spa, we found enemy carriages already waiting to take us to the unknown scene of negotiations. This motor car tour with French officers lasted ten hours, and it appears likely was intentionally prolonged in order to drive us all over the devastated provinces and prepare us by what we saw for what was shortly to be put before us in the way of hatred and revenge in the extremely severe armistice conditions. Now and again a Frenchman pointed silently to the heaps of ruins or said "Voila St. Quentin." In the evening, wherever it was, a train stood ready for us. The windows of the carriages were curtained, and when we awoke next morning the train stood in the midst of a wood. We know now that the negotiations took place in the Forest of Compiegne, but a week ago we knew nothing. Perhaps it was a measure of precaution, even for our sakes, that we were taken through no town. Perhaps acts of violence were feared on the part of the population, for the hatred for us among them is boundless. The wood was evidently barred by troops to all comers.

" 'There were no houses and no tents. On the railway line stood two trains, one occupied by Marshal Foch and his people, the other by ours. Here for three days we lived, worked and deliberated. This seems to be the modern form of such negotiations. Castles and fortresses of olden time have gone, even for such purposes. The train, with its sleeping and drawing rooms and dining cars, was very comfortable and we were provided with everything we wanted. The officer who had charge of the train had us supplied, and the conduct of the numerous guards who stood around was beyond reproach. But all the hostility and fulness of hate for our country that seems now to be cherished in France came to expression in the form of the negotiations as well as in the terrible nature of the conditions. Those of us who were soldiers wore our uniforms and our iron crosses. The introduction to a half dozen French officers who conducted the negotiations with us in plenum and the greetings were of the coldest. Marshal Foch, who showed himself only twice—at the opening and at the end—gave us no word of particular politeness that in earlier times distinguished the most chivalrous nation in the world, and his officers just as little. He received us with the words, "Ce que vous desirez, Messieurs." And he invited us into his business car, furnished with tables and maps.

" 'As each was to speak his own language and everything was translated, the reading conditions alone occupied nearly two hours. It was, moreover, a discovery when Marshal Foch announced there were to be no negotiations and only dictated matter. However, with all his coldness, he was by no means so tactless and brusque as was Gen. d'Esperey at Belgrade. Then we retired to our train, which stood on the other line. As we had been sent by the old Government and certainly had not been authorized to sign everything without conditions, we proceeded at the instance of Erzberger to divide the various points under three heads —military, naval and diplomatic—and discussed them separately with members of the enemy commissions, which consisted only of officers. Military Germany thus with two civilians stood face to face with the now completely militarized France. The enemy maintained in the persons of all his representatives the same objective. Their coldness was mitigated by no single word that bordered upon the human, as had marked our reception by the Marshal. The English Admiral adopted the tone of the French, and only from Marshal Foch's Chief of General Staff, who bore the Alsatian name of Weygand, did we perhaps receive any greater politeness. During our two days' proceedings there were really no negotiations and we could only try to obtain concessions on the various conditions. For when the enemy demanded the delivery of 160 U boats we could only point out the technical impossibility, as we hadn't 160 to give. This demand had to be changed into the formula "all U boats."

" 'The chief point was that of food, and of this we were in certain measure able to obtain assurance. In the mean time, in this lonely wood, with its two railway trains, we were cut off from all intercourse with the outside world. Marshal Foch himself went off twice to Paris, and couriers were able in two hours to arrive with papers. Thus our enemy was able silently to give us Paris newspapers of Sunday morning, newspapers in which the Kaiser's abdication was announced. As we read, no smile of triumph appeared on their faces, but we looked into their hearts.

" 'Our work was really undisturbed by the revolution. Our letters of credit were signed by the "German Government" and retained their validity. We could also speedily consult with Ebert and soften somewhat by small concessions from the enemy the new Government's unconditional subjection. Just before the end of the second and last general sitting we produced our protest in German, which has been published, but we were eventually obliged to sign the document forced on us with its inhuman conditions.' "

AUSTRIAN PEACE MOVES IN 1917.

Robert Dell, for many years Paris correspondent of the Manchester (England) Guardian, who was expelled from France in May, 1918, for his letters on the Prince Sixtus-"Dear Charles" communications, has published, in the London Nation, the following: "Of the four peace proposals known to us last year—there may have been others—three came from Austria.

"(1) On March 31 Prince Sixte de Bourbon communicated to M. Poincare the first letter from the Emperor Charles, who recognized the justice of the French claim in regard to Alsace-Lorraine. M. Poincare gave his word of honor to show the letter to nobody but M. Ribot, but it was understood that it would be communicated also to the King and Mr. Lloyd George, and it was so communicated, Prince Sixte paying two visits to England. M. Poincare, in the course of his conversation with the Prince, claimed for France the frontiers of 1814 and 1790; reparations, restitutions and indemnities, and guarantees on the left bank of the Rhine. Mr. Lloyd George was favorable to negotiations on the basis of the Emperor's letter; M. Poincare was not. Prince Sixte, after his visits to England, returned to Switzerland, and the result of his report was a second letter from Emperor Charles, who expressed his pleasure that England and France were in substantial agreement with him, repeated his conviction that he would be able to persuade Germany to agree to reasonable peace terms, but said that the demands of France must be limited to Alsace-Lorraine in order that agreement might be possible. On April 19 M. Ribot and Mr. Lloyd George met Baron Sonnino at St. Jean-de-Maurienne, and, although they did not show him the Emperor Charles's letter or inform him of its existence, he was informed of the fact, that proposals had been made and of their nature. Baron Sonnino was not at all disposed to treat, but nevertheless the pourparlers continued for a considerable time, being only definitely abandoned about July. There is no reason to suppose that M. Ribot insisted on the demands made by M. Poincare; Italy was the obstacle to a settlement. In order to meet the Italian claims M. Poincare proposed that Austria should take Silesia in return for Trieste and the Trentino, but the Emperor Charles did not regard the suggestion as a practical one.

"None of the other Allies was consulted about the matter, and it has never been explained why they could not have been treated in the same way as Baron Sonnino without any breach of confidence. Moreover, in July, the Emperor Charles's letter was shown to Baron Sonnino in spite of M. Poincare's undertaking. M. Ribot also seems to have shown it to M. Albert Thomas after the return of the latter from Russia. It is very difficult to form an opinion as to whether the German Emperor was cognizant of the Emperor Charles's overtures; if he was, it was certainly without the knowledge of the dominant military party in Germany. The Emperor Charles's insistence on the necessity of secrecy—evidently sincere—shows that. The Emperor Charles did not propose a separate peace, but he was prepared to make

AUSTRIAN PEACE MOVES IN 1917—*Continued.*

one in the event of Germany proving uncompromising, and that eventuality was discussed. The confidence of Vienna in the ability of Austria to obtain German agreement was based on the belief that the mere announcement of an armistice between Austria and the Allies would lead to a revolution in Germany, and that the German Government knew it.

"(2) Almost immediately after the failure of the first pourparlers Austria made a second attempt through Count Revertera, who asked to be allowed to meet a distant relative of his, Major Armand, who was an official of the French Ministry of War. M. Ribot was opposed to the meeting, but M. Painleve, his Minister of War, persuaded him to give way, and Major Armand had two interviews with Count Revertera in Switzerland in August. The Count asked to be put into touch with a more authorized representative of the French Government, but M. Ribot refused to allow the matter to go further. M. Painleve, of course, knew nothing of the Emperor Charles's letters, but, at the time of the Revertera-Armand affair, M. Ribot informed him of the fact that proposals had been made in the spring.

"(3) At the end of August Austria made a third proposal to M. Lazare Weiller, a French Deputy of the Centre, who at once communicated it to M. Ribot. M. Ribot refused to take any action in the matter and did not even consult the other Allies. According to statements made in the French press on M. Lazare Weiller's authority, his third proposal included concessions to Italy. While Austria was thus making continual efforts to open negotiations, Germany made in August, through a Belgian diplomatist, proposals to M. Briand, who was asked to go to Switzerland to meet Baron von Lancken, or if necessary the German Chancellor himself. According to statements made on M. Briand's authority, Germany offered to cede Alsace-Lorraine to France and Trieste and the Trentino to Italy, but demanded compensations in the East; French territory was, of course, to be evacuated, and the integrity, independence and sovereignty of Belgium unconditionally restored; Germany even offering to compensate Belgium for damage done. M. Briand, supported by the Belgian and Roumanian Governments, communicated the proposals to M. Ribot and asked permission to meet Baron von Lancken, which M. Ribot at once refused. Thereupon M. Briand insisted that the Allies should be consulted. M. Ribot consulted the British and Italian Governments, who both replied in the negative, but M. Briand has expressed the opinion that the matter was put to them in such a way as to invite a negative reply.

"President Wilson and M. Kerensky were informed after the proposals had been turned down. An allusion to this matter by M. Ribot in a public speech in the Chamber led M. Briand to reveal the facts; a secret session followed, at which M. Briand vigorously attacked M. Ribot (who was then Foreign Minister in the Painleve Cabinet), and the latter was obliged to resign."

PRESIDENT WILSON TO KING ALBERT, NOV. 15, 1918.

"Never has a national holiday occurred at a more auspicious moment, and never have felicitations been more heartfelt than those which it is my high privilege to tender to Your Majesty on this day. When facing imminent destruction, Belgium by her self-sacrifice won for herself a place of honor among nations, a crown of glory, imperishable, though all else were lost. The danger is averted, the hour of victory come, and with it the promise of a new life, fuller, greater, nobler than has been known before. The blood of Belgium's heroic sons has not been shed in vain. WOODROW WILSON."

AMERICAN PRISONERS OF WAR.

(Official figures, November 7, 1918.)

Soldiers of the American Expeditionary forces who have been identified as prisoners of war	2,664
American civilians interned overseas (including sailors)	281
Total	2,945

INTERNED PRISONERS, ETC., IN UNITED STATES.

Enemy prisoners of war interned at the War Prison Barracks, Fort McPherson, Georgia	1,411
Alien enemies interned at the War Prison Barracks, Fort Oglethorpe, Georgia	3,262
Alien enemies (and two prisoners of war) interned at the War Prison Barracks, Fort Douglas, Utah	660
Total	5,333.

NOTE—Includes 200 prisoners detached for labor at Camp Sherman, Ohio; 100 at Camp Devens, Mass. and 100 at Camp Wadsworth, South Carolina.

War Department, The Adjutant-General's Office, November 7, 1918.

FATALITIES AMONG GERMAN AVIATORS.

A list in the Berliner Zeitung am Mittag, April 24, 1918, showed that of the 41 German aviators who had brought down 15 or more opponents since the beginning of the war, 19 had fallen in action and two had been reported missing. The list of the fallen German flyers, together with the alleged number of their victims and the year of their death, follows:

Capt. von Richthofen, 80, 1918; Lieut. Boss, 50, 1917; Capt. Boelcke, 40, 1916; Lieut. Gontermann, 39, 1917; Lieut. Max Mueller, 38, 1918; Lieut. Kurt Wolff, 24, 1917; Lieut. Schaefer, 30, 1917; Lieut. Allmenroeder, 30, 1917; First Lieut. von Tutschek, 27, 1918; Lieut. Boehme, 24, 1917; First Lieut. Bethge, 20, 1918; Lieut. von Eschwege, 20, 1917; Lieut. Frankl, 19, 1917; Lieut. Wintgens, 18, 1916; Lieut. Baldamus, 18, 1917; Lieut. Hess, 17, 1917; First Lieut. Immelmann, 15, 1916; Lieut. Dossenbach, 15, 1917; Lieut. Schneider, 15, 1917.

Lieut. von Buelow, with 28 victims, and First Lieut. Dostler, with 26, were reported missing. At the beginning of the offensive in March, 1918, Germany claimed 102 army aviators, each of whom had brought down more than seven airplanes or balloons in battles, and that the total number of victims up to May of these star flyers was 1,698. In this period 43 of these aces had been killed and three were missing. Others had been disabled and were no longer in service.

PRESIDENT ANNOUNCES HE WILL GO TO EUROPE.

(Issued at the White House, November 18, 1918.)

"The President expects to sail for France immediately after the opening of the regular session of Congress, for the purpose of taking part in the discussion and settlement of the main features of the treaty of peace. It is not likely that it will be possible for him to remain throughout the sessions of the formal peace conference, but his presence at the outset is necessary in order to obviate the manifest disadvantages of discussion by cable in determining the greater outlines of the final treaty, about which he must necessarily be consulted. He will, of course, be accompanied by delegates who will sit as the representatives of the United States throughout the conference. The names of the delegates will be presently announced."

President Wilson's Farewell Address to Congress on Eve of His Departure for Peace Conference in France.

— Following is the text of President Wilson's address to Congress in joint session, Monday, Dec. 2, 1918, before setting out as the head of the American delegation to the peace conference in France:

"The year that has elapsed since I last stood before you to fulfil my constitutional duty to give Congress from time to time information on the state of the Union has been so crowded with great events, great processes, and great results, that I cannot hope to give you an adequate picture of its transactions or of the far-reaching changes which have been wrought in the life of our Nation and of the world. You have yourselves witnessed these things, as I have. It is too soon to assess them; and we who stand in the midst of them and are part of them are less qualified than men of another generation will be to say what they mean, or even what they have been. But some great outstanding facts are unmistakable, and constitute in a sense part of the public business with which it is our duty to deal. To state them is to set the stage for the legislative and executive action which must grow out of them and which we have yet to shape and determine.

"A year ago we had sent 145,198 men overseas. Since then we have sent 1,950,513, an average of 162,542 each month, the number in fact rising in May last to 245,951, in June to 278,850, in July to 307,182, and continuing to reach similar figures in August and September—in August 289,570, and in September 257,438. No such movement of troops ever took place before across 3,000 miles of sea, followed by adequate equipment and supplies, and carried safely through extraordinary dangers of attack—dangers which were alike strange and infinitely difficult to guard against. In all this movement only 758 men were lost by enemy attacks—630 of whom were upon a single English transport which was sunk near the Orkney Islands.

"I need not tell you what lay back of this great movement of men and material. It is not invidious to say that back of it lay a supporting organization of the industries of the country and of all its productive activities more complete, more thorough in method and effective in results, more spirited and unanimous in purpose and effort than any other great belligerent had ever been able to effect. We profited greatly by the experience of the nations which had already been engaged for nearly three years in the exigent and exacting business, their every resource and every executive proficiency taxed to the utmost. We were the pupils. But we learned quickly and acted with a promptness and readiness of co-operation that justify our great pride that we were able to serve the world with unparalleled energy and quick accomplishment.

TRIBUTE TO THE ARMY AND THE NAVY.

"But it is not the physical scale and executive efficiency of preparation, supply, equipment and despatch that I would dwell upon, but the mettle and quality of the officers and men we sent over and of the sailors who kept the seas, and the spirit of the Nation that stood behind them. No soldiers or sailors ever proved themselves more quickly ready for the test of battle or acquitted themselves with more splendid courage and achievement when put to the test. Those of us who played some part in directing the great processes by which the war was pushed irresistibly forward to the final triumph may now forget all that and delight our thoughts with the story of what our men did. Their officers understood the grim and exacting task they had undertaken and performed it with an audacity, efficiency, and unhesitating courage that touch the story of convoy and battle with imperishable distinction at every turn, whether the enterprise were great or small—from their chiefs, Pershing and Sims, down to the youngest Lieutenant; and their men were worthy of them—such men as hardly need to be commanded, and go to their terrible adventure blithely and with the quick intelligence of those who know just what it is they would accomplish. I am proud to be the fellow-countryman of men of such stuff and valor. Those of us who stayed at home did our duty; the war could not have been won or the gallant men who fought it given their opportunity to win it otherwise, but for many a long day we shall think ourselves 'accurs'd we were not there, and hold our manhood cheap while any speaks that fought' with these at St. Mihiel or Thierry. The memory of those days of triumphant battle will go with these fortunate men to their graves; and each will have his favorite memory. 'Old men forget; yes, all shall be forgot, but he'll remember with advantages what feats he did that day.'

"What we all thank God for with deepest gratitude is that our men went in force into the line of battle just at the critical moment when the whole fate of the world seemed to hang in the balance, and threw their fresh strength into the ranks of freedom in time to turn the whole tide and sweep of the fateful struggle—turn it once for all, so that thenceforth it was back, back for their enemies, always back, never again forward. After that it was only a scant four months before the commanders of the Central Empires knew themselves beaten, and now their very empires are in liquidation.

THE SPIRIT OF THE NATION FINE.

"And throughout it all, how fine the spirit of the Nation was, what unity of purpose, what untiring zeal, what elevation of purpose ran through all its splendid display of strength, its untiring accomplishment. I have said that those of us who stayed at home to do the work of organization and supply will always wish that we had been with the men whom we sustained by our labor; but we can never be ashamed. It has been an inspiring thing to be here in the midst of fine men who had turned aside from every private interest of their own and devoted the whole of their trained capacity to the tasks that supplied the sinews of the whole great undertaking. The patriotism, the unselfishness, the thoroughgoing devotion and distinguished capacity that marked their toilsome labors day after day, month after month, have made them fit mates and comrades of the men in the trenches and on the sea. And not the men here in Washington only. They have but directed the vast achievement. Throughout innumerable factories, upon innumerable farms, in the depths of coal mines and iron mines and copper mines, wherever the stuffs of industry were to be obtained and prepared, in the shipyards, on the railways, at the docks, on the sea, in every labor that was needed to sustain the battlelines, men have vied with each other to do their part, and do it well. They can look any man at arms in the face and say, We also strove to win and gave the best that was in us to make our fleets and armies sure of their triumph.

"And what shall we say of the women—of their instant intelligence, quickening every task that they touched; their capacity for organization and co-operation, which gave their action discipline and enhanced the effectiveness of everything they attempted; their aptitude at tasks to which they had never before set their hands; their utter self-sacrifice alike in what they did and in what they gave? Their contribution to the great result is beyond appraisal. They have added a new lustre to the annals of American womanhood.

"The least tribute we can pay them is to make them the equals of men in political rights, as they have proved themselves their equals in every field of practical work they have entered, whether for themselves or for their country. These great days of completed achievements would be sadly marred were

we to omit that act of justice. Besides the immense practical services they have rendered, the women of the country have been moving spirits in the systematic economics by which our people have voluntarily assisted to supply the suffering peoples of the world and the armies of every front with food and everything else that we had that would serve the common cause. The details of such a story can never be fully written, but we carry them at our hearts ,and thank God that we can say that we are the kinsmen of such.

"And now we are sure of the great triumph for which every sacrifice was made. It has come—come in its completeness, and with the pride and inspiration of these days of achievement quick within us, we turn to the tasks of peace again—a peace secure against the violence of irresponsible monarchs and ambitious military coteries, and made ready for a new order, for new foundations of justice and fair dealing.

THE UNRATIFIED TREATY WITH COLOMBIA.

"We are about to give order and organization to this peace, not only for ourselves but for the other peoples of the world as well, so far as they will suffer us to serve them. It is international justice that we seek, not domestic safety merely. Our thoughts have dwelt of late upon Europe, upon Asia, upon the Near and the Far East, very little upon the acts of peace and accommodation that wait to be performed at our own doors. While we are adjusting our relations with the rest of the world, is it not of capital importance that we should clear away all grounds of misunderstanding with our immediate neighbors and give proof of the friendship we really feel? I hope that the members of the Senate will permit me to speak once more of the unratified treaty of adjustment with the Republic of Colombia. I very earnestly urge upon them an early and favorable action upon that vital matter. I believe that they will feel, with me, that the stage of affairs is now set for such action as will be not only just but generous, and in the spirit of the new age upon which we have so happily entered.

"So far as our domestic affairs are concerned, the problem of our return to peace is a problem of economic and industrial readjustment. That problem is less serious for us than it may turn out to be for the nations which have suffered the disarrangements and the losses of the war longer than we. Our people, moreover, do not wait to be coached and led. They know their own business, are quick and resourceful at every readjustment, definite in ,purpose, and self-reliant in action. Any leading strings we might seek to put them in would speedily become hopelessly tangled, because they would pay no attention to them, and go their own way. All that we can do as their legislative and executive servants is to mediate the process of change here, there, and elsewhere, as we may. I have heard much counsel as to the plans that should be formed, and personally conducted to a happy consummation, but from no quarter have I seen any general scheme of 'reconstruction' emerge which I thought it likely we could force our spirited business men and self-reliant laborers to accept with due pliancy and obedience.

"While the war lasted we set up many agencies by which to direct the industries of the country in the services it was necessary for them to render, by which to make sure of an abundant supply of the materials needed, by which to check undertakings that could for the time be dispensed with, and stimulate those that were most serviceable in war, by which to gain for the purchasing departments of the Government a certain control over the prices of essential articles and materials, by which to restrain trade with alien enemies, make the most of the available shipping, and systematize financial transactions, both public and private, so that there would be no unnecessary conflict or confusion—by which, in short, to put every material energy of the country in harness to draw the common load and make of us one team in the accomplishment of a great task. But the moment we knew the armistice to have been signed we took the harness off. Raw materials, upon which the Government had kept its hand for fear there should not be enough for the industries that supplied the armies, have been released and put into the general market again. Great industrial plants whose whole output and machinery had been taken over for the uses of the Government have been set free to return to the uses to which they were put before the war. It has not been possible to remove so readily or so quickly the control of foodstuffs and of shipping, because the world has still to be fed from our granaries and the ships are still needed to send supplies to our men overseas, and to bring the men back as fast as the disturbed conditions on the other side of the water permit. But even these restraints are being relaxed as much as possible, and more and more as the weeks go by.

PUBLIC WORKS FOR SOLDIER LABOR.

"Never before have there been agencies in existence in this country which knew so much of the field of supply, of labor, and of industry as the War Industries Board, the War Trade Board, the Labor Department, the Food Administration, and the Fuel Administration have known since the labors became thoroughly systematized, and they have not been isolated agencies. They have been directed by men that represented the permanent departments of the Government, and so have been the centres of unified and co-operative action. It has been the policy of the Executive, therefore, since the armistice (which is in effect a complete submission of the enemy), to put the knowledge of these bodies at the disposal of the business men of the country, and to offer their intelligent mediation at every point and in every matter where it was desired. It is surprising how fast the process of return to a peace footing has moved in the three weeks since the fighting stopped. It promises to outrun any inquiry that may be instituted and any aid that may be offered. It will not be easy to direct it any better than it will direct itself. The American business man is of quick initiative.

"The ordinary and normal processes of private initiative will not, however, provide immediate employment for all of the men of our returning armies. Those who are of trained capacity, those who are skilled workmen, those who have acquired familiarity with established businesses, those who are ready and willing to go to the farms, all those whose aptitudes are known or will be sought out by employers, will find no difficulty, it is safe to say, in finding place and employment. But there will be others who will be at a loss where to gain a livelihood unless pains are taken to guide them and put them in the way of work. There will be a large floating residuum of labor which should not be left wholly to shift for itself. It seems to me important, therefore, that the development of public works of every sort should be promptly resumed, in order that opportunities should be created for unskilled labor in particular, and that plans should be made for such developments of our unused lands and our natural resources as we have hitherto lacked stimulation to undertake.

"I particularly direct your attention to the very practical plans which the Secretary of the Interior has developed in his annual report, and before your committees for the reclamation of arid, swamp, and cut-over lands, which might, if the States were willing and able to co-operate, redeem some three hundred million acres of land for cultivation. There are said to be fifteen or twenty million acres of land in the West, at present arid, for whose reclamation water is available, if properly conserved. There are about two hundred and thirty million acres from which the forests have been cut, but which have never yet been cleared for the plow, and which lie waste and desolate. These lie scattered all over the Union. And there are nearly eighty million acres of land that lie under swamps or subject to periodical overflow, or too wet for anything but grazing, which it is perfectly feasible to drain and protect and

redeem. The Congress can at once direct thousands of the returning soldiers to the reclamation of the arid lands which it has already undertaken, if it will but enlarge the plans and the appropriations which it has intrusted to the Department of the Interior. It is possible in dealing with our unused land to effect a great rural and agricultural development, which will afford the best sort of opportunity to men who want to help themselves, and the Secretary of the Interior has thought the possible methods out in the way which is worthy of your most friendly attention.

AID FOR BELGIUM AND NORTHERN FRANCE.

"I have spoken of the control which must yet for awhile, perhaps for a long while, be exercised over shipping because of priority of service to which our forces overseas are entitled and which should also be accorded the shipments which are to save recently liberated peoples from starvation and many devastated regions from permanent ruin. May I not say a special word about the needs of Belgium and Northern France? No sums of money paid by way of indemnity will serve of themselves to save them from hopeless disadvantage for years to come. Something more must be done than merely find the money.

"If they had money and raw materials in abundance to-morrow, they could not resume their place in the industry of the world to-morrow—the very important place they held before the flame of war swept across them. Many of their factories are razed to the ground. Much of their machinery is destroyed or has been taken away. Their people are scattered, and many of their best workmen are dead. Their markets will be taken by others if they are not in some special way assisted to rebuild their factories and replace their lost instruments of manufacture. They should not be left to the vicissitudes of the sharp competition for materials and for industrial facilities which is now to set in.

"I hope, therefore, that the Congress will not be unwilling, if it should become necessary, to grant to some such agency as the War Trade Board the right to establish priorities of export and supply for the benefit of these people whom we have been so happy to assist in saving from the German terror and whom we must not now thoughtlessly leave to shift for themselves in a pitiless competitive market.

"For the steadying and facilitation of our own domestic business readjustments nothing is more important than the immediate determination of the taxes that are to be levied for 1918, 1919 and 1920. As much of the burden of taxation must be lifted from business as sound methods of financing the Government will permit, and those who conduct the great essential industries of the country must be told as exactly as possible what obligations to the Government they will be expected to meet in the years immediately ahead of them; it will be of serious consequence to the country to delay removing all uncertainties in this matter a single day longer than the right processes of debate justify. It is idle to talk of successful and confident business reconstruction before those uncertainties are resolved.

"If the war had continued it would have been necessary to raise at least $8,000,000,000 by taxation payable in the year 1919; but the war has ended and I agree with the Secretary of the Treasury that it will be safe to reduce the amount to six billions. An immediate rapid decline in the expenses of the Government is not to be looked for. Contracts made for war supplies will, indeed, be rapidly cancelled and liquidated, but their immediate liquidation will make heavy drains on the Treasury for the months just ahead of us.

"The maintenance of our forces on the other side of the sea is still necessary. A considerable proportion of those forces must remain in Europe during the period of occupation, and those which are brought home will be transported and demobilized at heavy expense for months to come. The interest on our war debt must, of course, be paid and provision made for the retirement of the obligations of the Government which represent it. But these demands will, of course, fall much below what a continuation of military operations would have entailed, and six billions should suffice to supply a sound foundation for the financial operations of the year.

"I entirely concur with the Secretary of the Treasury in recommending that the two billions needed in addition to the four billions provided by existing law be obtained from the profits which have accrued and shall accrue from war contracts and distinctively war business, but that these taxes be confined to the war profits accruing in 1918 or in 1919 from business originating in war contracts. I urge your acceptance of his recommendation that provision be made now, not subsequently, that the taxes to be paid in 1920 should be reduced from six to four billions. Any arrangements less definite than these would add elements of doubt and confusion to the critical period of industrial readjustment through which the country must now immediately pass, and which no true friend of the nation's essential business interests can afford to be responsible for creating or prolonging. Clearly determined conditions, clearly and simply charted, are indispensable to the economic revival and rapid industrial development which may confidently be expected, if we act now and sweep all interrogation points away.

"I take it for granted that the Congress will carry out the naval programme which was undertaken before we entered the war. The Secretary of the Navy has submitted to your committees for authorization that part of the programme which covers the building plans of the next three years. These plans have been prepared along the lines and in accordance with the policy which the Congress established, not under the exceptional conditions of the war, but with the intention of adhering to a definite method of development for the navy. I earnestly recommend the uninterrupted pursuit of that policy. It would clearly be unwise for us to attempt to adjust our programme to a future world policy as yet undetermined.

CONCERN OVER THE RAILROAD PROBLEM.

"The question which causes me the greatest concern is the question of the policy to be adopted toward the railroads. I frankly turn to you for counsel upon it. I have no confident judgment of my own. I do not see how any thoughtful man can have who knows anything of the complexity of the problem. It is a problem which must be studied, studied immediately, and studied without bias or prejudice. Nothing can be gained by becoming partisans of any particular plan of settlement.

"It was necessary that the administration of the railways should be taken over by the Government so long as the war lasted. It would have been impossible otherwise to establish and carry through under a single direction the necessary priorities of shipment. It would have been impossible otherwise to combine maximum production at the factories and mines and farms with the maximum possible car supply to move the products to the ports and markets; impossible to route troop shipments and freight shipments without regard to the advantage of the roads employed; impossible to subordinate, when necessary, all questions of convenience to the public necessity; impossible to give the necessary financial support to the roads from the public treasury. But all these necessities have now been served, and the question is, What is best for the railroads, and for the public in the future?

"Exceptional circumstances and exceptional methods of administration were not needed to convince us that the railroads were not equal to the immense tasks of transportation imposed upon them by the rapid and continuous development of the industries of the country. We knew that already. And we knew that they were unequal to it partly because their full co-operation was rendered impossible by law

and their competition made obligatory, so that it has been impossible to assign to them severally the traffic which could best be carried by their respective lines in the interest of expedition and national economy.

"We may hope, I believe, for the formal conclusion of the war by a treaty by the time Spring has come. The twenty-one months to which the present control of the railways is limited, after formal proclamation of peace shall have been made, will run at the furthest, I take it for granted, only to the January of 1921. The full equipment of the railways which the Federal Administration had planned could not be completed within any such period. The present law does not permit the use of the revenues of the several roads for the execution of such plans except by formal contract with their Directors, some of whom will consent while some will not, and therefore does not afford sufficient authority to undertake improvements upon the scale upon which it would be necessary to undertake them. Every approach to this difficult subject-matter of decision brings us face to face, therefore, with this unanswered question: What is it right that we should do with the railroads, in the interest of the public and in fairness to their owners? Let me say at once that I have no answer ready. The only thing that is perfectly clear to me is that it is not fair either to the public or to the owners of the railroads to leave the question unanswered, and that it will presently become my duty to relinquish control of the roads, even before the expiration of the statutory period, unless there should appear some clear prospect in the mean time of a legislative solution. Their release would at least produce one element of a solution, namely, certainty and a quick stimulation of private initiative.

"I believe that it will be serviceable for me to set forth as explicitly as possible the alternative courses that lie open to our choice. We can simply release the roads and go back to the old conditions of private management, unrestricted competition, and multiform regulation by both State and Federal authorities; or we can go to the opposite extreme and establish complete control, accompanied, if necessary, by actual Government ownership; or we can adopt an intermediate course of modified private control, under a more unified and affirmative public regulation and under such alterations of the law as will permit wasteful competition to be avoided and a considerable degree of unification of administration to be effected, as, for example, by regional corporations, under which the railways of definable areas would be in effect combined in single systems.

"The one conclusion that I am ready to state with confidence is that it would be a disservice alike to the country and to the owners of the railroads to return to the old conditions unmodified. Those are conditions of restraint without development. There is nothing affirmative or helpful about them. What the country chiefly needs is that all its means of transportation should be developed, its railways, its waterways, its highways, and its countryside roads. Some new element of policy, therefore, is absolutely necessary—necessary for the service of the public, necessary for the release of credit to those who are administering the railways necessary for the protection of their security holders. The old policy may be changed much or little, but surely it cannot always be left as it was. I hope that the Congress will have a complete and impartial study of the whole problem instituted at once and prosecuted as rapidly as possible. I stand ready and anxious to release the roads from the present control, and I must do so at a very early date if by waiting until the statutory limit of time is reached I shall be merely prolonging the period of doubt and uncertainty which is hurtful to every interest concerned.

PARAMOUNT DUTY TO GO TO PARIS.

"I welcome this occasion to announce to the Congress my purpose to join in Paris the representatives of the Governments with which we have been associated in the war against the Central Empires for the purpose of discussing with them the main features of the treaty of peace. I realize the great inconveniences that will attend my leaving the country, particularly at this time, but the conclusion that it was my paramount duty to go has been forced upon me by considerations which I hope will seem as conclusive to you as they have seemed to me.

"The Allied Governments have accepted the bases of peace which I outlined to the Congress on the 8th of January last, as the Central Empires also have, and very reasonably desire my personal counsel in their interpretation and application, and it is highly desirable that I should give it in order that the sincere desire of our Government to contribute without selfish purpose of any kind to settlements that will be of common benefit to all the nations concerned may be made fully manifest. The peace settlements which are now to be agreed upon are of transcendent importance, both to us and to the rest of the world, and I know of no business or interest which should take precedence of them. The gallant men of our armed forces on land and sea have conspicuously fought for the ideals which they knew to be the ideals of their country. I have sought to express those ideals; they have accepted my statements of them as the substance of their own thought and purpose, as the associated Governments have accepted them; I owe it to them to see to it, so far as in me lies, that no false or mistaken interpretation is put upon them, and no possible effort omitted to realize them. It is now my duty to play my full part in making good what they offered their life's blood to obtain. I can think of no call to service which would transcend this.

"I shall be in close touch with you and with affairs on this side of the water, and you will know all that I do. At my request the French and English Governments have absolutely removed the censorship of cable news which until within a fortnight they had maintained, and there is now no censorship whatever exercised at this end, except upon attempted trade communications with enemy countries. It has been necessary to keep an open wire constantly available between Paris and the Department of State, and another between France and the Department of War. In order that this might be done with the least possible interference with the other uses of the cables, I have temporarily taken over the control of both cables in order that they may be used as a single system. I did so at the advice of the most experienced cable officials, and I hope that the results will justify my hope that the news of the next few months may pass with the utmost freedom, and with the least possible delay from each side of the sea to the other.

"May I now hope, gentlemen of the Congress, that in the delicate tasks I shall have to perform on the other side of the sea, in my efforts truly and faithfully to interpret the principles and purposes of the country we love, I may have the encouragement and the added strength of your united support? I realize the magnitude and difficulty of the duty I am undertaking. I am poignantly aware of its grave responsibilities. I am the servant of the nation. I can have no private thought or purpose of my own in performing such an errand. I go to give the best that is in me to the common settlements which I must now assist in arriving at in conference with the other working heads of the associated Governments. I shall count upon your friendly countenance and encouragement. I shall not be inaccessible. The cables and the wireless will render me available for any counsel or service you may desire of me, and I shall be happy in the thought that I am constantly in touch with the weighty matters of domestic policy with which we shall have to deal. I shall make my absence as brief as possible, and shall hope to return with the happy assurance that it has been possible to translate into action the great ideals for which America has striven."

THE PRESIDENT'S VOYAGE TO EUROPE.

The President and his party left New York on Wednesday, Dec. 4, 1918, bound for the peace conference. The following account of the departure appeared in The World of Thursday, Dec. 5. The story was written by Donald H. Clarke:

"That old picture of the sun bursting a prison of clouds at the psychological moment and bathing in gold the chief figure of a story may have been painted in words once or twice too often. But when the naval transport George Washington, on which President Wilson was leaving these shores, straightened out in the North River for her long voyage at 10.30 o'clock yesterday morning, the sun strengthened and brightened, as if operated by a push button, for the occasion. And its rays, shattering the mists that overhung the turbid current and blurred the precipitous skyline of lower Manhattan in the background, brought into sharp outline the figures of President and Mrs. Wilson; high on the flying bridge. They revealed clearly that the President, waving his soft brown hat, was smiling, and that Mrs. Wilson, a bit of linen fluttering in her gloved hand, was smiling too. And the rays glowed warmly on the blue folds of the President's flag with its emblazoned coat of arms of the United States, flying from the foretruck—the first time that such an emblem had been broken out on any ship bound for foreign shores.

"In this brief burst of radiance, which was ended by the quick lowering of a drab curtain of fog, two airplanes, diving and tumbling with unbelievable grace and agility, played over the gray ship like moths. Theirs was an exhibition of aerial acrobatics the like of which seldom, if ever, had been seen in New York. And a few minutes later, when the George Washington went ploughing down the river, these two airplanes were joined by another, and the three continued on overhead, whirling and banking and rolling end over end and slipping sidewise and backwise—dancing on the mist, one might fancy. Everywhere within the range of vision during that bright moment of departure, tufts of steam sprouted as if by magic from funnels of ships, great and small, commercial and naval, and from stacks and chimneys in Hoboken and Jersey City and Manhattan.

"And the collective shriek of godspeed from those hundreds, perhaps thousands, of metal throats almost drowned the quickly rolled Presidential salute of twenty-one guns from the three guardian destroyers, the cheers of soldiers and army transport girls in olive drab on the pier, the answering cheers of the sailors and marines on the slowly disappearing decks, and the farewell shouts of distinguished travellers and the few friends and relatives they were leaving behind, who had gone to Hoboken to see them off. From windows and roofs of all buildings with a view of the river in Manhattan and along the piers and on the Battery and any other vantage point that offered, men and women in the contagious enthusiasm of the moment, clapped their hands and hurrahed, apparently unmindful of the fact that, although they were thousands, the midget noise of their efforts was lost long before it could reach the ears of the man in whose honor it was made.

"So, down the river and past Governor's Island and Staten Island, where the superdreadnought Pennsylvania, in the command of Vice Admiral Henry T. Mayo, took the lead, out past Sandy Hook, and on into the North Atlantic the George Washington, with President Wilson and the American Commission to Negotiate Peace—official title of the body of peace commissioners—made her stately way. Fifteen destroyers, acting as traffic policemen, proceeded on either side. Forty-eight hours out ten of them will return. Five will assist the giant Pennsylvania as guards until the arrival at Brest. A transport bringing American soldiers home was passed. Signals and cheers were exchanged.

"The smiles of the President and Mrs. Wilson that were noted at the beginning of the voyage were said by those close to the President to be fair indicators of his mood. In fact, he appeared to be in unusually high spirits. He told correspondents that he was looking forward to the voyage as a rest, and spoke good-humoredly of the strong possibility that it would be 'an enforced rest for a few days.' This was a reference to his poor qualities as a sailor. The President left no final word and granted no formal interview on the eve of embarkation. Just before sailing time he called in for a confidential talk three representatives of press associations and a Washington correspondent for The World, who had made the trip from the capital on the President's special train.

"All that may be published of this talk is that the President appeared to be more determined than ever, if that is possible, that the causes for which America fought shall be sustained through the preliminary and final peace sessions, and that he reiterated his belief that he would have been failing in his duty had he not gone to Europe to stand for American ideals against whatever opposition may arise. The President also made it clear once more that the correspondents will have ready access to the news and will be permitted to use the wireless every day to transmit word of the mission's progress at sea.

"The President's departure from the United States was so perfectly timed by the army and navy that the gangplank was hauled in exactly at 10.15, the scheduled hour, and at 10.30, as recorded above, the big transport, which was once a boast of the German merchant marine, began to forge ahead under the thrust of her own propellers. On the trip by special train from Washington, as at all other stages of the journey, extraordinary precautions were taken by the Secret Service and the military. Capt. John J. Henry and his entire staff of 200 operatives accompanied the President to Hoboken. When the party arrived there at the entrance to the pier at 7.20 A. M., military guards and soldiery formed compact protective walls. Across the way, in River Street, heavily armed military guards patrolled the rooftops. No one was admitted to the piers except by special pass, extremely difficult to obtain, and, once admitted, everybody was constantly under the eye of officers until the President went aboard ship, which was at 8.10.

"The ship itself had been methodically gone over from stem to stern and keel to truck. Every man aboard was of proved loyalty. As soon as the President and his party had passed the gangplanks, which were guarded by two marines, apparently picked for their dashing appearance, the ship was closed to all, even high officials. Even George Creel was barred from going aboard and had to exert official pressure to win his point. But despite all precautions of secrecy every stop of the special train from Baltimore on through the night to Jersey City, which was reached at dawn, found small groups waiting an opportunity to cheer the President.

"The Wilsons had breakfast in their private car, the Ideal, and left the train at 8.07. As they stepped to the ground the 13th Infantry Band played the National Anthem. They stopped, the President bared his head, as did other civilians, and the military came to attention. Then the President and Mrs. Wilson, escorted closely by Secretary Tumulty and Rear Admiral Grayson, and surrounded by the Secret Service men, some of whom were on the locomotive when it arrived at the pier, walked a few yards to the entrance of Pier No. 4. A short flight of steps led up to the floor of the pier building. It was a bower of red, white and blue. Along the floor were drawn up the girls of the Army Transport Service. The President and Mrs. Wilson smiled and nodded continually as they passed the massed girls through an arbor of American and Allies' flags.

"On the pier proper, the President walked between lines of soldiers, a battalion of the 13th Infantry. They stood at present arms, with fixed bayonets. No newspaper men except the correspondents who accompanied the party from Washington were allowed on the pier until the President was aboard ship. No photographs of the President and Mrs. Wilson were taken until that time either, and then only from the pier, by personal request of the President, it was learned. The prohibiting order applied to

army photographers as well as to lay ones. Mrs. Wilson wore a tailored suit that looked to masculine eyes to be fashioned of grayish black whipcord, with a small fur boa. Her hat was small, of black velvet and trimmed with white. There was no evidence to support stories of lavish wardrobes that have been written in reports of her preparations for the voyage. Few trunks were taken from the White House, fewer than the number of boxes containing documentary material for the President's use in the peace negotiations.

"The correspondent for The World who made the journey from Washington, where he has seen the President frequently during the war, observed that he appeared to be fit for the task ahead. His hair is grayer and thinner than a year ago, but his face is firm, there are no lines and his eyes are clear and healthy. Rear Admiral Grayson, physician to the President, said he was in excellent health. One incident that apparently worried naval officials but only caused the President to laugh was the discovery that 'Bad,' the German word for bath, still was over the bathroom door on the George Washington, and that 'Damen,' the German word for ladies, was over the women's rest room. These were the only signs of German occupation visible when the Wilsons inspected the ship while waiting for the baggage to be got aboard. The President and all the other voyagers were delighted and surprised at the excellent condition of the transport.

"Brig. Gen. G. H. McManus, commanding officer of the port of embarkation, was the last person to come ashore from the ship. And he came with his fingers tingling from the warm handclasp of the President, who expressed the highest approval of the way in which the arrangements had been made and executed. By this time soldiers and army transport girls had broken ranks, and with officers and favored civilians had thronged to the apertures in the pier. A continuous roar of conversation between the ship and the pier was kept up, while the two bands on the ship and a band on the pier blared one melody after another. The girls were cheering the sailors and marines aboard as well as the President. Secretary Lansing, Mr. Creel, Philip Patchin of the State Department, and military and naval officers, with women of the party, lined up at a lower rail and cheered and waved back.

"As the ship cast off at 10.15 the band on the pier played 'Hail to the Chief.' If ever happiness and optimism were epidemic, it was then. The ship smiled, the pier smiled, and the reluctant sun, as recorded, smiled its last smile for the day. And if weather signals indicating a northwest storm was in the making outside were flying, no one—not even Capt. Edward McCauley, commanding officer of the George Washington—permitted it to affect the appearance of cheerfulness and confidence. In order to avoid the bad weather that prevails on the North Atlantic at this time, the crossing will be made further to the south than is ordinary, skirting the Azores.

PASSENGER LIST OF PRESIDENT'S SHIP.

"The official passenger list of the George Washington, given to The World by order of Brig. Gen. McManus yesterday, follows. In the service staff are listed two chefs, twenty-five cooks, fifty waiters and two moving picture operators. The list:

"The President's personal party—The President and Mrs. Wilson, Rear Admiral Cary T. Grayson, U. S. N.; George Creel, Chairman of Commission on Public Information; Gilbert F. Close, confidential clerk of the President; Charles S. Swemm, confidential clerk of the President; Irving H. Hoover; Miss Edith Benham, secretary to Mrs. Wilson.

"Secret Service Operatives—Joseph E. Murphy, Edmund W. Starling, John D. Slye, William A. Landvoight, John J. Fitzgerald, Walter G. Ferguson, John L. Sullivan; Arthur Brooks, personal attendant to the President; Susie Booth, maid to Mrs. Wilson.

"Guests of the President—French Ambassador and Mme. Jusserand, Italian Ambassador and Countess Cellere, man servant, two children, maid; Mrs. Francisco Quattrone, secretary to the Italian Ambassador; American Ambassador to Great Britain and Mrs. Davis, Admiral Knapp, U. S. N.; Capt. Pratt, Mrs. W. S. Benson, Mrs. Joseph C. Grew, Mrs. Gordon Auchincloss, Mrs. David Hunter Miller, L. C. Probert, Associated Press; R. J. Bender, United Press; John E. Nevin, International News Service.

"Members of the American Commission—Secretary of State and Mrs. Lansing, Henry White, Leland Harrison, Assistant Secretary of the commission; Philip H. Patchin, Assistant Secretary of the commission; Sydney Y. Smith, Chief of Bureau, Department of State, attached to the commission; William McNeil, Chief of Bureau, Department of State, Disbursing Officer of the commission; George H. Harris, Assistant Disbursing Officer of the commission; William C. Bullitt, attached to the commission; R. O. Sweet, confidential secretary to the Secretary of State.

"Clerks—J. K. Huddle, R. B. Macatee, C. B. Welch, H. E. Fenstermacher, S. Y. Skinner, L. T. Alverson, H. C. Coney, L. W. Ronimus, L. E. Mundy, H. Goldstein.

"Specialists—Major James Brown Scott, Technical Adviser, and Mrs. Scott; Assistants to Technical Adviser, George A. Finch, Prof. Amos S. Hershey, Henry G. Crocker; George D. Gregory, confidential clerk to Major Scott; S. E. Mezes, Director of Specialists, and Mrs. Mezes; I. Bowman, A. A. Young, C. H. Haskin, W. E. Lunt, R. H. Lord, W. L. Westerman, C. Seymour, C. Day, G. L. Beer, M. Jefferson, J. T. Shotwell; Assistants to Specialists—Capt. S. K. Hornbeck, H. A. Lybyer, P. J. Kerner, P. T. Moon, L. H. Gray, R. B. Dixon, J. Storck, A. K. Lobeck, O. G. Stratton, W. J. Blank, J. B. Stubbs, D. P. Frary, P. W. Slossen.

"War Department Personnel—Brig. Gen. Marlborough Churchill, General Staff, Chief of Military Intelligence and Chief Censor; Col. R. H. Jordan, General Staff; Col. L. P. Ayers, General Staff; Major Hunter S. Marston, A. G. D.; Major Birch Helms, Infantry; Major C. W. Furlong, U. S. A.; Major F. M. Fling, U. S. A.; Capt. T. M. Childs, U. S. A.

"In Charge of Photographs (to return at once to U. S.)—Major John M. Campbell, General Staff; Major Frank J. Griffin, Signal Corps; First Lieut. Victor Fleming, Signal Corps; Second Lieut. Leonard F. Fello (assistant to Col. Jordan, in charge of baggage); Ruth W. Higgins (special stenographer, M. I. B.); Mr. Raymond B. Fosdick (authorized by Secretary of War, not attached to Peace Commission).

"Enlisted Men Detailed From Port of Embarkation—Sergt. William L. Copeland, M. I. D.; Sergt. Lawrence Dwight Smith, Corps of Intelligence Police; Sergt. Victor Braegger, Corps of Intelligence Police; Sergt. Louis J. Morra, Corps of Intelligence Police; Sergt. Robert Williams, Infantry; Sergt. Clyde Kuhn, Private Howard S. MacFall, Cavalry; Private Dominick Pronalone, Signal Corps.

FORD PEACE PARTY SAILED THREE YEARS BEFORE.

"As the Presidential 'peace ship' steamed down the bay many persons with good memories for dates recalled that exactly three years ago, on Dec. 4, 1915, another 'peace ship' had started forth—the Oscar II., financed by Henry Ford and carrying a company of pacifists who hoped to end the war. The World wired to Mr. Ford yesterday and recalled to him the anniversary and the coincidence. Over the long distance telephone, talking to a World representative, Mr. Ford said:

"'I wish President Wilson the most complete success on his peace mission, and I wish he were receiving a much more unanimous approval of his journey than the country has displayed.'"

GEN. PERSHING'S STORY OF OUR ARMY IN FRANCE.

(Cabled to the Secretary of War, November 20, 1918, and made public by the Secretary December 5.)

"NOVEMBER 20, 1918. My Dear Mr. Secretary: In response to your request, I have the honor to submit this brief summary of the organization and operation of the American Expeditionary Force from May 26, 1917, until the signing of the armistice November 11, 1918. Pursuant to your instructions, immediately upon receiving my orders I selected a small staff and proceeded to Europe in order to become familiar with conditions at the earliest possible moment. The warmth of our reception in England and France was only equaled by the readiness of the Commanders in Chief of the veteran armies of the Allies, and their staffs, to place their experience at our disposal. In consultation with them the most effective means of co-operation of effort was considered. With the French and British armies at their maximum strength, and when all efforts to dispossess the enemy from his firmly intrenched positions in Belgium and France had failed, it was necessary to plan for an American force adequate to turn the scale in favor of the Allies. Taking account of the strength of the Central Powers at that time, the immensity of the problem which confronted us could hardly be overestimated. The first requisite being an organization that could give intelligent direction to effort, the formation of a General Staff occupied my early attention.

GENERAL STAFF.

"A well organized General Staff, through which the Commander exercises his functions, is essential to a successful modern army. However capable our division, our battalion, and our companies as such, success would be impossible without thoroughly co-ordinated endeavor. A General Staff broadly organized and trained for war had not hitherto existed in our army. Under the Commander in Chief, this staff must carry out the policy and direct the details of administration, supply, preparation, and operations of the army as a whole, with all special branches and bureaus subject to its control. As models to aid us we had the veteran French General Staff and the experience of the British, who had similarly formed an organization to meet the demands of a great army. By selecting from each the features best adapted to our basic organization, and fortified by our own early experience in the war, the development of our great General Staff system was completed. The General Staff is naturally divided into five groups, each with its chief, who is an assistant to the Chief of the General Staff. G. 1 is in charge of organization and equipment of troops, replacements, tonnage, priority of overseas shipment, the auxiliary welfare association, and cognate subjects; G. 2 has censorship, enemy intelligence, gathering and disseminating information, preparation of maps, and all similar subjects; G. 3 is charged with all strategic studies and plans, movement of troops, and the supervision of combat operations; G. 4 co-ordinates important questions of supply, construction, transport arrangements for combat, and of the operations of the service of supply, and of hospitalization and the evacuation of the sick and wounded; G. 5 supervises the various schools and has general direction and co-ordination of education and training. The first Chief of Staff was Colonel (now Major Gen.) James G. Harbord, who was succeeded in March, 1918, by Major Gen. James W. McAndrew. To these officers, to the Deputy Chief of Staff, and to the Assistant Chiefs of Staff, who, as heads of sections, aided them, great credit is due for the results obtained, not only in perfecting the General Staff organization, but in applying correct principles to the multiplicity of problems that have arisen.

ORGANIZATION AND TRAINING.

"After a thorough consideration of allied organizations it was decided that our combat division should consist of four regiments of infantry of 3,000 men, with three battalions to regiment and four companies of 250 men each to a battalion, and of an artillery brigade of three regiments, a machine-gun battalion, an engineer regiment, a trench-mortar battery, a signal battalion, wagon trains, and the headquarters staffs and military police. These, with medical and other units, made a total of over 28,000 men, or practically double the size of a French or German division. Each corps would normally consist of six divisions —four combat and one depot and one replacement division—and also two regiments of cavalry, and each army of from three to five corps. With four divisions fully trained, a corps could take over an American sector with two divisions in line and two in reserve, with the depot and replacement divisions prepared to fill the gaps in the ranks. Our purpose was to prepare an integral American force which should be able to take the offensive in every respect. Accordingly, the development of a self-reliant infantry by thorough drill in the use of the rifle and in the tactics of open warfare was always uppermost. The plan of training after arrival in France allowed a division one month for acclimatization and instruction in small units from battalions down, a second month in quiet trench sectors by battalion, and a third month after it came out of the trenches when it should be trained as a complete division in war of movement. Very early a system of schools was outlined and started, which should have the advantage of instruction by officers direct from the front. At the great school centre at Langres, one of the first to be organized, was the staff school, where the principles of general staff work, as laid down in our own organization, were taught to carefully selected officers. Men in the ranks, who had shown qualities of leadership, were sent to the school of candidates for commissions. A school of the line taught younger officers the principles of leadership, tactics, and the use of the different weapons. In the artillery school, at Saumur, young officers were taught the fundamental principles of modern artillery; while at Issoudun an immense plant was built for training cadets in aviation. These and other schools, with their well-considered curriculums for training in every branch of our organization, were co-ordinated in a manner best to develop an efficient army out of willing and industrious young men, many of whom had not before known even the rudiments of military technique. Both Marshal Haig and General Petain placed officers and men at our disposal for instructional purposes, and we are deeply indebted for the opportunities given to profit by their veteran experience.

AMERICAN ZONE.

"The eventual place the American Army should take on the western front was to a large extent influenced by the vital questions of communication and supply. The northern ports of France were crowded by the British Armies' shipping and supplies, while the southern ports, though otherwise at our service, had not adequate port facilities for our purposes, and these we should have to build. The already overtaxed railway system behind the active front in Northern France would not be available for us as lines of supply, and those leading from the southern ports of Northeastern France would be unequal to our needs without much new construction. Practically all warehouses, supply depots and regulating station must be provided by fresh constructions. While France offered us such material as she had to spare after a drain of three years enormous quantities of material had to be brought across the Atlantic. With such a problem any temporization or lack of definiteness in making plans might cause failure even with victory within our grasp. Moreover, broad plans commensurate with our national purpose and resources would bring conviction of our power to every soldier in the front line, to the nations associated with us in the war, and to the enemy. The tonnage for material for necessary construction for the supply of an army of three and perhaps four million men would require a mammoth programme of shipbuilding at home, and miles of dock construction in France, with a corresponding large project for additional railways and for storage depots. All these considerations led to the inevitable conclusion that if we were to handle and supply the great forces deemed essential to win the war we must utilize the southern ports of France—Bordeaux, La Pallice, St. Nazaire, and Brest—and the comparatively unused railway systems leading therefrom to the northeast. Generally speaking, then, this would contemplate the use of our forces against the enemy somewhere in that direction, but the great depots of supply must be centrally located, preferably

in the area included by Tours, Bourges, and Chateauroux, so that our armies could be supplied with equal facility wherever they might be serving on the western front.

GROWTH OF THE SERVICE OF SUPPLY.

"To build up such a system there were talented men in the Regular Army, but more experts were necessary than the army could furnish. Thanks to the patriotic spirit of our people at home, there came from civil life men trained for every sort of work involved in building and managing the organization necessary to handle and transport such an army and keep it supplied. With such assistance the construction and general development of our plans have kept pace with the growth of the forces, and the Service of Supply is now able to discharge from ships and move 45,000 tons daily, besides transporting troops and material in the conduct of active operations. As to organization, all the administrative and supply services, except the Adjutant General's, Inspector General's, and Judge Advocate General's Departments which remain at General Headquarters, have been transferred to the headquarters of the services of supplies at Tours under a commanding general responsible to the Commander in Chief for supply of the armies. The Chief Quartermaster, Chief Surgeon, Chief Signal Officer, Chief of Ordnance, Chief of Air Service, Chief of Chemical Warfare, the general purchasing agent in all that pertains to questions of procurement and supply, the Provost Marshal General in the maintenance of order in general, the Director General of Transportation in all that affects such matters, and the Chief Engineer in all matters of administration and supply, are subordinate to the Commanding General of the Service of Supply, who, assisted by a staff especially organized for the purpose, is charged with the administrative co-ordination of all these services.

"The Transportation Department, under the Service of Supply, directs the operation, maintenance, and construction of railways, the operation of terminals, the unloading of ships, and transportation of material to warehouses or to the front. Its functions make necessary the most intimate relationship between our organization and that of the French, with the practical result that our transportation department has been able to improve materially the operations of railways generally. Constantly laboring under a shortage of rolling stock, the transportation department has nevertheless been able by efficient management to meet every emergency. The Engineer Corps is charged with all construction, including light railways and roads. It has planned and constructed the many projects required, the most important of which are the new wharves at Bordeaux and Nantes, and the immense storage depots at La Pallice, Montoir, and Clevres, besides innumerable hospitals and barracks in various ports of France. These projects have all been carried on by phases keeping pace with our needs. The Forestry Service, under the Engineer Corps, has cut the greater part of the timber and railway ties required.

"To meet the shortage of supplies from America, due to lack of shipping, the representatives of the different supply departments were constantly in search of available material and supplies in Europe. In order to co-ordinate these purchases and to prevent competition between our departments, a general purchasing agency was created early in our experience to co-ordinate our purchases and, if possible, induce our Allies to apply the principle among the Allied armies. While there was no authority for the general use of appropriations, this was met by grouping the purchasing representatives of the different departments under one control, charged with the duty of consolidating requisitions and purchases. Our efforts to extend the principle have been signally successful, and all purchases for the Allied armies are now on an equitable and co-operative basis. Indeed, it may be said that the work of this bureau has been thoroughly efficient and businesslike.

ARTILLERY, AIRPLANES, AND TANKS.

"Our entry into the war found us with few of the auxiliaries necessary for its conduct in the modern sense. Among our most important deficiencies in material were artillery, aviation, and tanks. In order to meet our requirements as rapidly as possible, we accepted the offer of the French Government to provide us with the necessary artillery equipment of seventy-fives, one fifty-five millimeter howitzers, and one fifty-five G P F guns from their own factories for thirty divisions. The wisdom of this course is fully demonstrated by the fact that, although we soon began the manufacture of these classes of guns at home, there were no guns of the calibres mentioned manufactured in America on our front at the date the armistice was signed. The only guns of these types produced at home thus far received in France are 109 seventy-five millimeter guns. In aviation we were in the same situation, and here again the French Government came to our aid until our own aviation programme should be under way. We obtained from the French the necessary planes for training our personnel, and they have provided us with a total of 2,676 pursuit, observation, and bombing planes. The first airplanes received from home arrived in May, and altogether we have received 1,379. The first American squadron completely equipped by American production, including airplanes, crossed the German lines on August 7, 1918. As to tanks, we were also compelled to rely upon the French. Here, however, we were less fortunate, for the reason that the French production could barely meet the requirements of their own armies. It should be fully realized that the French Government has always taken a most liberal attitude, and has been most anxious to give us every possible assistance in meeting our deficiencies in these as well as in other respects. Our dependence upon France for artillery, aviation, and tanks was, of course, due to the fact that our industries had not been exclusively devoted to military production. All credit is due our own manufacturers for their efforts to meet our requirements, as at the time the armistice was signed we were able to look forward to the early supply of practically all our necessities from our own factories.

"The welfare of the troops touches my responsibility as Commander in Chief to the mothers and fathers and kindred of the men who came to France in the impressionable period of youth. They could not have the privilege accorded European soldiers during their periods of leave of visiting their families and renewing their home ties. Fully realizing that the standard of conduct that should be established for them must have a permanent influence in their lives and on the character of their future citizenship, the Red Cross, the Young Men's Christian Association, Knights of Columbus, the Salvation Army, and the Jewish Welfare Board, as auxiliaries in this work, were encouraged in every possible way. The fact that our soldiers, in a land of different customs and language, have borne themselves in a manner in keeping with the cause for which they fought, is due not only to the efforts in their behalf, but much more to other high ideals, their discipline, and their innate sense of self-respect. It should be recorded, however, that the members of these welfare societies have been untiring in their desire to be of real service to our officers and men. The patriotic devotion of these representative men and women has given a new significance to the Golden Rule, and we owe to them a debt of gratitude that can never be repaid.

COMBAT OPERATIONS.

"During our period of training in the trenches some of our divisions had engaged the enemy in local combats, the most important of which was Seicheprey by the 26th on April 20, in the Toul sector, but none had participated in action as a unit. The 1st Division, which had passed through the preliminary stages of training, had gone to the trenches for its first period of instruction at the end of October, and by March 21, when the German offensive in Picardy began, we had four divisions with experience in the trenches, all of which were equal to any demands of battle action. The crisis which this offensive developed was such that our occupation of an American sector must be postponed.

"On March 28 I placed at the disposal of Marshal Foch, who had been agreed upon as Commander in Chief of the Allied Armies, all of our forces to be used as he might decide. At his request the 1st Division was transferred from the Toul sector to a position in reserve at Chaumont en Vexin. As German superiority in numbers required prompt action, an agreement was reached at the Abbeville conference of the Allied Premiers and commanders and myself on May 2 by which British shipping was to transport ten Ameri-

can divisions to the British Army area, where they were to be trained and equipped and additional British shipping was to be provided for as many divisions as possible for use elsewhere.

"On April 26 the 1st Division had gone into the line in the Montdidier salient on the Picardy battle-front. Tactics had been suddenly revolutionized to those of open warfare, and our men, confident of the results of their training, were eager for the test. On the morning of May 28 this division attacked the commanding German position in its front, taking with splendid dash the town of Cantigny and all other objectives, which were organized and held steadfastly against vicious counterattacks and galling artillery fire. Although local, this brilliant action had an electrical effect, as it demonstrated our fighting qualities under extreme battle conditions, and also that the enemy's troops were not altogether invincible.

"The Germans' Aisne offensive, which began on May 27, had advanced rapidly toward the River Marne and Paris, and the Allies faced a crisis equally as grave as that of the Picardy offensive in March. Again every available man was placed at Marshal Foch's disposal, and the 3d Division, which had just come from its preliminary training in the trenches, was hurried to the Marne. Its motorized machine-gun battalion preceded the other units and successfully held the bridgehead at the Marne, opposite Chateau-Thierry. The 2d Division, in reserve near Montdidier, was sent by motor trucks and other available transport to check the progress of the enemy toward Paris. The division attacked and retook the town and railroad station at Boureseches and sturdily held its ground against the enemy's best guard divisions. In the Battle of Belleau Wood, which followed, our men proved their superiority and gained a strong tactical position, with far greater loss to the enemy than to ourselves. On July 1, before the Second was relieved, it captured the village of Vaux with most splendid precision. Meanwhile our 2d Corps, under Major Gen. George W. Read, had been organized for the command of our divisions with the British, which were held back in training areas or assigned to second-line defenses. Five of the ten divisions were withdrawn from the British area in June, three to relieve divisions in Lorraine and in the Vosges and two to the Paris area to join the group of American divisions which stood between the city and any further advance of the enemy in that direction.

"The great June-July troop movement from the States was well under way, and, although these troops were to be given some preliminary training before being put into action, their very presence warranted the use of all the older divisions in the confidence that we did not lack reserves. Elements of the 42d Division were in the line east of Rheims against the German offensive of July 15, and held their ground unflinchingly. On the right flank of this offensive four companies of the 28th Division were in position in face of the advancing waves of the German infantry. The 3d Division was holding the bank of the Marne from the bend east of the mouth of the Surmelin to the west of Mezy, opposite Chateau-Thierry, where a large force of German infantry sought to force a passage under support of powerful artillery concentrations and under cover of smoke screens. A single regiment of the Third wrote one of the most brilliant pages in our military annals on this occasion. It prevented the crossing at certain points on its front while, on either flank, the Germans, who had gained a footing, pressed forward. Our men, firing in three directions, met the German attacks with counterattacks at critical points and succeeded in throwing two German divisions into complete confusion, capturing 600 prisoners.

"The great force of the German Chateau-Thierry offensive established the deep Marne salient, but the enemy was taking chances, and the vulnerability of this pocket to attack might be turned to his disadvantage. Seizing this opportunity to support my conviction, every division with any sort of training was made available for use in a counteroffensive. The place of honor in the thrust toward Scissons on July 18 was given to our 1st and 2d Divisions in company with chosen French divisions. Without the usual brief warning of a preliminary bombardment, the massed French and American artillery, firing by the map, laid down its rolling barrage at dawn, while the infantry began its charge. The tactical handling of our troops under these trying conditions was excellent throughout the action. The enemy brought up large numbers of reserves and made a stubborn defense both with machine guns and artillery, but through five days' fighting the 1st Division continued to advance until it had gained the heights above Soissons and captured the village of Berzy-le-Sec. The 2d Division took Beau Repaire Farm and Vierzy in a very rapid advance and reached a position in front of Tigny at the end of its second day. These two divisions captured 7,000 prisoners and over 100 pieces of artillery.

"The 26th Division, which, with a French division, was under command of our 1st Corps, acted as a pivot of the movement toward Soissons. On the 18th it took the village of Torcy while the 3d Division was crossing the Marne in pursuit of the retiring enemy. The 26th Division attacked again on the 21st, and the enemy withdrew past the Chateau-Thierry-Soissons road. The 3d Division, continuing its progress, took the heights of Mont St. Pere and the villages of Charteves and Jaulgonne in the face of both machine-gun and artillery fire.

"On the 24th, after the Germans had fallen back from Trugny and Epieds, our 42d Division, which had been brought over from the Champagne, relieved the 26th Division and, fighting its way through the the Foret de Fere, overwhelmed the nest of machine guns in its path. By the 27th it had reached the Ourcq, whence the 3d and 4th Divisions were already advancing, while the French divisions with which we were co-operating were moving forward at other points.

"The 3d Division had made its advance into Roncheres Wood on the 29th and was relieved for rest by a brigade of the 32d Division. The 42d and 32d Division undertook the task of conquering the heights beyond Cierges, the Forty-second capturing Sergy and the Thirty-second capturing Hill 230, both American divisions joining in the pursuit of the enemy to the Vesle, and thus the operation of reducing the salient was finished. Meanwhile, the Forty-second was relieved by the Fourth at Chery-Chartreuve, and the Thirty-second by the Twenty-eighth, while the 77th Division took up a position on the Vesle. The operations of these divisions on the Vesle were under the 3d Corps, Major Gen. Robert L. Bullard commanding.

BATTLE OF ST. MIHIEL.

"With the reduction of the Marne salient, we could look forward to the concentration of our divisions in our own zone. In view of the forthcoming operation against the St. Mihiel salient, which had long been planned as our first offensive action on a large scale, the First Army was organized on August 10 under my personal command. While American units had held different divisional and corps sectors along the western front, there had not been up to this time, for obvious reasons, a distinct American sector; but, in view of the important parts the American forces were now to play, it was necessary to take over a permanent portion of the line. Accordingly, on August 30, the line beginning at Port sur Seille, east of the Moselle and extending to the west through St. Mihiel, thence north to a point opposite Verdun, was placed under my command. The American sector was afterward extended across the Meuse to the western edge of the Argonne Forest, and included the 2d Colonial French, which held the point of the salient, and the 17th French Corps, which occupied the heights above Verdun. The preparation for a complicated operation against the formidable defenses in front of us included the assembling of divisions and of corps and army artillery, transport, aircraft, tanks, ambulances, the location of hospitals, and the molding together of all of the elements of a great modern army, with its own railheads, supplied directly by our own Service of Supply. The concentration for this operation, which was to be a surprise, involved the movement, mostly at night, of approximately 600,000 troops, and required for its success the most careful attention to every detail. The French were generous in giving us assistance in corps and army artillery, with its personnel, and we were confident from the start of our superiority over the enemy in guns of all calibres. Our heavy guns were able to reach Metz and to interfere seriously with German rail movements. The French Independent Air Force was placed under my command, which, together with the British bombing squadrons and our air forces, gave us the largest assembly of aviation that had ever been engaged in one operation on the western front.

"From Les Eparges around the nose of the salient at St. Mihiel to the Moselle River the line was roughly forty miles long and situated on commanding ground greatly strengthened by artificial defenses. Our 1st Corps (82d, 90th, 5th, and 2d Divisions), under command of Major Gen. Hunter Liggett, restrung its right on Pont-a-Mousson, with its left joining our 3d Corps (the 89th, 42d, and 1st Divisions), under Major Gen. Joseph T. Dickman, in line to Xivray, were to swing toward Vigneulles on the pivot of the Moselle River for the initial assault. From Xivray to Mouilly the 2d Colonial French Corps was in line in the centre, and our 5th Corps, under command of Major Gen. George H. Cameron, with our 26th Division and a French division at the western base of the salient, were to attack three difficult hills—Les Eparges, Combres, and Amaramthe. Our 1st Corps had in reserve the 78th Division, our 4th Corps the 3d Division, and our First Army the 35th and 91st Divisions, with the 80th and 33d Divisions available. It should be understood that our corps organizations are very elastic, and that we have at no time had permanent assignments of divisions to corps. After four hours' artillery preparation, the seven American divisions in the front line advanced at 5 A. M. on September 12, assisted by a limited number of tanks manned partly by Americans and partly by French. These divisions, accompanied by groups of wire cutters and others armed with bangalore torpedoes, went through the successive bands of barbed wire that protected the enemy's front line and support trenches, in irresistible waves on schedule time, breaking down all defense of an enemy demoralized by the great volume of our artillery fire and our sudden approach out of the fog. Our 1st Corps advanced to Thiaucourt, while our 4th Corps curved back to the southwest through Nousard. The 2d Colonial French Corps made the slight advance required of it on very difficult ground, and the 5th Corps took its three ridges and repulsed a counter-attack. A rapid march brought reserve regiments of a division of the 5th Corps into Vigneulles in the early morning, where it linked up with patrols of our 4th Corps, closing the salient and forming a new line west of Thiaucourt to Vigneulles and beyond Fresnes-en-Woevre. At the cost of only 7,000 casualties, mostly light, we had taken 16,000 prisoners and 443 guns, a great quantity of material, released the inhabitants of many villages from enemy domination, and established our lines in a position to threaten Metz. This signal success of the American First Army in its first offensive was of prime importance. The Allies found they had a formidable army to aid them, and the enemy learned finally that he had one to reckon with.

MEUSE-ARGONNE OFFENSIVE, FIRST PHASE.

"On the day after we had taken the St. Mihiel salient much of our corps and army artillery which had operated at St. Mihiel, and our divisions in reserve at other points, were already on the move toward the area back of the line between the Meuse River and the western edge of the forest of Argonne. With the exception of St. Mihiel, the old German front line from Switzerland to the east of Rheims was still intact. In the general attack all along the line, the operation assigned the American Army as the hinge of this allied offensive was directed toward the important railroad communications of the German armies through Mezieres and Sedan. The enemy must hold fast to this part of his lines or the withdrawal of his forces with four years' accumulation of plants and material would be dangerously imperilled. The German Army had as yet shown no demoralization, and, while the mass of its troops had suffered in morale, its first-class divisions, and notably its machine-gun defense, were exhibiting remarkable tactical efficiency as well as courage. The German General Staff was fully aware of the consequences of a success on the Meuse-Argonne line. Certain that he would do everything in his power to oppose us, the action was planned with as much secrecy as possible and was undertaken with the determination to use all our divisions in forcing decision. We expected to draw the best German divisions to our front and to consume them while the enemy was held under grave apprehension lest our attack should break his line, which it was our firm purpose to do.

"Our right flank was protected by the Meuse, while our left embraced the Argonne Forest, whose ravines, hills, and elaborate defense, screened by dense thickets, had been generally considered impregnable. Our order of battle from right to left was the 3d Corps from the Meuse to Malancourt, with the 33d, 80th, and 4th Divisions in line, and the 3d Division as corps reserve; the 5th Corps from Malancourt to Vauquois, with 79th, 87th, and 91st Divisions in line, and the 32d in corps reserve, and the 1st Corps, from Vauquois to Vienne le Chateau, with 35th, 28th, and 77th Divisions in line, and the 92d in corps reserve. The army reserve consisted of the 1st, 29th, and 82d Divisions.

"On the night of September 25 our troops quietly took the place of the French who thinly held the line in this sector, which had long been inactive. In the attack which began on the 26th we drove through the barbed wire entanglements and the sea of shell craters across No Man's Land, mastering all the first-line defenses. Continuing on the 27th and 28th, against machine guns and artillery of an increasing number of enemy reserve divisions, we penetrated to a depth of from three to seven miles and took the village of Montfaucon and its commanding hill and Exermont, Gercourt, Cuisy, Septsarges, Malancourt, Ivoiry, Epinonville, Charpentry, Very, and other villages. East of the Meuse one of our divisions, which was with the 2d Colonial French Corps, captured Marcheville and Rieville, giving further protection to the flank of our main body. We had taken 10,000 prisoners, we had gained our point of forcing the battle into the open, and were prepared for the enemy's reaction, which was bound to come, as he had good roads and ample railroad facilities for bringing up his artillery and reserves. In the chill rain of dark nights our engineers had to build new roads across spongy, shell-torn areas, repair broken roads beyond No Man's Land, and build bridges. Our gunners, with no thought of sleep, put their shoulders to wheels and drag-ropes to bring their guns through the mire in support of the infantry, now under the increasing fire of the enemy's artillery. Our attack had taken the enemy by surprise; but, quickly recovering himself, he began to fire counterattacks in strong force, supported by heavy bombardments, with large quantities of gas. From September 28 until October 4, we maintained the offensive against patches of woods defended by snipers and continuous lines of machine guns, and pushed forward our guns and transport, seizing strategical points in preparation for further attacks.

OTHER UNITS WITH ALLIES.

"Other divisions attached to the Allied Armies were doing their part. It was the fortune of our 2d Corps, composed of the 27th and 30th Divisions, which had remained with the British, to have a place of honor in co-operation with the Australian Corps on September 29 and October 1, in the assault on the Hindenburg Line where the St. Quentin Canal passes through a tunnel under a ridge. The 30th Division speedily broke through the main line of defense for all its objectives, while the 27th Division pushed on impetuously through the main line until some of its elements reached Gouy. In the midst of the maze of trenches and shell craters and under crossfire from machine guns the other elements fought desperately against odds. In this and in later actions, from October 6 to October 19, our 2d Corps captured over 6,000 prisoners and advanced over thirteen miles. The spirit and aggressiveness of these divisions have been highly praised by the British Army commander under whom they served.

"On October 2-9 our 2d and 36th Divisions were sent to assist the French in an important attack against the old German positions before Rheims. The 2d Division conquered the complicated defense works on their front against a persistent defense worthy of the grimmest period of trench warfare and attacked the strongly held wooded hill of Blanc Mont, which they captured in a second assault, sweeping over it with consummate dash and skill. This division then repulsed strong counter-attacks before the village and cemetery of St. Etienne and took the town, forcing the Germans to fall back from before Rheims and yield positions they had held since September, 1914. On October 9 the 36th Division relieved the 2d Division, and in its first experience under fire withstood very severe artillery bombardment and rapidly took up the pursuit of the enemy, now retiring behind the Aisne.

MEUSE-ARGONNE OFFENSIVE, SECOND PHASE.

"The allied progress elsewhere cheered the efforts of our men in this crucial contest, as the German command threw in more and more first-class troops to stop our advance. We made steady headway in the almost impenetrable and strongly held Argonne Forest, for, despite this reinforcement, it was our army doing the driving. Our aircraft was increasing in skill and numbers and forcing the issue, and our infantry and artillery were improving rapidly with each new experience. The replacements fresh from home were put into exhausted divisions with little time for training, but they had the advantage of serving beside men who knew their business and who had almost become veterans overnight. The enemy had taken every advantage of the terrain, which especially favored the defense, by a prodigal use of machine guns manned by highly trained veterans and by using his artillery at short ranges. In the face of such strong frontal positions we should have been unable to accomplish any progress according to previously accepted standards, but I had every confidence in our aggressive tactics and the courage of our troops.

"On October 4 the attack was renewed all along our front. The 3d Corps, tilting to the left, followed the Brieulles-Cunel Road; our 5th Corps took Gesnes, while the 1st Corps advanced for over two miles along the irregular valley of the Aire River and in the wooded hills of the Argonne that bordered the river, used by the enemy with all his art and weapons of defense. This sort of fighting continued against an enemy striving to hold every foot of ground and whose very strong counter-attacks challenged us at every point. On the 7th the 1st Corps captured Chatel-Chenery and continued along the river to Cornay. On the east of Meuse sector one of the two divisions, co-operating with the French, captured Consenvoye and the Haumont Woods. On the 9th the 5th Corps, in its progress up the Aire, took Fleville, and the 3d Corps, which had had continuous fighting against odds, was working its way through Brieulles and Cunel. On the 10th we had cleared the Argonne Forest of the enemy.

"It was now necessary to constitute a Second Army, and on October 9 the immediate command of the First Army was turned over to Lieut. Gen. Hunter Liggett. The command of the Second Army, whose divisions occupied a sector in the Woevre, was given to Lieut. Gen. Robert L. Bullard, who had been commander of the 1st Division and then of the 3d Corps. Major Gen. Dickman was transferred to the command of the 1st Corps, while the 5th Corps was placed under Major Gen. Charles P. Summerall, who had recently commanded the 1st Division. Major Gen. John L. Hines, who had gone rapidly up from regimental to division commander, was assigned to the 3d Corps. These four officers had been in France from the early days of the expedition and had learned their lessons in the school of practical warfare. Our constant pressure against the enemy brought day by day more prisoners, mostly survivors from machine-gun nests captured in fighting at close quarters.

"On October 18 there was very fierce fighting in the Caures Woods east of the Meuse and in the Ormont Woods. On the 14th the 1st Corps took St. Juvin, and the 5th Corps, in hand-to-hand encounters, entered the formidable Kriemhild line, where the enemy had hoped to check us indefinitely. Later the 5th Corps penetrated further the Kriemhild line, and the 1st Corps took Champigneulles and the important town of Grand Pre. Our dogged offensive was wearing down the enemy, who continued desperately to throw his best troops against us, thus weakening his line in front of our Allies and making their advance less difficult.

DIVISIONS IN BELGIUM.

"Meanwhile we were not only able to continue the battle, but our 37th and 91st Divisions were hastily withdrawn from our front and dispatched to help the French Army in Belgium. Detraining in the neighborhood of Ypres, these divisions advanced by rapid stages to the fighting line and were assigned to adjacent French corps. On October 31, in continuation of the Flanders offensive, they attacked and methodically broke down all enemy resistance. On November 3 the 37th had completed its mission in dividing the enemy across the Escaut River and firmly established itself along the east bank included in the division zone of action. By a clever flanking movement troops of the 91st Division captured Spitaals Bosschen, a difficult wood extending across the central part of the division sector, reached the Escaut, and penetrated into the town of Audenarde. These divisions received high commendation from their corps commanders for their dash and energy.

MEUSE-ARGONNE—LAST PHASE.

"On the 23d the 3d and 5th Corps pushed northward to the level of Bantheville. While we continued to press forward and throw back the enemy's violent counterattacks with great loss to him, a regrouping of our forces was under way for the final assault. Evidences of loss of morale by the enemy gave our men more confidence in attack and more fortitude in enduring the fatigue of incessant effort and the hardships of very inclement weather.

"With comparatively well-rested divisions, the final advance in the Meuse-Argonne front was begun on November 1. Our increased artillery force acquitted itself magnificently in support of the advance, and the enemy broke before the determined infantry, which, by its persistent fighting of the past weeks and the dash of this attack, had overcome his will to resist. The 3d Corps took Ancreville, Doulcon, and Andevanne, and the 5th Corps took Landres et St. Georges and pressed through successive lines of resistance to Bayonville and Chennery. On the 2d the 1st Corps joined in the movement, which now became an impetuous onslaught that could not be stayed.

"On the 3d advance troops surged forward in pursuit, some by motor trucks, while the artillery pressed along the country roads close behind. The 1st Corps reached Authe and Chatillon-sur-Bar, the 5th Corps, Fosse and Nouart, and the 3d Corps, Halles, penetrating the enemy's line to a depth of twelve miles. Our large-calibre guns had advanced and were skillfully brought into position to fire upon the important lines at Montmedy, Longuyon, and Conflans. Our 3d Corps crossed the Meuse on the 5th and the other corps, in the full confidence that the day was theirs, eagerly cleared the way of machine guns as they swept northward, maintaining complete co-ordination throughout. On the 6th, a division of the 1st Corps reached a point on the Meuse opposite Sedan, twenty-five miles from our line of departure. The strategical goal which was our highest hope was gained. We had cut the enemy's main line of communications, and nothing but surrender or an armistice could save his army from complete disaster. In all forty enemy divisions had been used against us in the Meuse-Argonne battle. Between September 26 and November 6 we took 26,059 prisoners and 468 guns on this front. Our divisions engaged were the 1st, 2d, 3d, 4th, 5th, 26th, 28th, 29th, 32d, 33d, 35th, 37th, 42d, 77th, 78th, 79th, 80th, 82d, 89th, 90th, and 91st. Many of our divisions remained in line for a length of time that required nerves of steel, while others were sent in again after only a few days of rest. The 1st, 5th, 26th, 42d, 77th, 80th, 89th, and 90th were in the line twice. Although some of the divisions were fighting their first battle, they soon became equal to the best.

OPERATIONS EAST OF THE MEUSE.

"On the three days preceding November 10, the 3d, the 2d Colonial, and the 17th French Corps fought a difficult struggle through the Meuse Hills south of Stenay and forced the enemy into the plain. Meanwhile, my plans for further use of the American forces contemplated an advance between the Meuse and the Moselle in the direction of Longwy by the First Army, while, at the same time, the Second Army should assure the offensive toward the rich coal fields of Briey. These operations were to be followed by an offensive toward Chateau-Salins east of the Moselle, thus isolating Metz. Accordingly, attacks on the American front had been ordered, and that of the Second Army was in progress on the morning of Nov. 11, when instructions were received that hostilities should cease at 11 o'clock A. M. At this moment the line of the American sector, from right to left, began at Port-sur-Seille, thence across the Moselle to Vandieres and through the Woevre to Bezonvaux, in the foothills of the Meuse, thence along to the foothills and through the northern edge of the Woevre forests to the Meuse at Mouzay, thence along the Meuse connecting with the French under Sedan.

GEN. PERSHING'S STORY OF OUR ARMY IN FRANCE—*Continued.*

RELATIONS WITH THE ALLIES.

"Co-operation among the Allies has at all times been most cordial. A far greater effort has been put forth by the allied armies and staffs to assist us than could have been expected. The French Government and Army have always stood ready to furnish us with supplies, equipment, and transportation and to aid us in every way. In the towns and hamlets wherever our troops have been stationed or billeted the French people have everywhere received them more as relatives and intimate friends than as soldiers of a foreign army. For these things words are quite inadequate to express our gratitude. There can be no doubt that the relations growing out of our associations here assure a permanent friendship between the two peoples. Although we have not been so intimately associated with the people of Great Britain, yet their troops and ours when thrown together have always warmly fraternized. The reception of those of our forces who have passed through England and of those who have been stationed there has always been enthusiastic. Altogether it has been deeply impressed upon us that the ties of language and blood bring the British and ourselves together completely and inseparably.

STRENGTH.

"There are in Europe altogether, including a regiment and some sanitary units with the Italian Army and the organizations at Murmansk, also including those en route from the States, approximately 2,053,347 men, less our losses. Of this total there are in France 1,338,169 combatant troops. Forty divisions have arrived, of which the infantry personnel of ten have been used as replacements, leaving thirty divisions now in France organized into three armies of three corps each.

"The losses of the Americans up to November 18 are: Killed and wounded, 36,145; died of disease, 14,811; deaths unclassified, 2,204; wounded, 179,625; prisoners, 2,163; missing, 1,160. We have captured about 44,000 prisoners and 1,400 guns, howitzers, and trench mortars.

COMMENDATION.

"The duties of the General Staff, as well as those of the army and corps staffs, have been very ably performed. Especially is this true when we consider the new and difficult problems with which they have been confronted. This body of officers, both as individuals and as an organization, have, I believe, no superiors in professional ability, in efficiency, or in loyalty. Nothing that we have in France better reflects the efficiency and devotion to duty of Americans in general than the Service of Supply, whose personnel is thoroughly imbued with a patriotic desire to do its full duty. They have at all times fully appreciated their responsibility to the rest of the army, and the results produced have been most gratifying.

"Our Medical Corps is especially entitled to praise for the general effectiveness of its work, both in hospital and at the front. Embracing men of high professional attainments, and splendid women devoted to their calling and untiring in their efforts, this department has made a new record for medical and sanitary proficiency. The Quartermaster Department has had difficult and various tasks, but it has more than met all demands that have been made upon it. Its management and its personnel have been exceptionally efficient, and deserve every possible commendation. As to the more technical services, the able personnel of the Ordnance Department in France has splendidly fulfilled its functions, both in procurement and in forwarding the immense quantities of ordnance required. The officers and men and the young women of the Signal Corps have performed their duties with a large conception of the problem, and with a devoted and patriotic spirit to which the perfection of our communications daily testifies. While the Engineer Corps has been referred to in another part of this report, it should be further stated that the work has required large vision and high professional skill, and great credit is due their personnel for the high proficiency that they have constantly maintained.

"Our aviators have no equals in daring or in fighting ability and have left a record of courageous deeds that will ever remain a brilliant page in the annals of our army. While the Tank Corps has had limited opportunities, its personnel has responded gallantly on every possible occasion and has shown courage of the highest order.

"The Adjutant General's Department has been directed with a systematic thoroughness and excellence that surpassed any previous work of its kind. The Inspector General's Department has risen to the highest standards, and throughout has ably assisted commanders in the enforcement of discipline. The able personnel of the Judge Advocate General's Department has solved with judgment and wisdom the multitude of difficult legal problems, many of them involving questions of great international importance. It would be impossible in this brief preliminary report to do justice to the personnel of all the different branches of this organization, which I shall cover in detail in a later report.

"The navy in European waters has at all times most cordially aided the army, and it is most gratifying to report that there has never before been such perfect co-operation between these two branches of the service.

"As to the Americans in Europe not in the military service, it is the greatest pleasure to say that, both in official and in private life, they are intensely patriotic and loyal, and have been invariably sympathetic and helpful to the army.

"Finally, I pay the supreme tribute to our officers and soldiers of the line. When I think of their heroism, their patience under hardships, their unflinching spirit of offensive action, I am filled with emotion which I am unable to express. Their deeds are immortal, and they have earned the eternal gratitude of our country.

I am, Mr. Secretary, very respectfully,

"JOHN J. PERSHING, General, Commander in Chief, American Expeditionary Forces.

"To the Secretary of War."

ARMY PAY ABROAD AND HERE COMPARED.

THE General in the American Army, which is the rank of General Pershing, receives $883.33 per month; twice the pay of a German General and a little less than twice that of a French General, but less than the base pay of a General in the British Army, which is $1,380 a month.

Base rate of pay per day of enlisted men.	U. S.	G. Britain	France.	Italy.	Germany.
Private	$1.00	$0.36	$0.05	$0.02-.04	$0.10
Private first class	1.20	.50	.085	.05-.10	.25
Sergeant	1.27	.64	.20	.40-.80	.35
Base rate of pay per month of officers:					
Second Lieutenant	141.67	39.00	60.00	30–60	30.00
First Lieutenant	166.67	48.00	70.00	40–70	33.00
Captain	200.00	86.00	80.00	60–90	90.00
Major	250.00	115.00	90.00	80	130.00
Lieutenant Colonel	291.67	135.00	142.00	95	170.00
Colonel	333.33	145.00	165.00	126	176.00
Brigadier General	500.00	400.00	200.00	160	203.00
Major General	666.67	525.00	300.00	190	260.00
Lieutenant General	750.00	850.00	.....	240	267.00
General	$833.33	1,380.00	490.00	240	357.00

SECRETARY OF WAR'S FIGURES ON ARMY'S GROWTH; ALSO ON MILITARY OPERATIONS.

(Taken from Mr. Baker's Report to the President, Dec. 5, 1918.)

The size of the Army has increased from April 6, 1917 to November 11, 1918, from 190,000 to 3,665,000 men, of whom more than 2,000,000 were in France. The appropriations for the War Department, on the executive side alone, were increased in that period from $2,009,000 a year to $20,000,000; and the civilian employees had increased from about 2,000 to about 25,000. For the year ending June 30, 1918, the appropriations for the support of the military establishment aggregated $8,000,000,000. For the year ending June 30, 1919, the appropriations aggregate $15,300,000,000.

The first units of the American Expeditionary Force reached France in June, 1917. With remarkable foresight the Commanding General, John J. Pershing, immediately set about laying the foundations for a big American Army. Docks were built, miles of railroad were laid, machine shops and storage depots were constructed, training areas were laid out. While the force in France and in immediate prospect numbered but few thousands, essential preparations were made for an army mounting into the millions.

Until this groundwork was well under way large shipments of troops could not be handled, but before the end of the year five divisions had reached France—the First and Second Divisions of Regulars, the Twenty-sixth Division from New England, and the Forty-second and Forty-first, known as the Rainbow and Sunset Divisions. By the end of October American units had entered the line in quiet sectors in the Vosges, and in November engineers from the Twenty-sixth Division took part in the British engagement at Cambrai.

During the Fall and Winter American troops received the intensive training in modern warfare which made them able to lead later at Chateau-Thierry, St. Mihiel, and the Meuse.

AMERICAN TROOPS IN ACTION.

On March 21 the storm of the German offensive broke. Under the stress of the situation unity of command was effected and by the direction of the President, Gen. Pershing immediately placed his forces, numbering at that time about 343,000, at the disposal of Marshal Foch.

During the ensuing months American troops were on trial in the eyes of Europe. A huge army, hastily gathered, consisting largely of inexperienced troops, they upheld the finest traditions of the service. To a large extent at first they relieved French and British divisions in quiet sectors, making these experienced divisions available for service at crucial points. Then as the American troops showed their fighting qualities and the emergency became more acute, they were thrown into the hottest of the battle. At Cantigny on May 28, troops of the First Division fought their first real engagement and carried it through successfully. On June 4, the Second Division of Regulars and Marines went into the line on the Marne, where the Germans were driving toward Paris. On June 15, they met the triumphantly advancing enemy in the Belleau Wood, stopped his advance and in an impetuous charge drove his column back more than 900 yards. It was a brilliant demonstration of the quality of our troops, and among the weary French and British soldiers in the trenches the word flew from mouth to mouth that the Americans were first-class fighting men.

The attack on Paris had been definitely stayed by the fine strategy and desperate resistance of the French and American troops. But on July 15 the enemy resumed the attack from Chateau-Thierry eastward to the Argonne. Six American divisions were thrown into the line at Chateau-Thierry, with several more in reserve. Three days later the drive had been stopped and Marshal Foch launched his offensive.

From that time the story is one of allied attack and German retreat. In blow after blow which the Commander in Chief of the allied armies struck at the German line, American troops took a conspicuous part. On September 12 the First American Army under the personal direction of Gen. Pershing launched an attack on St. Mihiel and within twenty-four hours had pinched off that heavily fortified salient which had withstood attack through four years of war. The elimination of this salient, which had menaced eastern France, relieved the pressure on Verdun and made possible further advances north of that city.

Meanwhile the Twenty-seventh New York Division and the Thirtieth National Guard Division, with troops from South Carolina, North Carolina, and Tennessee, were operating with the British. The Three Hundred and Thirty-second Regiment of Infantry, together with aviation and ambulance units operating on the Italian front, had a share in the great Italian victory. Small expeditionary forces were also established at Archangel and Vladivostok.

THE BATTLE OF THE MEUSE.

From the point of view of military strategy, America's greatest contribution to the successful outcome of the war was the hotly contested battle of the Meuse, which resulted in cutting the main artery of the German supply system. Up through the middle of September the Germans were able to operate unmolested the Sedan-Mezières railway running parallel to the front and furnishing a base of supply for the whole line from Valenciennes to Metz. To cut this supply line at both ends and force withdrawal or capture on this entire front the British attacked in the north, and on September 26 Gen. Pershing drove in west of the Meuse with the First American Army. The first few days of fighting yielded considerable gains. Fully conscious of the gravity of the situation, the enemy threw in division after division of fresh troops; and during the ensuing weeks occurred the bitterest fighting in which American troops took part. The second week of October practically all available units—about twenty-eight American divisions—were in the line. Progress could be made only a few yards at a time, but the continued hammering finally wore out the resistance of the enemy forces, and November 1 the American troops broke through. Day after day steady gains were made up the west bank of the Meuse, until, on November 7, the United States forces entered the outskirts of Sedan and definitely cut the German supply line. A day later the French forces came up on the left flank.

The meeting of French and American troops on this historic spot signalized the defeat of the German arms, a defeat as decisive and humiliating as that forced upon France forty-seven years before at the same spot. If there had been questions before as to the acceptance of the armistice terms, the allied advance culminating in this meeting at Sedan left no choice in the matter.

In the final campaign of the war American troops thus played a part in a triumph which was beyond all praise and which made them worthy comrades in arms with French and British veterans.

Casualties reported to October 23: Deaths, 53,160; wounded, 179,625; missing, 1,160; prisoners, 2,163; Total, 236,108.

These figures include death from disease as well as battle casualties, slightly as well as severely wounded. Deaths from battle alone would be about 36,000. About half the wounded reported probably suffered very slight injury.

It is interesting to compare these figures with losses in previous wars. In the Civil War the battle fatalities on the Union side were approximately 110,000. In the Russo-Japancse War the Japanese losses were 59,000 killed or died of wounds. In the Franco-Prussian War, German battle deaths were 28,600. In the Spanish-American War we lost less than 1,000 men in battle.

Compared with recently reported British battle deaths of 659,000 for the period of the war, our losses were astonishingly light.

While we rejoice that our losses were no heavier, we still bear in mind the thousands of homes throughout the country upon which the heavy burden of the war has fallen. To these homes the Nation owes a debt of fullest gratitude. From them has sprung unbounded courage to face hardship, heroic strength in battle, the Nation's power to right the wrongs of selfish despotism.

GROWTH OF THE ARMY.

DATE.	In United States and Foreign Possessions	In the American Expediti'ry Forces.	Total.	DATE.	In United States and Foreign Possessions	In the American Expediti'ry Forces.	Total.
1917.				1918.			
April 1	190,000	.....	190,000	March 1	1,386,000	253,000	1,639,000
July 1	480,000	20,000	500,000	April 1	1,476,000	320,000	1,796,000
August 1	516,000	35,000	551,000	May 1	1,529,000	424,000	1,953,000
September 1	646,000	45,000	691,000	June 1	1,390,000	722,000	2,112,000
October 1	883,000	65,000	948,000	July 1	1,384,000	996,000	2,380,000
November 1	996,000	104,000	1,100,000	August 1	1,365,000	1,293,000	2,658,000
December 1	1,060,000	129,000	1,189,000	September 1	1,425,000	1,576,000	3,001,000
1918.				October 1	1,599,000	1,834,000	3,433,000
January 1	1,149,000	176,000	1,325,000	November 1	1,672,000	1,993,000	3,665,000
February 1	1,257,000	225,000	1,482,000				

The growth shown by these figures is remarkable, not simply because of the physical and administrative difficulties involved, but especially because the traditions of the country have all been opposed to large armaments. The principle of the draft had for years been opposed by considerable numbers of the population. Yet in a brief nineteen months more than three and a half million men were mobilized, housed, fully equipped with munitions and supplies, and the major part of them given a military training that enabled them to oppose successfully the soldiers of the most warlike of the European nations. This achievement is a tribute to the ability of army leaders, trained in dealing with small forces, to adapt themselves with wonderful effectiveness to the new and tremendous task. It is a tribute to the hearty co-operation of every Government department. It is a tribute, above all else, to the ability and enthusiastic patriotism of the American people.

An interesting comparison may be drawn between the development of the British and the American expeditionary forces. The British forces in France climbed to one million men in the fall of 1915, and to a high figure of slightly more than two million troops in the summer of 1917, three years after England entered the war. In nineteen months after the United States entered the war, we were represented overseas by an army of two million men. The growth of the American force was twice as rapid as that of the British force. It must be borne in mind that the British practically from the beginning used large numbers of men to fill gaps left by casualties, while the American forces could for many months apply practically every man to building up the force.

GROWTH OF SPECIAL SERVICES.

The increase in complexity and variety of services is as striking a feature of the new army as its tremendous growth. The size and relative numerical importance of the branches of the old army are shown in comparison with the new army:

COMPARATIVE STRENGTH OF SERVICE MARCH, 1917, AND NOVEMBER, 1918.

BRANCH.	Old Army, Mar., 1917.	New Army, Nov., 1918.	BRANCH.	Old Army, Mar., 1917.	New Army, Nov., 1918.
Infantry and machine gun	85,000	974,000	Air service	0	202,000
Engineer	3,000	394,000	Motor transport	0	103,000
Fld. Art. and ammunit'n. tr.	9,000	389,000	Militia bureau	0	27,000
Medical	7,000	300,000	Chemical warfare	0	18,000
Quartermaster	8,000	228,000	Tank	0	14,000
Coast artillery	21,000	137,000	In training	.....	549,000
Ordnance	1,000	64,000	All other	31,000	185,000
Signal	3,000	52,000			
Cavalry	22,000	29,000	Total	190,000	3,665,000

INDUCTIONS FROM ALL SOURCES.

The table below shows the number and per cent. of the entire army which was obtained through the draft and through sources other than the draft from each State. Below appear also the number by geographical divisions. In studying these and similar figures it must be borne in mind that draft figures include voluntary enlistments on the part of men who registered under the Selective Service Law.

NUMBER AND PER CENT. OF SOLDIERS COMING FROM EACH STATE AND FROM FOREIGN POSSESSIONS.

STATE.	Number.	% of Total	STATE.	Number.	% of Total	STATE.	Number.	% of Total
New York	328,000	9.5	Tennessee	70,000	2.0	North Dako.	25,000	0.7
Pennsylvania	275,000	8.0	Alabama	67,000	1.9	Maine	22,000	0.6

OFFICERS' TRAINING CAMPS.

One of the most serious problems confronting the War Department in April, 1917, was the procurement of sufficient officers to fill the requirements of the divisions that were to be formed for overseas duty. As a first step toward the solution of this problem it was decided to offer a three months' intensive training to qualified civilians at summer training camps modeled after the Plattsburg idea, for which Major Gen. Leonard Wood was so largely responsible. In August, 1917, a total of 27,341 candidates were graduated from the first series of these officers' training camps, a number sufficient to meet the immediate needs of the Army. A second series was held during September, October, and November, and a third series from January to April, 1918. The first two series were essentially civilian in character, and, because of the need for officers of all grades, commissions were granted up to the grade of Colonel. The third series, however, drew 90 per cent. of its candidates from the enlisted men of the Army, and the other 10 per cent. from civilians of draft age who had received military training at recognized educational institutions. The candidates in the third series were, upon satisfactory completion of the course, listed as eligible for appointment as Second Lieutenants and in a few weeks after graduation were commissioned and assigned to duty.

COMMISSIONS GRANTED.

The commissions received by successful candidates at the three series of camps were distributed among the several grades and arms of the service as shown below:

COMMISSIONS GRANTED THROUGH FIRST THREE SERIES OF OFFICERS' TRAINING CAMPS.

RANK.	Inf.	Cav.	F. A.	C. A. C.	Eng.	Q. M.	Statistics.	Ord.	Sig.	Total.
Colonel	2	.....	.....	.....	.....	.....	.....	.....	.....	2
Lieutenant Colonel	1	.....	.....	.....	.....	.....	.....	.....	.....	1
Major	185	18	37	1	50	.....	.....	2	1	294
Captain	3,379	251	849	329	419	.....	.....	147	55	5,429
First Lieutenant	7,665	258	2,128	575	747	.....	75	407	519	12,374
Second Lieutenant	23,345	1,371	8,540	1,158	750	3,067	77	211	687	39,207
Total	34,578	1,898	11,554	2,063	1,966	3,067	152	767	1,262	57,307

FOURTH SERIES OFFICERS' TRAINING CAMPS.

A fourth series of officers' training schools, with an initial enrolment of 13,114, was established May 15, 1918, in 24 National Army and National Guard divisions in the United States. These schools were an integral part of the divisions to which they were attached and under the original plan the school would accompany the division when it moved. Due to the urgent need of line officers, however, these schools were separated from their divisions, five central officers' training schools were established at permanent replacement camps, and candidates for such divisions as were scheduled for early overseas service were transferred to these central schools. On November 1, 1918, there were about 46,000 candidates in these schools.

HEALTH OF THE ARMY.

For the year ending August 30, 1918, the death rate from disease among troops in the United States was 6.4 per 1,000; in the American Expeditionary Force it was 4.7; for the combined forces it was 5.9. The male civilian death rate for the age groups most nearly corresponding to the Army age is substantially the same as the rate in the American Expeditionary Force. What this low figure means in lives saved is shown by comparing it with the rate of 65 per 1,000 in the Union Army during the Civil War, and the rate of 26 per 1,000 in the American Army during the Spanish War. Pneumonia, either primary or secondary to measles, caused 56 per cent. of all deaths among troops and 63 per cent. of the deaths from disease.

INFLUENZA EPIDEMIC.

About the middle of September the influenza epidemic, which had been prevalent in Europe, gained a foothold in this country. Beginning in the New England States it gradually spread South and West until practically the entire country suffered under its scourge. Naturally the camps and cantonments, with their closer concentration of men, provided especially favorable ground for the spread of the epidemic. In the eight weeks from September 14 to November 8 there were reported among all troops in the United States over 316,000 cases of influenza and over 53,000 cases of pneumonia. Of the 20,500 deaths during this period, probably 19,800 were the result of the epidemic. During eight weeks the epidemic caused more than twice as many deaths among troops in the United States as occurred during the entire year preceding the epidemic, and almost as many as the battle fatalities during the eighteen months of the war up to October, 1918. By the middle of November it was apparent that the epidemic had spent its force.

HOSPITALS IN THE UNITED STATES.

On November 11, 1918, the Army had 80 fully equipped hospitals in this country with a capacity of 120,000 patients:

HOSPITALS.	Standard Capacity.	Emergency Capacity.	HOSPITALS.	Standard Capacity.	Emergency Capacity.
Camp hospitals	51,665	74,632	Other hospitals	29,761	32,974
Embarkation hospitals	10,717	13,210			
			Total	92,143	120,816

HOSPITALS OVERSEAS.

There are 104 base hospitals and 31 evacuation hospitals in the American Expeditionary Force and one evacuation hospital in Siberia. In addition, a special hospital for head surgery, an optical unit, and eight auxiliary units are operating abroad. The capacity of the hospitals attached to the Expeditionary Force is shown below:

HOSPITALS.	Standard Capacity.	Emergency Capacity.	HOSPITALS.	Standard Capacity.	Emergency Capacity.
Base hospitals	121,261	195,324	Camp hospitals	22,159	24,880
			Total	143,420	220,204

SICK AND INJURED CARED FOR DURING THE WAR.

Army hospitals in the United States cared for 1,407,191 patients during the war; those with the American Expeditionary Force cared for 755,354, a total of 2,162,545.

ASSISTANCE FURNISHED TO ENGLAND AND ITALY.

In addition to furnishing its medical personnel for the operation of the above units, the War Department, through the Chief Surgeon, has detailed 931 American officers to serve with the British forces, and a further 169 for service in base hospitals that we have turned over to the British. Furthermore, several ambulance sections have been operating with the Italian Army.

EMBARKATION SERVICE.

In the nineteen months elapsing from the declaration of war to the signing of the armistice the Army created an embarkation service which succeeded in shipping overseas 2,075,834 men and 5,153,000 tons of cargo. Even these figures do not adequately express the extraordinary nature of the achievement. As time was required for the drafting and training of men and for organizing the production of supplies, most of the stupendous movement occurred in the last half of our active participation in the war. In the last ten months, that is, from January 1, 1918, to the signing of the armistice, the Army embarked 1,880,339 men and shipped 4,660,000 tons of cargo. Nothing to compare with the movement of this tremendous number of men and tons of supplies across the Atlantic Ocean is known in the military history of the world.

CARGO MOVEMENT.

The first shipment of cargo to support the forces abroad was made in June, 1917, and amounted to 16,000 tons. In July the total was 12,000 tons and in August 19,000 tons. By the fall of 1918 this movement had grown so that 750,000 tons were shipped in October.

Altogether, from our entrance into the war until the signing of the armistice, the Army shipped from this side of the Atlantic 5,153,000 tons of cargo. Unlike the case with regard to the troop movement, this cargo was carried almost entirely in American bottoms, and less than 5 per cent. was lifted by allied ships. Of all the cargo shipped, only 79,000 tons were lost at sea.

Included in the cargo shipment were 1,145 consolidation locomotives of the 100-ton type. Of these 350 were shipped set up on their own wheels so that they could be unloaded onto the tracks in France and run off in a few hours under their own steam. Shipment of set-up locomotives of this size had never been made before. Special ships with large hatches were withdrawn from the Cuban ore trade for the purpose, and the hatches of other ships were specially lengthened, so that when the armistice was signed the Army was prepared to ship these set-up locomotives at the rate of 200 a month.

The Army also shipped 17,000 standard-gauge freight cars, and at the termination of hostilities was preparing to ship flat cars set up and ready to run. Motor trucks to the number of 34,433 went forward, and when fighting ceased were being shipped at the rate of 10,000 a month. Rails and fittings for the reinforcing of French railways and for the construction of our own lines of communication aggregated 423,000 tons. In addition to the tons of cargo mentioned above the Army shipped 54,000 horses and mules, and at the cessation of hostilities was shipping them at the rate of 20,000 a month. The increase in the shipment of cargo from the United States was consistently maintained from the start of the war, and at its cessation was undergoing marked acceleration.

Aside from the cargo shipped across the Atlantic, Gen. Pershing imported large amounts from European sources, the chief item being coal from England. In October he brought into France by means of his cross-channel fleet a total of 275,000 tons of coal and other commodities.

GROWTH OF THE TRANSPORT FLEET.

The task laid upon the Army of creating a great transport fleet at a time when the world was experiencing its most acute tonnage shortage was a heavy one. At the outbreak of war a start was made at once by chartering a few of the American merchant steamers immediately at hand, and at the end of June there were in service seven troop ships with deadweight of 46,000 tons and six cargo ships with a deadweight of 48,000 tons. From these small beginnings there was developed a great transatlantic fleet which on November 1, 1918, included 39 troop ships of 309,198 tons, 38 animal transports of 372,011 tons, 18 refrigerator ships of 92,542 tons, 4 tankers of 31,271 tons, and 228 cargo ships of 1,807,336 tons. In addition Gen. Pershing had gathered a cross-channel fleet which numbered 104 vessels and aggregated 311,087 tons. Accordingly the Army had in service on November 1, 1918, a fleet of its own amounting to 431 ships and totaling 3,004,445 deadweight tons. At this time it also had definitely assigned to it 16 allied troop ships approximating 150,000 deadweight tons and 160,000 tons of loaned British cargo ships. On November 13, two days after the signing of the armistice the Army had American shipping either in operation or under definite allocation totalling 3,800,000 deadweight tons, a fleet over twice as large as the entire American merchant marine engaged in foreign trade at the start of the war.

In building up this fleet the first great increment, especially in the matter of troop transports, was the seized German vessels. These ships came into service during the fall of 1917 and accounted for approximately 460,000 tons. In the spring of 1918 the taking over of the Dutch steamers gave the Army the use of another 300,000 tons. The chartering of Scandinavian and Japanese tonnage during 1918, which relieved the whole tonnage position of our country, also was reflected in the growth of the Army fleet. The most ample credit must, however, be given the War Trade Board, which by drastic restriction of non-essential imports made possible the release of large amounts of shipping from the import trades. Accessions of tonnage from this last source were especially heavy during the fall of 1918, at which time the import trades were being stripped bare of suitable vessels by the Shipping Control Committee and the Army was receiving additional shipping at the rate of a half million tons a month.

The procurement, arming, repairing, loading, and convoying of this enormous fleet taxed the resources of the Embarkation Service, the Navy, and the Shipping Control Committee to the uttermost; but at all times these services proved equal to the burdens laid on them.

During the whole period of active hostilities the Army lost at sea only 200,000 deadweight tons of transports. Of this total 142,000 tons were sunk by torpedoes. No American troop transport was lost on its eastward voyage. For this splendid record the Navy, which arranged the convoy system, deserves the highest commendation.

RIFLES.

At the beginning of the war the standard Army rifle was the Springfield rifle, known as the Model 1903. Of these there were nearly 600,000 on hand and in arsenals, in the hands of the Navy and Marine Corps, Regular Army, National Guard, and schools and colleges. There were also several hundred thousand of Krag-Jorgensen rifles (Model 1898) stored for an emergency. The Springfield and Rock Island Arsenals had a productive capacity of 700 a day, on a single eight-hour shift. Manufacturing difficulties made it impossible to extend Model 1903 production sufficiently. Fortunately, there were available several plants which had just completed large orders for the Enfield rifle for the British Government. A new rifle, the Model 1917, was accordingly designed. This rifle resembled the British Enfield sufficiently so that the plants equipped for Enfield production could be rapidly converted and utilized, but the rifle was constructed to use the same ammunition as is used in the Model 1903 and in machine guns and machine rifles of American manufacture. Production of the Model 1917 was pushed and completed rifles were secured before September 1, two months before the date specified in the contract.

Up to November 1, 1918, about 2,137,025 rifles had been made and accepted. Of heavy Browning machine guns, 39,546, and of light Brownings, 47,019 had been made and accepted; also a total of 63,884,000 machined shells.

U. S. MILITARY OPERATIONS IN EUROPE—*Continued.*

PRODUCTION OF TRAINING PLANES AND ENGINES.

When war was declared the United States possessed less than 300 training planes, all of inferior types. Deliveries of imported models were begun as early as June, 1917. Up to November 11, 1918, over 5,300 had been produced, including 1,600 of a type which was temporarily abandoned on account of unsatisfactory engines.

Planes for advanced training purposes were produced in quantity early in 1918; up to the signing of the armistice about 2,500 were delivered. Approximately the same number was purchased overseas for training the units with the Expeditionary Force.

Several new models, to be used for training pursuit pilots, are under development.

Within three months after the declaration of war extensive orders were placed for two types of elementary training engines. Quantity production was reached within a short time. In all about 10,500 have been delivered, sufficient to constitute a satisfactory reserve for some time to come.

Of the advanced training engines, the three important models were of foreign design, and the success achieved in securing quantity production is a gratifying commentary on the manufacturing ability of this country. The total production up to November 11 was approximately 5,200.

PRODUCTION OF SERVICE PLANES.

The experience acquired during the operations on the Mexican border demonstrated the unsuitability of the planes then used by the American Army. Shortly after the declaration of war, a commission was sent abroad to select types of foreign service planes to be put into production in this country. We were confronted with the necessity of redesigning these models to take the Liberty motor, as foreign engine production was insufficient to meet the great demands of the Allies. The first successful type of plane to come into quantity production was a modification of the British De Havilaud 4—an observation and day bombing plane. The first deliveries were made in February, 1918. In May production began to increase rapidly, and by October a monthly output of 1,200 had been reached. Approximately 1,900 were shipped to the Expeditionary Force prior to the termination of hostilities. The number of Liberty motors produced was 13,396.

AIR FORCES AT THE FRONT.

Early in 1918 the first squadrons composed of American personnel, provided with French planes, appeared at the front. The number was increased as rapidly as equipment could be obtained. On September 30, the date of the latest available information, there were 32 squadrons at the front; of these 15 were pursuit, 13 observation, and 4 bombing. The first squadron equipped with American planes reached the front in the latter part of July.

LOSSES IN BATTLE AND IN TRAINING.

Though the casualties in the air force were small as compared with the total strength, the casualty rate of the flying personnel at the front was somewhat above the Artillery and Infantry rates. The reported battle fatalities up to October 24 were 128 and accident fatalities overseas 244. The results of Allied and American experience at the front indicate that two aviators lose their lives in accidents for each aviator killed in battle. The fatalities at training fields in the United States to October 24 were 262.

OVERSEAS SHIPMENT, CLOTHING AND EQUIPAGE, MARCH 31, 1918, TO OCTOBER 31, 1918.

Prunes	13,709,341	1,218,760	Motor gasoline	30,589,000	7,268,000

The total production of gas masks in the United States was 5,276,515.

The organization formed to build cantonments proved the best instrument for the erection of storage depots, port terminals, and hospitals. By November 1, 1918, the original 32 projects had grown to 448, including only major undertakings. The number of commissioned officers had grown to 1,329, and civilian employés to 2,351. In addition, as many as 130,000 people were employed on construction projects under the direction of the division. Allotments of funds to October 31 for the original 32 cantonments and camps, including extensions authorized in addition to the original plans, have totalled about $277,000,000. Allotments for all projects undertaken by the Construction Division amount to approximately $756,000,000.

FUNDS ALLOTTED FOR CONSTRUCTION—National Army cantonments, $208,000,000; National Guard camps, $69,000,000; other camps and cantonments, $117,000,000; Regular Army posts, $15,000,000; Coast Artillery posts, $12,000,000; hospitals, $20,000,000; Quartermaster Corps projects, $141,000,000; Ordnance Department projects, $148,000,000; Signal Corps projects, $2,000,000; Air Service projects, $4,000,000; other construction, $20,000,000; total, $756,000,000.

KNIGHTS TEMPLAR.

OFFICERS OF THE GRAND ENCAMPMENT OF THE UNITED STATES OF AMERICA.

Grand Master—Lee Stewart Smith, Pittsburgh, Pa. *Grand Treasurer*—H. Wales Lines, Meriden, Ct. *Grand Recorder*—Frank H. Johnson, Louisville, Ky.

The number of Grand Commanderies in the United States and Territories, each representing individual States or Territories (except that Massachusetts and Rhode Island are combined), is 47. Commanderies subordinate to Grand Commanderies, 1,445, with a membership of 251,167. Commanderies subordinate to Grand Encampments, 7; membership, 1,399; total number of commanderies, 1,452; total membership, 262,858. The orders conferred in a Commandery of Knights Templar are Red Cross, Knight Templar, and Knight of Malta. A Mason, to obtain these orders, must be a Master Mason and Royal Arch Mason.

GENERAL OFFICERS OF THE UNITED STATES ARMY.

(No., Name, Rank, and Date of Commission.)

GENERALS.

1. Peyton C. March (Chief of Staff) ..... May 20, 1918
2. John J. Pershing ..... Oct. 6, 1917

LIEUTENANT GENERALS.

1. Hunter Liggett ..... Oct. 16, 1918
2. Robert L. Bullard ..... Oct. 16, 1918

MAJOR GENERALS.

1. Leonard Wood ..... Aug. 8, 1903
2. J. Franklin Bell ..... Jan. 3, 1907
3. Thomas H. Barry ..... April 20, 1908
4. John F. Morrison ..... May 15, 1917
5. Charles G. Morton ..... May 15, 1917
6. William L. Sibert ..... May 15, 1917
7. Edwin F. Glenn ..... Aug. 5, 1917
8. Charles J. Bailey ..... Aug. 5, 1917
9. George Bell jr ..... Aug. 5, 1917
10. Frederick S. Strong ..... Aug. 5, 1917
11. Harry F. Hodges ..... Aug. 5, 1917
12. Clarence P. Townsley ..... Aug. 5, 1917
13. Francis J. Kernan ..... Aug. 5, 1917
14. John Biddle ..... Aug. 5, 1917
15. Henry C. Hodges jr ..... Aug. 5, 1917
16. Joseph T. Dickman ..... Aug. 5, 1917
17. Adelbert Cronkhite ..... Aug. 5, 1917
18. Henry T. Allen ..... Aug. 5, 1917
19. Clarence R. Edwards ..... Aug. 5, 1917
20. Chase W. Kennedy ..... Aug. 5, 1917
21. Omar Bundy ..... Aug. 5, 1917
22. Harry C. Hale ..... Aug. 5, 1917
23. Samuel D. Sturgis ..... Aug. 5, 1917
24. David C. Shanks ..... Aug. 5, 1917
25. William M. Wright ..... Aug. 5, 1917

48. Peter E. Traub ..... June 26, 1918
49. Edward M. Lewis ..... June 26, 1918
50. William S. Graves ..... June 26, 1918
51. William J. Snow ..... June 26, 1918
52. James G. Harbord ..... June 26, 1918
53. William B. Smith ..... June 26, 1918
54. Charles P. Summerall ..... June 26, 1918
55. William Crozier ..... July 12, 1918
56. Henry G. Sharpe ..... July 12, 1918
57. Jesse McI. Carter ..... Aug. 8, 1918
58. William H. Johnston ..... Aug. 8, 1918
59. Grote Hutcheson ..... Aug. 8, 1918
60. Beaumont B. Buck ..... Aug. 8, 1918
61. Walter H. Gordon ..... Aug. 8, 1918
62. William Weigel ..... Aug. 8, 1918
63. Eli A. Helmick ..... Aug. 8, 1918
64. Robert L. Howze ..... Aug. 8, 1918
65. William Lassiter ..... Aug. 8, 1918
66. Robert Alexander ..... Aug. 8, 1918
67. William S. McNair ..... Aug. 8, 1918
68. John L. Hines ..... Aug. 8, 1918
69. Henry P. McCain ..... Aug. 27, 1918
70. Guy Carleton ..... Oct. 1, 1918
71. De Rosey C. Cabell ..... Oct. 1, 1918
72. William H. Hay ..... Oct. 1, 1918
73. Frank L. Winn ..... Oct. 1, 1918
74. Edmund Wittenmyer ..... Oct. 1, 1918
75. Mark L. Hersey ..... Oct. 1, 1918
76. Henry Jervey ..... Oct. 1, 1918
77. Clement A. F. Flagler ..... Oct. 1, 1918
78. Charles D. Rhodes ..... Oct. 1, 1918
79. Joseph D. Leitch ..... Oct. 1, 1918
80. Hanson E. Ely ..... Oct. 1, 1918
81. John F. O'Ryan ..... Aug. 5, 1917

BRIGADIER GENERALS.

1. Henry A. Greene ..... Nov. 19, 1914
2. Edward H. Plummer ..... July 1, 1916
3. John W. Ruckman ..... July 20, 1916
4. Francis H. French ..... Sept. 30, 1916
5. Charles G. Treat ..... Oct. 18, 1916
6. Augustus P. Blocksom ..... May 15, 1917
7. William H. Sage ..... May 15, 1917
8. Richard M. Blatchford ..... May 15, 1917
9. William J. Nicholson ..... Aug. 5, 1917
10. Wilber E. Wildel ..... Aug. 5, 1917
11. William D. Beach ..... Aug. 5, 1917
12. Lloyd M. Brett ..... Aug. 5, 1917
13. James B. Erwin ..... Aug. 5, 1917
14. Joseph A. Gaston ..... Aug. 5, 1917
15. Charles H. Barth ..... Aug. 5, 1917
16. Edward Burr ..... Aug. 5, 1917
17. George W. McIver ..... Aug. 5, 1917
18. Thomas B. Dugan ..... Aug. 5, 1917
19. Ira A. Haynes ..... Aug. 5, 1917

TEXT OF KAISER'S ABDICATION.

THE former German Emperor's act of renunciation was issued November 30, 1918, by the new German Government "in order to reply to certain misunderstandings which have arisen with regard to the abdication." It reads as follows:

"By the present document I renounce forever my rights to the crown of Prussia and the rights to the German imperial crown. I release at the same time all the officials of the German Empire and Prussia and also all officers, non-commissioned officers and soldiers of the Prussian Navy and Army and of contingents from confederated States from the oath of fidelity they have taken to me, as their Emperor, King, and supreme chief.

"I expect from them until a new organization of the German Empire exists that they will aid those who effectively hold the power in Germany to protect the German people against the menacing dangers of anarchy, famine, and foreign domination.

"Made and executed and signed by our own hand with the imperial seal at Amerongen, November 28. WILLIAM."

PERMANENT COURT OF ARBITRATION OF THE HAGUE.

ESTABLISHED BY INTERNATIONAL CONVENTION, SIGNED JULY 29, 1899.

THE Administrative Council consists of the Netherlands Minister of Foreign Affairs and the diplomatic representatives there of the ratifying Powers. The United States delegation to the court is as follows: Mr. George Gray, formerly United States Senator; Mr. Oscar Straus, formerly Secretary of Commerce and Labor, Ambassador Extraordinary and Plenipotentiary at Constantinople; Mr. Elihu Root, formerly Secretary of State, Secretary of War, and United States Senator; Mr. John Bassett Moore, Professor of International Law at Columbia University, formerly Counsellor of the Department of State.

DECISIONS RENDERED BY THE COURT.

October 14, 1902, in the matter of the case of the Pious Fund of the Californias between the United States and Mexico; February 22, 1904, respecting the preferential claims of the creditor nations of Venezuela under the protocols of May 7, 1903; May 22, 1905, in the difference between France, Germany and Great Britain on the one hand, and Japan on the other, respecting leases held in perpetuity; August 8, 1905, in the matter of the dispute between Great Britain and France, respecting the right of certain Muscat dhows to fly the French flag; May 22, 1909, in the matter of the Casablanca dispute between France and Germany; October 23, 1909, respecting the maritime boundary between Norway and Sweden; September 7, 1910, in the North Atlantic Fisheries case between the United States and Great Britain; October 25, 1910, in the Orinoco steamship case between the United States and Venezuela; February 24, 1911, in the "Savarkar" case between Great Britain and France; November 11, 1912, in the "Interest" case between Russia and Turkey; May 3, 1912, in the "Canevaro" case between Italy and Peru; May 3, 1913, in the case of the vessels "Tavignano," "Kamouna" and "Galois" between France and Italy, the Governments reached an agreement and withdrew the cases from the court; May 6, 1913, in the "Carthage" case between France and Italy; May 6, 1913, in the "Manouba" case between France and Italy; June 25, 1914, in the Island of Timor case between France and Italy.

Cases pending—(1), July 31, 1913, compromise signed by Spain, France, Great Britain and Portugal submitting the case of the property of religious associations in Portugal to the court; (2), February 2, 1914, compromise signed by France and Peru submitting the claims between the two countries to the court. *President of the Administrative Council*—J. Louden, Netherlands Foreign Minister. *Secretary of the Administrative Council and Secretary General of the Permanent Court of Arbitration*—Michiels van Verduynen.

DECLARATIONS OF WAR—1914-1917.

Austria against Belgium, August 28, 1914.
Austria against Japan, August 27, 1914.
Austria against Montenegro, August 9, 1914.
Austria against Russia, August 6, 1914.
Austria against Serbia, July 28, 1914.
Brazil against Germany, October 26, 1917.
Bulgaria against Roumania, September 1, 1916.
Bulgaria against Serbia, October 14, 1915.
China against Austria, August 14, 1917.
China against Germany, August 14, 1917.
Cuba against Germany, April 7, 1917.
France against Austria, August 12, 1914.
France against Bulgaria, October 16, 1915.
France against Germany, August 3, 1914.
Germany against Belgium, August 4, 1914.
Germany against France, August 3, 1914.
Germany against Portugal, March 9, 1915.
Germany against Roumania, August 28, 1916.
Germany against Russia, August 1, 1914.
Great Britain against Austria, August 13, 1914.
Great Britain against Bulgaria, October 15, 1915.
Great Britain against Germany, August 4, 1914.
Great Britain against Turkey, November 5, 1914.
Greece against Bulgaria, November 23, 1916 (Provisional Government).
Greece against Germany, November 23, 1916 (Provisional Government).
Greece against Bulgaria, July 2, 1917 (Government of Alexander).
Greece against Germany, July 2, 1917. (Government of Alexander.)
Guatemala against Germany, April 21, 1918.
Hayti against Germany, July 12, 1918.
Honduras against Germany, July 19, 1918.
Italy against Austria, May 24, 1915.
Italy against Bulgaria, October 19, 1915.
Italy against Germany, August 28, 1916.
Italy against Turkey, August 21, 1915.
Japan against Germany, August 23, 1914.
Liberia against Germany, August 4, 1917.
Panama against Austria, December 10, 1917.
Panama against Germany, April 7, 1917.
Portugal against Germany, November 23, 1914 (resolution passed authorizing military intervention as ally of England).
Portugal against Germany, May 19, 1915 (military aid granted).
Roumania against Austria, August 27, 1916 (allies of Austria also consider it a declaration).
Russia against Bulgaria, October 19, 1915.
Serbia against Germany, August 9, 1914.
Siam against Austria, July 22, 1917.
Siam against Germany, July 22, 1917.
Turkey against Allies, November 23, 1914.
Turkey against Roumania, August 29, 1916.
United States against Germany, April 6, 1917.
United States against Austria, December 7, 1917.

SEVERANCE OF DIPLOMATIC RELATIONS.

Austria against Portugal, March 15, 1916.
Austria against Serbia, July 26, 1914.
Austria against United States, April 8, 1917.
Belgium against Turkey, October 30, 1914.
Bolivia against Germany, April 14, 1917.
Brazil against Germany, April 11, 1917.
China against Germany, March 14, 1917.
Ecuador against Germany, December 7, 1917.
France against Austria, August 11, 1914.
France against Turkey, October 30, 1914.
Germany against Italy, May 23, 1915.
Great Britain against Turkey, October 30, 1914.
Greece against Turkey, July 2, 1917 (Government of Alexander).
Greece against Austria, July 2, 1917 (Government of Alexander).
Guatemala against Germany, April 27, 1917.
Hayti against Germany, June 16, 1917.
Honduras against Germany, May 17, 1917.
Japan against Austria, August 25, 1914.
Liberia against Germany, May 8, 1918.
Nicaragua against Germany, May 19, 1917.
Peru against Germany, October 5, 1917.
Roumania against Bulgaria, August 30, 1916.
Russia against Bulgaria, October 5, 1918.
Russia against Roumania, January 28, 1918.
Russia against Turkey, October 30, 1914.
Turkey against United States, April 20, 1917.
United States against Germany, February 3, 1917.
Uruguay against Germany, October 7, 1917.

WAR RISK INSURANCE.

Up to October 31, 1918, that is, in the first year of its existence, the Division of Military and Naval Insurance has issued over seven and a half million checks. About a million checks are now mailed each month, the sums paid out in these checks amounting now to over a million dollars a day. Checks have gone each month to every city and hamlet of the United States. Many, indeed, have gone to foreign countries. In June, 20,000 checks were sent to Italy; 5,000 to the British Isles; 2,000 to France; 550 to China; 500 to Sweden, and 300 to Switzerland. The total payments on allotments and allowances made during the past year have amounted to over $225,000,000.

UNITED STATES WARS AND CASUALTIES, 1775-1918.

(Data taken from the Historical Register of the Armies of the United States.)

THE total, 1775-1918, of dead, wounded and other casualties, is estimated at approximately 1,500,000, of which number the dead comprise over 725,000. For other facts on wars and battle losses, see elsewhere, "Wars of the United States."

Here is a list to date of the wars in which the United States has been engaged:

1775-1783—War of the Revolution.
1782-1787—Wyoming Valley, Pa., Insurrection.
1786-1787—Shays's Rebellion, Massachusetts.
1790-1795—War with the Northwest Indians (Miamis, Wyandottes, Delawares, Pottawatomies, Shawnees, Chippewas, and Ottawas).
1791-1794—Whiskey Insurrection in Pennsylvania.
1798-1800—War with France.
1799—Fries Rebellion, Pennsylvania.
1801-1805—Tripolitan War.
1806—Burr Conspiracy.
1806—Sabine Expedition, Louisiana.
1807—Chesapeake Bay Naval Affair.
1808—Lake Champlain Embargo Troubles.
1811-1813—Second War with the Northwest Indians.
1812-1815—War with Great Britain.
1812—Seminole War, Florida.
1813—Peoria Indian War, Illinois.
1813-1814—Creek Indian War, Alabama.
1817-1818—Second Seminole War.
1819—Yellowstone Expedition.
1823—Campaign against Blackfeet and Arickaree Indians.
1827—La Fevre Indian War.
1831—Sac and Fox Indian War.
1832—Black Hawk War.
1832-1833—Nullification, South Carolina.
1833-1839—Cherokee Indian War.
1834—Pawnee Expedition.
1835-1836—Third Seminole War.
1836-1837—Second Creek Indian War.
1837—Osage Indian Troubles.
1838—Heatherly Indian War.
1838—Mormon Disturbances.
1838-1839—New York-Canadian Frontier Disturbances.
1846-1847—Doniphan's Expedition into Mexico.
1846-1848—War with Mexico.
1846-1848—New Mexican Expedition.
1848—Cayuse War, Oregon.
1849-1861—Navajo Wars.
1849-1861—Comanche, Cheyenne, and Kickapoo Indian Troubles.
1850—Pitt River (Cal.) Expedition.
1851-1852—Yuma (Cal.) Expedition.
1851-1853—Utah Indian War.
1851-1856—Indian Wars, Oregon and Washington.
1855—Snake Indians Expedition.
1855-1856—Sioux Expedition, Nebraska Territory.
1855—Yakima Expedition, Washington Territory.
1855-1856—Cheyenne and Arapahoe Troubles.
1855-1858—Seminole or Florida War.
1856-1858—Kansas Border Troubles.
1857—Gila Expedition, New Mexico.
1857—Sioux Indian Troubles in Minnesota and Iowa.
1857—Mountain Meadow Massacre, Utah.
1857-1858—Utah Expedition.
1858—Expedition against Northern Indians.
1858—Puget Sound Expedition.
1858—Spokane, Coeur d'Alene and Paloos Indian Troubles.
1858—Navajo Expedition, New Mexico.
1858-1859—Wichita Expedition, Indian Territory.
1859—Colorado River Expedition.
1859—Pecos Expedition, Texas.
1859—Antelope Hills Expedition, Texas.
1859—Bear River Expedition, Utah.
1859—San Juan Imbroglio, Washington Territory.
1859—John Brown Raid, Virginia.
1859-1860—Cortina Troubles on Texas and Mexican Border.
1860—Pah-Ute Expedition, California.
1860—Kiowa and Comanche Expedition, Indian Territory.
1860—Carson Valley Expedition, Utah.
1860-1861—Navajo Expedition, New Mexico.
1861-1890—Apache Indian War in Arizona and New Mexico.
1861-1865—Civil War.
1862—Indian Massacres at New Ulm, Minn.
1862-1867—Sioux Indian War in Minnesota and Dakota.
1863-1869—War against the Cheyenne, Arapahoe, Kiowa, and Comanche Indians in Kansas, Nebraska, Colorado, and Indian Territory.
1865-1868—Indian War in Oregon, Idaho, and California.
1865-1866—Fenian Raid, New York and Canada Border.
1867-1881—Campaign against Lipan, Kiowa, Kickapoo, and Comanche Indians, Mexican Border Disturbances.
1868-1869—Canadian River Expedition, New Mexico.
1871—Yellowstone Expedition.
1871—Fenian Troubles, Dakota and Manitoba Frontier.
1872—Yellowstone Expedition, Dakota.
1872-1873—Modoc Campaign.
1873—Yellowstone Expedition, Dakota.
1874-1875—Campaign against Kiowa, Cheyenne, and Comanche Indians in Indian Territory.
1874—Sioux Expedition, Wyoming and Nebraska.
1874—Black Hills Expedition, the Dakotas.
1875—Expedition against Nevada Indians.
1876—Sioux Indian War.
1876—Powder River, Wyo., Expedition.
1876-1877—Big Horn and Yellowstone Expeditions.
1876-1879—Sioux and Cheyenne War.
1877—Nez Perces Campaign.
1878—Ute Expedition.
1879—Snake Indian Trouble, Idaho.
1890-1891—Sioux Indian War.
1891-1893—Mexican Border or "Tin Horn" War.
1895—Bannock Indian Disturbances.
1898-1899—Spanish-American War.
1898—Chippewa Indian Disturbances.
1899-1902—Philippine Insurrection.
1900-1901—Boxer Insurrection, China.
1912-1913—Nicaraguan Expedition.
1913-1914—Haitian and Santo Domingan Expeditions.
1914—Vera Cruz Expedition.
1916—Punitive Expedition into Mexico.
1917-1918—European War.

CERMAN ESTIMATE OF THE COST OF THE WAR.

On the assumption that the war would terminate by the end of 1918 a German financial authority (Georg Bernhard), quoted by the London Economist, July 27, 1918, gave the following estimates of the direct financial burden of the war to Germany:

Cost of mobilizatioo	$250,000,000	Pensions to invalided soldiers and the families of killed soldiers	$7,250,000,000
Military expenses, proper	29,000,000,000		
Feeding the nation, etc	2,500,000,000		
Aid to invaded districts	1,250,000,000		
Reconstruction of army and fleet	1,500,000,000	Total	$40,750,000,000

FEDERAL RESERVE BOARD'S ESTIMATE OF COST OF WAR.

(From the Board's November, 1918, bulletin.)

"ACCORDING to our calculations, the direct cost of the war, since the outset, can be estimated at an amount somewhere between eight hundred and fifty and nine hundred billion francs—not taking into account the amortization of the debt or the total of indemnities."

Up to July, 1918, Britain had loaned over $8,000,000,000, of which $6,300,000,000 was to her Continental allies. Nearly $3,000,000,000 had been advanced to Russia, and $2,000,000,000 to France.

TROOPS ENGAGED IN AMERICAN WARS.

WARS.	From—	To—	Regulars.	Militia and Volunteers.	Total.
War of the Revolution	April 19, 1775	April 11, 1783	130,711	164,080	309,781
Northwestern Indian Wars	Sept. 19, 1790	Aug. 3, 1795	.....	.....	8,983
War with France	July 9, 1798	Sept. 30, 1800	.....	.....	4,593

Spanish-American War	April 21, 1898	Dec 10, 1898	.....	.....	60,000
Philippine Insurrection	1899	1900	.....	.....	60,000

Figures for the French and Tripoli Wars of 1798 and 1801 show only the naval forces. In the Civil War the Confederates had over 750,000 troops actually engaged.

THE GREAT BATTLES OF THE CIVIL WAR.

(From "Regimental Losses in the American Civil War," by William F. Fox, Lieutenant-Colonel, U. S. V.)

As to the loss in the Union armies, the greatest battles in the war were:

DATE.	Battle.	Killed.	Wounded.	Missing.	Aggregate.
July 1-3, 1863	Gettysburg	3,070	14,497	5,434	23,001
May 8-18, 1864	Spottsylvania	2,725	13,413	2,258	18,396
May 5-7, 1864	Wilderness	2,246	12,037	3,383	17,666
September 17, 1862	Antietam	2,108	9,549	753	12,410
May 1-3, 1863	Chancellorsville	1,606	9,762	5,919	17,287
September 19-20, 1863	Chickamauga	1,656	9,749	4,774	16,179
June 1-4, 1864	Cold Harbor	1,844	9,077	1,816	12,737
December 11-14, 1862	Fredericksburg	1,284	9,600	1,769	12,653
August 28-30, 1862	Manassas	1,747	8,452	4,263	14,462
April 6-7, 1862	Shiloh	1,754	8,408	2,855	13,047
December 31, 1862	Stone River	1,730	7,802	3,717	13,249
June 15-19, 1864	Petersburg (assault)	1,688	8,513	1,185	11,386

The Union losses at Bull Run (first Manassas), July 21, 1861, were: Killed, 470; wounded, 1,071; captured and missing, 1,793; aggregate, 3,334.

The Confederate losses in particular engagements were as follows: Bull Run (first Manassas), July 21, 1861, killed, 387; wounded, 1,582; captured and missing, 13; aggregate, 1,982. Fort Donelson, Tenn., February 14-16, 1862, killed, 466; wounded, 1,534; captured and missing, 13,329; aggregate, 15,329. Shiloh, Tenn., April 6-7, 1862, killed, 1,723; wounded, 8,012; captured and missing, 959; aggregate, 10,694. Seven Days' Battle, Virginia, June 25-July 1, 1862, killed, 3,478; wounded, 16,261; captured and missing, 875; aggregate, 20,614. Second Manassas, August 21-September 2, 1862, killed, 1,481; wounded and missing, 7,627; captured and missing, 89; aggregate, 9,197. Antietam campaign, September 12-20, 1862, killed, 1,886; wounded, 9,348; captured and missing, 1,367; aggregate, 12,601. Fredericksburg, December 13, 1862, killed, 596; wounded, 4,068; captured and missing, 651; aggregate, 5,315. Stone River, Tenn., December 31, 1862, killed, 1,294; wounded, 7,945; captured and missing, 1,027; aggregate, 10,266. Chancellorsville, May 1-4, 1863, killed, 1,665; wounded, 9,081; captured and missing, 2,018; aggregate, 12,764. Gettysburg, July 1-3, 1863, killed, 2,592; wounded, 12,706; captured and missing, 5,150; aggregate, 20,448. Chickamauga, September 19-20, 1863, killed, 2,268; wounded, 13,613; captured and missing, 1,090; aggregate, 16,971.

Gettysburg was the greatest battle of the war; Antietam the bloodiest. The largest army was assembled by the Confederates at the seven days' fight; by the Unionists at the Wilderness.

The number of casualties in the volunteer and regular armies of the United States during the war of 1861-65, according to a statement prepared by the Adjutant-General's office, was as follows: Killed in battle, 67,058; died of wounds, 43,012; died of disease, 199,720; other causes, such as accidents, murder, Confederate prisons, etc., 40,154; total died, 349,944; total deserted, 199,105. Number of soldiers in the Confederate service who died of wounds or disease (partial statement), 133,821; deserted (partial statement), 104,428. Number of United States troops captured during the war, 212,608; Confederate troops captured, 476,169. Number of United States troops paroled on the field, 16,431; Confederate troops paroled on the field, 248,599. Number of United States troops who died while prisoners, 30,156; Confederate troops who died while prisoners, 30,152.

STATISTICS OF BRITISH PENSIONERS.

Up to August 31, 1918, from the beginning of the war, 421,877 wounded soldiers had been reported to the British Ministry of Pensions. Of this total, 42 per cent. had been discharged from service for wounds and injuries, and 58 per cent. for disease and illness. The injuries and ailments, by classes, were as follows:

Eyesight cases, 11,347; wounds and injuries to leg (necessitating amputation), 11,536; wounds and injuries to arms (necessitating amputation), 5,910; wounds and injuries to leg (not necessitating amputation), 50,590; wounds and injuries to arms (not necessitating amputation), 37,074; wounds and injuries to hands (not necessitating amputation), 17,987; wounds and injuries to head, 16,270; hernia, 3,391; miscellaneous wounds and injuries, 25,049; chest complaints and tuberculosis, 47,078; rheumatism, 27,424; heart disease, 41,699; epilepsy, 4,257; nervous diseases—Shell shock, neurasthenia, miscellaneous, 25,165; insanity, 3,888; deafness, 7,731; frost bite (including cases of amputation of feet or legs), 3,392; miscellaneous disabilities—Bright's disease, debility, ulcer of stomach, varicocele, enteric and malaria, spinal, appendicitis, and other disabilities, 81,381; not classified (awards made by War Office and Admiralty which have lapsed or not come up for renewal of Ministry of Pensions), 708; total, 421,877.

Of the pensioners, 7,193 were officers in the army, 815 were naval officers, 397,760 were warrant officers, petty officers, non-commissioned officers, and men in the army, and 16,109 were navy rank and file.

UNITED STATES LOANS TO FOREIGN GOVERNMENTS.

(By the Secretary of the Treasury.)

By the acts of Congress of April 24, 1917, September 24, 1917, April 4, 1918, and July 9, 1918, authority was vested in the Secretary of the Treasury on behalf of the United States, with the approval of the President, to establish credits in favor of foreign Governments engaged in war with the enemies of the United States, and, to the extent of the credits so established, from time to time to purchase at par from such foreign Governments, respectively, their several obligations. A total appropriation of $10,000,000,000 was provided for this purpose. Under these authorizations credits have been established in favor of the Governments of Belgium, Cuba, France, Great Britain, Greece, Italy, Liberia, Roumania, Russia, and Serbia, and advances have been made as follows, from April 24, 1917, to November 16, 1918:

COUNTRY.	Credits Established.	Cash Advances.	Other Charges Against Credits.	Balances Under Established Credits.
Belgium	$192,520,000	$173,380,000	.....	$19,140,000
Cuba	15,000,000	10,000,000	.....	5,000,000
France	2,445,000,000	1,970,000,000	$200,000,000	275,000,000
Great Britain	3,945,000,000	3,696,000,000	.....	249,000,000
Greece	15,790,000	.....	15,790,000	.....
Italy	1,210,000,000	1,051,000,000	.....	159,000,000
Liberia	5,000,000	.....	.....	5,000,000
Roumania	6,666,666	.....	5,000,000	1,666,666
Russia	325,000,000	187,729,750	.....	137,270,250
Serbia	12,000,000	10,605,000	.....	1,395,000
Total	$8,171,976,666	$7,098,714,750	$220,790,000	$852,471,916

The currencies needed in France, Great Britain, and Italy for our war expenditures in those countries have been provided by the respective foreign Governments under an arrangement whereby the dollar equivalents of the amounts so provided have been made available to the respective foreign Governments for use to meet their war expenditures in the United States, and thus the needs to these Governments for advances from the United States have been reduced by a corresponding amount. The following tabulation shows the amounts of the foreign currencies placed at the disposal of the United States, and the dollar equivalents paid therefor in the United States, for the period commencing during the month of January, 1918, up to November 15, 1918:

COUNTRY.	Francs.	Pounds Sterling.	Lire.	Dollar Equivalent.
France	3,571,436,076.38	.....	.....	$631,275,365.86
Great Britain	.....	24,270,545-1-6	.....	115,633,978.20
Italy	.....	.....	39,540,419	5,284,348.38
Total	.....	.....	.....	$752,193,692.44

LOSSES IN BRITISH ARMIES—1914-1918.

OFFICERS.

	Killed.	Wounded.	Total.		Killed.	Wounded.	Total.

In addition to the killed and wounded, there were 359,145 British officers and men on the "missing" list. Also, not in the above tables, were 19,000 "deaths from various causes among the troops not forming any part of the expeditionary force." The tables above take in not only soldiers from the British Isles, but also from India, Canada, Australia, and New Zealand.

COST OF FORMER WARS TO OTHER NATIONS.

(By the Treasury Department.)

DATES.	Countries Engaged.	Cost.
1793–1815	England and France	$6,250 000,000
1812–1815	France and Russia	450,625,000
1828	Russia and Turkey	100,000,000
1830–1840	Spain and Portugal (civil war)	250,000,000
1830–1847	France and Algeria	190,000,000
1848	Revolts in Europe	50,000,000
1854–1856	England	371,000,000
	France	332,000,000
	Sardinia and Turkey	128,000,000
	Austria	68,600,000
	Russia	800,000,000
1859	France	75,000,000
	Austria	127,000,000
	Italy	51,000,000
1864	Denmark, Prussia, and Austria	36,000,000
1866	Prussia and Austria	$330,000,000
1864–1870	Brazil, Argentina, and Paraguay	240,000,000
1865–1866	France and Mexico	65,000,000
1870–1871	Germany	954,400,006
	France	1,580,000,000
1876–1877	Russia	806,547,489
	Turkey	403,273,745
1900–1901	Transvaal Republic and England	1,000,100,000
1904–1905	Russia and Japan	2,500,000,000
	Expense of wars, 1793-1860	$9,243,225,000
	Expense of wars, 1861-1910	14,080,321,240
	Total	$23,323,546,240
	The cost of the Balkan wars	1,264,000,000

WHAT FRANCE HAS RAISED.

The following data are taken from a statement in the French National Assembly, October 1, 1918, in connection with the fourth war loan. The figures represent francs.

Raised in France: Advances of the Bank of France and Bank of Algiers, 19,415,000,000; National Defense notes (Treasury), 26,462,683,000; National Defense obligations (Treasury), 679,232,000; irredeemable State loans, 32,186,859,000; total, 78,733,774,000.

Borrowed abroad, from: England, 12,552,927,000; United States, 11,887,114,000; Spain, 326,000,000; Sweden, 46,687,000; Norway, 67,478,000; Switzerland, 97,050,000; Holland, 33,280,000; Argentina, 471,726,000; Japan, 196,704,000; total, 25,678,966,000.

To the above figures should be added the tax receipts of the ordiuary budget, namely, money realized by normal resources from the beginning of 1915 to the end of 1917, 18,000,000,000 francs ($3,600,000,000). During the eight first months of 1918, the deposit of public funds with Treasury agents procured more than 1,000,000,000 francs ($200,000,000). The employment of short-term Treasury notes, reduced even to one month, has drawn out untouched resources at home, while the diminution of credits asked from the Allies (corresponding in part with a diminution of imports) goes along with increased resources from neutrals.

STOCK OF MONEY IN THE WORLD.

The stock of gold and silver money in the world on January 1, 1916, the latest date for which official figures are available, according to the Director of the Mint, amounted to $10,699,225,000, of which $8,258,213,000 was gold and $2,441,012,000 was sliver. Of the total money, the United States had $3,055,465,000, of which $2,299,454,000 was gold; and the British Empire had $1,507,415,000, of which $1,159,820,000 was gold. Of the British Empire's stock, the United Kingdom held $661,944,000, go d, and $204,393,000, silver. The stock of money of the other chief nations was as follows: Canada, $170,560,000 gold, $2,835,000 silver; India, $42,412,000 gold, $112,194,000 silver; South Africa, $32,572,000 gold, $2,601,000 silver; Bulgaria, $19,569,000 gold, $11,580,000 silver; Denmark, $31,168,000 gold, $12,854,000 silver; Egypt, $22,832,000 gold, $21,634,000 silver; France, $1,384,125,000 gold, $411,090,000 silver; Germany, $714,073,000 gold, $7,806,000 silver (German figures cover only Reichsbank holdings); Greece, $11,518,000 gold, $65,000 silver; Italy, $335,689,000 gold, $46,568,000 silver; Japan, $143,128,000 gold, $71,507,000 silver; Netherlands, $172,536,000 gold, $195,968,000 silver; Norway, $24,887,000 gold, $4,395,000 silver; Portugal, $17,794,000 gold, $41,646,000 silver; Russia, $1,058,480,000 gold, $171,465,000 silver; Siam, $7,549,000 silver; Spain, $167,375,000 gold, $241,811,000 silver; Sweden, $43,542,000 gold, $10,492,000 silver; Switzerland, $48,276,000 gold, $9,889,000 silver; Turkey, $291,197,000 gold, $56,805,000 silver; South America—Argentina, $228,939,000 gold; Brazil, $24,408,000 gold; Paraguay, $1,930,000 gold; Peru, $25,622,000 gold, $3,425,000 silver; Uruguay, $28,356,000 gold, $1,898,000 silver; Venezuela, $2,057,000 gold, $1,464,000 silver. Central America—Nicaraugua, $315,000 silver; Panama, $51,000 gold, $13,000 silver; Salvador, $1,554,000 silver.

EXCHANGING OF PRISONERS OF WAR.

A CONFERENCE of French and German delegates, opened at Berne, Switzerland, May 15, 1918, arranged for an exchange of more than 330,000 French, German and Belgian prisoners. In the summer of 1917 the Central Powers held 2,874,271 prisoners, and the Entente Allies held a total of 1,284,050. Germany had 1,690,731 prisoners, including 17,474 officers; Austria-Hungary, 1,092,055; Bulgaria, 67,582, and Turkey, 23,903, a total of 2,874,271, of whom 27,620 were officers.

	Total Number.	In Germany		Total Number.	In Germany		Total Number.	In Germany
Russian	2,080,699	1,212,007	Italian	98,017	.....	Belgian	42,437	42,435
French	368,607	367,124	Roumanian	79,033	10,157	Montenegrin	5,607	.....
Serbian	154,630	25,879	British	45,241	33,129			

The British prisoners of war not in Germany were divided between Bulgaria and Turkey. The prisoners of the Allies, not including 40,000 Austrians and Bulgarians captured by the Serbians and in Italy or 20,000 Turkish prisoners in Egypt, were distributed as follows:

	Total Number.	In England.	In France.	In Russia.	In Italy.
German	594,050	85,000	259,050	250,000	.....
Austrian	630,000	.....	.....	550,000	80,000

At the same time Switzerland was sheltering 26,000 interned war prisoners, of whom 16,000 were French, English, and Belgian, while 10,000 were German. In addition, 7,000 relatives were visiting interned men in Switzerland. Most of these interned prisoners were released by the new agreements, while other thousands took their place.

THE LIBERTY LOANS—BY FEDERAL RESERVE DISTRICTS.

In the case of the United States debt, over $8,000,000,000 in loans to Allies is a partial offset. Great Britain, France and Germany also have made large loans to their allies. The London Economist of September 28, 1918, estimated the British debt at over $34,000,000,000 on that date.

COST OF FORMER WARS TO THE UNITED STATES.

(Compiled by the Treasury Department.)

WAR OF 1812 WITH GREAT BRITAIN, FROM JUNE 18, 1812, TO FEB. 17, 1815.

Year.	Total.	War.	Navy.
1812	$20,280,000	$11,817,000	$3,959,000
1813	31,681,000	19,652,000	6,446,000
1814	34,720,000	20,350,000	7,311,000
1815	32,943,000	14,794,000	8,660,000

WAR WITH MEXICO, FROM APRIL 24, 1846, TO JULY 4, 1848.

Year.	Total.	War.	Navy.
1846	$27,261,000	$10,413,000	$6,455,000
1847	54,920,000	35,840,000	7,900,000
1848	47,618,000	27,688,000	9,408,000
1849	43,499,000	14,558,000	9,786,000

CIVIL WAR, FROM 1861 TO 1865.

Year.	Total.	War.	Navy.
1860	$63,201,000	$16,472,000	$11,514,000
1861	60,650,000	23,001,000	12,387,000
1862	469,569,000	389,173,000	42,640,000
1863	718,733,000	603,314,000	63,261,000
1864	864,968,000	690,391,000	85,705,000
1865	1,295,099,000	1,030,690,000	122,617,000

SPANISH-AMERICAN WAR, FROM APRIL 21, 1898, TO DEC. 10, 1898.

Year.	Total.	War.	Navy.
1897	$365,774,000	$48,950,000	$34,561,000
1898	443,368,000	91,992,000	58,823,000
1899	605,071,000	229,841,000	63,942,000
1900	487,713,000	134,774,000	55,953,000

At the end of the Revolutionary War the United States national debt was $170,000,000.

ACHIEVEMENTS OF THE U. S. NAVY IN THE WAR.

(Data taken from the Report of Secretary Daniels, made public Dec. 9, 1918. Statistics as to the strength and personnel will be found elsewhere, under separate heads.)

The Secretary in his report says:

"It is too early to tell the full story of the accomplishments of the American Navy during the great war, now happily a tragedy of the past, with the achievement of all aims which summoned our country to take up arms. It will require the quiet perspective, after the stress of battle, for a full assessment of the valor of the men of the sea, their resource, their initiative, their success, and their forgetfulness of self in the whole-hearted and efficient service of their country. When the peace terms are signed and the agreement between all nations cements the blood-bought victory for permanent peace, the detailed story of the Navy's participation will afford a new cause for gratification and give a greater thrill of pride when the world fully knows the many instances of splendid courage which, for military reasons, could not be fully disclosed during the struggle and must be left for the historian to record."

Mr. Daniels gives a brief history of the moves in Congress in conjunction with the Navy Department, and adds:

War was declared on April 6, 1917. On the 4th of May a detachment of destroyers was in European waters. By January 1, 1918, there were 113 United States naval ships across, and in October, 1918, the total had reached 338 ships of all classes. At the present time there are 5,000 officers and 70,000 enlisted men of the United States Navy serving in Europe, this total being greater than the full strength of the navy when the United States entered the war.

As an indication of the work being done by United States naval vessels in the war zone, the following averages of miles steamed per month are given:

Destroyers, 275,000; miscellaneous patrol craft, 120,000; mine sweepers, 10,000; mine layers, 10,000; battleships and submarines, 90,000; submarine chasers, 121,000; or a total of 626,000 miles per month. The above figures include vessels actively engaged in naval duties only, under command of the force commander, United States naval forces in Europe, and not troopships, transports, cargo carriers, or miscellaneous merchant vessels flying the American flag, constantly plying through the war zone. Nor does it include cruisers or battleships engaged in oversea escort duties.

Distances steamed by various destroyers can be shown when the record of several of the first to arrive in European waters is examined. Three of these are shown to have steamed during the first year of service in the zone:

U. S. S. Porter, 64,473 miles; U. S. S. Conyngham, 63,952 miles; U. S. S. Davis, 63,015 miles.

An individual instance of activity is given for one of the new destroyers. The U. S. S. Kimberley, during the month of June, steamed 7,019 miles, and was at sea 470 hours during the month; i. e., about 65 per cent. of the time.

The destroyers upon their first arrival were based on Queenstown, which has been the base of the operations of these best fighters of the submarines during the war. Every facility possible was provided for the comfort and recreation of the officers and men engaged in this most rigorous service.

During July and August, 1918, 3,444,012 tons of shipping was escorted to and from France by American escort vessels; of the above amount, 1,577,735 tons were escorted in and 1,864,677 tons were escorted out of French ports. Of the tonnage escorted into French ports during this time, only 16,988 tons, or 0.009 per cent. were lost through enemy action, and of the tonnage escorted out from French ports, only 27,858 tons, or 0.013 per cent. were lost through the same cause. During the same period, July and August of this year, 259,604 American troops were escorted to France by United States escort vessels without the loss of a single man through enemy action. The particulars in the above paragraph refer to United States navy forces operating in the war zone from French ports.

During the same time—July and August—destroyers based on British ports supplied 75 per cent. of the escorts for 318 ships, totalling 2,752,908 tons, and including the escort of vessels carrying 137,283 United States troops. The destroyers on this duty were at sea an average of 67 per cent. of the time, and were under way for a period of about 16,000 hours, steaming approximately an aggregate of 260,000 miles. There were no losses due to enemy action.

American and British ships have carried over 2,000,000 American troops overseas. The United States did not possess enough ships to carry over our troops as rapidly as they were ready to sail or as quickly as they were needed in France. Great Britain furnished, under contract with the War Department, many ships and safely transported many American troops, the numbers having increased greatly in the spring and summer. A few troops were carried over by other allied ships. The actual number transported in British ships was more than a million. The exact figures are not now available, but it was a service invaluable and timely, and was typical of Great Britain's large contribution of its great shipping facilities for the common cause.

The American force based on Gibraltar, including destroyers, gunboats, cruisers, yachts, and Coast Guard cutters during July and August have been at sea 56 per cent. of the time, and actually under way 15,500 hours, steaming during this period 160,000 miles. They have supplied approximately 25 per cent. of the escorts for Mediterranean convoys between Gibraltar on the one hand and France and Italy on the other, and have performed 70 per cent. of the ocean escort duties between Gibraltar and England. The above figures are given as indicative of what is accomplished month by month by our vessels in the war zone.

In addition to duty performed by destroyers and other escorting vessels, the extensive naval activities of our battleships with the British Grand Fleet, mining units, patrol units, submarine hunting, mine sweeping, salvage, etc., have been many and varied.

When the submarine chaser flotillas were sent overseas it was decided to route them via the Bermudas and the Azores in order to get them across materially fit and with the personnel in fighting trim. Having formulated the plan of getting our chasers across, it was necessary to secure for them certain base facilities on the way over. To that end negotiations were entered into with the Portuguese whereby we received from them the use of a temporary base at Ponta Delgada, in the Azores. This base was built up to such an extent that we were able to care for the needs of our small and other craft that might require the use of a base while passing to and fro across the Atlantic.

The coal used by the American Expeditionary Forces in France is carried to that country in vessels largely officered and manned by the navy. Of the 70 or more ships operating in army coal service two-thirds have now been commissioned in the navy, and the others will shortly follow.

The destruction of tankers carrying oil to our own ships and the British fleet in the North Sea gave much anxiety, and in order to avert the submarine menace in sending the tankers around the north of Scotland it was determined by the American and British Navy to build a pipe line across Scotland. Our naval experts undertook the big task, and thereby reduced the distance and danger of supplying the fleet with oil.

In order to efficiently co-operate with our allies, United States naval port officers have been stationed at 20 of the principal seaports of Great Britain, France and Italy. Fifteen naval bases have been established.

In connection with aviation, two repair and assembly bases, 4 kite balloon stations, 18 seaplane

stations, 5 bombing plane stations, and 3 dirigible stations have been established and manned with navy personnel, which includes 624 officers, 97 observers, and over 15,000 enlisted men.

More than 50,000 American mines have been laid in strategical areas in European waters. The Navy has taken part in and actually laid 80 per cent. of the great mine barrage, 230 miles long, from Scotland to Norway. A total of 56,439 mines have been laid, all of which were designed and manufactured by the United States and transported and laid by the United States Navy. The total personnel engaged in mining activity alone is upward of 6,700 men.

OPERATIONS—AT HOME AND ABROAD.

The operations of our navy during the world war have covered the widest scope in its history. Our naval forces have operated in European waters from the Mediterranean to the White Sea. At Corfu, Gibraltar, along the French Bay of Biscay ports, at the English Channel ports, on the Irish coast, in the North Sea, at Murmansk and Archangel, our naval forces have been stationed and have done creditable work. Their performance will probably form the most interesting and exciting portion of the naval history of this war, and it is the duty which has been most eagerly sought by all of the personnel, but owing to the character of the operations which our navy has been called upon to take part in, it has not been possible for all of our naval forces, much as they desired it, to engage in operations at the front, and a large part of our work has been conducted quietly but none the less effectively in other areas. This service, while not so brilliant, has still been necessary, and without it our forces at the front could not have carried on the successful campaign that they did.

Naval men have served on nearly two thousand craft that plied the waters, on submarines that fear not the undersea perils, and in aviation where men of vision and courage prevent surprise attacks and fight with new-found weapons. On the land, marines and sailors have helped to hold strategic points, regiments of marines have shared with the magnificent army their part of the hard-won victory, a wonderfully trained gun crew of sailors have manned the monster 14-inch guns which marked a new departure in land warfare. In diplomacy, in investigation at home and in all parts of the world by naval officers and civilian agents, in protecting plants and labor from spies and enemies, in promoting new industrial organizations and enlarging older ones to meet war needs, in stimulating production of needed naval craft—these are some of the outstanding operations which mark the heroic year of accomplishment.

NAVAL OPERATING FORCES—FIGHTING CRAFT.

The employment of the fighting craft of the navy may be summed up as follows:

In the summer of 1917, the submarine problem having become so acute and the losses to merchant ships so great, it became necessary to adopt more effective methods of handling merchant shipping, in order that a greater degree of safety should be afforded. The system of convoying ships was adopted. While this slowed up shipping fully 20 per cent. and increased the dangers of collision and other difficulties, experience has amply justified the wisdom of the policy. The convoy system, the adoption of which was suggested by President Wilson shortly after our entrance into the war, was applied to both cargo and troop ships and its success was almost immediately apparent. It consisted in gathering together certain numbers of vessels, sailing at regular intervals along established lanes, under the guard of heavier ships to protect against raiders, and destroyers to protect against submarines.

This system went into effect with the first of our troop convoys, which crossed in June, 1917, and has continued ever since, to the day the armistice was signed. It had much to do with breaking the back of the submarine offensive, for it deprived the U boat of the benefit he derived from attacking individual, unprotected ships and forced him to devote his efforts, for the most part, to ships which were protected by destroyers. To engage with a convoy, the submarine was forced to enter the danger zone and frequently it was he and not our ships which became the victim.

In these convoy efforts, all our destroyers, our armed cruisers, our smaller cruisers, and later the old battleships of our fleet, have been engaged, continuously, winter and summer. It has been hard, grinding work, but that it was well done is attested by the fact that two million troops were sent abroad, with not the loss by enemy action of a single east-bound ship carrying troops under the protection of our forces.

The history of the convoy operations in which our naval forces have taken part, due to which we have been able so successfully to transport such a large number of our military forces abroad, and so many supplies for the army, is a chapter in itself. It is probably our major operation in this war and will, in the future, stand as a monument to both the army and the navy, as the greatest and most difficult troop transporting effort which has ever been conducted across seas. The work is not finished. The bringing of our forces back is still a naval problem, and it will be undertaken with the same spirit which characterized the transportation and convoy of our troops to Europe.

PROTECTION OF OIL SUPPLIES FROM THE GULF.

To forestall enemy submarine operation in the Gulf and Caribbean, a force was established called the American Patrol Force, and its headquarters was in the vicinity of Key West. While the coastwise shipping could be adequately protected by routing close along our coast, the problem became a different one the instant it entered the Gulf and Caribbean areas, and it was this problem and the problem of antisubmarine operations which the American patrol detachment had to undertake. As was foreseen, the protection of the oil supplies from the Gulf to our own coast and then abroad were quite vital to the success of the general campaign, and these supplies the patrol detachment was prepared to safeguard by adopting at once the convoy system the instant they were threatened.

NAVAL OVERSEAS TRANSPORTATION SERVICE.

On January 9, 1918, the Naval Overseas Transportation Service was established, owing to the foreseen necessity to expeditiously supply the naval forces in foreign waters and to assist the army if necessary with their tremendous task of transporting and supplying the American Expeditionary Force in France. This organization sprang into being almost overnight, and has proved its right to be reckoned as one of the most important and successful operations of the navy.

At the outbreak of the war the lack of an American merchant marine was immediately felt. The United States Shipping Board was authorized, and the vast task of creating a merchant marine was undertaken. The United States was without a sufficiently large trained merchant marine personnel, as the seagoing population of this country was small compared to that which followed the pursuits on shore. The difficulty of obtaining this trained personnel to man the vast American merchant marine was immediately felt, and the Navy Department was ready to assist in every way. It was asked to man immediately two vessels, in order to hasten their departure overseas, and from this inception the Naval Overseas Transportation Service has grown in 10 months to a fleet of 321 cargo-carrying ships aggregating a dead-weight tonnage of 2,800,000, and commercially nearly equalling the combined Cunard, Hamburg-American and North German Lloyd Lines at the outbreak of the war. Of this number 227 ships represented vessels previously in operation. From the Emergency Fleet Corporation the navy has taken

over for operation 94 vessels, aggregating 700,000 dead-weight tons. On March 21, 1918, by order of the President, 161 Dutch merchant vessels were taken over by the Navy Department pending their allocation to the various vital trades of this country, and 26 of these vessels are now a part of the naval overseas fleet. This vast fleet of cargo vessels has been officered and manned through enrolment of the seagoing personnel of the American merchant marine, officers and men of the United States Navy, and the assignment after training of graduates of technical schools and training stations, developed by the navy since the United States entered the war.

There are required for the operation of this fleet at the present time 5,000 officers and 29,000 enlisted men, and adequate arrangements for future needs of personnel have been provided. The navy has risen to the exacting demands imposed upon it by the war, and it will certainly be a source of pride to the American people to know that within 10 months of the time that this new force was created, in spite of the many obstacles in the way of its accomplishment, an American naval vessel, manned by an American naval crew, leaves an American port on the average of every five hours, carrying subsistence and equipment so vital to the American Expeditionary Force. I would be derelict in my duty unless I expressed my keenest appreciation and heartiest admiration for those men of the Naval Overseas Transportation Service who have traveled the lonely lanes of the ocean, which have been for so long infested with the menacing submarine. These terrors have not been regarded as terrors by this personnel. They have braved the dangers most willingly and have thereby exemplified the best traditions of the navy of the United States. In the many engagements with the enemy submarines our fleet has necessarily suffered, but it is believed that the losses of the enemy have been relatively much greater than ours.

The high-power radio service of the navy has made great progress during the past year. On the Atlantic Coast the navy has completed and is operating its new high-power station at Annapolis, Md., in addition to those already in service. It is now possible to transmit messages simultaneously from four high-power radio stations to European stations and at the same time receive despatches from several European stations.

CABLE CENSORSHIP.

The censorship of the cables has been officially conducted by a well co-ordinated organization, whose officers and men have attacked a difficult task with ability and zeal. The office of the chief cable censor, which administers and regulates cable censorship as a whole, is in the Navy Department; and local stations, where the actual censoring of cablegrams is for the most part done, are maintained at the points of cable landings within the United States and its territorial possessions.

NAVAL LOSSES CAUSED BY SUBMARINE WARFARE.

Since this country entered the war practically all the enemy's naval forces, except the submarines, have been blockaded in his ports by the naval forces of the Allies, and there has been no opportunity for naval engagements of a major character. The enemy's submarines have, however, formed a continual menace to the safety of all our transports and shipping, necessitating the use of every effective means and the utmost vigilance for the protection of our vessels. Concentrated attack was made by enemy U boats on the ships which carried the first contingent of our troops to Europe, and all that have gone since have faced this liability to attack.

Our destroyers and patrol vessels, in addition to convoy duty, have waged an unceasing offensive warfare against the submarines. In spite of all this, our naval losses have been gratifyingly small. Not one American troop ship, as previously stated, has been torpedoed on the way to France, and but three, the Antilles, the President Lincoln and the Covington, were sunk on the return voyage.

Only three fighting ships have been lost as a result of enemy action—the patrol ship Alcedo, a converted yacht, sunk off the coast of France Nov. 5, 1917; the torpedo boat destroyer Jacob Jones, sunk off the British coast Dec. 6, 1917, and the cruiser San Diego, sunk near Fire Island, off the New York coast, on July 19, 1918, by striking a mine supposedly set adrift by a German submarine. The transport Finland and the destroyer Cassin, which were torpedoed, reached port and were soon repaired and placed back in service. The transport Mount Vernon, struck by a torpedo on Sept. 5 last, proceeded to port under its own steam and was repaired.

Detailed accounts of these losses, and of the courage, endurance and perfect performance of duty by officers and men, appears as Appendix F to this report.

The most serious loss of life due to enemy activity was the loss of the Coast Guard cutter Tampa, with all on board, in Bristol Channel, England, on the night of Sept. 26, 1918. The Tampa, which was doing escort duty, had gone ahead of the convoy. Vessels following heard an explosion, but when they reached the vicinity there were only bits of floating wreckage to show where the ship had gone down. Not one of the 111 officers and men of her crew were rescued; and, though it is believed she was sunk by a torpedo from an enemy submarine, the exact manner in which the vessel met her fate may never be known.

There has been no more baffling mystery in the annals of the navy than the disappearance last March of the U. S. S. Cyclops, navy collier of 19,000 tons displacement, with all on board. Loaded with a cargo of manganese, with 57 passengers, 20 officers and a crew of 213 aboard, the collier was due in port on March 13. On March 4 the Cyclops reported at Barbados, British West Indies, where she put in for bunker coal. Since her departure from that port there has not been a trace of the vessel, and long continued and vigilant search of the entire region proved utterly futile, not a vestige of wreckage having been discovered. No reasonable explanation of the strange disappearance can be given. It is known that one of her two engines was damaged and that she was proceeding at reduced speed, but even if the other engine had become disabled it would not have had any effect on her ability to communicate by radio. Many theories have been advanced, but none that seems to account satisfactorily for the ship's complete vanishment. After months of search and waiting the Cyclops was finally given up as lost and her name stricken from the registry.

VESSELS CONTRACTED FOR DURING THE YEAR.

During the year, including orders placed at navy yards, the following have been contracted for: Four battleships, one battle cruiser, two fuel ships, one transport, one gungoat, one ammunition ship, 223 destroyers, 58 submarines, 112 fabricated patrol vessels (including 12 for the Italian Government), 92 submarine chasers (including 50 for the French Government), 51 mine sweepers, 25 seagoing tugs and 46 harbor tugs, besides a large number of lighters, barges and other auxiliary harbor craft. In addition to this, contracts have been placed for 12 large fuel ships in conjunction with the Emergency Fleet Corporation.

155 SHIPS LAUNCHED UP TO OCT. 1.

Ships launched during the year and up to Oct. 1, 1918, include one gunboat, 93 destroyers, 29 submarines, 26 mine sweepers, four fabricated patrol vessels and two seagoing tugs. It is noteworthy that in the first nine months of 1918 there were launched no less than 83 destroyers of 98,281 tons

aggregate normal displacement, as compared with 62 destroyers of 58,285 tons during the entire nine years next preceding Jan. 1, 1918.

There have been added to the navy during the fiscal year and including the three months up to Oct. 1, 1918, two battleships, 26 destroyers, 28 submarines, 355 submarine chasers (including 50 which were turned over to the French Government), 13 mine sweepers and two seagoing tugs There have also been added to the operating naval forces by purchase, charter, &c., many hundred vessels of commercial type, including all classes from ex-German transatlantic liners to harbor tugboats and motor boats for auxiliary purposes.

RECORDS BROKEN IN DESTROYER CONSTRUCTION.

Among the ships added, mention should be made of the destroyer Ward, built at the Navy Yard, Mare Island, Cal , in the remarkably short time of 70 days from the laying of the keel to the placing of the ship in commission. Only 17½ days elapsed from the day the keel was laid until the ship was launched. This result was achieved by most careful system of routing materials and handling labor, worked out by that yard in conjunction with its programme of destroyers now under construction.

In addition to new ships completed, there was a very large amount of work in refitting ex-German and Austrian ships for war uses and in fitting up both commandeered merchantmen and new merchant ships as completed.

NOTABLE ACHIEVEMENTS IN ORDNANCE.

One of the great achievements of the navy during the past year was the design and construction of the 14-inch naval guns on railway mountings now on the western front, which hurled shells far behind the German lines. The mount was designed, built and delivered in less than four months. On Dec. 26, 1917, not a drawing had been started. On April 25, 1918, a completed gun was rolling on its own wheels to Sandy Hook Proving Ground for long-range tests.

These guns were originally intended for the new battle cruisers, but a change of ship design left them available for other use. As the navy had no immediate need for them afloat, Rear Admiral Ralph Earle, Chief of the Bureau of Ordnance, recommended that they be utilized for land service with our army in France. It was more than good fortune that in these testing times the navy had Admiral Earle, one of the ablest and fittest officers, in direction of great ordnance plans and operations. With a staff of men of like mettle, achievements have been made that will always live

It was realized that to be most effective the railway battery must be completely mobile and independent of any permanent artillery base. The guns themselves were mounted on cars which could move freely over the French railways. It was necessary to make the repair shops and barracks for the personnel mobile. Twelve cars were constructed to accompany each gun. There were machine shop cars, armored ammunition cars, kitchen cars, berthing, crane and wireless cars. These cars, as well as the gun mounts, were all built and equipped under the direction of the Bureau of Ordnance. This battery is sufficiently mobile so that were an order to move position received while the gun was in action, gun, personnel, kitchen, fuel, berthing cars and all could be under way in about an hour.

The naval land batteries fire heavier projectiles and have greater range than any gun ever before placed on mobile shore mounting. The German long range "freak" guns which fired on Paris were non-mobile. They were built on permanent steel and concrete foundations which were eventually sought out by Allied aeroplanes and the guns subsequently silenced. The shells were small and specially built for long flight. This fact reduced their military efficiency. The German long range guns, while they had a certain moral effect, were without great practical military value The American naval guns fire projectiles approximately seven times heavier than the shells the Germans used against Paris

In 1916 the Germans had one 15-inch naval gun in Flanders, which became famous through its long range bombardment of Dunkirk and other Allied bases. This gun was on a permanent foundation and could not be shifted from point to point on the front. Our 14-inch gun can move from one end of France to the other, and it hurls a projectile a distance of approximately 30 miles (52,000 yards)

In the future American dreadnoughts and battle cruisers will be armed with a 16-inch gun, the first of which had been tested during the year and which proved eminently satisfactory in every respect. These guns will make those ships the heaviest armed vessels in the world. This gun throws a projectile weighing 2,100 pounds. At present our largest battleships mount 14-inch guns, which throw a projectile weighing only 1,400 pounds. It is interesting to note that broadside weights have trebled within the space of twenty years.

The total weight of steel thrown by a single broadside from ships armed with 16-inch guns will be 25,200 pounds; that of the Pennsylvania, the largest type of ship in commission, is 17,508 pounds, while the total weight thrown by the Oregon, the largest ship at the time of the Spanish-American War, was 5,660 pounds.

DEPTH CHARGE MOST EFFECTIVE ANTI-SUBMARINE WEAPON

The successful operation of the depth charge and the development of tactics for attacking submarines with them have been the most potent factors in the solution of the German submarine menace. These charges are now being produced in quantities considerably in excess of the needs of our navy and merchant fleet, and so tremendous is their destructive quality and so thoroughly has strategy for their use been developed, that it is a lucky submarine which shows itself or its periscope within view of a destroyer and survives the subsequent bombardment

THE NAVY THAT FLIES

Of gratifying proportions and effectiveness have been the expansion of aviation in the navy

On July 1, 1917, naval aviation was still in its infancy. At that time there were only 45 naval aviators. There were officers of the navy, Marine Corps and Coast Guard who had been given special training in and were attached to aviation. There were approximately 200 student officers under training and about 1,250 enlisted men attached to the Aviation Service. These enlisted men were assigned to the three naval air stations in this country which were then in commission Pensacola, Fla., had about 1,000 men; Bay Shore, Long Island, N. Y., which was put in operation at that time, had about 100 men; and Squantum, Mass., which was abandoned in the fall of 1917, had about 150 men.

On July 1, 1918, there were 823 naval aviators, approximately 2,052 student officers and 400 ground officers attached to naval aviation In addition, there were over 7,300 trained mechanics and over 5,400 mechanics in training. The total enlisted and commissioned personnel at this time was about 30,000.

MARINE CORPS WINS GLORY.

This efficient fighting, building and landing force of the navy has won imperishable glory in the fulfilment of its latest duties upon the battle fields of France, where the marines, fighting for the time under Gen. Pershing as a part of the victorious American Army, have written a story of valor and sacrifice that will live in the brightest annals of the war With heroism that nothing could daunt, the Marine Corps played a vital role in stemming the German rush on Paris and in later days aided

ACHIEVEMENTS OF THE U. S. NAVY IN THE WAR—*Continued.*

in the beginning of the great offensive, the freeing of Rheims, and participated in the hard fighting in Champagne, which had as its object the throwing back of the Prussian Armies in the vicinity of Cambrai and St. Quentin.

With only 8,000 men engaged in the fiercest battles, the Marine Corps casualties numbered 69 officers and 1,531 enlisted men dead and 78 officers and 2,435 enlisted men wounded seriously enough to be officially reported by cablegram, to which number should be added not a few whose wounds did not incapacitate them for further fighting. However, with a casualty list that numbers nearly half the original 8,000 men who entered battle, the official reports account for only 57 United States Marines who have been captured by the enemy. This includes those who were wounded far in advance of their lines and who fell into the hands of Germans while unable to resist.

The advance of the Germans was across a wheat field, driving at Hill 165 and advancing in smooth columns. The United States Marines, trained to keen observation upon the rifle range, nearly every one of them wearing a marksman's medal, or better, that of the sharpshooter or expert riflemen, did not wait for those gray-clad hordes to advance nearer. Calmly they set their sights and aimed with the same precision that they had shown upon the rifle ranges at Paris Island, Mare Island and Quantico. Incessantly their rifles cracked, and with their fire came the support of the artillery. The machine gun fire, incessant also, began to make its inroads upon the advancing forces. Closer and closer the shrapnel burst to its targets. Caught in a seething wave of machine gun fire, of scattering shrapnel, of accurate rifle fire, the Germans found themselves in a position in which further advance could only mean absolute suicide. The lines hesitated. They stopped. They broke for cover, while the marines raked the woods and ravines in which they had taken refuge with machine gun and rifle to prevent them making another attempt to advance by infiltrating through. Above, a French airplane was checking up on the artillery fire. Surprised by the fact that men should deliberately set their sights, adjust their range and then fire deliberately at an advancing foe, each man picking his target, instead of firing merely in the direction of the enemy, the aviator signalled below "Bravo!" In the rear that word was echoed again and again. The German drive on Paris had been stopped.

In all the history of the Marine Corps there is no such battle as that one in Belleau Wood. Fighting day and night without relief, without sleep, often without water, and for days without hot rations, the marines met and defeated the best divisions that Germany could throw into the line. The heroism and doggedness of that battle are unparalleled. Time after time officers seeing their lines cut to pieces, seeing their men so dog tired that they even fell asleep under shell fire, hearing their wounded calling for the water that they were unable to supply, seeing men fight on after they had been wounded and until they dropped unconscious; time after time officers seeing these things, believing that the very limit of human endurance had been reached, would send back messages to their post command that their men were exhausted. But in answer to this would come the word that the lines must hold, and if possible those lines must attack. And the lines obeyed. Without water, without food, without rest, they went forward—and forward every time to victory. Companies had been so torn and lacerated by losses that they were hardly platoons; but they held their lines and advanced them. In more than one case companies lost every officer, leaving a Sergeant and sometimes a Corporal to command, and the advance continued. After thirteen days in this inferno of fire a captured German officer told with his dying breath of a fresh division of Germans that was about to be thrown into the battle to attempt to wrest from the marines that part of the wood they had gained. The marines, who for days had been fighting only on their sheer nerve, who had been worn out from nights of sleeplessness, from lack of rations, from terrific shell and machine gun fire, straightened their lines and prepared for the attack. It came—as the dying German officer had predicted.

GERMAN CRACK TROOPS REPULSED AND BEATEN.

At 2 o'clock on the morning of June 13 it was launched by the Germans along the whole front. Without regard for men, the enemy hurled his forces against Bouresches and the Bois de Belleau and sought to win back what had been taken from the Germans by the Americans. The orders were that these positions must be taken at all costs; that the utmost losses in men must be endured; that the Bois de Belleau and Bouresches might fall again into German hands. But the depleted lines of the marines held; the men who had fought on their nerve alone for days once more showed the mettle of which they were made. With their backs to the trees and boulders of the Bois de Belleau, with their sole shelter the scattered ruins of Bouresches, the thinning lines of the marines repelled the attack and crashed back the new division which had sought to wrest the position from them.

And so it went. Day after day, night after night, while time after time messages like the following travelled to the post command:

"Losses heavy. Difficult to get runners through. Some have never returned. Morale excellent, but troops about all in. Men exhausted."

Exhausted, but holding on. And they continued to hold on in spite of every difficulty. Advancing their lines slowly day by day, the marines finally prepared their positions to such an extent that the last rush for the possession of the wood could be made. Then, on June 24, following a tremendous barrage, the struggle began.

The barrage literally tore the woods to pieces, but even its immensity could not wipe out all the nests that remained; the emplacements that were behind almost every clump of bushes, every jagged, rough group of boulders. But those that remained were wiped out by the American method of the rush and the bayonet, and in the days that followed every foot of Belleau Wood was cleared of the enemy and held by the frayed lines of the Americans.

DEATHS IN U. S. NAVY FROM "WAR CAUSES," 1,233.

Deaths in the navy from "war causes" totalled 1,233, Surgeon-General Braisted on November 26, 1918, told the House Naval Committee. No figures were given as to deaths from disease. The bodies of virtually all navy men dying in foreign service, the Surgeon-General said, have been returned home. He added there were 15,000 patients in naval hospitals and that institutions at New York, Philadelphia, Boston and Norfolk were crowded. Appropriations for the Navy Medical Department of $15,000,000, asked for under plans for continuing the war, were reduced to $9,200,000 by the Surgeon-General.

THE NEW AMERICAN MERCHANT MARINE.

(By the Department of Commerce, October, 1918.)

VESSELS built in the United States (including those for our French allies) and officially numbered by the Commerce Department, Bureau of Navigation, during September, numbered 170 of 308,470 gross tons, a greater tonnage than was built during the whole fiscal year 1915 or 1912 or 1911 or 1909, but not half enough to supply and maintain the American troops sent overseas during the month. During the nine months ended September 30 the total is 1,357 vessels of 1,722,730 gross tons, and during the twelve months ended September 30, the total is 1,681 of 2,013,264 gross tons, or 70 per cent. of the whole world's greatest output in 1913, but much over double this tonnage was required to transport and supply the American troops sent overseas.

The steel ship figures for May, 1918, include one cement vessel of 3,427 gross tons. The non-seagoing figures for July, 1918, include one cement vessel of 325 tons.

Of the vessels built in the United States in the nine months ending September 30, 1918, ATLANTIC AND GULF YARDS turned out 443 wood (191,756 tons), and 86 metal (357,136 tons); total, 529 (548,892 tons). PACIFIC YARDS turned out 409 wood (229,618 tons), and 110 metal, including one concrete (620,833 tons); total, 519 (850,451 tons).

GREAT LAKES YARDS turned out 67 wood (6,219 tons), and 122 metal (260,491 tons); total, 189 (266,710 tons).

WESTERN RIVERS YARDS turned out 94 wood (3,012 tons), and one metal (13 tons); total, 95 (3,025 tons).

There were built for foreigners in the nine months 25 wooden vessels of 53,652 gross tons.

Of the wooden ships built in 1918, January-September, 75 were sailing, 144 steam, 548 gas, and 246 unrigged. Of the metal ships, 4 were sailing, 308 steam, 3 gas, and 4 unrigged.

The total United States Merchant Marine tonnage on June 30, 1916, was 8,469,649 gross tons, divided as follows: FOREIGN TRADE—Steam, 1,573,705 tons; total, 2,185,008 tons. COASTWISE TRADE—Steam, 4,315,579 tons; total, 6,244,550 tons. WHALE FISHERIES—Steam, 1,789 tons; total, 6,707 tons. COD AND MACKEREL FISHERIES—Gas or steam, 10,731 tons; total, 33,384 tons.

STATUS OF WORLD TONNAGE, SEPTEMBER 1, 1918.

(Germany and Austria excluded. The figures are dead weight tons.)

Total losses (Allied and neutral) August, 1914-September 1, 1918, 21,404,913; total construction (Allied and neutral) August, 1914-September 1, 1918, 14,247,825; total enemy tonnage captured (to end of 1917), 3,795,000; excess of losses over gains, 3,362,088; estimated normal increase in world's tonnage if war had not occurred (based on rate of increase, 1905-1914), 14,700,000; net deficit due to war, 18,062,088. Allied monthly construction passed destruction for the first time in May, 1918.

ESTIMATE OF STRENGTH OF AUSTRIAN NAVY.

ACCORDING to estimates based on the latest information received by the Navy Department, the strength of the Austrian Navy was approximately as follows, Nov. 11, 1918: 15 battleships, 21 torpedo boat destroyers, 10 torpedo gunboats, 45 submarines, 1 river torpedo boat, 2 trawlers, 2 mine layers, 15 cruisers, 67 torpedo boats, 43 mine layers, 11 river monitors, 6 scouts, 3 armed steamers, 7 patrol boats.

These figures are compiled without reference to reported recent losses. According to press despatches two battleships have recently been destroyed and an unknown number of war craft has been taken over by the Jugo-Slavs.

WAR LOSSES OF AMERICAN MERCHANT SHIPPING.

FROM the beginning of the European war of August 3, 1914, to the armistice of November 11, 1918, the authenticated loss of American merchant vessels from acts of the enemy was 145 vessels of 354,449 gross tons, with the sacrifice of 775 lives, as shown by the official records of the Bureau of Navigation, Department of Commerce. These returns do not include the losses of vessels of the American Navy or of the American Army and lives thus sacrificed recorded by the Navy and War Departments. They do not include several cases of the loss of merchant vessels in which it is not yet established whether the loss was due to acts of the enemy. There is given below a summary of the losses according to periods before and after the United States entered the war and according to the methods of destruction to which the enemy resorted, with number and gross tonnage of ships destroyed and number of lives lost.

The following table covers the period from the beginning of the war, August 3, 1914, to April 5, 1917, inclusive:

SHIP.	Torpedoed.		Mined.		Gunfire, Etc.		Total.		Lives Lost
	No.	*Gross.*	*No.*	*Gross.*	*No.*	*Gross.*	*No.*	*Gross.*	
Steam	6	25,988	4	9,675	6	24,649	16	60,312	67
Sail	.....	.....	1	1,904	2	4,927	3	6,831	.....
Total	6	25,988	5	11,579	8	29,576	19	67,143	67

The following table covers the period from April 6, 1917, the entry of the United States into the war, up to the armistice of November 11, 1918, inclusive:

SHIP.	Torpedoed.		Mined.		Gunfire, Etc.		Total.		Lives Lost
	No.	*Gross.*	*No.*	*Gross.*	*No.*	*Gross.*	*No.*	*Gross.*	
Steam	45	190,357	2	8,116	22	38,272	69	236,745	707
Sail	.....	.....	.....	.....	57	50,561	57	50,561	1
Total	45	190,357	2	8,116	79	88,833	126	287,306	708

The totals for the entire period August 3, 1914, to November 11, 1918, inclusive, are given below:

SHIP.	Torpedoed.		Mined.		Gunfire, Etc.		Total.		Lives Lost
	No.	*Gross.*	*No.*	*Gross.*	*No.*	*Gross.*	*No.*	*Gross.*	
Total steam	51	216,345	6	17,791	28	62,921	85	297,057	774
Total sail	.....	.....	1	1,904	59	55,488	60	57,392	1
Grand total	51	216,345	7	19,695	87	118,409	145	354,449	775

The killing at sea of 703 persons on American merchant ships is chargeable to submarine torpedoes. 38 were killed by gunfire, and 34 were victims of drifting enemy mines.

44 SHIPS OF UNITED STATES NAVY LOST IN THE WAR.

Forty-four vessels of the navy, including army and cargo transports, manned by naval crews, were lost from the declaration of war on April 6, 1917, until hostilities ceased November 11, 1918. Twelve of these were destroyed by enemy submarines. Only three of the twelve ships torpedoed were war craft—the destroyer Jacob Jones, sunk December 6, 1917, with a loss of 62 lives; the coastguard cutter Tampa, sunk September 6, 1918, with a loss of 112 lives, and the armed yacht Alcedo which carried down 20 men.

Three ships lost by mines included only one war craft, the armored cruiser San Diego, which went down off Fire Island last July 19, with a loss of 50 lives. A total of 678 men on torpedoed ships were drowned or killed by explosions.

Fourteen vessels, including the collier Cyclops, were given under the head of miscellaneous sinkings, with a loss of life of 346.

SUBMARINES—THEIR HISTORY.

(From a Bulletin [May, 1918] of the Naval Consulting Board.)

THE first recorded experiment in submarine operation was made by a Hollander, Dr. Cornelius Van Drebbel, who in 1624 constructed a one-man submarine operated by feathering oars which made a successful underwater trip from Westminster to Greenwich on the Thames. Dr. David Bushnell, an American inventor and graduate of Yale in the class of 1775, nearly sank the "Eagle" in New York harbor during the Revolutionary War by the use of his little one-man-powered submarine the "American Turtle." In England, the American inventor, Robert Fulton, in the presence of William Pitt, then chancellor, and a large number of spectators, blew up a brig by exploding a mine which he had placed under her bottom by the use of his submarine boat. Both of these inventors were discouraged and were refused the necessary assistance to enable them to develop further their ideas regarding submarines, although they had undoubtedly shown that there were great possibilities in the underwater type of vessel. Various unsuccessful attempts were made to utilize submarines during the Civil War, but at that time their only means of offense was a torpedo on the end of a long spar, and the solitary recorded hit was disastrous to both the warship and the submarine. Just as the breech-loading rifle, a very ancient device, failed to come into its own until the invention of the metallic cartridge, the submarine had to await the invention of the automotive torpedo before it became a really efficient means of offense.

Modern submarines are divided into two general classes: the Coast Defense type of from 300 to 700 tons surface displacement, and the Cruising type of from 800 to 2,500 tons displacement, having a radius of action of from 3,000 to 8,000 miles and capable of operating along the Atlantic Coast of the United States from European bases. The smallest type of modern coast defense submarines, which can hold the necessary apparatus to have a useful range of action, weighs about 300 tons; the handling of such weights from the deck of a vessel at sea cannot be accomplished with any degree of safety. Generally, the German U-boat—which is the designation for the enemy ocean-going submarines—is made with a double hull. The bottom space between the inner and outer hulls is used for water ballast; the top space is used for carrying fuel oil. Water ballast displaces the fuel oil as it is consumed by the internal combustion engine. The frequent statements that oil has been seen on the sea, after a U-boat has been attacked, may have merely indicated that the submarine's outer hull had been punctured. However, there is some oil slick on the surface when the exhaust mufflers are flooded.

The submarine, when submerged so that its periscope does not project above the water, is blind, but not deaf, for it is provided with sound detectors or microphones that will indicate the approach and direction of a ship, if its own machinery is at rest or moving slowly, with noise so slight as not to interfere with the listening. The propagation of sound through water is more rapid and efficient than through air, because water does not have so great a cushioning effect upon sound waves. While we speak of sound waves, and can measure their amplitude in some cases, there is no bodily displacement of the medium through which they travel. In general the harder, denser and more incompressible the medium, the more efficient the transmission of the sound waves. The underwater listening devices which are so frequently availed of in submarines, and patrol boats and destroyers used to attack them consist primarily of a large diaphragm or its equivalent in some other physical form.

LOSSES OF AMERICAN VESSELS DURING THE WAR.

THE following is a list, according to the most authentic information on file in the Office of Naval Intelligence, of all naval losses from April 6, 1917, to November 11, 1918:

NAME.	Class.	Tonnage.	Lives Lost.	Date.	Remarks.
BY SUBMARINES.					
Antilles	Transport	6,878 gross	70	Oct. 17, 1917	Torpedoed.
Alcedo	Armed yacht	981 gross	20	Nov. 5, 1917	Torpedoed.
Jacob Jones	Destroyer	1,265 gross	62	Dec. 6, 1917	Torpedoed.
Lake Moor	Cargo steamer	1,955 gross	45	April 11, 1918	Torpedoed.
Rockefeller, Wm	Tanker	7,157 gross	3	May 18, 1918	Torpedoed.
President Lincoln	Transport	18,167 gross	26	May 31, 1918	Torpedoed.
Covington	Transport	16,339 gross	6	July 1, 1918	Torpedoed.
Westover	Army supply	8,800 gross	8	July 11, 1918	Torpedoed.
Westbridge	N. O. T. S.	5,660 gross	4	Aug. 15, 1918	Torpedoed.§
Montanan	Army account	6,659 gross	5	Aug. 16, 1918	Torpedoed.
Mt. Vernon*	Transport	18,372 gross	36	Sept. 5, 1918	Torpedoed.
Buena Ventura	Army cargo	4,881 gross	64	Sept. 16, 1918	Torpedoed.
Tampa	C. G. C.	1,181 displacement.	112	Sept. 26, 1918	Torpedoed.
Ticonderoga	Animal cargo	5,130 gross	‡216	Sept. 30, 1918	Shelled and torpedoed.
BY MINES.					
Pratt, Herbert L.†	Tanker	7,145 gross	None.	June 2, 1918	
Californian	Cargo	5,658 gross	None.	June 23, 1918	
San Diego	Cruiser	13,680 displacement.	50	July 19, 1918	
Minnesotaf	Battleship	16,000 displacement.	None.	Sept. 29, 1918	
Saetia	N. O. T. S.	2,873 gross	.....	Nov. 9, 1918	
BY COLLISION.					
Mohawk	Revenue cutter	1,148 displacement.	None.	Oct. 1, 1917

Lake Borgne	Army account	2,100 gross	None.	Oct. 22, 1918	Struck rock.
Ophir	N. O. T. S.	7,089	None.	Nov. 11, 1918	Internal explosion.

* Torpedoed; made port. † Mined; made port. ‡ 216 lost, 2 captured. § Salvaged.

262,693 CASUALTIES TO OUR FORCES, NOT COUNTING PRISONERS.

It is announced that up to Nov. 26 the American casualties reported to Gen. Pershing's headquarters aggregated 262,693. This is 26,605 more than the total made public a week before by Gen. March, Chief of Staff.

In making this announcement Gen. March indicated that additional casualties might be reported, as checking up had not yet been completed. With many units on the move in France checking up was rendered more difficult.

Gen. March was unable to give out up to Dec. 15 the exact total of men known to have been confined in Germany as prisoners of war, due to the fact that Gen. Pershing's cablegram was not clear as to these figures.

These are the figures, as given out by the Chief of Staff:

Killed in action	28,363	Died from other causes	1,980
Died of wounds	12,101	Wounded	189,955
Died of disease	16,034	Missing in action	14,290

Prisoners (unintelligible).

The principal change in the revised list is the addition of 13,100 men missing in action. It was declared that Gen. Pershing has thus far forwarded no explanation of the increase under this heading, and it is assumed that an error was made in transmission. The total of these given last week was 1,160.

ZIONIST ORGANIZATION OF AMERICA.

(Headquarters, 55 Fifth Avenue, fifteenth floor, New York.)

Honorary President—Justice Louis D. Brandeis, Washington. *President*—Judge Julian W. Mack, New York. *Vice-Presidents*—Dr Stephen S. Wise, New York; Dr. Harry Friedenwald, Baltimore. *Treasurer*—E. W. Lewin-Epstein, New York. *Assistant Treasurer*—Louis Robison, New York. *Executive Secretary*—Jacob de Haas, New York. *Secretary for Organization*—Louis Lipsky, New York. *Secretary for Education*—Miss Henrietta Szold, New York. *Comptroller*—Robert D. Kesselman, New York.

PRESIDENT WILSON'S ARRIVAL IN FRANCE.

President Wilson and his party arrived at Brest, France, on the George Washington on Friday, Dec. 13, 1918. Under the shadow of the saluting guns of the Chateau of St. Anne, with its walls dating from the Phoenician wars before the Christian era, the George Washington steamed to her anchorage in the Brest roadstead, escorted by ten American battleships, twenty-nine destroyers, five French and one Italian warship, each thundering the Presidential salute. While the guns roared, the American President gazed upon the marine spectacle with the enthusiasm of a boy. With an agile step he debarked at the municipal pier at 3.15 P. M. to receive a welcome from picturesque Breton women in their native costumes, Red Cross nurses, French marines and Colonial troops, including the Spahis, Turcos, Senegalese and Cochin China contingent. The Red Cross women presented flowers to the President and Mrs. Wilson. Through a lane formed by 20,000 doughboys an open motor car in which the President sat with the French Foreign Minister, M. Stephen Pichon, and Mayor Hervagault of Brest, traversed the hilly streets of the town choked with mud and under glowering skies and misty rain.

President Wilson was hailed everywhere as "the champion of the people's rights and of international justice." In his ears dinned cries of "Hurrah for Wilson!" "Vive le President-Wilson!" "Vivent les Americans!" At almost every foot Breton girls tossed flowers into the motor and into that in which Mrs. Wilson followed. The brief ceremonies were entirely in the hands of the French. Foreign Minister Pichon and Minister of Marine Leygues delivered short addresses of welcome on board the George Washington, while an address extending the freedom of the city and the keys were delivered by Mayor Hervagault at the landing stage from which President Wilson first stepped upon French soil from the tender on which he left the George Washington. In his response to the address of the Mayor of Brest the President said:

"It is delightful for me to realize that I have come, and will join my counsel with that of your own public men in bringing about a peace settlement which shall be consistent alike with the ideals of France and the ideals of the United States." The Government of France sent to greet the President two Cabinet Ministers and a committee of twenty-two Deputies, although the ceremonies were officially confined to the municipal welcome. Gens. Pershing, Bliss and Helmick reported to the Commander in Chief aboard the George Washington, along with Admirals Sims, Benson, Mayo and Wilson. The President conferred with Gen. Pershing ten minutes aboard the ship's tender. The first person to greet the President in French waters was his daughter, Miss Margaret Wilson, who has been singing for the American soldiers in France. Extraordinary precautions were taken to guard the President.

The 40,000 American doughboys in the camps around Brest were given a holiday to hail their Commander in Chief. The greeting of the French populace to the President was fervent. The city was elaborately decorated, the feature being a Statue of Liberty outlined by electric bulbs on the walls of the ancient fort overlooking the harbor. The Presidential train departed for Paris at 4 P. M.

Just before the President left for Paris a deputation of French Socialists handed him a resolution indorsing the fourteen peace terms. As the train pulled out, a group of costumed Breton children, with inimitable drollery, under the direction of a stalwart doughboy, sang "Hail, hail, the gang's all here. What the hell do we care? What the hell do you care?" from start to finish.

Army officers explained that some of the doughboys when American troops first landed in France whimsically taught the children who flocked down to the quays to sing "Hail, hail" as the American national anthem, and that it became the custom for children to meet all incoming transports with their drums and what American flags they could find, singing this American "anthem" with all solemnity. In some ways the news spread quickly, and fresh troops arriving never undeceived the children, it being said that even officers, when necessary, stood at attention while they sang.

THE PRESIDENT'S RECEPTION AT PARIS.

President Wilson made his entrance into Paris at 6.15 A. M., Dec. 14. His arrival was greeted with a salvo of artillery in salute, while dense throngs hailed his coming with cheers. Great crowds of people were massed about around the Bois de Boulogne station awaiting the President, and as he alighted from his train a roar went up. President Wilson was greeted by President and Madame Poincare, Premier Clemenceau, Andre Tardieu, French High Commissioner to the United States, and other high officials. The formalities over, the President entered a carriage with President Poincare. Mrs. Wilson, with Miss Margaret Wilson, daughter of the President, followed in another carriage, accompanied by Madame Poincare. The party drove immediately to the residence of Prince Murat, in the Rue de Monceau, where the President will reside while in the French capital. President Poincare greeted President Wilson as the latter stepped from the train, the French Executive firmly grasping him by the hand. William Martin, attached to the Foreign Office as introducer of Ambassadors, presented Premier Clemenceau, who welcomed President Wilson in English, saying he was extremely glad to meet him.

During the ride from the station the President was smiling and almost continuously took off his hat and bowed to the right and left. Waves of human voices answered his salutation, broken by the sharp bark of guns at intervals of fifteen seconds. The procession left the Porte Dauphine a few minutes after the President arrived. The scene was impressive, as the crowds cheered and then uncovered as the bands played "The Star-Spangled Banner." A throng was gathered at the Arc de Triomphe, where the procession turned down the Champs Elysees, continuing down that thoroughfare until the Bridge Alexander III. was reached. After crossing the Seine the procession moved past the building of the Chamber of Deputies, and again crossed the Seine to the Place de la Concorde. A tremendous throng was gathered there, and they set up a mighty roar. The route to the Presidential residence was lined with French troops in solid array along its entire length.

The passage of the Presidential train from Brest to Paris had given evidence of the interest the population attached to the President's visit. At every station along the railway crowds of men, women and children waited through the night for the passing of the train, hoping to catch a glimpse of the American Executive. Their cheers could be heard as the train sped by in the darkness. The platform of the station at Paris was carpeted in red, and palms adorned the broad stairway. The band of the Republican Guards was playing "The Star-Spangled Banner" as the train, decorated with the Stars and Stripes, drew into the station. Immediately the artillery gave voice, and a saluto of 100 guns announced the President's arrival.

President Wilson reached Prince Murat's residence at 10.45 o'clock. His arrival was the signal for the hoisting of the American flag, amid cheers from the crowd.

In the procession from the railway station to the Prince Murat home, in the Rue de Monceau, the first carriage was occupied by President Wilson and President Poincare, and the second carriage by Mrs. Wilson, Madame Poincare, Madame Jusserand and Miss Margaret Wilson. Those in other carriages were: Third, the American Ambassador, Mr. Sharp; Premier Clemenceau and Gens. Mordacq and Desparge; fourth, Secretary of State Lansing and Foreign Minister Pichon; fifth, Gen. Bliss and Mr. Henry White; sixth, Gen. Pershing and Ambassador Jusserand; seventh, Admiral Benson and Capt. Tardieu, French High Commissioner to the United States, and eighth, Rear Admiral Grayson, Gen. Harts and Lieut. Col. Lobez.

PRESIDENT WILSON'S FIRST ADDRESS AT PARIS, DEC. 14, 1918.

At the luncheon Dec. 14, 1918, at the Palace of the Elysee, Paris, which the President of France and Mme. Poincare gave in honor of President Wilson and Mrs. Wilson, the American Executive spoke as follows in reply to an address by President Poincare:

"Mr. President: I am deeply indebted to you for your gracious greeting. It is very delightful to find myself in France and to feel the quick contact of sympathy and unaffected friendship between the representatives of the United States and the representatives of France. You have been very generous in what you were pleased to say about myself, but I feel that what I have said and what I have tried to do has been said and done only in an attempt to speak the thought of the people of the United States truly, and to carry that thought out in action.

"From the first the thought of the people of the United States turned toward something more than the mere winning of this war. It turned to the establishment of eternal principles of right and justice. It realized that merely to win the war was not enough; that it must be won in such a way and the questions raised by it settled in such a way as to insure the future peace of the world and lay the foundations for the freedom and happiness of its many peoples and nations. Never before has war worn so terrible a visage or exhibited more grossly the debasing influence of illicit ambitions. I am sure that I shall look upon the ruin wrought by the armies of the Central Empires with the same repulsion and deep indignation that they stir in the hearts of the men of France and Belgium, and I appreciate, as you do, sir, the necessity of such action in the final settlement of the issues of the war as will not only rebuke such acts of terror and spoliation, BUT MAKE MEN EVERYWHERE AWARE THAT THEY CANNOT BE VENTURED UPON WITHOUT THE CERTAINTY OF JUST PUNISHMENT.

"I know with what ardor and enthusiasm the soldiers and sailors of the United States have given the best that was in them to this war of redemption. They have expressed the true spirit of America. They believe their ideals to be acceptable to the peoples everywhere, and are rejoiced to have played the part they have played in giving reality to those ideals in co-operation with the armies of the Allies We are proud of the part they have played, and we are happy that they should have been associated with such comrades in a common cause.

"It is with peculiar feeling, Mr. President, that I find myself in France joining with you in rejoicing over the victory that has been won. The ties that bind France and the United States are peculiarly close. I do not know in what other comradeship we could have fought with more zest or enthusiasm. It will daily be a matter of pleasure with me to be brought into consultation with the statesmen of France and her allies in converting the measures by which we may secure permanence for these happy relations of friendship and co-operation, and to secure for the world at large such safety and freedom in its life as can be secured only by the constant association and co-operation of friends.

"I greet you, not only with deep personal respect, but as the representative of the great people of France, and beg to bring you the greetings of another great people to whom the fortunes of France are of profound and lasting interest. I raise my glass to the health of the President of the French Republic and to Mme. Poincare and the prosperity of France."

PRESIDENT POINCARE'S ADDRESS OF WELCOME.

In his address to President Wilson, President Poincare had said: "Mr. President: Paris and France awaited you with impatience. They were eager to acclaim in you the illustrous democrat whose words and deeds were inspired by exalted thought, the philosopher delighting in the solution of universal laws from particular events, the eminent statesman who had found a way to express the highest political and moral truths in formulas which bear the stamp of immortality. They had also a passionate desire to offer thanks in your person, to the great Republic of which you are the Chief, for the invaluable assistance which has been given spontaneously during this war to the defenders of right and liberty. Even before America had resolved to intervene in the struggle she had shown to the wounded and the orphans of France a solicitude and a generosity the memory of which will always be enshrined in our hearts. The liberality of your Red Cross, the countless gifts of your fellow citizens, the inspiring initiative of American women, anticipated your military and naval action and showed the world to which side your sympathies inclined.

"And on the day when you flung yourself into the battle, with what determination your great people and yourself prepared for united success! Some months ago you cabled me that the United States would send ever increasing forces, until the day should be reached on which the Allied armies were able to submerge the enemy under an overwhelming flow of new divisions, and, in effect, for more than a year a steady stream of youth and energy has been poured out upon the shores of France. No sooner had they landed than your gallant battalions, fired by their chief, Gen. Pershing, flung themselves into the combat with such a manly contempt of danger, such a smiling disregard of death, that our longer experience of this terrible war often moved us to counsel prudence.

"They brought with them, in arriving here, the enthusiasm of crusaders leaving for the Holy Land. It is their right to-day to look with pride upon the work accomplished and to rest assured that they have powerfully aided by their courage and their faith. Eager as they were to meet the enemy, they did not know when they arrived the enormity of his crimes. That they might know how the German Armies make war it has been necessary that they see towns systematically burned down, mines flooded, factories reduced to ashes, orchards devastated, cathedrals shelled and fired—all that deliberate savagery, aimed to destroy national wealth, nature and beauty, which the imagination could not conceive at a distance from the men and things that have endured it and to-day bear witness to it. In your turn, Mr. President, you will be able to measure with your own eyes the extent of these disasters, and the French Government will make known to you the authentic documents in which the German General Staff developed with astounding cynicism its programme of pillage and industrial annihilation. Your noble conscience will pronounce a verdict on these facts. Should this guilt remain unpunished, could it be renewed, the most splendid victories would be in vain.

"Mr. President, France has struggled, has endured and has suffered during four long years; she has bled at every vein; she has lost the best of her children; she mourns for her youths. She yearns now, even as you do, for a peace of justice and security. It was not that she might be exposed once again to aggression that she submitted to such sacrifices. Nor was it in order that criminals should go unpunished, that they might lift their heads again to make ready for new crimes, that under your strong leadership, America armed herself and crossed the ocean. Faithful to the memory of Lafayette and Rochambeau, she came to the aid of France, because France herself was faithful to her traditions. Our common ideal has triumphed. Together we have defended the vital principles of free nations.

"Now we must build together such a peace as will forbid the deliberate and hypocritical renewing of an organism aiming at conquest and oppression. Peace must make amends for the misery and sadness of yesterday, and it must be a guarantee against the dangers of to-morrow. The association which has been formed for the purpose of war between the United States and the Allies, and which contains the seed of the permanent institutions of which you have spoken so eloquently, will find, from this day forward, a clear and profitable employment in the concerted search for equitable decisions and in the

mutual support which we need if we are to make our rights prevail. Whatever safeguards we may erect for the future no one, alas, can assert that we shall forever spare to mankind the horrors of new wars. Five years ago the progress of science and the state of civilization might have permitted the hope that no Government, however autocratic, would have succeeded in hurling armed nations upon Belgium and Serbia.

"Without lending ourselves to the illusion that posterity will be forever more safe from these collective follies, we must introduce into the peace we are going to build all the conditions of justice and all the safeguards of civilization that we can embody in it. To such a vast and magnificent task, Mr. President, you have chosen to come and apply yourself in concert with France. France offers you her thanks. She knows the friendship of America. She knows your rectitude and elevation of spirit. It in the fullest confidence that she is ready to work with you. I lift my glass, Mr. President, in your honor, and in honor of Mrs. Wilson. I drink to the prosperity of the Republic of the United States, our great friend of yesterday and of other days, of to-morrow and of all time."

"CO-OPERATION OF NATIONS NECESSARY," PRESIDENT TELLS FRENCH SOCIALISTS.

President Wilson addressed a Socialist delegation which called on him on Dec. 14, 1918. He said:

"Gentlemen: I received with great interest the address which you have just read to me. The war through which we have just passed has illustrated in a way which never can be forgotten the extraordinary wrongs which can be perpetrated by arbitrary and irresponsible power. It is not possible to secure the happiness and prosperity of the world, to establish an enduring peace, unless the repetition of such wrongs is rendered impossible. This has indeed been a people's war. It has been waged against absolutism, and these enemies of liberty must from this time forth be shut out from the possibility of working their cruel will upon mankind.

"In my judgment, it is not sufficient to establish this principle. It is necessary that it should be supported by a co-operation of the nations which shall be based upon fixed and definite covenants and which shall be made certain of effective action through the instrumentality of a League of Nations. I believe this to be the conviction of all thoughtful and liberal men. I am confident that this is the thought of those who lead your own great nation, and I am looking forward with peculiar pleasure to co-operating with them in securing guarantees of a lasting peace of justice and right dealing which shall justify the sacrifices of this war and cause men to look back upon those sacrifices as the dramatic and final processes of their emancipation."

MAJOR OPERATIONS IN 1918 OF UNITED STATES FORCES IN FRANCE.

April 28-29—A sector in the vicinity of Breteuil, northwest of Montdidier, was occupied by the 1st Division.

May 28—Cantigny was captured by the 1st Division. A detachment of our troops, reinforced by French artillery, successfully attacked the enemy on a front of about 2,220 yards. We occupied Cantigny, capturing some 200 prisoners, and inflicted severe losses on the enemy.

June 10—The 2d Division attacked in Bois de Belleau, advancing the line 900 yards on a front of 1½ miles, capturing 300 prisoners, 30 machine guns, 4 trench mortars and stores of small arms, ammunition and equipment. Held all of Hill 204 down to the village on the northeast slope, thus preventing the enemy from concentrating his forces in the northern part of Chateau-Thierry.

June 11—The 2d Division continued its advance in the Bois de Belleau, capturing more prisoners and machine guns and two 77-mm. field pieces.

Our aviators executed their first bombing raid, dropping numerous bombs on the railway station at Dommary-Baroncourt, northwest of Metz. All of our planes returned in safety.

The artillery of the 2d Division shelled the enemy in their areas, preventing concentration near Torcy, Monthiers, Hill 128 and La Gonetrie Farm. It discovered and dispersed a group of 210 machine guns in the wood south of Etrepilly. The 2d Division captured the last of the German positions in the Bois de Belleau, taking 50 prisoners, machine guns and trench mortars.

July 18—French and American troops advanced under the cover of a heavy storm on the front between Soissons and Chateau-Thierry. The greatest advance was in the northern part of the sector, where a depth of five miles was attained, and we reached the heights southwest of Soissons, dominating the railroad and highways.

July 24—The Advance of the Franco-American forces continued, and in the evening the line ran east of Buzancy to Tigny, to Hartennes, Grand Rozoy, Ouichy-le-Chateau, Armentieres, Coincy, Coupoil, and then joined the old line at Jaulgonne. West of Rheims Marfaux was retaken and the line ran from Aubilly, through Mezy, and joined the old line at Coulommes.

July 25—The line ran from the Ourcq to the Marne, where the Allied troops advanced 6 kms. in the centre and 3 to 4 kms. on the flanks. The line in the evening ran from Armentieres to Bruyeres, the eastern edge of the Bois de la Tournelle, the eastern edge of Beuvardes, the eastern edge of la Charnel, the cross roads at Gros Chene, le Boulangere, the northern edge of Treloup, Chassins.

July 26—The line ran: Nanteuil, Notre Dames, Hill 123, Hill 118, la Misere, Hill 100, southwestern part of Bois de la Tournelle, Hill 111, le Charnel. Hard fighting continued all day and the French and Americans steadily advanced on Fere.

July 27—The 42d Division tried to cross the Ourcq, but was driven back by heavy artillery fire.

July 28—The 42d Division renewed the assault, crossed the river, and after vigorous fighting took Seringes-et-Nesles, Nesles and Sergy.

The 28th Division held the line about 1 kilometer north of the Ourcq. During the day slow progress was made, the enemy slowly falling back after bitter rearguard action.

July 29—Franco-American troops advanced 3 kilometers from Ouichy to Villers Agron and Bougreux, Saponay, Seringes, Nesles and Cierges were included within our lines.

July 30—Our pressure continued on the right bank of the Ourcq. The railroad station at Fere and Cayenne Farm remained in our possession. We lost Seringes-et-Nesles, but reoccupied Sergy, Hill 312 and the woods 8 kilometers north of Roncheres.

July 31—The 28th Division retook Seringes-et-Nesles. The 32d Division attacked in Crimpettes Woods with success; the woods were taken and troops advanced to Clerges. German counter attacks were brilliantly repulsed with the bayonet, and an immense amount of material and equipment was taken from the enemy.

Aug. 3—After continuous fighting late in the evening Soissons was taken, and a line extending along the Vesle to between Braisne and Bazoches was being consolidated. South of the Aisne our troops drove back the enemy rearguard. Acting with the 4th Division, the 32d Division reached a line from Ville Savoye to a point just north of St Gilles.

Aug. 4—A large enemy patrol attacked in the vicinity of Coulees, but was driven off by a combat group of the 5th Division, which had been re-enforced. Our troops were very active in patrolling, having sent out over seven reconnaissance, combat and ambush patrols.

The 32d Division took Fismes. In an eight-day battle this division forced the passage of the Ourcq, took prisoners from six enemy divisions, met, routed and decimated a crack division of the Prussian Guards, a Bavarian Division and one other

enemy division, and drove the enemy line back 16 kilometers.

Aug. 6—The 28th Division launched an attack, the objective of which was the north bank of the Vesle. The attack was met by exceedingly heavy machine gun and artillery fire. On the right our troops succeeded in crossing the river and advancing to the highway which runs from Rheims to Soissons. On the left the advance was held up by the enemy's fire.

Aug. 7—The units on the left advanced, across the river and occupied the railroad lines on the north bank. The casualties resulting from this operation were considerable. A violent enemy counter attack was completely repulsed and a number of prisoners and machine guns were left in our hands.

Aug. 8—As a result of successful operations on the evening of Aug. 8, 11 companies of infantry and some machine gun detachments of the 28th Division reached the north bank of the Vesle.

Aug. 10—The 28th Division launched an attack in Fismette. A creeping barrage moved ahead of them. They made some progress, but were soon exposed to flanking fire from both the east and the west and were forced to fall back into Fismette. The position here was very difficult. Flanking machine gun fire came from both sides and heavy casualties were reported. A box barrage was placed around the town and ammunition was sent up. The town was held by one battalion, with one machine gun platoon, which received orders to hold the position at all cost.

Aug. 17—After strong artillery preparation the infantry of the 5th Division captured the Village of Frapelle and consolidated the lines north of the road running into the town from the southeast.

Aug. 19—The enemy continued shelling Frapelle positions and the artillery of the 5th Division replied actively.

Aug. 21—The 5th Division repulsed hostile attack with heavy loss to the enemy and with no casualties to ourselves.

The 32d Division, acting with the 10th French Army, advanced to and held Juvigny.

The 77th Division cleared the small wood between the Vesle and the railroad west of Chateau du Diable.

Sept. 3—During the five days prior to Sept. 3 the 32d Division made daily advances against the enemy, gaining 6 kilometers through very difficult terrain and against violent opposition. It captured 11 officers and 920 enlisted men. A large amount of guns and munitions were captured. A patrol of the 77th Division penetrated to Bazoches.

Sept. 5—French and American units advanced in the Oise-Rheims area as far as Conde. Strong patrols of the 77th Division were pushed forward north of the Vesle and were encountered by machine-gun resistance. Our casualties were slight.

The 28th Division crossed the Vesle in force and pursued the enemy to the north.

Sept. 6—The artillery of the 28th Division directed harassing and destructive fire on the Aisne bridges, while the enemy harassed the villages in our rear areas, using a great number of gas shells.

Sept. 7—The 28th Division repulsed two enemy counter attacks. The 77th Division drove the enemy out of La Cendiere Farm and have passed the Aisne Canal.

Sept. 12—After four hours' bombardment our troops advanced on the south and west flanks of the St. Mihiel salient at 5 A. M. By 7.30 A. M. the forces operating on the south had reached the southern edge of the Bois Juli, the Quart de Reserve, and the northern edge of the Bois de Mort Mare. By noon they had reached Essey and Vieville and the army operating in the difficult ground in the west had captured Les Eparges. At 6 P. M. the troops had reached a point 1 kilometer east of Senzey and had taken St. Remy and Combres. During the night the troops on the western flank of the salient advanced 5 miles in five hours, reaching Vigneulles by 3 A. M.

Sept. 14—There was general advance along the entire line, and the American Army established itself on the following front: Manheulles, Fresnes, Pintheville, St. Hilaire, Doncourt, northeast of Woel, south end of the Etang de Lachaussee, Vandieres, and across the Moselle at Champey.

Sept. 17—American troops advanced along the Moselle within 300 yards of Paguy.

Sept. 18—The 26th Division made two raids during the night. One against St. Hilaire was without result, as the enemy had retired; the other against the Bois de Warville resulted in the capture of 15 prisoners.

Sept. 19—The 92d Division repulsed an attempted enemy raid in the St. Die sector.

Sept. 20—The 92d Division repulsed two enemy raids in the region of Lesseux.

Sept. 26—The 1st Army attacked northwest of Verdun on a front of 20 miles and penetrated to an average depth of 7 miles.

Sept. 27—The 107th Regiment of the 27th Division attacked east of Bellicourt and attained its objectives.

Sept. 29—In the Argonne, the Americans met with furious resistance. Their losses were heavy, and they were unable to do more than hold their own.

Sept. 30—The 27th and 30th Divisions took prisoners north of St. Quentin totalling 210 officers and more than 1,200 men.

Oct. 1—The 28th Division repulsed a hostile counter attack on the entire divisional front in the Aire Valley, with very heavy losses to the enemy.

Oct. 3—The 2d Division, operating with the 4th French Army, made an advance of 2 kilometers, reaching Medeah Farm in the afternoon. In the evening the 2d Division advanced about 3 kilometers, and their line ran from Medeah Farm southwest along the road to Blanc Mont. They captured 1,000 prisoners and casualties were estimated at 500.

Oct. 4—The 1st Division attacked on both sides of Exermont, and made progress in spite of strong opposition from the enemy, who resisted with machine guns in organized opposition. Approximately 300 prisoners were taken, and our casualties were 1,500.

Oct. 5—The 1st Division captured Arietal Farm, and the line was advanced 400 yards beyond. The 6th Division repulsed a large enemy raid on Sondernach.

Oct. 7—A brigade of the 82d Division advanced 7 kilometers, occupying Hill 223, north of Chatel Chehery; 46 prisoners were captured, including 1 officer. Our casualties were light. Later the enemy counter attacked and reoccupied Hill 223, north of Chatel Chehery.

Oct. 8—The 59th Brigade of the 30th Division attacked, at 5 A. M., over a front of 5,000 yards, gained all first objectives by 9 A. M., and second objectives by noon. Fifty officers, 1,500 men and four 101-millimeter guns were taken.

Oct. 8-9—The 2d Corps advanced about 7 miles on a front of 4,000 yards and captured about 2,000 prisoners and 30 guns.

Oct. 9—In spite of strong resistance the 1st Division advanced in the sector east of Fleville and captured 230 prisoners. The 33d Division, operating with the 17th French Army Corps, attacked early in the morning north of Consenvoye and reached its final objective about 9 A. M. About 650 prisoners were taken.

Oct. 10—The 1st Corps reached Cornay-La-Besogne Ridge and passed Malassise Farm, east of Grand Ham. The 60th Brigade of the 30th Division advanced six kilometers, reaching the Selle River, and held the St. Benin-St. Souplet-La Hale-Menneresse line. Up to the evening of the 9th, 50 officers, 1,800 men and 32 guns were captured.

Oct. 12—The 4th Division repulsed two counter attacks by machine gun fire, with severe loss to the enemy.

Oct. 13—An attack on Grandpre this morning met very heavy machine gun fire, and troops of the 2d Corps were finally forced to retire south of the Aire. A hostile counter attack at 8 P. M. south of Landres-et-St. Georges was repulsed. The 81st Division repulsed an enemy raid in St. Die sector. The 77th Division took Grandpre.

Oct. 17—The 29th Division advanced to the summit of Bois de la Grande Montagne, east of the

Meuse. The 42d Division took Cote de Chatillon. The 2d Battalion of the 76th Division reached the northern edge of Bois des Loges, west of Champigneulle. In an attack on a 4,000-yard front from St. Souplet to Molain our troops advanced 3,000 yards against very stiff resistance. All counter attacks repulsed. Prisoners taken were estimated at 2,500.

Oct. 19—The 30th Division attacked with the British at dawn and advanced 2,000 yards. Prisoners captured since the morning of the 17th totaled 44 officers and over 1,500 men.

The 78th Division pushed their lines forward to Bellejoyeuse Farm and began to mop up the Bois des Loges.

Oct. 21—In attacks on the Bois des Rappes the 5th Division met with stubborn resistance by machine guns, supported by artillery and infantry fire. It captured the entire position, with 170 prisoners, including five officers. An enemy counter attack, supported by heavy artillery fire, was repulsed with heavy losses.

The 5th and 3d Divisions took Hill 297 and Bois des Rappes.

Attacking in the evening, the 89th Division occupied the northern and eastern edge of the Bois de Bantheville.

Oct. 23.—Troops of the 3d Corps reached the ridge north of the village of Bantheville, taking 171 prisoners.

The 29th Division captured the ridge of Bois d'Etrayes and Hill 361.

Oct. 27—The 78th Division entered Bellejoyeuse Farm, northeast of Grandpre, and found it unoccupied. The occupation of the right of way north and northwest of Grandpre was completed.

Oct. 30—On Oct. 30 patrols were active along the entire front of the 28th Division. The 33d Division, in the face of heavy artillery and machine gun fire, north of Grandpre, advanced its lines and occupied the Bellejoyeuse Farm. On Oct. 30 2,000 high explosive and gun shells fell in the vicinity of Fresnes. One of the divisional patrols captured five prisoners.

Nov. 1—The troops of the 1st Army captured Clery-le-Grand. North of Ancreville they took 53 additional prisoners and continued their advance into the Bois des Bantheville. During the night of Nov. 1-2 the troops of the 37th Division consolidated their positions and effected a crossing of the River Scheldt, confronted by enemy machine gun and rifle fire. The 91st Division, supported by artillery and machine gun fire, rapidly advanced over six kilometers in spite of enemy artillery and machine gun fire.

Nov. 2—On the evening of Nov. 2 the troops of the 78th Division drove the enemy from the Bois des Loges and closely followed his retreat. The 92d Division, in spite of machine gun resistance, pushed forward and advanced the line 3 kilometers.

Nov. 3—The 91st Division, in spite of active machine gun resistance, forced their way toward the bank of the Scheldt in the vicinity of Eyne.

Nov. 4—On Nov. 4 a brigade of the 79th Division attacked an enemy sector, taking 81 prisoners and 8 machine guns, encountering strong resistance and repulsing several counter attacks.

Nov. 5.—On Nov. 5 the troops of the 77th Division engaged in severe fighting, overcame strong enemy resistance along the entire line. The artillery was active, firing on the enemy's retreating columns. Harassing artillery fire was returned by the enemy. Aviation was active on both sides. The enemy flew over our front lines and delivered machine gun fire on our advancing troops. Two enemy planes were brought down.

Nov. 6—Our troops of the 1st Corps continued their successful advance, forcing the enemy to retire. The towns of Flabas, Raucourt, Haraucourt and Autrecourt were taken, and patrols pushed on as far as the Meuse. Large quantities of material were captured during the advance.

Following heavy bombardment on the enemy's divisions the troops of the 5th Division attacked, rapidly overcoming the enemy's resistance, capturing Lion-devant-Dun, Murvaux, Fontaine and Viloesnes-sur-Meuse, taking more than 250 prisoners.

Nov. 7—The troops of the 2d Division cleared the west bank of the Meuse of the remaining machine guns and snipers in the vicinity of Mouzon. The 5th Division, supported by artillery fire, continued their advance despite the enemy's continued resistance, principally with machine guns. Most of the artillery crossed to the east bank of the Meuse, following in support of the infantry. Additional prisoners were taken, including 2 officers and 132 men.

Nov. 8—The patrols of the 2d Division crossed the Meuse south of Mouzon. The troops of the 33d Division, aided by barrage fire, carried out a successful raid on Chateau Aulnois, capturing 1 officer and 22 men. Strong combat patrols were sent out from the lines of the 92d Division (colored). Prisoners were captured and casualties inflicted on the enemy.

Nov. 9—On midnight of Nov. 9 the patrols of the 5th Division drove back the enemy, inflicting many casualties and capturing 6 prisoners. The troops consolidated and, despite stubborn resistance, principally from machine guns, drove the enemy from Bois du Canol and La Sentinelle and captured Brandeville. In these operations 47 prisoners, 125 machine guns and other material were captured. A strong combat patrol was active along the entire front of the 33d Division, meeting with heavy machine gun resistance from the enemy, and a patrol of one company captured 8 prisoners in the Bois de Warville. The troops of the 79th Division advanced in a generally northeasterly direction, with the right flank in Bois de Damvillers. The 42d and units of the 1st seized the heights south of Sedan.

Nov. 10—The 33d Division carried out a successful raid on Marcheville, occupying the town and taking 80 prisoners, including 3 officers. Strong patrols from the line engaged in sharp fighting. The 37th Division, operating with the 34th French Army Corps, attacked in order to force a crossing of the Scheldt. Violent enfilading machine gun fire, heavy artillery and the flooded condition of the terrain delayed the construction of bridges and crossings. In the face of continuous heavy artillery fire, supported by machine guns, the troops advanced about 2 kilometers. The 90th Division advanced toward Baalou, encountering no resistance. The 92d Division reached Bois Frehaut and captured 710 prisoners.

Nov. 11—The 3d Division advanced 3 kilometers east of Breheville. Despite increased resistance by machine gun and artillery fire the 5th Division continued to advance, capturing 18 prisoners, 3 large-calibre guns, 6 minenwerfers and considerable material.

SALVATION ARMY IN THE UNITED STATES.

SCIENTIFIC PROGRESS IN 1918.

Prepared by the National Geographic Society, of Washington, D. C. GILBERT GROSVENOR, Director and Editor.

ARCHAEOLOGY.

An expedition under the joint auspices of the Smithsonian Institution, of Washington, and the Museum of the American Indian, of New York, in the first season of its excavation among the ruins of the Pueblo city of Hawikuh (one of the famed "Seven cities of Cebola" which figured so prominently in the Spanish conquest led by Coronado and his successors) found large walls in a stratum underlying that of the Pueblo city, indicating that another Indian city stood there in days antedating the Pueblos. The 237 graves opened showed different forms of burial. In some were cremated remains. The Museum of the American Indian has been completed and its collections have been installed. The American Museum of Natural History had an expedition in the field making excavations of Pueblo architecture in the Animas Valley in New Mexico.

In the vicinity of Scarborough, Yorkshire, England, a fall of a cliff resulted in unearthing twenty bronze weapons consisting of battle-axes, spears, chisels, gouges, portions of a sword, etc. The collection evidently formed the stock in trade of a metal worker of the Bronze Age, at least a thousand years before the Christian era.

Australian troops after the advance toward Gaza, about eighteen miles northwest of Beersheba, discovered ruins which led to excavation revealing a pavement evidently covering part of the floor of a church. The mosaic, which is rich in elements of early Christian symbolism, was taken up and removed to Cairo. In the advance from Bagdad the British forces used what is reputed to be the remains of the Tower of Babel as the site of a field wireless station.

Commendatore Giacomo Boni has excavated on the Palatine a beautiful marble torso, 0.86 m. high, a youthful female figure with draperies blown back by the wind. It is apparently of Pentelic marble, and an original Greek work of the end of the fifth century B. C.

The upper left-hand quarter of a Stele of white Attic marble found at Cottenham, near Cambridge, England, bears an archaic relief of an ephebus with his horse. It was probably executed in the latter part of the fifth century B. C., and, if so, is one of the finest monuments surviving to the heroes of Marathon.

Sir A. Stein announces that he has found in the desert of the Helmand, Afghanistan, a series of watch towers extending 62 miles. They date apparently from the early centuries of the Christian era, and were built to protect the fertile part of Seistan. The towers indicate that they were connecting links between the Great Wall of China and the Roman lines of Syria.

Prof. G. A. Reisner continued his excavations at the pyramids of the twenty-fifth and twenty-sixth Egyptian dynasties in the vicinity of Napata. Fifteen kings, of whom the names of only six were known before, have been identified, and the order in which they reigned determined. In the pyramids of Tirhaka more than a thousand ushabtis, five granite stelæ of the kings, two granite altars, two beautiful silver mirrors and many other rare objects were found. Many of these eventually will be deposited in the Museum of Fine Arts at Boston.

The New York Historical Society recently put on exhibition one hundred and thirty Egyptian ushabtis. The oldest of these dates from the twelfth dynasty.

ASTRONOMY.

Many observatories sent out parties to study the total eclipse of the sun which occurred on June 8, 1918. A number of new stars were discovered during the year. Most interesting of these was the one that appeared in the constellation of Aquila on June 8, first observed in this country at the University of Virginia. This star behaved like the one discovered in the constellation of Perseus in 1901, flaring up so as to rival the brightest stars in magnitude and then gradually fading away. A star having the appearance of a minor planet, but with an orbit of a comet-like character, was discovered by Prof. Wolf, at Heidelberg, in January. Its distance from the earth at that time appeared to be about twenty-three million miles. Another star was discovered by the same observer on the fourth of February, which was named Nova Monocerotis. The U. S. Bureau of Standards made investigations with regard to the feasibility of employing, in stellar photography, plates made sensitive to infra-red rays by the application of various dyes, notably dicyanin.

It was shown during the year that instead of a Centauri being our nearest stellar neighbor, the position belongs to a faint star near a Centauri. It is apparently moving through space with the larger star, but somewhat nearer to us. A large meteor fell in northern Canada in February. It was of unusual brilliancy, the light of which, judged by the visibility of distant objects, was about as light as daylight. In the latter part of October, 1917, observations made at Bristol, during a period aggregating 23 hours of watching on 14 nights, revealed 197 meteors. A brilliant daytime meteor passed over part of Scotland in December, 1917, and is said to have fallen on Keithick House, 12 miles northeast of Perth. A piece of the meteorite weighing 2 pounds entered the roof of the lodge. Other fragments were found in neighboring fields. It came down with a noise resembling a peal of thunder, or a distant explosion. Although the sun was shining bright, observers described the course of the meteor as brilliant.

Schaumasse's Comet made a near approach to the earth on March 31. Encke's Comet was observed at Greenwich on March 1. It appeared as a largely diffused nebulosity of 8½ magnitude without visible nucleus or tail. The observatory at Florence, Italy, has been engaged for 3 years in studying the lunar crater, Eimmart. This crater has a diameter of about 24 miles. On the rampart there is a craterlet, which, under very oblique illumination, shows a deep cavity. The observations suggest that the changes in the crater originate in the craterlet. There were a number of auroral displays visible in various parts of the world during the year. One of these occurred on March 7 and was widely visible throughout the United States. It was also visible in London.

At Mt. Wilson observatory the 75-ft. spectograph was in use for visual observation in conjunction with the 150-ft. tower telescope, and the magnetic polarities and strength of field in some 40 sun spots was determined on each day of observation. Observations bear out the conclusions that the intrinsic fainter stars move more rapidly than the brighter, irrespective of their distance from the sun. Good progress was made in the installation and use of the great 100-inch reflector. The New Dominion Astrophysical observatory at Victoria, B. C., was opened in June. Dr. Swasy, of Cleveland, and Dr. Brashear, of Pittsburgh, constructed the telescope and the mirror of the 72-inch reflector, respectively. The observatory, under the direction of Dr. J. S. Plaskett has since been at work chiefly on the task of measuring stellar radial velocity.

CHEMISTRY.

Practically all of the chemical formulas of the German coal tar products have been secured, covering synthetic colors, odors, flavors and explosives. Potash sources were the subject of a world-wide search by the Allied nations. Extraction from flue dust and coking gases seem most promising of the various methods of potash recovery. There are wide

deposits of potash brines in Western lakes, while many seaweeds have much to offer, and certain volcanic lavas promise to prove an important source. Alsace-Lorraine has very rich deposits that have never been worked, so that Germany's monopoly on commercial potash, as well as her military power, is broken. It is estimated that American cement plants and iron works can produce nearly enough potash to take the place of the tonnage imported in peace years. Potash feldspar, treated with common salt, yields potassium chloride, and there are large deposits of potash feldspar in Great Britain.

Liquid air has been adopted in Europe as a saturating medium for cartridges of carbonaceous material used in blasting operations in coal mines.

As a result of an agreement between the National Radium Institute and the U. S. Bureau of Mines for the development of more efficient methods of extracting radium from carnotite ores, the Bureau now has $180,000 worth of radium at an outlay of $38,000. Under the new process extraction costs only about one-third as much as the current price of radium.

Recent studies of the Bureau of Standards show that zinc sulphide, in which the radium of luminous compounds is embedded, gets its luminosity from the heat generated. The Bureau has also found a method of making zinc sulphide into short pieces of wire or thin strips.

ENGINEERING.

The problem of the utilization of volcanic heat has been solved in Tuscany. Wells are dug and lined with iron tubes welded together with an oxyhydrogen flame. When it is judged that the hole has reached a sufficient depth, a sort of rough piston is introduced into it and then rapidly withdrawn, provoking a small volcanic eruption in which the hole emits violently mud, stones and boiling water. The eruption lasts for some minutes and is succeeded by the emission of dry steam.

William D. Sisson of Los Angeles, California, has perfected a deep-sea spherical submarine car for deep sea salvage work. This submarine is built so it can resist great pressure and can work at great depth by means of electro-magnets and electrically driven drills. With it the divers are able to hitch huge cables to the sunken vessels and to pump water out of the pontoons to which the other end of the cables are attached, thus providing a buoyancy which gradually brings the ship to the surface.

June 14, 1918, the Queen of Holland signed an act providing for the draining of the Zuyder Zee. The completion of this project will add 523,440 acres to Holland's present area of dry land. It is necessary to cut off the North Sea by a massive dike 18 miles long, and to erect a barrier across the Amstel Diep. The dike will be built in two parts, it will have a width of 230 feet, and will cost more than eleven million dollars.

The high dam built by the United States Government between the cities of Minneapolis and St. Paul was recently completed. It makes Minneapolis the head of navigation on the Mississippi River. Of the new hollow type the dam is 578 feet across and cost $1,250,000. The lock, on the Minneapolis side, is 350 feet long and 80 feet wide.

GEOGRAPHY.

North America—The National Geographic Society sent an expedition into the region of Mt. Katmai and the Valley of Ten Thousand Smokes in the spring of 1918. It was the purpose of this expedition, the fourth expedition of the National Geographic Society to this region, to continue the work that had been done in the previous expeditions, and to survey a route of approach from the Behring Sea shore instead of the Pacific Coast. The expedition surveyed a broad section across the base of the Alaska Peninsula, and mapped some 1,500 square miles of new territory between Katmai Bay and Naknek. In the Valley of Ten Thousand Smokes it succeeded in obtaining the first accurate measurements of the temperatures of the vents. The highest temperature reported was 430 degrees Centigrade, or 860 Fahrenheit. The 1918 expedition was preliminary to larger endeavors which will be undertaken later under the leadership of Prof. Robert F. Griggs and under the auspices of the National Geographic Society. Mt. Katmai, the consequences of whose eruption have been studied by the series of expeditions of the National Geographic Society, and whose crater, the largest in the world, was first examined by these expeditions, has been found by the Government to be of such great value in the study of the problems of volcanism that it was decided to set aside the volcano and the surrounding region as a national monument. In pursuance of that decision President Wilson on Sept. 24 issued a proclamation creating it as the Katmai National Monument. This national monument embraces approximately 1,700 square miles and is the largest created to date under the national laws. Archdeacon Stuck, in June, reported that he had last winter made a tour of the whole Arctic coast of Alaska.

Senor Luis Urquijo, in connection with the Mexican Government Survey, determined the altitudes of the principal volcanic peaks at the following figures: Orizaba, 18,564.6 feet; Popocatepetl, 17,843.5 feet; Malinche, 14,630 feet.

A series of very severe earthquakes began in Guatemala on Nov. 17, 1917. They continued to increase in intensity until Christmas night, when Guatemala City was aroused by a terrific shock. There were severe shocks on the 27th and 28th, while on January 3 there was a more terrible visitation than anything that had gone before. Again on January 24 there was a very severe quake, and by the time conditions became quiescent again, only about 5 per cent. of the houses in the city, which has a normal population of about 125,000, were left in a condition permitting their repair. During the reign of terror, 43 distinct earthquakes took place. Most of the cracks in the earth's surface proceeded from the general direction of the quiescent volcano Pacaya. On April 21, 1918, the whole of Southern California and Western Arizona was shaken by an earthquake of marked intensity. The greatest damage occurred in the small city of San Jacinto, Riverside County, California, where the loss was estimated at more than $125,000. The shock appears to have been caused by a slip along the San Jacinto fault. An earthquake occurred in Porto Rico in the early autumn, causing a loss of upward of 200 lives and several million dollars property damage.

The winter of 1917-1918 was one of the coldest in American history. It was reported that for the first time in the history of that region the main channel used by ships plying between Boston and New York was closed by a solid bridge of ice between Nantucket and Cape Cod. It has been suggested that the unusually cold winter may have been due to a sun hotter than usual, which brought on self-perpetuating cold waves and draughts.

Europe—The geographers of the world were engaged throughout the latter part of the year studying the racial, economic and physiographic problems of Europe, collecting material upon which to base the remade map of that continent.

Following the action of the French Navy, the British Admiralty summoned a conference of representatives of the various Government departments and scientific societies interested to consider and report upon the desirability of establishing a standard time at sea in the British naval and merchant services. The conference was of the opinion that the establishment of zones at sea, corresponding to the time zones on land, is the most practicable method of obtaining uniformity of time reckoning at sea, and it recommends the adoption of the boundaries of the zones now in use in the French Navy.

Africa—Commandant Tilho made a report upon his exploration of the region between Tibesti and Darfur during the past five years. He found a broken mountainous area of from 10,000 to 13,500 square miles uniting the two territories. The highest elevations do not exceed 5,000 feet, and the

SCIENTIFIC PROGRESS IN 1918.—*Continued.*

territory is occupied by small groups of restless, unsubmissive tribes. Erdi, near the frontier, is a part of the Libyan Desert. It has no oases or date gardens, but is the natural refuge of a number of nomadic tribes of astonishing endurance and audacity. Commandant Tilho proved by his explorations that there is no connection between Lake Chad and the Nile. Instead of a simple mountain range running northwest to southeast, Tibesti is, in reality, four or five chains arranged as a sort of fan pivoted on the massif of Kussi. The volcano Emi-Kussi, 11,100 feet high, has a crater five miles across in one direction and seven and one-half miles in the other. Its depth is 130 feet. Commandant Tilho's cartographic work fills up a large blank in the map of Africa. In a paper on "The Backbone of Africa," Sir Alfred Sharp reports that the fall of the water-level of Lake Nyassa, which had been continuing for many years prior to 1915, has been succeeded by a rise. At the end of the dry season in 1917 the water-level was three feet ten inches higher than at the corresponding date in 1915.

Not since the finding of that strange beast the okapi in the Congo forest has as important a zoological discovery been made in Africa as the finding of a real dwarf elephant. Adult specimens of this new species attain no greater height than six feet, which is about half the height at the shoulder of the ordinary African elephant. Tusks of the female weigh no more than two pounds to the pair, while the tusks of the male reach seven pounds a pair. The tusks of a well-grown African elephant often reach as much as 220 pounds to the pair. The Congo expedition of the American Museum of Natural History penetrated into the northeastern section of the Belgian Congo for a distance of from 1,200 to 2,000 miles, making an extremely interesting collection of large mammals and birds.

Asia—The large collection of birds and animals obtained as a result of the American Museum's Asiatic Zoological Expedition to China, conducted by Roy Chapman Andrews, has been placed on display just as it was received, instead of first putting it through the process of preparation.

A severe earthquake occurred February 12 in Swatow, on the southern coast of China. Several hundred persons were killed and more than a thousand injured. The position of the epicentre, as determined from records made by the Japanese, was 24 degrees north and 116 degrees east. That the duration of the preliminary tremor of an earthquake varies with the distance of the epicentre has long been known, though for earthquakes with neighboring origin no simple formula has been devised for estimating the distances of the epicentre from the duration of the tremor. From a discussion of forty-one recent earthquakes in Japan, Prof. Omori shows that when the distance does not greatly exceed 1,000 kilometers, the distance of the epicentre in kilometers is nearly 7.42 times the number of seconds in the duration of the preliminary tremor.

Polar Regions— During the year, Capt. Roald Amundsen, discoverer of the South Pole, set out in his ship "The Maude" on a voyage through the Arctic Ocean above Europe and Asia from the Atlantic to the Pacific. With the purpose of determining the drift of the ice of the Polar seas he built his vessel with an egg-shaped hull and permitted it to become frozen in the ice. He drifted eastward toward the Siberian Islands. At the same time Storker Storkerson drifted westward from the Pacific Coast toward the same islands on an ice pack, an unusually perilous undertaking.

Vilhjalmur Stefansson, the discoverer of the blond Eskimos, returned to civilization and was engaged at the end of the year lecturing on his discoveries in the Far North. These include a new land discovered in 1915, with its northern tip in about 79 degrees north and 113 degrees west; an island lying between Ellef Ringnes and Axel Heiberg islands, and a number of other small islands in the same region.

Knud Rassmussen, leader of the Danish "Second Thule" expedition, returned to Copenhagen after a harrowing trip into the frozen North. Leaving its base in North Star Bay in April, 1917, the expedition went to St. Georges Bay, where it hoped to find game, but except for a few hares and a seal or two no game was secured, and the party had to return empty-handed. The journey across the ice cap was accomplished in the face of terrible hardships. The dogs were eaten one after another, the last one before they reached Cape Agassiz, near Humboldt Glacier. The men were all exhausted and starving, but Rassmussen, with one Eskimo, pushed forward to Etah to obtain aid for the others. Dr. Wulff, the botanist, finally succumbed, but not before dictating his botanical notes and giving his companions messages for his family. He knew his fate, and, after bidding his associates farewell, resigned himself to it. Lange Koch, the geographer and cartographer of the expedition, succeeded in leading the remainder of the party to safety, with the exception of Hendrick Olsen, who succumbed to the hardships of the journey. Rassmussen succeeded in charting all of the fritus and fjords of northern Greenland. He found no trace of Eskimo migrations on the northwest coast.

GEOLOGY.

The Mid-Continent and Texas region, the Gulf Coastal Plain, and Wyoming are regarded by the United States Geological Survey as probably containing more undiscovered oil pools of great value than are to be found in any other part of the United States. In the Mid-Continent field the Osage Reservation is one of the richest and most promising areas. More than 1,160,000 acres of Osage land remains to be opened up. The deepest well in the world, already 7,363 feet deep, is now being drilled on the Golf Farm, eight miles northeast of Clarksburg, West Virginia. The well is near the centre of the great Appalachian Coal Basin, and is being drilled in search of deeper oil sands than have yet been reached in this region. Until January 25 the record for depth was held by a boring at Czuchow in Silesia, which had reached a depth of 7,349 feet.

Henry Fairfield Osborn announced a new theory of evolution, which he calls the "caso-mechanical theory." Instead of, as most theorists do, starting with life already begun and dealing with its subsequent development, this author begins with a consideration of a lifeless world and discusses the physiochemical factors that favored the origin of living matter. At Harvard University a plan for an investigation of the stratigraphy of the Ordovician formations of the Appalachian region was approved and research undertaken.

VOLUNTEERS OF AMERICA.

Chartered 1896. National headquarters, 34 West Twenty-eighth Street, New York City. Gen. and Mrs. Ballington Booth, *Co-Commanders-in Chief*. Edward Fielding, *Vice-President*. W. J. Crafts, *Treasurer*. J. W. Merrill, *Secretary*. The organization is religious and philanthropic, with branches throughout the United States. During the year, 208,683 free lodgings have been given the poor, while 229,056 have been furnished at a nominal charge or in exchange for work. Homes for women are maintained.

CATHOLIC CHURCH EXTENSION SOCIETY OF THE U. S. OF AMERICA.

HEADQUARTERS, McCormick Building, Chicago. *Chancellor*—Most Rev. George W. Mundelein, D. D., Archbishop of Chicago. *President*—Rt. Rev. Francis C. Kelley, D. D. *Vice-President and General Secretary*—Rt. Rev. Mgr. E. B. Ledvina. *Vice-President and Director Child Apostles and Director Order of Martha*—Rev. W. D. O'Brien. *Vice-President and General Counsel*—Joseph D. Daly. *Treasurer*—John A. Lynch. *Secretary of the Board*—Warren A. Cartier. *Superintendent of Chapel Cars*—George C. Hennessey.

U. S. DIPLOMATIC AND CONSULAR SERVICE.

(Revised to December 5, 1917.)

AMBASSADORS EXTRAORDINARY AND PLENIPOTENTIARY.

Country.	*Name and State.*	*Salary.*
Argentina	Frederic J. Stimson, Mass.	$17,500
Brazil	Edwin V. Morgan, N. Y.	17,500
Chile	Joseph H. Shea, Ind.	17,500
France	William G. Sharp, Ohio	17,500
Great Britain	John W. Davis, W. Va.	17,500
Italy	Thomas Nelson Page, Va.	$17,500
Japan	Roland S. Morris, Pa.	17,500
Mexico	Henry P. Fletcher, Pa.	17,500
Russia	David R. Francis, Mo.	17,500
Spain	Joseph E. Willard, Va.	17,500

ENVOYS EXTRAORDINARY AND MINISTERS PLENIPOTENTIARY.

Belgium	Brand Whitlock, Ohio	$12,000
Bolivia		—
Bulgaria	Chas. J. Vopicka, Ill.	10,000

Venezuela		2,000

FOREIGN ENVOYS IN THE UNITED STATES.

Argentina—Dr. Tomas A. Le Breton, Ambassador.

Austria-Hungary—Represented during the war by Sweden.

Belgium—Mr. E. de C. de Marchienne, Minister.

Bolivia—Senor Don Ignacio Calderon, Minister.

Brazil—Alberto de Ipanema Moreira, Counsellor.

Bulgaria—Mr. Stephen Panaretoff, Minister.

Chile—Senor Don Gustavo M. Varela, Charge d'Affaires.

China—Mr. Vi Kyuin Welliugton Koo, Minister.

Colombia—Dr. Carlos Adolfo Urueta, Minister; Dr. Alfonso Delgado, Secretary.

Costa Rica—.....Minister.

Cuba—Dr. Carlos Manuel de Cespedes, Minister; Dr. Alfonso F. Jorrin, Secretary.

Denmark—Mr. Constantin Brun, Minister; Peter C. Schou, Secretary.

Dominican Rep.—Dr. Louis Galvan, Charge d'Affaires.

Ecuador—Senor Dr. Don Raphael H. Elizalde, Minister; Senor Miguel A. de Ycaza, Secretary.

France—Mr. Jean J. Jusserand, Ambassador; Charles de Chambrun, Counsellor.

German Empire—Represented during the war by Switzerland.

Great Britain—Earl Reading, Ambassador; Mr. Colville Barclay, Charge d'Affaires and Counsellor; Capt. Arthur L. Snagge, Naval Attaché; Henry G. Chilton, Secretary.

Greece—Mr. Georges Roussos, Minister; Mr. A Vouros, Counsellor.

Guatemala—Senor Don Joaquin Mendez, Minister.

Hayti—Solon Menos, Minister.

Honduras—J. A. L. Gutierrez, Minister; Senor Don R. Camilo Diaz, Secretary.

Italy—Count V. Macchi di Cellere, Ambassador; Baron Pietro Arone de Valentino, Secretary.

Japan—Viscount Kikujiro Ishii, Ambassador; Mr. Tokichi Tanaka, Counsellor.

Mexico—Senor Ing. Ygnacio Bonillas, Ambassador; Senor Dr. Juan B. Rojo, Counsellor.

Netherlands—J. Theo. Cramer, Minister.

Nicaragua—Senor Don Diego M. Chamorro, Minister.

Norway—Mr. H. H. Bryn, Minister.

Panama—Senor Dr. Don Belisario Porras, Minister; Senor Don J. E. Lefevre, Secretary.

Paraguay—Dr. Manuel Gondra, Minister.

Persia—Mirza Ali Kuli Khan, Charge d'Affaires.

Peru—Mr. Manuel de Freyre y Santander, Minister.

Portugal—Visconde de Alte, Minister.

Roumania—George Danielopol, Minister.

Russia—Mr. Boris Bakhmeteff, Ambassador.

Salvador—Dr. Don Rafael Zaldivar, Minister.

Serbia—Y. Simitch, Charge d'Affaires, Minister.

Siam—Phya Prabha Karavongse, Minister; Mr. Edward H. Loftus, Secretary.

Spain—Senor Don Juan Riano y Gayangos, Ambassador.

Sweden—Mr. W. A. F. Ekengren, Minister; Judge Erik Sjoborn, Counsellor.

Switzerland—Dr. Hans Sulzer, Minister; Dr. Carl Paul Hübscher, Secretary.

Uruguay—Dr. Carlos Maria de Pena, Minister.

Venezuela—Dr. Don Santos A. Dominici, Minister. Senor Don Luis Churion, Secretary.

DOMINION OF CANADA.

(Compiled for the ALMANAC by the Dominion Bureau of Statistics, Ottawa, Canada.)

SEAT OF GOVERNMENT—OTTAWA.¶

Governor-General—Duke of Devonshire, K. G., G. C. M. G., G. C. V. O. Salary $50,000.

MINISTRY.

GRAND LODGE F. & A. M., STATE OF N. Y.

Grand Master—William S. Farmer, Syracuse. *Deputy Grand Master*—Robert H. Robinson, New York. *Senior Grand Warden*—Arthur S. Tompkins, Nyack. *Junior Grand Warden*—Harold J. Richardson, Lowville. *Grand Treasurer*—Christopher C. Mollenhauer. Brooklyn. *Grand Secretary*—Robert Judson Kenworthy, Masonic Hall, New York City.

OFFICERS OF THE UNITED GRAND LODGE OF ENGLAND, 1918-1919

Grand Master—His Royal Highness The Duke of Connaught and Strathearn, K. G. *Pro. Grand Master*—Br. The Rt. Hon. Lord Amptbill, G. C. S I., G. C. I. E. *Deputy Grand Master*—Br. The Rt. Hon. Thomas Frederick Halsey, P. C. *Grand Wardens*—His Grace The Duke of Abercorn, P. G. W.; the Rt. Hon. Lord Loverhulme. *Grand Chaplain*—The Rt. Rev. The Bishop of Chelmsford, D. D.

Cabinets of the World.

(Owing to the war, Cabinets changed often late in 1918 and are still in flux.)

BAVARIA.

Premier—Kurt Eisner.

BELGIUM.

Premier and Minister of State—G. Cooreman
Minister Foreign Affairs—P. Hymans.
Minister Agriculture and Public Works—G. Helleputte.
Minister War—Gen. De Ceuninck.
Minister Justice—Henri Carton de Wiart.
Minister National Reconstruction—M. de Broqueville.
Minister Rail. Post-Telegr. and Marine—M. Seegers.
Minister Finance—A. Van de Vyvere.
Minister Supplies and Ordnance—M. Van der Velde.
Minister Fine Arts—E. Poullet.
Minister Interior—Paul Berryer.
Minister Industry and Work—H. Hubert.
Minister Colonies—J. Renkin.

DENMARK.

President Council and Minister Justice—Carl Theodor Zahle.
Minister Foreign Affairs—Erik Scavenius.
Minister Commerce—Christopher F. Hage.
Minister Finance—Dr. Phil. Edvard Brandes.
Minister Defense—Dr. Phil. Peter Munch.
Minister Public Instruction—Soren Kelser-Nielsen.
Minister Agriculture—Kristjan Pedersen.
Minister Interior—Ove Rode.
Minister Public Works—Jens Hassing Jorgensen.
Minister Ecclesiastical Affairs—Thorvald V. Povlsen.
Minister without Portfolio—Thorvald A. M. Stauning.
Minister for Iceland—Jon Magnusson.
Minister for Iceland—Sigurd Eggerz.
Minister for Iceland—Sigurdur Jonsson.

FRANCE.

Premier and Minister War—Georges Clemenceau.
Minister Foreign Affairs—Stephen Pichon.
Minister Justice—Louis Nail.
Minister Interior—Jules Pams.
Minister Finance—Louis Klotz.
Minister Marine—Georges Leygues.
Minister Commerce, Industry, Posts and Telegraphs and Marine—Etienne Clementel.

—Since beginning Champagne offensive French have taken 21,567 prisoners (499 officers), 600 guns, 3,500 machine guns, 200 mine throwers, a great quantity of munitions and war materials.
—President Poincare, in Paris, makes Premier Hughes of Australia a grand officer of the Legion of Honor.
Oct. 14—In Albania, Italians take Durazzo. French take Prizrend and Mitravitsa; are now 150 miles from Monastir and same from Sarajevo.

Oct. 14—British cavalry advance; occupy Tripoli.
—British attack on 20-mile front toward Lys River and get canal. Gen. Plumer's troops capture Menin Junction. Belgians and French take Thourout and Roulers. French advance in Champagne, near Rethel. Allied line is within 2 miles of Courtrai. To the south British cross Haute-Deul Canal, on a 5-mile front. French and British reach the Courtrai-Ingelmanister railway.
—In Flanders offensive so far 10,000 prisoners have been taken.
—United States troops pass beyond Cumel and Ronagny, pierce positions of St. Georges and Landres-et-St. Georges; take about 750 prisoners. United States patrol crosses Selle River near St. Souplet; takes 30 prisoners. Allies take Denaat, Bosehmolen, Gulleghem, Wulverghem and Wervicq. French capture Roulers. Belgians take Hazebrook, Gitsberg and Beverin. All take prisoners. Day's total, 7,100. Germans react heavily in area north of Le Cateau.
—Week's British casualty list: Killed or died of wounds, officers 552, men 6,937; wounded or missing, officers 1,741, men 26,480.
—France breaks diplomatic relations with Finland.
—The President replies to Germany's peace offer in effect that military supremacy of armies of United States and Allies must be safeguarded, processes and methods left to military advisers; illegal and inhumane practices must cease and German people must alter their government so that no one power can of its single choice destroy the peace of the world.
—M. Frank Bouillon, head of Parliamentary Commission on Foreign Affairs, says France will insist on evacuation of occupied territory, including Alsace-Lorraine; will demand guarantees for everything, taking German word for nothing.
—New Turkish Cabinet, Tewfik Pasha Premier, notifies Austria-Hungary that owing to military conditions Turkey must conclude a separate peace with the Entente.

Oct. 15—United States troops widen breach in Kriemhild line. German counter attacks fail. Left wing crosses the Aire and pass Grand Pre; centre takes Hill 286. British in Selle Valley, take village of Haussy and 300 prisoners. Gen. Plumer in last 3 days advances 8 miles in Flanders; takes towns of Comines, Wervicq, Menin, Wulverghem, Heule and Guerne.
—United States transport America sinks at Hoboken pier.
—British occupy Honis without opposition.
—Czechs, in Prague, Bohemia, start revolt against rule of Austria; martial law proclaimed throughout Bohemia.

Oct. 16—British cross the Lys, between Armentieres and Menin. Southwest of Rethel French capture village of Acy-Romance; northwest of Sissonne take Notre Dame de Liesse and village of Talma. United States troops occupy town of Grand Pre; capture La Musari Farm. French cavalry approach Thielt, 7 miles from Ghent-Bruges Canal (10 miles from Holland border). British reach Quesnoy, 4 miles north of Lille; take Linselles. Belgians attack Bavichae, northeast of Courtrai. Liege division of Belgium captures German colonel, his staff and 2,000 men. Belgians cut Thourout-Ostend road and are astride of Thourout-Bruges Road.
—Allied forces, including United States troops, repulse Bolshevik attacks on banks of Dvina. Americans and Russians advance toward Welsk, 125 miles northeast of Vologda.
—British cavalry occupy Tripoli, 45 miles north of Beirut.
—London reports that up to July 31, India had contributed 1,115,189 men to the British Army. First Indian war loan, $200,000,000; a second loan still greater in amount not specified.
—Germany's Federal Council accepts amendment to the Constitution; hereafter consent of Federal Consul and of the Reichstag required for peace treaties in case of declaration of war, except in case of invasion.
—Baron Burian, Austro-Hungarian Foreign Minister, says to Foreign Affairs Committee of Austrian delegations, in discussing President's note: "We always establish an agreement with Germany."

Oct. 16—Serbian troops capture Krushevatz, 30 miles northwest of Nish. German airplanes bomb Nish.
—The French take Ipek, in Montenegro.

Oct. 17—Allied troops capture Ostend, Bruges and Lille, and occupy Douai. King Albert of Belgium and Queen Elizabeth enter Ostend. The French cross the Oise, 8 miles southwest of Guise. United States troops take Chatillon Wood.
—Germans bombard Dunkirk with long range guns; 2 Americans killed; 1 man wounded.

Oct. 18—Allies take Zeebrugge, Bruges, Thielt, Tourcoing, Roubaix and many other small towns. British take more of Lille salient. United States and British troops attack east of Le Cateau, take Bazel. French retake Forest of Anidgny and village of Mennevret, a gain of 3 miles. United States infantry advance north of Romagne and take Bantheville; northwest of Grand Pre, take Talma Farm.
—More than 60 United States bombing planes attack Bayonville, Buzancy and other towns north of Grand Pre; escorting planes bring down 10 German planes. 140 United States planes raid beyond German lines and all return. They raid Remonville, Briquenay, Verpel, Clery-le-Grand, Aincreville and Inrecourt; pursuit planes engage in 35 aero fights, bring down 12 enemy planes.
—French Premier Clemenceau, in Chamber of Deputies, says: "Our victory does not spell revenge."
—Czechs occupy Prague, in Bohemia. Czecho-Slovak National Council, sitting in Paris, formally declares independence.
—Emperor Charles proclaims plan for federalization of Austria.
—Guatemala confiscates German owned electric light company at Guatemala City.

Oct. 19—British advance east of Lille toward Tournai. British, Americans and French press Germans along the Olse-Sambre Canal and in Argonne and Meuse region. Germans withdraw from Belgian and French front from North Sea to the Sambre. 6,000 Germans are caught between advancing troops and the Holland frontier above Eecloo. Germans evacuate Loges Wood on northwest and Bantheville Wood to the east.
—Allies capture Zaietchar, close to Bulgarian border.
—President says to Austria, in effect: "United States, having recognized Czecho-Slovaks, the terms of Jan. 8 address no longer applies," and refuses an armistice.

Oct. 20—Allied forces drive back Gen. Ludendorff's 40 divisions above and below Valenciennes, on the Scheldt, a pivotal point. The British are within a mile of Valenciennes and within 7 miles of Ghent. The French surround city of Audenarde, 15 miles below Ghent. Gen. Gourand attacks west of the Meuse; takes heights east of the Aisne, north and south of Vouzieres, 20 guns and many prisoners. United States troops advance on edge of Bois-de-Bantheville and in region of Bourrett; clean up Bois-de-Rappes, take 80 prisoners; cross Oise Canal.
—French and Serbs reach the Danube, in the region of Vlelin (an important Bulgaria river town); across the Danube lies Califat, a Roumanian city.
—German note, unofficial, is received by wireless. On its face accepts President Wilson's conditions; claims Kaiser's personal arbitrary powers have been taken from him; denies barbarity; claims retreat destructions permissible under international law. Submarines all recalled to their bases.

Oct. 21—British week's casualty list: Killed or died of wounds, officers 517, men 4,971; wounded or missing, officers 1,464, men 30,198.
—British airmen attack barracks and railways at Metz; 7 battle machines missing. German airmen bomb region around Clermont, Montfaucon and Rarecourt.
—Serbian and French forces reach Paracin, 46 miles northwest of Nish, 85 miles southeast of Belgrade; take 1,000 Austro-German prisoners.
—King George of England, in speech to inter-parliamentary delegates at Buckingham Palace, says: "Victory is within reach and must be complete."
—Socialist papers in Germany demand that the Kaiser abdicate.

Oct. 22—Chancellor Maximilian says in Reichstag, "German people will not submit to a peace by violence, nor will they be brought blindly to the conference table."

Oct. 22—British cross the Scheldt, 5 miles north of Tournai. French and Belgians advance toward Ghent, cross Lys Canal at several points. Allies drive toward Conde, with Mons as objective. British capture Ourcq. French advance between Serre and the Oise; reach Assis-sur-Serre and the St. Jacques Farm, northwest of Chalandry. Czecho-Slovak forces aid in the recapture of village of Terron.

—Serbians occupy Massif of Mecka, and village of Cicevak; take 300 prisoners.

—The Turks quit Tabriz, Persia.

Oct. 23—President Wilson replies to the German note, says he will take up question of armistice with his co-belligerents; refers details to field commanders and says: "If we must deal with the present Imperial Government of Germany we cannot trust it and must demand surrender."

—British gain on 17-mile front south of Valenciennes; approach Le Quesnoy; take Chatillon and Orrs. West of the Meuse United States forces take Bantheville, Bricuiles and Hills 297, 299 and 281, Belle Joyeuse and Talma Farms.

—In Serbia French continue advance and enter Negotin.

—British airmen bomb railways at Burbach and Saarbrücken, chemical factories at Mannheim and railways at Coblenz, near Mainz, and at Metz-Sablons.

—Explosion in factory at Dessau, Germany, kills 70, wounds 50.

—Count Karolyi, in Hungarian Unterhaus, moves a resolution for independence of Hungary and a separate peace and demands resignation of Wekerle cabinet.

Oct. 24—British advance on 25-mile front between Sambre Canal and the Scheldt, take 7,000 prisoners and more than 100 guns; forest of Raismes is cleared; forest of Mormal reached. Allied line is within 15 miles of Maubeuge. British also take villages of Neuville, Saiesches and Beau-Degnes, Thiers Haute Rive and Thun. On the Oise front, French cross canal east of Grand Verly; on the right reach road between La Fere-Chevresis and Ferrier Farm. United States troops take Bois Belleau.

—In Monte Grappa sector Italians cross Ornic River; take Monte Solarolo, part of Monte Pressolan and Monte Pertica. Italians, aided by British and French, have thus far taken 3,000 prisoners. On Asiago Plateau French take Monte Sisenol.

—Gen. Joseph Haller is named Commander-in-Chief of Polish forces fighting with the Allies.

Oct. 25—Germans push back British on the Scheldt and the Sambre and the French on the Oise and Serre. British in 2 days take 9,000 prisoners, 150 guns. British cross railway between Le Quesnoy and Mainz and the Ecallon River. The French cross the Serre between Crecy and Montiers.

—Germans in Argonne region are damming rivers and flooding the country to stop United States advance. British advance 2½ miles. French take 3,155 prisoners. French cross the Danube into Roumania.

—Serbian troops take heights south of Kraguyevatz.

—Count Andrassy succeeds Baron Burian as Austrian Premier. Count Albert Apponyi succeeds Dr. Wekerle as Hungarian Premier.

—Col. Edward M. House, President Wilson's personal representative, reaches Paris.

—British Admiralty publishes navy figures: Fleet increased during war from 2,500,000 tons to 6,500,000 tons; personnel from 146,000 to 406,000. Soldiers transported 21,500,000; lost 4,391.

Oct. 26—British troops cross Rhonelle and circle Valenciennes; take Famars and 1,000 prisoners. The French press east from the Oise and northeast from the Serre toward Hirson; take Mont Carmel and Angelfontaine.

—A German official paper at Berlin announces that the Emperor has accepted a request for retirement made by General of Infantry Ludendorff, the First Quartermaster General and commander in time of peace of 25th Infantry Brigade. Despatches from the German capital indicate that the resignation had been forced by the pro-peace majority in the Reichstag. Ludendorff was the soldier who, on account of his reputation as an expert in retreat tactics, was put on the western front to extricate the Crown Prince's armies from the tightening grasp of the Allied forces.

Oct. 26—In last 4 days Allies have taken 15,000 prisoners; German casualties have been 50,000.

—Italians continue advance on mountain and Piave front; take 2,000 Austrian prisoners and advance in Albania.

—British, under Gen. Allenby, occupy Aleppo. In Mesopotamia, Gen. Marshall continues pursuit of Turks on both sides of Tigris.

Oct. 27—French advance 5 miles between the Oise and the Serre. Reach outskirts of Guise; take Crecy-sur-Serre, Baheris, Maequigney and Praix-Landifey, Monceau-le-Neuf and Montigny-sur-Serre, Origny-Ste, Bemoite, Courjuelles and Chevreis-Monceau. On the Verdun front east of the Meuse, United States troops attack and take Bois Belleau. East of Rethel United States troops advance two-thirds of a mile. Germans counter attack British at Famars and are repulsed.

—Italians and British cross the Piave, take the Island of Grave di Papadopoli.

Oct. 28—Germans counter attack the French on the Oise front. French advance east of the Peron, in region northeast of Bois-les-Pargny. British south of Valenciennes advance between the Rhonelle and the Scheldt; take 100 prisoners. British troops enter Lys and are welcomed with enthusiasm. Americans east of the Meuse attack Germans in Consenvoye Wood and Ormont Wood and are repulsed.

—Allies on 45-mile front drive Austrians 5 miles from the Piave toward the Livenga. Congellano is taken and 15,000 prisoners.

—Gen. Pershing's artillery bombard the Germans Longuyon-Mezieres shuttle service.

—Hungary sends note, signed by Count Andrassy, new Foreign Austro-Hungarian Minister, that it accepts all conditions, including independence of Czecho-Slovaks and Jugo-Slavs and is ready for armistice.

—M. Poincare, President of France, receives Col. Edward M. House.

—British Food Controller increases retail price of meat and reduces meat rations to ¾-pound per week per person, except ham and bacon.

—Kaiser Wilhelm writes to Imperial Chancellor, Prince Maximilian of Baden, approving of transfer of "fundamental rights of the Kaiser's person" to the people.

Oct. 29—Fierce fighting continues on mile wide strip between the Scheldt and the Rhonelle. United States artillery bombard extensions of main line into Conflans and sweep areas near Spincourt and nearby towns for miles. Germans shell Bantheville and Cunel. Civilians in panic flee from Rhine towns, taking their deposists from banks.

—Day's United States casualties: Army, 360; marine corps, 69.

—United States airmen bomb Montigny and Danviliers; 5 United States planes on reconnaissance missions are lost.

—Serbians advance 12 miles; now within 45 miles of Belgrade.

—From Oct. 14 to 27 Allied armies in Flanders took 18,293 prisoners (441 officers), 509 guns, 1,200 machine guns.

—In Germany the Federal Council approves bill passed by Reichstag Oct. 26, providing that sanction of Reichstag and Bundesrat is necessary for a declaration of war; that the Chancellor is responsible for the Kaiser's political actions and the Minister of War is responsible to the Reichstag.

—Count Andrassy, Austrian Foreign Minister, sends note to Secretary of State Lansing, requesting immediate armistice and communicates it to the French, British, Japanese and Italian Governments, begging for their approval and support.

Oct. 30—Italians advance 12 miles beyond the Piave, reach the Livenza on 50-mile front; take more than 100 towns and villages; take Segnisino and Monte Cosen. United States troops take Aincreville and advance for about 2 miles. French advance on north bank of the Oise; take Beaufort Farm. Between the Lys and the Scheldt, near Famars and Englefontaine Germans repulse attacks.

Oct. 30—French advance on north bank of Oise, west of Guise, take Beaufort Farm; advance on right of the Peron. French occupy enemy trenches south of Guise and approach road between Guise and Herie-la-Vieville. Germans make 2 unsuccessful raids in Lorraine. United States troops occupy Aincreville, north of Verdun. Belgian official statement says prisoners taken Oct. 14 to 27, in Flanders, number 18,293 (331 officers), 509 guns, over 1,200 machine guns. On Italian front British reach Roncadelle, Ormelle, Fontainelle and line of Monticano River to Ramara; cross the Monticano about 6 miles beyond the Piave. Austria recognizes Czecho-Slovak nation. Gen. Weber, Austrian, and deputation apply to Gen. Diaz for armistice; application forwarded to Supreme War Council at Versailles. Passenger and merchandise traffic between Germany and Austria ceases. Entire Turkish force on Tigris, about 7,000, surrender. Rioting in Budapest; banks attacked and stores looted.

Oct. 31—Italian troops reach Ponte Delle Alpi, northeast of City of Belluno, take height of Ceseme, ridge between Valleys of Follina and Piave; occupy Pass of Serravalle; in Grappa region take Col Caprile, Col Bonato, Asolone, Mount Frassolan, salient of Solaro, Mount Spinoncia and Plateau of Asiago. Prisoners taken thus far over 50,000. Italians have 54 divisions and are assisted by less than 4 Allied divisions.

Nov. 1—Gen. Pershing's forces advance to northeast of Grandpre, capture a dozen or more fortified villages and 3,000 prisoners; take Andevanne and clear the Bois des Loges. Hungarian Republic proclaimed in Budapest, where the national colors, red, white and green, are displayed; mobs release military and political prisoners; Emperor Charles escapes to Gödöllö, 20 miles northeast of Budapest. The red flag of Socialism is hoisted in Vienna. National Assembly meets in Vienna and accepts a new Constitution without the crown; Victor Adler, Socialist, is Foreign Secretary; Cavalry Captain Meyer, War Minister; Dr. Mahoja, Social Democrat, Minister of Interior; Dr. Steinwender, German Nationalist, Minister of Finance.

Nov. 2—Above Verdun United States troops advance an average of 2½ miles on 14-mile front; in last 2 days take 3,000 prisoners, 60 heavy cannon, hundreds of machine guns; capture Fosse, 8 miles southwest from Stenay; railway junctions in regions of Montmédy and Longuyon under fire of United States big guns. Paris reports since drive began on western front, July 15, Allied armies have taken 362,355 prisoners (7,990 officers), 6,217 cannon, 38,622 machine guns, 3,907 mine throwers. During October Allies captured 103,343 prisoners (2,472 officers), 2,064 cannon, 13,639 machine guns, 1,198 mine throwers. British casualties reported during October total 158,825 officers and men.

—Italians advance on 125-mile front, reach Tagliamento River; in present offensive have freed over 1,000 square miles of conquered territory, taken 80,000 prisoners, 1,600 guns; booty taken exceeds in value $800,000,000. In the Trentino Italians advance as far as Sugana Valley, passing the Austrian frontier.

—British take villages of Preseau, Valenciennes, Marly, advance northeast of Maresches; capture hamlet of St. Hubert and farms in that region. United States troops take and pass beyond St. Georges, Imecourt, Landreville, Chennery, Remonville, Estanne and Clery-le-Grand.

—Italian Government announces that officer of Austrian General Staff presented himself at front of Italian lines bearing credentials, asking to discuss armistice; Gen. Diaz referred question to Premier Orlando, now in Paris, who informs Inter-Allied Conference, which discusses and defines armistice conditions and charged Gen. Diaz in name of Governments of Allies and of United States to communicate them to Austrian white flag bearers.

—King Boris abdicates throne of Bulgaria; Peasant Government established at Tirnova under leadership of M. Stambulivsky (pardoned by King Ferdinand Sept. 30).

Nov. 3—United States troops advance to within 4 miles of Stenay, take many towns, prisoners and much booty; Gen. Pershing's men, with Gen. Haig's and French, reach Ghent outskirts, enter Audenarde. United States bombing air machines attack Martincourt, Mouzay, Beauclair and Beaufort. French and Americans clear enemy out of Bourgogne Woods and whole of Argonne region; take Chatillon-sur-Barre and Bois du Chesne, Teges, Belleville, Quatre-Champs, Noirval and Les Alleux.

—Italians capture Trent. Italian forces land at Trieste. Italian cavalry enter Udine, chief Austrian base in Italy. In drive more than 100,000 prisoners taken and over 2,200 guns; entire regiments surrender to Gen. Diaz.

—Jugo-Slavs seize Austro-Hungarian fleet, except Viribus Unitis, recently sunk by Italians, and send wireless to President Wilson offering to hand vessels over to United States Government or representatives of Allied navies.

—Serbian Army occupies Belgrade.

Nov. 4—British take Valenciennes, advance 5 miles on 30-mile front and are half way through Mormal Forest; take 10,000 prisoners, 200 guns; on northern flank approach Belgian border. First British division take villages of Fesmy, Hautrêve and La Groise; 32d division takes Ruedenhaut and drives enemy from Mezières, La Folle and Sambreton; 13th division take Soyers, Preux-au-Bois, Hecq, Futoy and Louvignies. Franco-American troops and Belgians, under King Albert, are in outskirts of Ghent and in possession of Audenarde. All towns on west bank of Meuse south of Halles now in American hands. United States troops penetrate village of Beaumont and occupy Lauenville, opposite Stenay; take Les Grandes Armoises, an advance of over 3 miles. United States troops now 7½ miles from Carignan, on Mezières-Metz railroad, and 9 miles from Sedan.

—Austria accepts truce terms—immediate ending of hostilities by land, on sea and in air; demobilization of Austro-Hungarian Army, immediate withdrawal from North Sea to Switzerland, half of equipment to be surrendered; evacuation of all territory invaded since war began, military and railway equipment and coal to be given up; no new destruction, pillage or requisitions; right of free movement over territory and means of communication; evacuation in 15 days of all German troops, any remaining to be interned; local authorities of evacuated territory to administer under Allied control; repatriation without reciprocity of all Allied prisoners of war and interned subjects of civil populations; naval conditions, definite information of location and movements of Austro-Hungarian ships to be given; surrender of 15 submarines and all German submarines now in or hereafter entering Austro-Hungarian waters; other surface war ships to be disarmed; 34 war ships to be surrendered; freedom of the Adriatic and up the Danube; Allies and United States to occupy or dismantle fortifications; blockade conditions unchanged, naval aircraft to be concentrated at designated bases; evacuation of Italian coasts, occupation by Allies and United States of land and sea fortifications; merchant vessels to be returned; no destruction of ships or material; naval and marine prisoners to be returned without reciprocity.

—People in Vienna reported to be delirious with joy at peace news.

—Armistice with Austria goes into effect at 3 P. M. Before that Italy had 300,000 prisoners, 5,000 guns.

—President Wilson cables felicitations to King of Italy. Secretary Lansing sends message to Baron Sonnino, Italian Minister of Foreign Affairs, now in Versailles.

—Allies settle on and sign truce terms for Germany.

—Chilian Government seizes all German interned trade ships.

—New (Omsk) Russian Government rescues from "Reds" $400,000,000 in gold taken from Petrograd to Kazan by Bolsheviki.

Nov. 5—Marshal Foch has the Allies' armistice terms ready for the Germans.

—Southward from Ghent the Americans went further over the Scheldt, above Audenarde, while south of there British forces occupied a wide stretch of the eastern river bank.

Nov. 5—Pershing's 1st Army continued its advance on both banks of the Meuse. Crossings were made north and south of Dun and large forces made good their hold on the hills of the eastern bank and pressed on toward Stenay, from which they were distant 6 miles, and Montmédy. By an advance of more than 4 miles on the centre (where the Metropolitan Division from New York has been operating) they passed beyond Raucourt Wood to within 5 miles of the point where the great trunk line to Metz crosses the river and within 8 miles of Sedan.

—The Allies began the siege of Ghent, the stronghold on the Scheldt River, with American, Belgian, British and French units participating and with the Queen of the Belgians watching, in the van of the attack, the smashing of the city's defenses. Germans already reported to have withdrawn their main forces from the city.

—The American forces later captured Liny-devant-Dun and Milly-devant-Dun, 6 miles south of Stenay, east of the Meuse. They were also occupying the hills on the east bank of the river, despite a stiff machine gun resistance by the Germans.

—Between the Sambre Canal and the Argonne the French advanced more than 6 miles at points. They captured more than 4,000 prisoners and at least 60 cannon.

Nov. 6—Reports from the centre of the American line are to the effect that the town of Mouzon is on fire and that part of Sedan is burning. Its footing established east of the Meuse, the American Army has forced its way along both banks of the river, within 6 miles of Sedan.

—American and French troops continue their advance. Murvaux, north of the Freya line and east of Dun, was reached this afternoon, and operations about the heights to the east of Sedan are under way.

—The British, further west, are 4 miles within the trunk line connecting Northern France and Lorraine, threatening to divide the enemy's forces into 3 armies, with precarious roads of retreat.

—As a result of the menace on the flanks, the Germans are retreating fast in the centre, leaving guns and supplies. Following fast on them the French forged ahead from 5 to 7 miles from Guise to the point of their junction with the American forces west of the Meuse.

Nov. 7—The Americans have not only captured Sedan in their advance on both sides of the Meuse, but have made a jump toward the Briey iron mines, which the Longuyon line protects. Longuyon for several days has been under the fire of American guns. With that part of Sedan resting on the western bank of the river occupied, the American Army is consolidating its positions and preparing for a further advance. It was contingents of the noted Rainbow Division and of the 1st Division that made the final whirlwind dash into Sedan.

—The French advanced 10 miles at points, directly menacing the German centre communications. More than 100 villages were taken.

—British forces are continuing their progress along the Franco-Belgian battle line. Northeast of Valenciennes they have reached the outskirts of Quiévrain and Crespin, close to the Belgian border. Further south the town of Angre has been taken. Southeast of the Mormal Forest the British have captured Monceau-St. Vaast and Dompierre, 3 miles northwest of the railway junction of Avesnes.

—Advices from neutral sources indicate that the outbreaks at Kiel and Hamburg and the suburbs of the latter city are assuming serious proportions, the correspondent of the Copenhagen Politik at Vamdrup reporting violent artillery firing in the streets of Hamburg.

—A premature publication in afternoon newspapers that peace terms had been agreed to by Germany made New York City delirious with joy; whistles and sirens blew, bells rang, business was practically abandoned and the streets filled up with merrymakers very similar to an old night before New Year celebration. The excitement continued to a late hour in spite of publication of denials of authenticity of report.

—Admiral Henry B. Wilson, commander of the American naval forces in French waters, later said he authorized the giving out of the announcement of the alleged signing, believing it to be authentic.

Nov. 7—Twenty thousand deserters from the German Army are marching through the streets of Berlin.

—A large part of the German Navy and a great part of Schleswig are in the hands of the revolutionists, according to reports received in Copenhagen from Kiel and forwarded by the Exchange Telegraph Company. All of the workshops have been occupied by the Red troops and Kiel is governed by a Marines, Soldiers and Workers' Council. All the street car lines and railways are under control of this council.

—Virtually all the German fleet has revolted, according to a despatch received from The Hague. The men are masters at Kiel, Wilhelmshaven, Heligoland, Borkum and Cuxhaven.

—In taking over the battleship Kaiser at Kiel the officers attempting to defend the German flag were overpowered, and 2 of them, including the commander, were killed and a number of others were wounded, says the Cologne Gazette. Three companies of infantry sent to Kiel to restore order joined the revolution and a fourth company was disarmed. During the night, hussars sent from Wandsbeck were forced to turn back by sailors armed with machine guns.

Nov. 8—Germany's armistice delegates were received by Marshal Foch at 9 A. M. in a railroad car in which the Commander-in-Chief has his headquarters. Matthias Erzberger, leader of the enemy delegation, speaking in French, announced that the German Government had appointed them plenipotentiaries to take cognizance of the terms and eventually to sign an armistice. Marshal Foch then read the terms to them, dwelling upon each word. They made a few observations, pointing out difficulties in the way of carrying out some secondary clauses. Then Erzberger asked for a suspension of hostilities. This request Marshal Foch refused. The delegates, having obtained permission to send a courier to Spa, German great headquarters, and communicate with that place by wireless, withdrew. The armistice terms called for an answer within 72 hours, expiring at 11 A. M. Monday.

—The French have reached Mezières, the railroad junction on the left of the American front on the Meuse. Gen. Gouraud holds the west bank of the Meuse from Sedan to the outskirts of Mezières. His troops advanced from 5 to 8 miles in a day. Scores of villages were liberated. Artillery and supplies were rushed up over roads deep with mud and the German resistance became stiffer.

—The Americans have improved their positions beyond Sedan on both sides of the river, consolidating their tremendous gains of the last 4 days.

—The British not only have taken the stronghold of Avesnes and vital junction of the enemy's connections between the north and south armies, but have pushed their line to within 2 miles of Maubeuge, a total gain of 5 miles on a front of more than 30 miles.

—Emperor William has refused a demand of the Socialists that he and the Crown Prince abdicate. Chancellor Maximilian, unable to control the Socialists, who are the most powerful bloc in the Reichstag majority, has resigned.

—A popular uprising in Munich has resulted in the proclamation of a republic in Bavaria.

—The rebels who raised the red flag at Kiel now control all the North Sea Coast of Germany and part of the Baltic shore. Prince Henry of Prussia, the Kaiser's brother, fled under a red flag from Kiel, fired on by revolutionists.

—Rebellious movements are reported in the great industrial district about Essen.

Nov. 9—"The Kaiser and King has decided to renounce the throne," officially announces the retiring Chancellor, Prince Maximilian of Baden. Prince Max acted a few hours as Regent.

—Revolt of the soldiers, sailors and workmen, which began at Kiel, has spread over Germany until the movement has embraced practically all northeastern and northwestern sections of the empire. Rebellions have occurred in Hanover, Cologne, Brunswick and Magdeburg, the latter city 80 miles southwest of Berlin.

—The population of the Polish Province of Plock has risen against the Germans and there have been conflicts in which a number of persons of both sides have been killed.

Nov. 9—At Berlin the Socialists have taken over the Government.

—The commander at Kiel and Naval Capt. Heine were shot and killed while resisting arrest.

—A general railway strike has been started in Germany. Owing to the run on the banks in Berlin these institutions have stopped payment.

—Six German battleships anchored outside of Flensburg in Schleswig have directed their guns against the revolutionists. The battlesnip König, which refused to surrender, was captured after a fight.

—The retired Prussian General, Gustav Ahlborn, 82 years old, a veteran of the Franco-Prussian War, committed suicide at the foot of the Bismarck statue in Brunswick.

—The Americans advanced everywhere along their line. The enemy artillery fire was from large calibre guns, indicating positions a great distance away. One American division reached Mouzay in its forward march, despite machine gun resistance and a fire from mine throwers. Five American ambulances drove by mistake into the German lines northeast of Lion-devant-Dun and were captured. Comrades organized a rescue party and returned with the ambulances, 4 prisoners and 3 guns. The Americans are in control of both sides of the Meuse and occupied Remoiville Wood. They crossed the river at Mouzon, thus making their line on both sides complete from Villers-devant-Mouzon southward.

—The British battleship Britannia was torpedoed near the west entrance to the Straits of Gibraltar and sank 3½ hours later, according to an Admiralty announcement; 39 officers and 673 men were saved. The Britannia, which had a displacement of 16,350 tons, was launched at Portsmouth Dec. 10, 1904. She was 453.7 feet in length, had a speed of approximately 19 knots an hour and carried a peace time complement of 777 men. Her main armament consisted of 4 12-inch guns.

—Field Marshal Haig announced the capture of the fortress of Maubeuge by the Guards and 62d Divisions. British troops have made progress south of that town and are east of the Avesnes-Maubeuge road. North of Tournai the British are on the east bank of the Scheldt, about Herinnes and Herchem. South of Maubeuge the British are pushing eastward and are beyond the Avesnes-Maubeuge road.

—French cavalry crossed the Belgian frontier, overthrowing the enemy rearguards, taking prisoners and capturing guns, material and railway trains. Glageon, Formies, Hirson, Anor and St. Michel were occupied. Our forces continued their pursuit beyond these localities on the general line of Momignies, the northern outskirts of the St. Michel Forest, Maquenoise and Philippe Forge. Further east, after having forced a passage on the Thon and Aube Rivers, they occupied the plateau to the north, took Signy-le-Petit and reached the Mezieres-Hirson railway at the village of Wagny and south of Maubert-Fontaine. On the right they reached and surrounded Mezieres and Mohon, and crossed the Meuse further east, opposite Lumes.

—Belgian troops are standing along the Ghent-Terneuzen Canal from the Dutch frontier to the Ghent Station. The French troops in Belgium, advancing beyond the Scheldt, were able to occupy Welden and Edelaere. East of Melden the Heights of Koppenberg were captured.

—Friedrich Ebert, upon assuming office at Berlin as Chancellor, issued a proclamation announcing that the new Government at Berlin had taken charge of business to prevent civil war and famine. In a manifesto addressed to the "citizens" of Germany, the Chancellor said he was going to form a people's Government to bring about peace "as quickly as possible," and to confirm the liberty which the Government has gained.

Nov. 10—The German courier from the meeting place of the armistice negotiations arrived at German grand headquarters at 10 A. M. He had been delayed by an explosion of an ammunition depot, which he mistook for firing.

—The revolution spreads throughout Germany, headed by Workmen's and Soldiers' Councils.

—Lieut. Krupp von Bohlen und Halbach, the head of the Krupp works, and his wife have been arrested.

Nov. 10—The ex-Kaiser and suite flee to Holland, arriving at Eysden, on the frontier, at 7.30 A. M. Thence he went to the Chateau Middachten, owned by Count William F. C. H. von Bentinck, at de Steeg, a town on the Guelders Yssel, an arm of the Rhine, 12 miles from the German border.

—Count zu Reventlow flees to Denmark. Among the incidents of the revolution is the renunciation by the Grand Duke of Saxe-Weimar and his family of the right of exemption from taxation.

—Wilhelm II., the reigning King of Wurttemberg, abdicated on Friday night, according to Havas Agency despatches from Basel.

—The 1st and 2d American Armies in their attacks extending along the Moselle and the Meuse advanced on a front of 71 miles. French troops operating under the American command also advanced at various points. The captured territory includes the German stronghold of Stenay, Grimaucourt, east of Verdun, and numerous villages and fortified positions in Lorraine. The entire district in the region of Stenay was flooded by the Germans, who dammed the canals and rivers. The Americans, crossing the River Meuse from below, took Stenay in a great northward push. The Germans shelled the Verdun road in the regions of Cesse, Beaumont, Mouzon and Balan. The Mouzon Bridge was broken in 2 places. Along the Meuse from the region of Sedan to Stenay the enemy machine gunners, clinging to the hills overlooking the river, kept flares burning all during Saturday night, preventing theAmericans from crossing.

—The British have entered the outskirts of Mons. It was here the original "contemptibles" made their first stand against von Kluck. South of the city Haig's forces have crossed the Belgian border. Several railroad trains were taken as British advance guards pressed east of Maubeuge.

—In Vienna and Neustadt the aeropiane hangars have been burned. At Salzburg there has been shooting in the streets. From Aussig and Pettau hunger revolts are reported, the military food stores being plundered. A Vienna despatch to the Berlin Vossische Zeitung says: "The former Austrian Navy has ceased to exist. The most valuable warships are lying at the bottom of the sea. Austrian naval officers who arrived this morning from Laibach relate that the Jugo-Slavs, to whom the fleet was handed, blew up all the biggest ships at Pola, valued at $14,000,000, to prevent their falling into the hands of the Italians."

—The Czecho-Slovak press agency wires from Laibach: "Italian military forces have occupied Trieste. The Slovene National Council has protested." The Jugo-Slav National Council at Agram has sent a deputation to the Serbian troops now occupying Mitrowitza, asking that the Serbians occupy the whole of Jugo-Slavia.

—The first member of royalty in the Austrian entourage has arrived in Switzerland with an Italian permit. He is the Duke of Braganza, former pretender to the throne of Portugal, who sought refuge in Austria and joined Emperor Charles's army. He has reached Samadan, near St. Moritz.

—More than a quarter of a million Italian prisoners of war held in Austria have been returned to Italy. Sick and wounded men will be returned later by way of Switzerland.

—King Victor Emmanuel of Italy made a triumphal entry into Trieste. The entire population welcomed him. The King, who was accompanied by Gen. Diaz, other generals and Lieut. Commander Rizzo, arrived on the destroyer Audace. The King was showered with flowers as he made his way to the City Hall.

Nov. 11—German envoys signed the Allied armistice terms at Senlis, at 5 A. M., Paris time, which took effect at 11 A. M., Paris time (6 A. M. New York time). Delay for evacuation prolonged by 24 hours for the left bank of the Rhine besides the 5 days; therefore, 31 days in all. A supplementary declaration to the armistice terms was signed to the effect that in the event of the 6 German battle cruisers, 10 battleships, 8 light cruisers and 50 destroyers not being handed over owing to a mutinous state, the Allies reserve the right to occupy Heligoland as an advance base to enable them to enforce the terms.

WAR CHRONOLOGY—*Continued.*

Nov. 11—The Grand Duke of Oldenburg has been dethroned and the Grand Duke of Mecklenburg-Schwerin has abdicated, according to despatches from Hamburg.

—President Wilson reads the terms of the German armistice to Congress in joint session and announces the end of the war. Similar declarations were made to the British Parliament, the French National Assembly, and at other Allied capitals. In New York and other great cities the event was hailed by celebrations.

—Dr. Solf, German Foreign Secretary, addresses a message to Secretary of State Lansing requesting that President Wilson intervene to mitigate "the fearful conditions" existing in Germany. He says the enforcement of the conditions of the armistice, especially the surrender of transport, means the starvation of millions, and requests that the President's influence be directed to overcoming this danger.

—Field Marshal von Hindenburg has placed himself and the German Army at the disposition of the new people's Government at Berlin. He asked the Cologne Soldiers and Workers' Council to send delegates to German main headquarters at once. Von Hindenburg said he had taken this action "in order to avoid chaos."

—King Friedrich August of Saxony has been dethroned, according to an official telegram from Berlin.

—When fighting ended the German front line opposite the 1st American Army, running south and north, was approximately as follows: From north of the Chateau d'Hannoncelles, through the Bois de Lavale, the Bois de Manheulles, the Bois Masseneue, thence northwest, passing east to Blanzee, east of Grimaucourt, east and north of Nobras Woods, thence through the Grand Chenas, east of Bezonvaux, through the Herbebois Woods, east and north of Hill 319, north of Chaumont-devant-Damvillers and Hill 324, to the east side of the Thiente Brook and the Damvillers-Metz road, north of Remoiville to the north of the Forest of Woevre and Paalon, to east and north of Stenay, and thence north and slightly west to the end of the sector north of Mouzon, along the Meuse.

—The front of the 2d Army from south to north was: Nomeny to Eply, through the Bois Voirrotte, through the Bois Frehaut, to the Moselle River and up the river to a point about two-thirds of a mile south of Pagny and thence west to a point one-third of a mile south of Preny. Thence through Remberecourt to the north of the Bois Dommartin and the Mainbois Farm, skirting the northern end of Lake Lachaussee, through the Bois les Hautes Epines, through the Bois de Wavrille, St. Hilaire, Marcheville, Riaville to one-third of a mile south of Ville-en-Woevre.

—On the front of the 1st and 2d Armies, between the Meuse and the Moselle, Allied troops hold the former German front line villages of Ronvaux, Watronville, Blanzee, Moranville, Abaucourt, Dieppe and Bezonvaux.

—Thousands of American heavy guns fired the parting shot at the Germans at exactly 11 A. M. At many batteries the artillerists joined hands, forming a long line, as the lanyard of the final shot. There were a few seconds of silence as the shells shot through the heavy mist. Then the gunners cheered. American flags were raised by the soldiers over their dugouts and guns and at the various headquarters. Individual groups unfurled the Stars and Stripes, shook hands and cheered. Soon afterward they were preparing for luncheon. All the boys were hungry, as they had breakfasted early in anticipation of what they considered the greatest day in American history.

—Mons was taken by the British, and from Belgium to the Meuse the German line was near collapse before the Allied forces got orders to stop punishing the foe. The latest British report says: "At the cessation of hostilities this morning we had reached the general line of the Franco-Belgian frontier, east of Avesnes, Jeumont, Sivry, 4 miles east of Mons, Chievres, Lessines and Gammont."

—The latest French report says: "In the fifty-second month of a war without precedent in history the French Army, with the aid of the Allies, has achieved the defeat of the enemy."

—Canada's casualties in the war up to 11 days before the capture of Mons, on the final morning of the conflict, totalled 211,358 men, it was announced here to-day. These are classified as follows: Killed in action, 34,877; died of wounds or disease, 15,457; wounded, 152,779; presumed dead, missing in action and known prisoners of war, 8,245.

Nov. 12—The abdication of Emperor Charles of Austria is officially announced at Vienna.

—Latest advices from Germany show that while desultory fighting is occurring in Berlin, and that naval mutineers are refusing to yield to any authority, the Socialist Government is proceeding toward full control. All factions of the Socialists are apparently working in unison, and the ultra-radical, or so-called Bolshevist element, has gained great recognition. The agreement which has been reached between the Socialist and Independent Socialist Parties and the new régime seems to have secured support from the press. In addition to the Wolff Bureau, the Socialists are now represented by 3 newspapers, the Vorwaerts, the Lokal-Anzeiger, formerly the Emperor's favorite newspaper and now rechristened the Red Flag, and the former semi-official organ, the North German Gazette, which has taken the new title of the International. The revolutionary movement is continually spreading. Koenigsberg, Frankfort-on-Main and Strassburg are now controlled by the Soviets.

—The Belgian Legation, in an official statement today, announced that Belgium will no longer submit to a status of "guarantced neutrality" like that which existed before the war. It aspires to "complete independence; to the rights common to all free peoples."

—Chairman Baruch of the United States War Industries Board began to lift the restrictions on building material so that the country can return to a peace basis gradually. He announced the reversal of priority orders respecting commodities that had been curtailed for the war. The action of the War Industries Board is a first step, to be followed as quickly as it is deemed advisable by others.

—Secretary McAdoo announced a 75 per cent. reduction in Government war risk insurance rates on hulls, cargoes and seamen's insurance. This made the rate on ships and cargoes through the war zone ½ of 1 per cent., instead of 2 per cent., with other rates cut accordingly. Treasury officials explained that, although the submarine has been abandoned, risk still exists on account of floating mines and the possibility that some submarines may run amuck.

Here ends the war chronology. For all later events consult the General Chronology that follows.

GENERAL CHRONOLOGY

1917.

Dec. 14—The Federal Fuel Administrator orders electric advertising signs darkened Sunday and Thursday of each week.

Dec. 15—Col. E. M. House, with others of American mission to France, return to New York.

—Charles H. Smith of St. Louis, member of staff of John F. Stevens, head of American Railway Mission to Russia, arrested at Tohita, Siberia.

Dec. 17—In Canadian elections Unionist Government of Sir Robert Borden returned; conscription law confirmed.

—J. P. Morgan gives to the Metropolitan Museum of Art, New York City, all his works on loan there, except bronze figure of Eros.

Dec. 18—Andrew J. Peters elected Mayor of Boston on Non-Partisan ticket.

Dec. 19—Grand Jury indicts Mayor Smith of Philadelphia for alleged contempt of court and conspiracy to violate the election laws.
Dec. 20—Australia defeats conscription in referendum vote, 889,000 for, 1,072,000 against.

—The United States tug Cherokee founders off Cape Henlopen. The steamship British Admiral picks up 12 survivors. There are no available records of the lost. The lieutenant in command and 29 men are lost.
Feb. 28—The Spanish Cabinet resigns.
—Canadian soldiers in Toronto audience refuse to listen to William Jennings Bryan talk on prohibition.
—American and Japanese Ambassadors, the Chinese and Siamese Ministers, the Brazilian Charge d'Affaires and American Red Cross representatives arrive at Vologda from Petrograd (350 miles).
March 1—Motion denied for new trial for Thomas J. Mooney, convicted of murder on account of bomb explosion in San Francisco.
—Major Gen. Peyton C. March, United States Army Chief of Staff, returns from Europe.
—War Trade Board declares embargo on corn imports.
March 2—Bud Fisher, cartoonist, creator of Mutt and Jeff, commissioned Captain in British Army.
—Porto Rico goes dry.
March 3—Federal Food Administrator reduces meatless days to a beefless and porkless Tuesday.
—The Archbishop of York preaches in Cathedral of St. John the Divine, New York City.
—Rodriguez Alvez and Delfin Moreira of the War Party elected President and Vice President of Brazil.
—Judge Robert S. Lovett retires from War Industries Board, resigns Chairmanship of Union Pacific Railroad and is appointed Director of Division of Betterments and Additions of the Railroads.
—Federal officers discover (disconnected) powerful wireless outfit in tower of Trinity Building, New York City.
March 4—The President appoints Bernard M. Baruch Chairman of War Industries Board.
—Washington announces plans for building a $25,000,000 ordnance base in France.
—New York State Senate Committee on Taxation and Retrenchment submits a State prohibition amendment to the State Constitution.
—Theodore Roosevelt leaves hospital.
—The President fixes price of aluminum at a maximum of 32 cents per pound.
March 5—The President, after Cabinet meeting, announces opposition to Japanese armies entering Russia.
—Sein Fein volunteers take Kiltamagh, County Mayo, Ireland.
March 6—Mayor of East Orange, N. J., will not permit Fritz Kreisler, violinist, formerly a lieutenant in Austrian Army, to play at a concert in that city.
—Wisconsin Assembly concurs in Senate resolution condemning United States Senator Robert M. La Follette.

March 8—Leon Trotzky resigns as Russian Foreign Minister.
—Washington announces signing of commercial agreement between United States and Spain by which United States gets mules and blankets and Spain cotton and petroleum.
March 9—Union labor mass meeting, Union Square, New York City, addressed by W. Bourke Cockran, protests against death penalty for Thomas J. Mooney, San Francisco labor agitator.
—Indiana State Prohibition Law declared unconstitutional by Judge Hostetter of Superior Court, Evansville, Ind.
—Daylight saving schedule begins in France.
—Tornado sweeps over Vanwerp County, Ohio.
—United States Shipping Board announces 17 vessels of 120,000 tons completed and put into service in February; 16 ships of 112,000 tons launched in January; 15 of 77,900 tons in February.
—Moving picture theatre at Winchester, Ky., collapses; killing 40.
—Russian wireless despatch to London announces the conclusion of peace treaty between Germany and Roumania.
March 10—Secretary of War Baker arrives in France.
—Eighty-two-mile gale in New York City knocks down pedestrians, blows out show windows, wrecks chimneys and rips away signs; 1 man killed, many injured.
—Hospital ship Guilford Castle attacked by German submarine in Bristol Channel.
—Zionist Commission (English) arrives at Jerusalem.
March 11—The President sends message to the Moscow Soviets Congress.
—Texas Legislature passes and Governor signs a bill to punish any form of disloyalty by imprisonment, 2 to 25 years.
—Secretary of War Baker and staff arrive at Paris.
March 12—Maryland State-wide Prohibition Bill is beaten in the House.
—Texas Legislature passes bill making dry zones of all territory within 10 miles of army camps, from April 15.
March 14—Texas Senate passes State-wide Prohibition Bill.
—Cincinnati, O., drops pretzels from free lunch counter.
—All Russian Congress of Workmen's and Soldiers' Councils meet at Moscow and ratifies peace treaty with Germany.
March 15—Secretary Daniels established dry zones within 5 miles of training stations; Newport, R. I., goes bone dry.
—Woman Suffrage defeated in Mississippi Senate.
—Interstate Commerce Commission grants general increase of 15% in commodity rates to railroads east of the Mississippi and north of the Ohio and Potomac.
March 16—Coal dealers are put under license system by the President on recommendation of Fuel Administrator Garfield.
—Brooklyn Academy of Music notifies Boston Symphony Orchestra that next year's concerts must be under some other leadership than that of Dr. Muck.
—A large block of stone fell from steeple of St. Patrick's Cathedral, New York; no one hurt.
March 14-15-16—Meetings of Supreme War Council, under Presidency of Lloyd George, are held in Downing Street, London, and are attended by the Premiers of France and Italy and other Ministers, with their military and expert advisers.
March 17—New York Catholic War Fund Campaign for Knights of Columbus Camp and Overseas Service starts at Hippodrome.
March 18—Mme. Despina Davidovich Storch, Mme. Elizabeth Charlotte Nix, wife of a German army officer, Baron Henry de Beville and Count Robert de Clairmont arrested in New York as German spies and ordered deported.
—A bill to annul the charter of German-American Alliance is introduced in New York Legislature by Senator Douglas Robinson and Assemblyman Schuyler Meyer.
—Lenroot wins Republican nomination in the Wisconsin primaries.
March 19—Emergency Fleet Corporation launches the Coyote at Kearny, N. J.
March 21—Gens. Leonard Wood and J. Franklin Bell return from France.
March 22—New Spanish Cabinet is formed with Antonio Maura, former Premier, at its head.
—Gov. Whitman, New York, signs bill appropriating $3,787,383 for State roads.
—South Dakota passes law to conscript labor for farms.
—Director General of Railroads creates Railroad Board of Adjustment, to consider wages, hours, etc.
March 23—Mrs. Rose Pastor Stokes of New York arrested at Willow Springs, Mo., charged with violating Espionage Act.
March 25—Dr. Carl Muck, conductor of Boston Symphony Orchestra, assaulted in Boston and then held as enemy alien.
—New York Catholic War Fund exceeds its goal of $2,500,000 by more than $600,000: Rockefeller Foundation contributes $100,000; Payne Whitney $25,000.

—Swedish Government decides to give both sexes the vote. Control of the foreign policy, as well as declarations of war and peace are to rest with the Riksdag.
—American forces begin their march toward Germany, which will be at the rate of 12 miles a day.
—Alsace-Lorraine Day in Paris. 200,000 members of civilian societies march in parade before 10,000 troops along route from Arc de Triomphe to Place de la Concorde, then past monuments of Joan of Arc, Gambetta and Lafayette.
—Admiral von Tirpitz, former Minister of the German Navy, the man chiefly responsible for Germany's submarine campaign, fled to Switzerland immediately the revolution in Germany broke out, says the Frankfort Gazette, as quoted in advices from Copenhagen.
Nov. 17—Saxe-Meiningen has been proclaimed a republic and all estates owned by princes are made public property.
—Former Grand Duke Ferdinand of Mecklenburg-Schwerin, who abdicated, has arrived at Copenhagen with his English-born wife and their children.
—Duke Karl Eduard of Saxe-Coburg and Gotha and Grand Duke Friedrich Franz IV. of Mecklenburg-Schwerin have abdicated.
—The Matin, Paris, estimates Germany's debt to France at $68,000,000,000. The newspaper apportions the debt as follows: Return of indemnity of 1871, with interest, $12,000,000,000; expenses in present war, $28,000,000,000; pensions, $8,000,000,000; reparation for damages, $20,000,000,000.
Nov. 18—French soldiers' pay was raised 10 cents a day.
—Ten thousand servant girls at Stuttgart, Wurttemberg, are mobilized to help unload freight cars.
—American troops cross the Belgian border north of Verdun and push on to Virton. British forces reach a line from Florennes and Charleroi to Hal.
—Germany protests to the Allies against their retention of the left bank of the Rhine, declaring Bolshevik conditions imperilling neighboring States are threatened as a result of this armistice requirement.
—Gen. Pershing, on behalf of the President, awards a bronze leaf to Brig. Gen. MacArthur to be worn on his Distinguished Service Cross awarded in March.
—War Industries Board removes ban from domestic uses of gold and silver for industrial purposes.
—Western Union Telegraph announces restoration of its transatlantic cable service.
—The United States Supreme Court declines to review the case of Thomas Mooney, San Francisco labor leader, convicted of murder in connection with the San Francisco preparedness day parade.
—Display of the red flag in New York banned by Mayor Hylan in an order to Police Commissioner Enright, in which the police are directed to "disperse all unlawful assemblages."
—Canada spent in the year ended April 30, 1918, $520,415,832 for food and $324,005,237 for munitions.
—Between April 6, 1917, and Nov. 11, 1918, 2,958 ships of 3,091,605 tons were built in the United States.
—Steamer Tollard, a freighter of 8,800 tons, was launched at New London, Conn., for the Emergency Fleet Corporation.
—A new order by Provost Marshal General Crowder to draft boards suspends indefinitely physical examinations of draft registrants.
—Official announcement is made at the White House that President Wilson has decided to go to Paris, London and Rome to take part in discussion and settlement of the main features of the peace treaty.
—The Federal Reserve Board estimates that the cost of the war to all belligerents up to May 1 last was $175,000,000,000 and that it would reach $200,000,000,000 by the end of 1918. The yearly burden entailed by interest, pension and sinking funds is placed at $10,000,000,000.
—Three flying schools are ordered discontinued.
Nov. 19—Rodman Wanamaker is named by Mayor Hylan as Chairman of a Victory Arch Committee.
—Ships are on the ocean with 200,000 tons of food for the civilian populations of Northern France, Belgium and Austria.
—Mayor Hylan's police survey of the coal supply reveals a shortage of 3,577,261 tons in New York City.
—French troops enter Belgium, Lorraine and Alsace, Marshal Petain occupying Metz.
—British losses for the entire war were 3,049,991, according to a statement in the House of Commons by the Parliamentary Secretary for War. Of these 142,634 were officers. The killed and died of wounds or disease totalled 658,724.
—London Daily Mail cables Aero Club of America $50,000 prize now open to flier who crosses Atlantic.
—Ministerial Council on recommendation of Premier Clemenceau votes to make Gen. Petain a Marshal of France.
Nov. 20—The reception to Marshal Petain and the French and Allied soldiers in Metz lasts all of Tuesday night. The Marshal reviewed the Iron Division before the Marshal Ney statue. Fifty wounded Americans were found in the city.

Nov. 20—When French troops entered Budapest, the capital of Hungary, they were showered with flowers by cheering crowds that filled the streets. The city was beflagged with the Allied colors. No Austrian or German flags were seen. The residents sang the "Marseillaise" as the French marched in. The Military Governor of the city gave a banquet to the French officers.

—Flying the white flag, 20 German submarines surrender to a British squadron and are taken into Harwich port for internment.

—American troops cross the German frontier of Lorraine, opposite Briey and Audun-le-Roman, and further north enter Luxemburg, going in the direction of Luxemburg city.

—Postmaster General Burleson orders consolidation and operation as one system of the Postal and Western Union Telegraph Companies on Dec. 1. He also takes over all cable lines.

Nov. 21—The British Grand Fleet of 47 battleships and battle cruisers, 35 cruisers and light cruisers and 150 destroyers, with a total of 80,000 personnel, covering a stretch of water 40 miles long and 6 wide, received the surrender of 13 German battleships and battle cruisers, 6 light cruisers and 49 destroyers manned by 14,000 officers and men, under Admiral Meurer. With 500 Allied guns ready to open broadsides on them from either side, the Germans passed into custody, out of the mist, at 9.30 o'clock, 30 miles east of May Island, and were convoyed back to the Firth of Forth between 2 wonderful lines of the Grand Fleet.

—A coup makes Admiral Kolchak Director and Commander of the all-Russian army and fleet.

—British cavalry cross the field of Waterloo on way to German frontier.

—The Campania, since the war a British auxiliary war vessel, is sunk in collision with a British battleship. No lives lost.

—Gen. Pershing entered the City of Luxemburg ahead of his troops. The American Commander in Chief and his staff drove into the capital in automobiles. The General was greeted by thousands of cheering Luxemburgers and with the blowing of sirens and the ringing of church and school bells.

—An explosion of munition trains at the station of Hamont, east of Antwerp, Belgium, caused casualties estimated to be between 1,500 and 2,000.

—Advance troops of the British Army of Occupation reached Namur and crossed the Meuse.

—Field Marshal von Mackensen, the former German Commander in Rumania, arrived in Berlin. The German troops returning with him met Czecho-Slovak forces at Silein, Moravia, and were unable to continue the journey by way of Oderberg and were forced to withdraw from Austria by way of Vienna and Passau.

—When the former German Crown Prince arrived at the Zuyder Zee fishing town of Enkhuyzen howls of execration arose from the thousands gathered outside the station gates. The Government yacht, which was to have taken him to the Island of Wieringen, grounded in the fog. A little tugboat was substituted. The hamlet of Mosterland consists of small farmsteads and fishermen's huts on the lonely island of Wieringen, some distance from the Dutch naval station at Helder. The local pastor's 2-story residence has been leased furnished for 6 months, and here the former Crown Prince will live.

—The second session of the Sixty-fifth, or "War" Congress, which began last Dec. 3, ended at 5 P. M., under a resolution which had been adopted earlier in the day by the Senate, 41 to 18, and by the House, without objection. Except the War Revenue bill, little business was left unfinished.

Nov. 22—While as an effective military force the American Army remains intact, the homeward movement has already begun. Construction of all kinds has been stopped and contracts and deliveries cancelled where possible, and the men whose services have been in these and other lines of activity are either en route to ports or plans for their embarkation are under way. The first to go will be the sick and convalescent wounded.

—Resignations in Europe: Lord Robert Cecil, British Under Foreign Secretary; John R. Clynes, British Food Controller; Philipp Scheidemann, German Finance Minister.

Nov. 22—An all-Ukraine Government, composed of the General Staff of the Volunteer Army, has been formed at Ekaterinodar, with the object of re-establishing South Russia on a federated principle.

—The German battleship Koenig and the battle cruiser Mackensen, which, although scheduled for surrender Nov. 21, were permitted to be absent, are being disarmed under the supervision of Vice Admiral Browning of the British Navy, who was sent to Germany for that purpose. The Koenig is in dock and could not be moved, and the Mackensen is not completed.

—Adherents of the Spartacus group at Berlin attempted to seize the Berlin Police Presidency. Several persons were killed or injured.

—Gen. de Castelnau entered Colmar, Alsace, at the head of his troops. He was received with acclamation by the populace. Strassburg, capital of Alsace, was entered by French advance guards.

—Philipp Scheidemann resigns as Minister of Finance in the new German Government and his place taken by Hans Landsberg, Secretary of Publicity, Art and Literature.

—In the presence of Sir Eric Geddes, First Lord of the Admiralty, 28 more German U boats surrendered. The cruiser submarine Deutschland was among the number. She carried 2 American officers, rescued from the American army cargo ship Ticonderoga, torpedoed on Sept. 30. The officers were taken to Kiel by the Deutschland, which was returning from a 3 months' cruise in American waters, and were landed at Harwich. Another surrendered boat was the U 139, which had just returned to a German port after a 64 days' cruise, commanded by Lieut. Commander Arnauld La Perriere, who in 1916 received the order Pour le Merite for sinking 126 vessels. The U 139 was brought in by a first lieutenant, who explained that Perriere was too sad to undertake the duty.

—In a proclamation in Karlsruhe, Grand Duke Friedrich of Baden said he relieved officials and soldiers from their oaths of fidelity and renounced the throne for himself and his descendants in accord with his cousin and heir, Prince Maximilian, the former German Chancellor.

—King Albert, in a speech to the Belgians from his throne in Parliament, at Brussels, with Gen. Pershing at his side, said: "The Government proposes to the Chambers to lower, by patriotic agreement, the ancient barriers, and to make the consultation of the nation a reality on the basis of equal suffrage for all men of the mature age required for the exercise of civil rights." The King entered Brussels at 10.30 A. M. He was accompanied by Queen Elizabeth, Princes Leopold and Charles and Princess Marie Jose. The party entered at the Porte de Flanders and proceeded to the Place de la Nations, receiving an ovation. At the Parliament House, King Albert and his family listened to an address of welcome. Then followed a review of Allied troops which formed a line 10 miles long. Flowers were thrown in the path of King Albert as the procession made its way.

—Several thousand American soldiers sailed from Liverpool for home on the liners Lapland and Minnehaha. The men marched from the railway station and local camps to the landing stage amid the cheers of throngs of people along the streets.

—The railroads hire Elihu Root to fight Government ownership. John D. Ryan resigns as head of the Aircraft Board.

—The lifting of the "lightless nights" ban puts New York City's Great White Way in an old-time blaze of illumination.

—Three thousand employees of the Pennsylvania shipbuilding plant at Gloucester walked out after the workmen had notified the company they would quit unless Charles Colburn, a foreman, was discharged. The company refused to discharge the man, saying he can do work no other man in the yard can do.

—Fire, which started on the new $1,000,000 pier at Canton Wharf, spread to the Standard Oil Company's ship F. C. Barstow, which brought a cargo of 75,000 barrels of gasoline into port. Within 5 minutes the flames spread to the adjoining wharves, and hundreds of barrels of gasoline were exploding.

—The charge of making seditious utterances in a speech at St. Paul against Senator La Follette has been passed on to the Senate for final action. The Committee on Privileges and Elections by a vote of 9 to 2 recommended the dismissal of the charge.

Nov. 22—Male clericals of the General Electric Works at Schenectady, N. Y., were given a horizontal increase of 15 per cent. by the War Labor Board. All classes of female clerical workers were given an increase of 20 per cent., with a minimum for adult female workers of $16.50 a week. The minimum wage for adult male clerks was fixed at $22.50 a week.

Nov. 23—Gen. Pershing reports that the total casualties in the American Expeditionary Forces are 236,117, divided as follows: Killed or died of wounds, 36,154; died of disease, 14,811; deaths unclassified, 2,204; wounded, 179,625; prisoners, 2,163; missing, 1,160.

—Gen. Pershing's forces in Luxemburg and all along the River Moselle, from the points of junction with the French on their right and left, looked over into Germany.

—The Finnish paper Turun Sanomat reports that there has been a further wholesale shooting of former officers in Petrograd. About 500 officers have been shot in the last few days.

—Two hundred and seventy-eight persons have been affected by the dethronement or abdication of ruling houses in Germany, the Zeitung am Mittag of Berlin says. Of this number, 33 were of the royal Prussian house and 39 of the Bavarian reigning family.

—Polish troops capture Lemberg.

—All German soldiers in Poland have been disarmed and sent to Germany. Gen. von Beseler, German Governor General of the occupied territory in Russia, fled in the night and the Civil Governor, Herr Steinmeister, has been deported.

—The National Council of French Women has declined to intercede with the French Government to mitigate the terms of the German armistice.

—Miss Carrie M. Hall, of Nashua, N. H., formerly in charge of the Nurses' Training School at Peter Bent Britham Hospital, Boston, has been appointed chief of the American Red Cross nursing forces in France. She succeeds Miss Julia Stimson, who assumes her new duties as chief nurse of the American Expeditionary Force.

—Ignace J. Paderewski sailed for England, carrying power of attorney to act for all the Polish committees in the United States.

—Cardinal Gibbons has authorized the publication by the Zionist organization of America of a statement by him approving the project to establish in Palestine a national homeland for the Jewish people.

—Director General McAdoo granted to railroad station agents a general wage increase of $25 a month above the rate prevailing on Jan. 1, with a minimum of $95 a month. Eight hours is a day's work, with pro rata pay for 2 hours' overtime and time and a half for service above 10 hours.

—Prince Axel of Denmark, who has been in America for nearly 2 months, sailed yesterday for England with his suite on a British liner.

—October imports were $247,000,000, against $262,000,000 in September, and $221,000,000 in October, 1917. Exports aggregated $503,000,000, compared with $550,000,000 in September of this year, and $542,000,000 in October, 1917. For the 10 months ending with October, imports were $2,569,000,000, against $2,504,000,000 in 1917. For the same period exports were $5,063,000,000, as compared with $5,146,000,000 for the same period last year.

Nov. 24—American forces have demolished the barriers which guarded the old German front east of Verdun, consisting of reinforced concrete pillars stretching along the old front for a distance of 2 miles. The pillars were 3 feet apart at the roads and 50 feet apart across the country. They were connected by 2-inch cables. Each pillar was 5 feet square and stood 8 feet above the ground. The pillars apparently were erected a year or more ago, as each was camouflaged by reeds growing in nearby swamps, the concrete being scarcely noticeable from a distance. At Mars-la-Tour, at the edge of the village, the Americans encountered tank barriers some of which were only half completed. A few blasts of dynamite soon put them out of commission. At Etain the Germans had barriers of logs chained together on 4 wheels, the logs being movable like a gate. On these the Germans had installed ingenious devices to remove the wheels from beneath the logs, which would then drop across the road at the main road entrance into Etain. This log barrier was just at the western entrance, the logs acting as a check in the event that the mines failed to destroy the bridge.

—Prince and Princess Joachim Murat, at the request of the Government, have placed their town house at No. 28 Rue de Monceau at the disposal of the French authorities to receive President and Mrs. Wilson during their stay in Paris.

—William Hohenzollern, the former German Emperor, has not left the grounds of Amerongen Castle since he was interned there, Dutch newspapers say. The former Emperor begins each day with a walk about the castle grounds and then attends a religious service, conducted by Count von Bentinck or the Count's son. The day closes with another walk in the gardens. The officers of his suite dash about the country in automobiles.

—Field Marshal von Hindenburg has telegraphed the Berlin Government, asserting the German Army, because of the terms of the armistice and of the internal situation, is in no position to renew fighting. He added that even operations against the French Army alone would be impossible.

—The United Workers' and Soldiers' Councils have proclaimed Oldenburg, Oestfriesland, Bremen, Hamburg and Schleswig-Holstein a republic. The capital will be at Hamburg. The districts named comprise all the North Sea coast of the German Empire, from Holland to Denmark. Bremen and Hamburg are the 2 most important German shipping ports and are free cities. The Kiel Canal traverses Holstein.

—Permanent Government control of all radio communication through the acquisition and operation by the Navy Department of all shore wireless stations in the United States used for commerical purposes is planned by the Administration under a bill put before Congress.

Nov. 25—Marshal Pétain, accompanied by Gen. Casteinau, made solemn entry into Strassburg at the head of the army of Gen. Gouraud. The French troops were received with acclamations. On the French front the troops continued their advance in Luxemburg, occupying Merzig, Bellen, Heiderscheid and Lemerie. In Lorraine they advanced also, reaching positions along the River Lauter

—Italian troops have occupied Innsbruck, capital of the Austrian Tyrol, in accordance with the terms of the Austrian armistice. They also took possession of Landeck, west of Innsbruck, on the Inn River.

—Some of the coal mines at Lens have been so damaged by the withdrawing Germans that it will be impossible to put them in shape for operation within 3 years. Others may be repaired in 8 months.

—An agreement has been reached between the German Soldiers and Workmen's Council and the Government, it is officially announced in Berlin. The agreement provides that all political power is to be in the hands of the German Socialist Republic and the Soldiers and Workmen's Council.

—Former Emperor Charles of Austria, with his wife and their five children, Otto, Robert, Felix, Carl and Adelheid, are at Eckertsau Castle, in the centre of a vast plain devoted to farming. The structure dates from the twelfth century, but has been remodelled and handsomely furnished, so that now it appears as a luxurious country place. Though there are few callers, soldiers are constantly on guard.

—Three hundred and eighty-two officers and 6,614 men of the air service and other detachments training in England are homeward bound on the Minnekahda, Lapland and Orca, British liners. The first 2 ships left Liverpool Nov. 22; the Orca sailed Nov. 24.

—The Cunard Line steamship Mauretania sailed from Liverpool for New York, carrying a large number of passengers. Early in the war she was used by the British as a hospital ship.

—The first woman to be appointed an Ambassador has been nominated by the Hungarian Government for the post in Switzerland. She is the writer and pacifist, Rozsika Schwimmer, who now resides in Switzerland. Mme. Schwimmer has accepted.

—Before the Public Service Commission, at New York, George W. Markens testified the New York Telephone Company annually overcharges its patrons $6,000,000 because of "wrong numbers," which, he asserts, are charged as completed calls.

Nov. 25—The Bosnian National Government has addressed a note to Crown Prince Alexander of Serbia, asking for an immediate reunion of Bosnia and Herzegovina with the Serbian Kingdom, under the sovereignty of the Kara-Georgevitch dynasty, of which the Crown Prince is the ruling head.

—Half dead from starvation and disease, 1,321 survivors of the original total of 2,100 Bolshevik prisoners and refugees in a train sent across Siberia by the Czecho-Slovak troops fighting in Samara, European Russia, have arrived at Nikolsk, near Vladivostok. Of the 800 missing, some were shot while trying to escape from the train. Others threw themselves from car windows.

—It is officially announced that Peru has withdrawn her Consuls from Chili as a result of the renewal of anti-Peruvian rioting in Iquique and Antofagasta. The Tacna-Arica controversy is approaching a critical stage. The Peruvian Club was closed and the Peruvian Consul was forcibly placed aboard the Chilian steamer Palena, bound for Callao.

—The naval estimates for the fiscal year beginning July 1 are to be reduced $1,180,315,573. The original estimate was $2,644,307,046. In the Department of Ordnance, $313,421,716 is to be lopped off. The pay of the navy is to be cut $275,324,285. Naval aviation will be reduced $133,770,700.

—Soldiers and sailors, in New York City, repulsed after an attack in force on Madison Square Garden —where more than 12,000 Reds were gathered in mass meeting to "send fraternal greetings to the Socialists of Germany—roamed the lower part of the city, particularly the east side, beating every man they found wearing a red emblem of Socialism. Hundreds of the service men, armed with sticks and clubs, had tried to batter their way into the Garden and had been driven off after a struggle by police afoot and ahorse.

—Reduction of wages will be opposed by the workers, Frank Morrison, Secretary of the American Federation of Labor, said in a statement dealing with reconstruction as it affects labor.

—Andrew Carnegie passed his eighty-third milestone. He spent the day at home, except for a 2-hour drive in the morning. He entertained a few relatives at luncheon and in the afternoon strolled in the grounds surrounding his residence at Fifth Avenue and 91st Street.

—"The Pershing Republican League" has been launched at Columbus, O., to "crystalize the already existing sentiment for Gen. John J. Pershing as President of the United States in 1920 and to work for his nomination and election."

—At Poughkeepsie, N. Y., Henriette G. Cappanni and Mrs. Androcles G. Gographer of Watch Hill, R. I., started a contest of the will of Thomas B. Hidden, New York real estate operator, who died at Sharon, leaving $2,000,000. The nieces charge Hidden was not competent.

—William Travers Jerome, former District Attorney of New York County, was named by Surrogate Cohalan trustee to succeed James Gordon Bennett in administering that part of the Bennett estate left to Miss Jeannette Bennett, now Mrs. Isaac Bell. The procedure in no way involves the New York Herald. Mr. Jerome filed a surety bond for $600,000 for the faithful performance of his duties.

Nov. 26—Marshal Foch, Allied Commander in Chief, has established headquarters in Luxemburg with his staff. There were no ceremonies. The American forces were on the west side of the Moselle, the extreme left being at the frontier village of Wallendorf. From this point the line extended along the Sauer River as far south as Garsch. Among the other units on the American front was the 26th Infantry of the 1st Division, with its headquarters at Ehnen. Lieut. Col. Theodore Roosevelt, Jr., occupies a room in a hotel there, formerly occupied by Major von Hindenburg, son of the Field Marshal. It overlooks the Moselle vineyards.

—The French Armies marching through Luxemburg reached the German frontier east of Weiswampach and Heinerscheid. Beyond Treves the withdrawal of the Germans is being received with open arms by the civilians.

—Strassburg was still at the height of its celebration when Marshal Petain, with Gen. Gouraud, made his official entry into the city. The passage of the troops was declared to be one of the finest military spectacles ever witnessed. The long column of soldiers marched 8 abreast and was accompanied on either side by a line of Alsatian girls. Marshal Petain everywhere was greeted most warmly. One of the features of the parade was Miss Margaret Wilson, who wore a tricolored cockade in her hat.

—The Grand Duchy of Oldenburg has been transformed into a republic under a directory, composed of 5 Social Democrats, 3 bourgeois and 2 former Ministers. The Duke of Brunswick and his family have gone to Augsburg. A meeting, representing Bremen, Hanover, Hamburg, Flensburg, Osnabrueck and Wilhelmshaven, passed a resolution to stand behind the Government and demand a National Assembly by a vote of 81 to 20. There was also a defeat for the extremists at a meeting representing the 10th Army Corps at Hanover, where, 140 to 4, a resolution was passed against efforts to establish a dictatorship and demanding the summoning of a Constituent Assembly.

—Gen. Ludendorff has left Sassnitz, Prussia, for Sweden. His position in the German military system was that of First Quartermaster General.

—Russian Bolshevik troops have crossed the River Narva on a broad front and have entered Esthonia, between the Gulf of Finland and Lake Peipus. General mobilization has been ordered in Esthonia, which the Germans are expected to leave within a fortnight. Over the Northern Russian front the rivers are ice-bound and the Bolshevist gunboats, which have menaced American and Allied forces on the Dvina River, have been forced to withdraw. The Bolshevists have mounted big guns south of the Allied Armies.

—Workers of France ask for a seat at Peace Conference.

—During the 13 months preceding the armistice 709 bombing raids were made by British aviators over German territory. The list of large towns visited shows that 52 were bombed during the period.

—Difficulties between Peru and Chili, which resulted in the recall of consular representatives by each nation from the principal cities of its neighbor have been overcome by an apology on the part of the Peruvian Government.

—Several hundred soldiers, sailors and marines laid siege to the Palm Garden, where a mass meeting of Internationalists was in session. The men in uniform gathered in the vicinity of the Garden early in the evening, threatening persons attending and daring the Socialists and Internationalists to display their forbidden banners. When one was flaunted—and by a woman—there was a rush that the police couldn't stay. The woman was swept from her feet and the banner torn from her hands before the police could rescue her. The soldiers, sailors and marines—some of them men on crutches recently returned from France—held the banner up on a stick and burned it, singing "The Star Spangled Banner."

—The Leviathan, formerly the Hamburg-American lined Vaterland, transported 94,195 American fighting men to France since she first sailed from New York as an American transport on Dec. 15, 1917, until Nov. 5, when she was laid up in Liverpool for her annual overhauling.

—The United States Government has refused to approve the proposed transfer to a British syndicate of the vessels now under British registry owned by the International Mercantile Marine Corporation. The vessels number 85, of an aggregate of 730,000 gross tons.

—James F. Regan, whose real name, the police say, is Leo Sellinger, and who, under the former name, is serving a 10-year sentence in Sing Sing for burglary, confessed that he, not Elizabeth Baksa, murdered Mrs. Helen Hamel, whose body was found in the kitchen of her rooming house at No. 507 West Twenty-third Street, New York, Feb. 14, 1918.

—Over the protests of 6 Socialists and 1 Democrat, the New York Board of Aldermen passed the Anti-Red Flag Ordinance. The vote stood 58 to 7. The ordinance reads: "No red or black flag and no banner, ensign, or sign having upon it any inscription opposed to organized government, or which is sacrilegious or which may be derogatory to public morals, shall be displayed or carried through the streets of the city in any procession or parade. Any person who shall violate any provision of this section shall be punished by a fine of not more than $100, or by imprisonment for not exceeding 10 days, or by both such fine and imprisonment."

Nov. 26—Ten thousand munition workers were discharged when 5 plants of the Westinghouse Electric and Manufacturing Company, working on war work, closed down following cancellation of British and United States contracts.

—Deaths in the navy from "war causes" totalled 1,233, Surgeon General Braisted told the House Naval Committee. No figures were given as to deaths from disease. The bodies of practically all navy men dying in foreign service, the Surgeon General said, have been returned home. He said there were 15,000 patients in naval hospitals and that the institutions in New York, Philadelphia, Boston and Norfolk were crowded.

Nov. 27—Forces of the American Army of Occupation have been across the German frontier in Rhenish Prussia since Nov. 24, and a large party of American soldiers spend their Thanksgiving on German soil. While there are a few stragglers behind it, the German line in front of the Americans runs generally from Bitburg, through Treves to Oberemmel, Oberzerf and Losheim. This line is from 8 to 17 miles within Rhenish Prussia, across the Luxemburg border.

—The advance of the British Army on the western front has reached the general line of Beho, Werbemont and Aywallle, south of Liege.

—All German soldiers, with the exceptions of the classes of 1898 and 1899, are being discharged. These 2 classes are to be held in service until Field Marshal von Hindenburg sees fit to discharge them.

—Marshal Foch, accompanied by Gen. de Castelnau, arrived at Strassburg and reviewed the Army of Occupation. He then passed through the town at the head of the troops.

—The former German Emperor went for a drive with his host, Count von Bentinck, accompanied by the usual police guard. He almost daily receives flowers and dainties from friends, but as often letters or post cards are delivered at the castle addressed "William Hohenzollern," in which the senders express hatred, contempt or execration. The missives are withheld from him.

—The Czecho-Slovak Department of National Defense has mobilized the active reservists for 1895 to 1899, inclusive, and ordered all men under arms up to 40 years of age to remain in the service.

—Twenty-seven German submarines were surrendered at Harwich to the British allies. This brings the total of German U boats turned over to 114.

—More than 1,500,000 prisoners have been released by the Germans. Of this number approximately 250,000 will pass through the American lines and will be fed by the Americans. Most of them are French, English, Italian and American soldiers. The army, assisted by the Salvation Army, Young Men's Christian Association and the Knights of Columbus, is shouldering the bulk of the task. The population of the Grand Duchy of Luxemburg has been doubled by the arrival of the Army of Occupation. The physical condition of American prisoners released from German prison camps is declared in general as good as could be expected.

—Strassburg did not wait the arrival of the French troops before beginning its celebration, according to reports from that city. Eight hundred students on the night of Nov. 20-21, under the leadership of an old man, pulled down the statue of Emperor William I. in the Kaiserplatz and carried it to the foot of the statue of Kleber, a noted French General. Other students decapitated the statues of William I., Frederick III. and William II. in front of the post office.

—A convention of delegates, representing all the Soldiers' and Workmen's Councils in Germany, has been summoned to meet in Berlin on Dec. 16.

—Roumanian Transylvania has proclaimed its independence and has sent an ultimatum to the Hungarian Government, asking that all political, administrative and judicial departments in territories inhabited by Roumanians in Hungary and Transylvania be handed over. Hungary has refused and the National Roumanian Government has broken off negotiations.

—At Constantinople, British troops marched from their ships to the British Embassy and through applauding crowds to barracks just evacuated by the Germans. The right of civil trial under the Armenian Patriarchate has been restored to Armenians, although the Patriarch is still in banishment in Mesopotamia.

—That politics is controlled in the coal mining regions of Pennsylvania by the coal barons and brewers and that they, in turn, are controlled by Senator Penrose, was the substance of testimony given before the Senate Committee on Manufactures by William Wilhelm, an attorney of Pottsville, Pa.

—The seventy-seventh anniversary of the Brooklyn Daily Eagle was celebrated in the Eagle Auditorium, Washington and Johnson Streets. There were addresses by H. V. Kaltenborn, Maurice McLoughlin, Chaplain Percy T. Edrop, T. R. Kenney, Herbert F. Gunnison and Don C. Seitz.

—The will of Mrs. Mary E. Jones, widow of Dr. Oliver E. Jones, of Cold Spring Harbor, L. I., was filed for probate in the Surrogate's office at that town. Miss Rosalie Jones, the Suffragist, a daughter, is one of the executors, as are 2 sons, Charles H. and Philip H. An estate estimated at more than $5,000,000 is disposed of. The entire sum is left to the children, with one small exception. Mrs. Jones is credited with owning real estate in every county in New York State and property in every State in the United States.

—Commanders of the Students' Training Corps at more than 500 universities, colleges and secondary schools received orders from the War Department to demobilize the units.

—Senator Phelan of California presented to President Wilson a petition from the priests of the Roman Catholic archdiocese of San Francisco, asking the President's support for the claims of Ireland to be a free and independent nation.

—During the war American factories have produced in excess of 12,000 airplanes, 31,814 motors, and all equipment to go with them. Up to Nov. 22 a total of 15,131 Liberty motors had been manufactured, and the output of these engines had reached 150 a day. The country has produced 30,000 Lewis flexible type aircraft machine guns and 35,000 Marlin fixed type guns, in addition to all the machine guns used by the land forces. Armor piercing, tracer and incendiary bullets are used.

—Announcement that the Government, through the Emergency Fleet Corporation, had definitely decided to purchase the real estate of the Hog Island Shipyard and thus become sole owner of the shipbuilding establishment was made. The Government has expended $60,000,000 in equiping the plant.

—A combination of steel interests is forming an organization under the Webb-Pomerene export act to compete with the United States Steel Corporation for foreign trade. Twenty-five or more of the rivals of the United States Steel Corporation have agreed to pool their interests, and send commercial representatives to every nation in Europe to seek contracts.

Nov. 28—King George, the Prince of Wales and Prince Albert arrived in Paris. His Majesty was received at the Bois de Boulogne Station by President Poincare, Premier Clemenceau, Foreign Minister Pichon and other Cabinet Ministers and the Presidents of the Chamber of Deputies and the Senate. Enormous crowds thronged the streets, in spite of the bad weather, all the way from the railroad station to the Quai d'Orsay, where the royal party arrived at 3.30 o'clock.

—It is officially announced that during the war the forces of Great Britain lost nearly 1,000,000 men, killed or dead through various causes. Recently it was stated that the British losses totalled 658,704, but this number did not take into consideration men who were reported missing who actually lost their lives, but of whom there is no trace.

—The Royal Air Force had completed all preparations for the bombing of Berlin on Nov. 9 with 19 Handley-Page planes, each carrying 3,500 pounds of bombs, according to an official report. The weather proving bad, the raid was postponed until Nov. 11, but the armistice was signed that same morning.

—Advance guards of the British troops have reached the Belgian-German frontier in the region between Beho and Stavelot and are in possession of more than 1,400 surrendered German guns.

—At a dinner by American aviators in honor of their French comrades, it was announced by the Under Secretary of Aviation that of 240 American pilots in the Lafayette Squadron 60 lost their lives.

Nov. 28—Belgium is clear of German troops. There has been little destruction in the country east of Mons; in the area between Mons and Charlerol the mines and factories are working.

—Both Chambers of the Spanish Parliament have approved the formation of a League of Nations and will name a Spanish representative in that organization.

—The American Thanksgiving Day was celebrated in England as never before. At all the naval bases the American naval units were entertained, while the officers and crews of the 5 American battleships in the Firth of Forth were guests on board British warships there. In London the programme included a football game at Chelsea between teams of sailors and a mid-day dinner at Albert Hall, where 400 British sailors were the hosts of 400 American tars. High mass for officers and men was celebrated at Westminster Cathedral. Scores of American wounded were conspicuous there. Special arrangements had been made by the Knights of Columbus to convey them from the various London hospitals. The Rt. Rev. Mgr. Howlett, Administrator of Westminster Cathedral, read an address, which was identical with one delivered by Cardinal Bourne at Paris. American priests with the army and navy in England officiated. These were the Rev. J. J. Duff, of Philadelphia; the Rev. J. Edmanton, of Brooklyn, N. Y., and the Rev. Edmund C. Sliney, of South Boston. At night there were 2 big dinners, one of the American Society and the other of the American Officers' Club, where the Americans entertained British guests. The American Red Cross supplied all the Americans in English hospitals with a turkey dinner and gave dinners to 500 officers in different camps. The crews of 150 American ships, all the way from Gibraltar to the Shetland Islands, were entertained by British seamen.

—At Lima, Peru, the Cabinet and Senate have approved the protest of the Foreign Minister to Chili against the anti-Peruvian riots at Iquique. Peru will demand indemnities.

—Vice-President Marshall has cancelled the speaking tour for which he was booked and will remain in Washington during the President's absence abroad.

—The sentence of Thomas J. Mooney, condemned to be hanged on Dec. 13 for the deaths of 10 persons killed by a bomb explosion in San Francisco during a preparedness parade in July, 1916, was commuted by Gov. W. D. Stephens to imprisonment for life.

—Officials of the Independent Order of B'nai B'rith presented to President Wilson a gold medal awarded to him by the society last October as the man who rendered the most distinguished service to humanity during the year.

—Probably the first aerial banquet in the history of the world was eaten 2,800 feet above New Jersey by 9 passengers in the Handley-Page airplane which will carry mail regularly between New York and Chicago beginning Dec. 15. A regular Thanksgiving Day dinner was served with nothing eliminated from the menu except soup.

—Demand has been made by the Polish National Department and the Polish National Defense Committee that the United States send a special commission to Poland to investigate existing conditions and report its findings. The special commission is to have Jewish and Polish membership.

—The engagement was announced of Miss Margaret Carnegie, only daughter of Mr. and Mrs. Andrew Carnegie and heiress to the steel man's millions, to Roswell Miller, son of the late Roswell Miller, who was President of the Chicago, Milwaukee and St. Paul Railroad.

—The American flag was the only banner carried by the several thousand striking cooks and waiters who paraded through the New York hotel district. As a result, there was no excitement, though the streets were lined with sailors and soldiers.

—Aerial defense of the American coast line is part of the plans of the Navy Department, the House Naval Affairs Committee was informed by Capt. Steele, United States Naval Air Service, and Rear Admiral Taylor, chief of the Bureau of Construction and Repair. It is intended to have 90 stations distributed between the Atlantic and Pacific coasts and including Panama, Hawaii, Guam, Alaska and the Philippines, where triplanes, which can develop 160 miles an hour, and dirigibles, some of the Zeppelin type, will base. The cost is estimated at $85,769,300 for the next fiscal year. The fleet of dirigibles would include 4 huge ships of the rigid type, costing $1,500,000 each; 12 smaller balloons, to cost about $250,000 each, and a number of still smaller type, costing $75,000 each. The operation of the coastal stations would cost about $8,000,000. Training stations would require $3,000,000 more, and experimental stations $3,000,000.

Nov. 29—The formal document of Emperor William's abdication has arrived in Berlin. The Berlin Government had sent a telegram to the ex-Kaiser, in Holland, demanding the formal abdication of himself and the ex-Crown Prince.

—Austria-Hungary lost 4,000,000 killed and wounded during the war, according to an Exchange Telegraph despatch from Copenhagen. There were 800,000 killed, including 17,000 officers.

—It is announced that approximately 200 German submarines were destroyed during the war. The total number of all types built by the Germans is estimated to have been 360.

—In a raw, misty morning, Frau Auguste Victoria, wife of the once German Emperor, arrived by automobile from Potsdam to join her husband in exile in Amerongen Castle. She was handed over to Count von Bentinck, by the Captain of the rural gendarmerie, who, acting under orders, had escorted her from the first Dutch frontier station. The former Empress wore a plain, dark tailor-made velvet dress and a hat and veil that did not conceal her silver hair. There was no official reception or demonstration of any kind.

—Field Marshal Haig's report shows the British Army has reached the German frontier along the whole of the front, from just north of the Duchy of Luxemburg to the neighborhood of Lupen.

—The frontier bridges between Luxemburg and Rhenish Prussia have been crossed by American engineers at various points on the American front, say reports from Luxemburg. They examined the bridge piers on both sides of the river for mines, but none were found. The ends of the bridges on the Luxemburg side are guarded by Americans. Civilians are allowed to pass, provided they show proper passes. German soldiers and civilians are permitted to cross into Luxemburg only if they agree to stay in Luxemburg until the army has moved into Rhenish Prussia.

—"Liberty cabbage," ex-sauerkraut, has been served in American messes. The Americans found five carloads of it when they entered Arlon, Belgium, along with several cars of potatoes, many tons of turnips and other perishables, which were served at Thanksgiving dinners. Only one turkey was served Thanksgiving Day in the entire American Army of Occupation. This was at the mess of fifteen officers at Remich, who bought the turkey Nov. 11. Other dinners had venison, ducks, chicken, plenty of beef, nuts and sweetmeats.

—Brand Whitlock, American Minister to Belgium, formally notified the United States State Department of his reoccupation of the legation at Brussels, relieving the Spanish Minister, who cared for American interests during the German occupation.

—Prince Antoine Gaston Philippe of Bourbon-Orleans, great-grandson of King Louis Philippe of France, has died in a military hospital from injuries suffered in the fall of an airplane. He was flying from France to England and was forced to make a landing at Old Southgate. The plane got out of control and crashed into a cottage. The pilot was killed and the Prince was fatally hurt. He was the son of Prince Gaston, Count d'Eu, and Princess Isabelle of Braganza. He was born in 1881 and early in the war was a Captain in the Royal Canadian Dragoons.

—At Peking, the celebrations of the victory over Germany opened with a review of the Chinese and Allied troops by President Hsu Shih Chang. The square fronting the throne room was filled with two regiments of Chinese soldiers and picked troops from the Allied contingents. The centre of the square was occupied by an American Marine Band, flanked by three British soldiers and three Cossacks carrying their respective flags. Behind were French and Anamite troops, facing Japanese and Italian detachments. The President passed through the square under an arch of Allied flags.

Nov. 29—Viscount Buxton, Governor-General of South Africa, said to-day that the number of deaths from influenza among Europeans and natives of South Africa was estimated at 50,000.

—It was announced at the White House that the representatives of the United States at the Peace Conferences would be the President himself, the Secretary of State, the Hon. Henry White, recently Ambassador to France; Mr. Edward M. House and Gen. Tasker H Bliss. It was explained that it had not been possible to announce these appointments before, because the number of representatives each of the chief belligerents was to send had until a day or two ago been under discussion.

—From his cell in California, Thomas J. Mooney issued a statement protesting against Governor Stephen's commutation of his sentence to life imprisonment. "I would rather die," he said, "than be condemned to a living grave." Mooney also appealed to labor leaders to continue their efforts in his behalf.

—It cost $5,645,000,000 to run the American Army during the year ended June 30, last; $1,368,000,000 for the navy, and $1,516,000,000 for the Civil Government proper. The Shipping Board spent $862,000,000 and $181,000,000 was paid out in pensions, a total of $9,572,000,000. These figures are shown to-day by the annual report of John Burke, Treasurer of the United States, to Secretary McAdoo. The public debt June 30, was $12,396,000,000.

—At Chicago, Mme. Amelita M. Galli-Curci, grand opera prima donna, filed suit for divorce from her husband, Luigi C. Curci, alleging extreme and repeated cruelty.

—The four-masted schooner Alice May of New York was driven high on the beach west of the Forge River Coast Guard station, opposite Mastic, L. I.

Nov. 30—The German Government has proposed to the Entente nations that a neutral commission be established to examine the question as to who was responsible for the war. The proposal is contained in a note sent to Switzerland for transmission to France, Great Britain, Italy and the United States. It asks that all the belligerents place their secret documents at the disposal of the commission.

—A red flag hoisted over the University of Leipzig by the Soldiers and Workers' Council was hauled down by students.

—Speaking before the Fabian Society at London, George Bernard Shaw said that before the war England had a choice between an alliance with the United States or with Russia, and that she had deliberately chosen Russia, with "consequences we all know."

—Douglas Fairbanks, comedian and movie star, was divorced by his wife. A process server for Mrs. Beth S. Fairbanks, who is a daughter of Daniel J. Sully, the former cotton king, served the complaint on Fairbanks in Sherry's on October 22, but secrecy was maintained till the suit came to trial at New Rochelle.

—King Albert and the Belgian royal family made their official entry into Liege at the head of the troops who conducted the defense of that town in 1914. The King and Queen and Gen. Leman, defender of Liege, were cheered by the crowds.

—The Allied naval squadron anchored off Sebastopol, the Russian naval base in the Crimea. The Russian ships, which were in the hands of the Germans, and also some German submarines, were surrendered to the Allied naval representatives.

—The Soldiers' Council of Greater Berlin resolved to investigate the Executive Council of twenty-eight men.

—The Republic of Lithuania has been proclaimed at Riga in the presence of the National Council and great numbers of the population, the Rhenish Westphalian Gazette of Essen states. Karl Ullmann is the President of the new republic.

—The Executive Council of the American Alliance for Labor and Democracy, Samuel Gompers, President, voted to fight against any scaling down of wages.

—By decree of President Wilson all of the breweries of the country closed for conservation of grains. Breweries making "near beer" or, as they are known in the trade, cereal beverages, likewise ceased. About 1,200 breweries in the country were affected by the order. Of that number, 160 are in New York State and 41 are in New York City. A total of 75,000 employees throughout the country are thrown out of work by the closing, of whom 5,000 are in this city.

—Bernard M. Baruch, Chairman of the War Industries Board, has forwarded his resignation to President Wilson, to take effect on Jan. 1.

—It is announced that all records for the number of passengers carried in any type of airplane were broken on Nov. 27 at the Naval Air Station, Rockaway, when the navy's newest type seaplane, the giant NC-1, the largest in the world, made a flight with fifty men on board. The pilot was Lieut. David H. McCullough of the Naval Reserve Flying Corps.

—Announcement was made at New York Police Headquarters that the hand bag and personal effects found Nov. 25 in a stateroom on the Fall Fiver liner Priscilla, from New York, had been identified as belonging to Miss Dorothy Armstrong, the sister of Matthew C. Armstrong of Hampton, Va.

—The sentence of death imposed upon Paul Chapman, youthful Brooklyn choir boy, for complicity in the murder of Harry Regensburg, a Brooklyn cigar store proprietor, was commuted to life imprisonment by Gov. Whitman. The time for Chapman's execution had been fixed by the Court of Appeals for the week beginning Jan. 8.

Dec. 1—American troops have crossed the frontier into Prussia behind the German rear guards, the crossing having been made at daylight, according to reports from the American Army of Occupation. The advance averaged twelve miles, and Treves was the most important city occupied. The British advanced troops, under Gen. Plumer, crossed the German frontier between Beho and Eupen, and advanced toward the Rhine, by evening had reached the general line of Hurg, Reuland, Bullingen and Montjoie. Gen. Pershing's advanced headquarters will be established at Treves, where Gen. Preston Brown will be the Military Governor, and Gen. Harry A. Smith in charge of civil affairs.

—The Belgian troops entered Aachen (Aix-la-Chapelle), Rhenish Prussia.

—Four American soldiers dispersed a mob of thousands at Esch, Luxemburg, after it had wrecked 28 shops in revenge for the overcharging of Americans. Most of these establishments were conducted by Germans. The loss is estimated at between $800,000 to $1,400,000.

—Marshal Foch and Premier Clemenceau of France and Premier Orlando and Foreign Minister Sonnino of Italy were received by Premier Lloyd George, the Duke of Connaught and other high officials on their arrival in London.

—Field Marshal von Hindenburg has issued a proclamation declaring that conflicts with the Soldiers and Workmen's Councils will be avoided. He requested that the Central Government instruct the councils to abstain from interfering with the army commanders.

—The German Revolutionary Government, according to estimates made by the Berlin correspondent of the Cologne Volkszeitung, has spent $150,000,000 in the last three weeks.

—The Russo-American forces, continuing their advance up the Pinega River over ice and snow-covered roads, have captured the town of Karpagorskoi, 120 miles from the town of Pinega, after a fight with the Bolsheviki.

—At Lima, Peru, the army reserves have been called to the colors. Three more Chilian Consuls sailed for Valparaiso.

—Nearly 4,000 American aero troops came into New York Harbor on the British transport Mauretania. They included over 800 wounded.

Dec. 2—Demobilization was begun of the Students' Army Training Corps at New York University and Princeton.

—President Wilson told Congress, in joint session, that he was about to leave for France to take part in the Peace Conference, particularly as regards his "14 points," which, he said, had been accepted in outline by the other Allies. He goes, he said, only because he believed it his imperative duty. He discussed, also, in his address, the unscrambling of federalized railroads and other war-emergency conditions in industry. Congress received the address coldly.

Dec. 2—The advance of the American Army of Occupation into Germany was held up by the limited number of bridges across the Sauer and Moselle Rivers. The American divisions marched with full war equipment of steel helmet, gas mask, rifle, and belts filled with cartridges. The main roads were in good condition. The first American tunes heard in Germany, as played by the bands of the Army of Occupation, were in the Village of Irrel, just across the Sauer River. The village was entered by the 125th Infantry while the villagers were on their way to church. With the American flag and the regimental insignia at the head of the column, the 125th band marched into Irrel playing sprightly airs.

—Based on information cabled by Gen. Pershing in reply to an inquiry, the War Department authorized this announcement: "American prisoners released from German prison camps complain of poor, scanty food and bad housing conditions. Only a small percentage of those who are sick are hospital cases; the majority are suffering from slight colds. Practically all recover rapidly with proper food and housing. There is as yet no evidence of discrimination against Americans. Among 7,000 prisoners of all nationalities, there have been no authenticated instances of brutality against Americans. The majority of American prisoners state that the German soldiers also suffered food privation, but that in cases where supply of food was insufficient the food for prisoners was cut off before that for German soldiers."

—King Nicholas of Montenegro has been deposed by the Skupshtina, the Montenegrin National Assembly, according to a message from Prague.

—A despatch from Amsterdam tells of a plot for the early restoration of imperialism and the return of the fugitive Kaiser, which has been discovered in Berlin. The chief men behind it were Gen. von Mackensen, Gen. von Boehn and Gen. Count Sixt von Arnim. They had been busy for the last few days issuing instructions to the Prussian Officers' Corps to effect a pro-Kaiser agitation, which was to start the minute demobilization was completed.

—The Mauretania docked at New York and discharged her 4,000 aero service troops and her wounded soldiers. The troops went to Camp Mills, the wounded to hospitals.

—Private Walter L. Hirshberg, said to be an associate of Lenine and Trotzky, has been sentenced to twenty years at hard labor at the Federal Penitentiary at Atlanta, on a charge of desertion. Hirshberg was to have sailed to Russia to participate in the Bolshevik uprising, but missed the boat and was arrested as a deserter.

—The admission that no automatic speed control and no block signal system to insure the safety of passengers were on the Brighton Beach line, on which occurred the wreck of Nov. 1, causing more than ninety deaths, was drawn by District Attorney Lewis from President T. S. Williams and Chief Engineer W. S. Menden of the Brooklyn Rapid Transit system. This was at the conclusion of the hearing before Mayor Hylan.

—War expenses persisting in peace times, but falling off rapidly, will make the Government's outlay in the fiscal year beginning next July 1, 1919, amount to $7,443,415,838, of which $5,212,000,000 will go to the War and Navy Departments, $893,000,000 to pay interest on war debt, and $579,000,000 for continuing the building of a merchant marine, according to departmental estimates presented to Congress. These expenses compare with the $24,599,000,000 appropriations for the current year ending next June 30, with the $18,000,000,000 which probably will be actually spent this year, and with the ordinary annual expenses of about a billion dollars before the war.

Dec. 3—The President started on his momentous journey to the Peace Conference after midnight. His departure from the White House was two hours earlier. Great care was taken to prevent any general knowledge of the hour of his going, and except for the extra police and the waiting automobiles there was nothing to indicate the approaching departure. There were 68 passengers on the train, including Secret Service men, stenographers and under secretaries. Secretary Baker was of the party, but only to see the President on board the army transport—for that is still the official rating of the George Washington.

—Senator Knox, Republican, Pennsylvania, offered in the Senate a resolution, "that any project for any general League of Nations or for any sweeping change in the ancient laws of the sea, as hitherto recognized as international law and violated by the Teutonic powers should be postponed for separate consideration, not alone by the victorious belligerents but by all the nations, if and when at some future time general conferences on these subjects might be deemed useful." It was referred to a committee.

—Announcement was made at the White House that President Wilson had pardoned Lieut. Col. George W. Mixter and Lieut. Jesse M. Vincent, army officers whom the Hughes report on aircraft production showed to be technically guilty of violating Section 41 of the Criminal Code.

—The State Department announced it has urged Chile and Peru to make up.

—Dr. Harry A. Garfield, Fuel Administrator resigned, and his resignation was accepted by the President.

—Airplanes have been added to the means by which liquor may not be brought into the State of Florida. Hundreds of aviators fly regularly from half a dozen places in Florida to New Orleans or to coast points where illicit stills are in operation.

—Restrictions on the purchase of sugar for consumption in homes and public eating places were removed by the Food Administration.

—Major Gen. William L. Kenly, Director of Military Aeronautics, announced information from Dayton, O., that the Loening two-seater monoplane has developed a speed of 145 miles an hour with a full military load, including four guns.

—Across the Rhine the American Army take up a line a little over sixty miles in length, an arc of a circle having Coblenz as a centre and with a radius eight and six-tenths miles in length. This circle, plotted upon Coblenz, is the bridgehead which the Germans conceded in the armistice. The line leaves the Rhine at a point northwest of Coblenz, swings eastward through Rahms and Oberlahr and turns to the south just beyond Rossbach. It continues through Woelferlingen, Moisberg, Diez, Schonbron, Katzeneinbogen and Welteroth, and reaches the Rhine again at Caub. Along the Rhine the Americans occupy a line about forty-three miles in length. The front extends a few miles beyond either end of the semicircle described above, thus overlapping in places the lines of the British, on the left, and the French, on the right.

—The German Crown Prince, in an interview on the Island of Wieringen, denied he had renounced succession to the throne, adding: "I was convinced early in October, 1914, that we had lost the war. I considered our position hopeless after the Battle of the Marne, which we should not have lost if the chiefs of our General Staff had not suffered a case of nerves. I tried to persuade the General Staff to seek peace then, even at a great sacrifice, going so far as to give up Alsace-Lorraine. But I was told to mind my own business and confine my activities to commanding my armies. I have proof of this. What finally brought about the downfall of the German military power was revolution induced by four years of hunger among the civilians and the troops in the rear, together with the overwhelming numbers being gathered by the Entente Powers, since America's entry into the war had undermined the confidence of the German fighting forces."

—The Spanish Cabinet resigned.

—Czecho-Slovak forces have occupied Bodenbach, 200 miles northwest of Vienna, near the German frontier, cutting off from Vienna supplies of provisions. The Czechs are pressing toward the frontiers of Upper Austria, having garrisoned German Bohemia. To the south the Jugo-Slavs have occupied Harburg, 115 miles southwest of Vienna, and have entered Carinthia and Styria. In the northwest the Poles are advancing over the Carpathians to the frontiers of Hungary in their fight against the Ukrainians. At Lemberg, 350 miles northeast of Vienna, the Ukrainians are preparing to surround and starve out the city, the railroad having already been cut. In the east a Roumanian Army has marched into Bukowina as far as Kolomea, 390 miles east of Vienna, on the River Pruth.

Dec. 4—President Wilson and his party left New York Harbor on the George Washington on their way to the Peace Conference. The special train bearing them from Washington arrived at Hoboken at 7.20 A. M. Mr. Wilson left the train at 8.07, boarded the vessel at 8.10, and the latter moved into the North River at 10 30. Aeroplanes, destroyers and a mighty chorus of harbor whistles attended the progress of the Presidential party down the bay.

—For one "zoom," two tailspins, divers volplanes and other antics in the air above President Wilson's head as he stood on the George Washington, Lieut. Fred Kelly, the crack hurdler from the Pacific Coast, was later ordered to remain two weeks on post at the Hazelhurst Camp.

—It was reported to Frederick Shepherd, Superintendent of Passaic (N. J.) Schools, by Miss Aima L. Smith, Principal of School No. 2, that of the 800 pupils there, 200, whose ages range from 9 to 14 years, have come to their studies under the influence of liquor during two months.

—Arthur Gabryel, former Vice-President of the American Association of Foreign Language Newspapers, declared before the Senate Committee investigating brewers' activities and German propaganda that Count von Bernstorff, the former German Ambassador here, visited the offices of the association in New York in March, 1916, and that immediately afterward an advertising campaign to prevent the manufacture of munitions in this country for the Allies was started.

—A Congressional investigation of the political and other activities of the National Security League of New York was demanded in the House by Representative Frear, Republican, of Wisconsin.

—Calling the seizure of the cables lawless, the Commercial Cable Company begins an action to enjoin Postmaster General Burleson from interfering with its system.

—Discussion of the fourteen principles enunciated by President Wilson as forming a basis for permanent peace was precipitated in the Senate by Mr. Frelinghuysen. He offered a resolution calling upon the President for an interpretation of the principles.

—George J. Gould is a patient at Roosevelt Hospital, New York, having been operated on for stone in his left kidney by Dr. John F. Erdmann of the hospital staff. Mr. Gould had been suffering with the ailment for four weeks.

—At Atlantic City 4,000 men, representing every branch of business and industry in the country, met in a Reconstruction Congress, and listened to utterances on readjustment problems by Secretary of Commerce Redfield Charles M. Schwab, head of the Bethlehem Steel Corporation and Director General of the Emergency Fleet Corporation, and Harry A. Wheeler, President of the Chamber of Commerce of the United States.

—Railway executives, representing more than 90 per cent. of the mileage of the country, met at the New York Chamber of Commerce, and, with one dissenting vote, adopted resolutions urging the return of the railroads to private ownership, under conditions making for their "highest possible efficiency." No time for their return was set. The one vote against the resolution came from Newman Erb, President of the Ann Arbor Railroad Company. He said that he preferred Government ownership to pre-war regulations.

—The 3d American Army in its advance into Germany reached the general line Dahlem-Eisenschmitt-Wittlich-Berncastel-Asann; Steinberg. The 10th French Army on its way to the Rhine and Mayence has crossed the German frontier of 1870, occupying the Valley of the Sarre. The advance into German territory has been without incident. The population of the districts thus far reached appears to be more astonished than downcast.

—All liabilities contracted by the Russian Government, except those made by the Bolshevik regime, are recognized by the All-Russian Government at Omsk, and will be executed by it, according to a statement authorized by the Ministry of Foreign Affairs. The Government has refused to admit 1,500,000 Russian soldiers who have been prisoners in Germany and has turned them back at the frontier. 15,000,000 persons in Northern Russia will probably die of privation this winter, according to Charles Stewart Davison, Chairman of the American Defense Society.

—Anti-Jewish pamphlets have been distributed over Berlin accusing Jews called to military service of having shirked going to the front and having managed to procure for themselves safe work behind the fighting lines. The pamphlet violently attacks the Jewish members of the Government, Haase, Cohn, Bernstein, Lansberg and Eisner, and finishes with a veiled appeal to organize pogroms against the Jews.

—This was nomination day for candidates for the British Parliament in the coming general election and among the surprises was the appearance of an opponent to Premier Lloyd George at Carnarvon, Wales. He is Austin Harrison, editor of the English Review, and is standing on the plank of a league of nations and the abolition of conscription. Another striking feature of the nominations was the large number of unopposed returns.

—Brest-Litovsk, where Germany negotiated the peace treaties with Russia and the Ukraine, has been occupied by Polish troops, according to the Neue Freie Presse of Vienna, says a Geneva despatch to l'Information.

Dec. 5—A wireless from the George Washington said the President spent most of the first day (Dec. 4) of the trip at sea working in the office part of his suite. After acknowledging from the bridge the greetings that were given him as the ship put to sea he turned to the pile of letters and telegrams awaiting him and spent several hours working with his stenographers. In the afternoon, on the advice of his physician, Rear Admiral Cary T. Grayson, he lay down and rested for a time because of a slight cold that was affecting his voice. Later the President received calls from officials on board, including the Italian and French Ambassadors. Following this he took a walk on deck, together with Mrs. Wilson. The Presidential party dined quietly in the evening, being served by a waiter who said he had attended Emperor William and the Empress in the same suite on the trial trip of the George Washington. In the dining hall music was furnished by the ship's band and a quartet of sailors. The escorting destroyers, with the battleship Pennsylvania leading the column, are keeping in close touch with the steamship carrying the President. Mine sweepers are running before the bow of his ship. They are loaded with steel billets, to insure their deep draught. In the evening Mrs. Wilson released from the George Washington carrier pigeons bearing notes of thanks to Vice Admiral Gleaves for the success of the arrangements made for the departure.

The ship this morning (Dec. 5) was 450 miles out, steering a steady course at a speed of seventeen knots. The weather was clear and cold, the pale sunlight making the escort observable from the decks. The President slept late and took breakfast with Mrs. Wilson, no other members of the party being present. Afterward he worked with his stenographer and examined the official wireless messages, which included several applications for clemency. A pouch of official mail will be put off at the Azores on Sunday and hurried back to the United States on board a destroyer. The President has his own typewriter on board and is using it at intervals in working upon the speeches he expects to deliver in France.

—At Washington, Secretary Daniels said: "The George Washington and the battleship Pennsylvania are both equipped with the most modern radio apparatus, some of which was installed for this particular trip. This apparatus includes, on the Pennsylvania, the most powerful transmitting set on any United States naval ship and also special receiving apparatus for receiving from high power stations, used ordinarily only for transatlantic messages. The George Washington was also especially equipped with similar receiving apparatus. On board both ships were installed radio telephones and the newest types of low power radio sets for use only in communicating from ship to ship. All messages for the President are sent by the new naval high power station at Annapolis, which is five times as powerful as the Arlington station. These messages are received by the George Washington and the Pennsylvania simultaneously. All replies are forwarded from the George Washington to the Pennsylvania and relayed to shore by the Pennsylvania.

"At three special naval radio receiving stations,

one in Maine, one in New Jersey and one in the Navy Building, Washington, expert operators are listening continuously for the Pennsylvania's messages. The messages when received are forwarded with utmost despatch to the transatlantic radio division of the office of the Director of Naval Communications in the Navy Department, and the three copies are compared to insure accuracy. The message is then delivered to the addresses. All outgoing messages pass through the same office in Washington. As the Presidential party approaches Europe, by arrangement of the Navy Department, special receiving stations in both England and France will listen for messages from the Pennsylvania, and one of the French high power stations will forward messages direct to the ship. The President will thus be kept in touch with Washington and Paris or London simultaneously, for the George Washington will receive easily the messages sent from the Annapolis station until the end of the voyage and the ship is in a French port."

Dec. 5—One hundred and forty-nine Yale men lost their lives in the war.

—Arthur Brisbane told the Judiciary Sub-Committee of the United States Senate the details of his purchase of the Washington Times with brewers' money, explained that he considered war "international murder," revealed that his salary from William Randolph Hearst was $104,000 a year, and that his employer had an option on the Times that enabled him to take it over any time he felt Brisbane was neglecting Hearst's interests because of it.

—In the Senate Mr. New of Indiana said twelve new automobiles were a part of the cargo of the George Washington, on which President Wilson is a passenger, and inquired if Congress would be called upon to make appropriations to defray this expense, together with the upkeep of the Paris mansion in which are housed the members of the Creel committee party.

—The first soldiers to win the Congressional Medal of Honor are Lieut. Col. C. W. Whittlesey, Capt. G. G. McMurtry and Private T. C. Niebaur.

—Postmaster General Burleson in his annual report says the revenues of the department increased from $329,726,115 to $388,975,962, while expenditures increased only from $319,838,718 to $324,833,728. Of the increase in revenue $44,500,000 arose from increases in postage rates and went to the Treasury Department. There remained an excess of $19,642,233 of revenues over expenditures.

—Representative Carter Glass of Virginia was nominated by President Wilson as Secretary of the Treasury to succeed William G. McAdoo.

—New York City experienced its first snowfall of the winter—a few flakes. In Connecticut and elsewhere north the ground was made white with snow.

—The Orca arrived at New York with 1,925 more American aviators.

—The 3d American Army, continuing its advance south of the Moselle, reached the general line Berncastel-Malborn-Otzenhausen. Northwest of Berncastel our line remained unchanged.

—Gen. Nudant, President of the French Armistice Commission at Spa, has presented a note to the German Commission, demanding for the first month for the British troops of occupation $10,000,000, and for the French troops $13,500,000.

—The entire Turkish fleet is now in the hands of the Allies. The warships, after surrendering, were interned in the Golden Horn, at Constantinople.

—At London, Winston Spencer Churchill, in an election speech, announced the Government's decision to nationalize the railways. He added that the British representatives at the Peace Conference will demand general and absolute abolition of conscription throughout Europe.

—"I am threatened on all sides with criminal charges which, if brought, I must face. Therefore, I must reserve any statement until charges are actually brought," said the ex-Kaiser to a correspondent, at Amerongen.

—Machine guns were used in suppressing food riots in Cologne. The mobs retreated only when the quick-firers were brought into play. A number of casualties were reported among the demonstrants, who continued the fighting throughout the night. Several stores were plundered in different parts of the city, and after their work crowds gathered at the food depot, but the Welfare Committee of the city decided to suppress the disturbances without mercy.

—King Albert and Queen Elizabeth of Belgium and their eldest son arrived in Paris. The royal train, decorated with Belgian and Allied escutcheons and flags, reached the Bois de Boulogne station at 2 P. M. The streets were crowded along the entire route from the station. The Queen sat beside Mme. Poincaré in an open carriage and smiled as women and children in the throng threw flowers into the carriage.

Dec. 6—All time limitation on trading in future deliveries of corn, oats, rye and barley was removed by the Food Administration.

—A. B. Bielaskl, head of the Bureau of Investigation of the Department of Justice, testified to the United States Senate Judiciary Committee that W. B. Hale, a correspondent of the Hearst newspapers, was at the same time, according to Count von Bernstorff's cablegrams, a confidential agent of the German Embassy at Washington; that Germans were planning to buy the New York Sun and Washington Post; and that C. B. Means was employed to get evidence against the British Government which might stir up trouble between Britain and the United States. Mr. Hale issued a denial.

—At Atlantic City, the War Service Committees of the Wholesale and Retail Clothing Associations of the United States agreed that the style recommendations promulgated by the War Industries Board be continued for the spring and summer styles of 1919.

—An appeal to the workers of the country not to engage in a Nation-wide strike as a protest in the case of Thomas J. Mooney, convicted of murder in connection with the Preparedness Day bomb explosion in San Francisco, was issued by Secretary of Labor Wilson.

—Mayor Hylan of New York vetoed the Curfew ordinance.

—Wage increases approximating $3 a week were granted by the War Labor Board to members of the New York Printers' Union and associated unions involved in the wage disputes with the New York City section of the American Association of Employing Printers.

—Capt. B. B. Lipsner, Supt. of the United States Aerial Mail Service, and Max Miller, aerial postman of the New York-Philadelphia-Washington route, resigned, saying they were dissatisfied with the Government's plans for the service.

—19 persons were hurt in a collision on the "L" at 57th St. and 2d Ave., New York City.

—Indictments charging treason—the first of the sort to be returned in the New York district since the war began—were returned by the Federal Grand Jury against Hermann Wessels, known as Carl Roediger, and Albert Paul Fricke. The offense is punishable by death.

—Despite snowstorms over the Alleghany Mountains, which forced an ascent to 12,000 feet, the trip from Pittsburgh to Washington, a distance of 175 miles, was made in seventy-five minutes by a bombing plane equipped with twin Liberty motors and piloted by Major Harley W. Lake, inspector for the Division of Military Aeronautics. Major Lake started from Cleveland, but was forced to descend near Pittsburgh by the cold.

—A speed of 170 miles an hour was claimed for a "Bullet" airplane, which had its first trial flight at Central Park, L. I.

—Commutation by President Wilson of the death sentences imposed by military court martial at Camp Shelby, Miss., on Privates Thomas T. Barnes and George T. Walker, convicted of desertion, was announced by the War Department The sentences were reduced in each case to twenty years' imprisonment at hard labor.

—An appeal to Christians to support the project for a League of Nations has been issued by the Archbishops of Canterbury and York and the Presidents and Moderators of the principal free churches of the United Kingdom.

—An Admiralty statement says: "The British warship Cassandra struck a mine in the Baltic just before midnight Wednesday and sank at 1 A. M. Thursday. Eleven men are missing. Presumably they were killed by the explosion. The others of the officers and crew were saved by our destroyers."

Dec. 6—Gen. Skoropadski, Hetman of the Ukraine, has been killed and all power in that country is in the hands of the Unionists, say Geneva advices, adding that Kieff is in the hands of Unionist troops. The city was taken after a battle in which 10,000 men, including 500 officers, were killed or wounded.

—Gen. Pershing, from his headquarters at Treves, issued a proclamation to the inhabitants, saying: "The American Army is not come to make war on a civilized population. All persons who, with honest submission, act peacefully and obey the rules laid down by the military authorities will be protected in their persons, homes, religion and property. All others will be brought within the rule with firmness, vigor and promptness. The American Army will govern in strict accordance with international law and the rules and customs of war sanctioned by the civilized world. Inhabitants on their part must absolutely abstain in word and deed from every act of hostility or impediment of any kind toward the American forces. It is your duty to devote yourselves to the orderly and obedient conduct of your private lives and affairs, the re-establishment of normal conditions in schools, churches, hospitals and charitable institutions and the resumption of your local civil life. You will be unobstructed, but, on the contrary, will be encouraged and protected in those pursuits. So far as your attitude and conduct make it possible, local courts, governing bodies and institutions will be continued in operation under supervision of American authorities. Except where they affect the rights and security of the American Army, your present laws and regulations will remain undisturbed and in force. Every violation of the laws of war, every act offering hostility or violence and every disobedience of the rules laid down by military authority will be punished with the utmost vigor."

—American troops have entered Mainz, capital of the Province of Rhenish Hesse and one of the principal fortresses of Germany on the left bank of the Rhine. British troops reached Blankenheim. Two Belgian cavalry detachments, 300 men strong, to-day entered Duesseldorf, on the left bank of the Rhine, twenty-one miles north west of Cologne.

—Considerable firing has taken place in the principal streets of Berlin, serious disorders having been caused by the German Bolsheviki, according to reports reaching the Dutch-German frontier, says an Exchange Telegraph despatch from Amsterdam

—According to a semi-official despatch, the German Crown Prince renounced, on December 1, his succession to the throne, in these words: "I renounce formally and definitely all rights to the crown of Prussia and the imperial crown, which would have fallen to me by the renunciation of the Emperor King or for other reasons. Given by my authority and signed by my hand. Done at Wieringen, December 1, 1918."

—The Prussian Government has formally withdrawn the privilege heretofore held by the members of the Hohenzollern family of immunity from law.

—An encyclical letter has been addressed by Pope Benedict to the Catholic episcopate throughout the world exhorting it to offer public prayers for the guidance by Providence of the approaching Peace Conference.

Dec. 7—The President's ship is delayed on her southern course by storms.

—The American troops have invested Coblenz; the British are at Cologne; the French at Mainz. At these places they hold the bridgeheads on the Rhine.

—The red flag is disappearing from Berlin, where 16 persons were killed in rioting, and Bolshevism is reported on the wane. Twenty guard regiments have voted to uphold the Ebert-Haase Government.

—The war has cut the birth rate one half in Austria.

—The Western Railway Station at Ghent was accidentally set on fire and burned. The fire caused the explosion of a bomb that had been hidden by the Germans, with the result that ten persons were killed and several others injured.

—At Washington, A. B. Bielaski produced alleged Bernstorff notes to Berlin telling how he had endeavored to wind up "compromising" German propaganda after the Lusitania was sunk "because nothing can for long be kept secret in America," and had used the American Embargo Conference for German purposes. Senator Gilbert N. Hitchcock, now Chairman of the Senate Foreign Relations Committee; former Congressman Frank Buchanan, William Bayard Hale and Dr. Aked, a clergyman, were in co-operation with the Embargo Conference, established to control Congress through American voters and thereby prevent shipment of munitions to the Allies, according to the German Consul, P. Reisweitz, at Chicago. The New York World's expose in 1915 of German propagandist plans was the first heavy blow they received, according to admissions made by agents directing the work of the Embargo Conference. The Citizens' Committee on Food Shipments, a pro-German body, was organized, Bielaski alleged, at the home of Samuel Untermyer. Senator Hitchcock denied the testimony, as did Mr. Untermyer and others. Bielaski also said the Germans planned to get control of American aircraft production.

—Mayor Hylan of New York signed an ordinance making unlawful the display in parades or public gatherings of the red flag or any flag bearing an inscription in opposition to organized government or of a sacrilegious nature or which may be derogatory to the public morals. The penalty for the violation of the ordinance is a fine of not more than $100, imprisonment for ten days or both.

—Prince Yorihito of the House of Higashi-Fushimi, cousin of the Emperor of Japan, arrived at New York from England aboard the British armed merchantman Orvieta, and left for Washington.

Dec. 8—President Wilson attended divine services on the George Washington.

—American troops were rushed, by German request, to Coblenz, to guard against disorders.

—Nine French prisoners were shot by the Germans and fifteen other prisoners seriously wounded at the prison camp in Langensalza, Prussian Saxony, the Spanish Ambassador at Berlin reports.

—Emir Feys Sal, son of the King of the Hejaz, who was allied with the Entente against the Turks, reached Paris.

—President Poincare presented Gen. Petain with the baton of a Marshal of France.

—A French Governmental decree names M. Jacquet, a merchant of Lille, a Knight of the Legion of Honor. He was executed by the Germans Sept. 23, 1915, for having hidden French and English soldiers and assisted them to escape.

—The motorman was killed and four other persons were injured when a shuttle train jumped the track and struck a roof pillar in the New York City Interborough subway, Lenox Avenue and 141st Street.

—The submerged steel net which had been stretched across the Narrows, New York Harbor, since this country entered the war was taken up.

—Five hundred members of the Brighton "L" Wreck Victims and Passengers Protective Association, the organization that grew out of the disaster, Nov. 1, on the Brighton Beach Line, met in Brooklyn and demanded that the city declare its B. R. T. contract forfeited, and that a receiver be appointed to operate the lines of the company in such a way that responsibility for all acts may be fixed.

—President Flavel S. Luther of Trinity College, Hartford, Ct., has sent his resignation to the Board of Trustees, to take effect July 1, 1919. He gave his age as the reason.

—Fire partially destroyed Execution Lighthouse and burned its machinery, leaving the station without power to flash its signal and operate its foghorn, between New Rochelle and Sands Point, Long Island Sound.

Dec 9—President Wilson stood on the bridge of the George Washington and saw a United States destroyer stage a thrilling demonstration of the work of repulsing a submarine attack. A touch of realism was given by the drill of the men on board the liner and the convoying ships. The great liner was gliding through the tropical waters like a chip on a duck pond when the bugles and alarm bells called the men to battle station.

—Maimed American fighters, waving crutches, arrive at New York City on Hospital Ship Comfort, 394 soldiers and 17 marines.

—Strassburg gave an official greeting to President Poincare.

—Gen. Du Pont, of the French Army, has established headquarters at Berlin to exchange prisoners.

GENERAL CHRONOLOGY—*Continued.*

Dec. 9—Loyal troops quiet Berlin and inciters of riots fail.
—The will of Capt. Joseph R De Lamar, of New York and Paris, leaves $10,000,000 in trust to his daughter, Alice A. De Lamar; $500,000 to the Association for Improving the Condition of the Poor, and about $2,000,000 each to the medical schools of Harvard, Columbia, and Johns Hopkins Universities.
—Denmark and Norway sever relations with Russia.
—August Thyssen, "Iron King" of Germany, has been arrested, charged with treason by the Socialist Council.
—Peru accepts United States offer to mediate with Chili the boundary dispute.
Dec 10—The President's steamship, George Washington, passed the Azores at 1 P. M.
—Before the Senate Committee at Washington the Department of Justice put on record twenty messages from Palm Beach, Fla., Feb. 22 to March 4, 1917, alleged to have been written, dictated or inspired by William R. Hearst, together with messages to him from editors of Hearst papers. In one Mr. Hearst referred to the Zimmermann note to Mexico as being in "all probability absolute fake and forgery," Attorney General Gregory is denounced as "a spy fancier and plot conceiver," while Colonel House is described as a man who "has been a corporation lobbyist all his life." He also referred to Postmaster General Burleson and Attorney General Gregory as being "so crooked" that one of them could lie on top of the Woolworth Building and the other on the floor and look down and up the winding stairs into each other's eyes. Another was a cablegram from Mr. Hearst to William Bayard Hale, then his Berlin correspondent, dated Feb. 24, 1917, saying "the vast majority of the people of the United States did not wish to go to war against Germany." In a telegram, March 3, 1917, he said the use of pictures of American flags on his papers had given "us a very American character, and probably helping to sell papers, etc."
—The New York Court of Appeals refused to stay the issuing of a certificate of election to Alfred E. Smith as successor to Governor Whitman.
—William Hohenzollern has attempted to commit suicide, following mental depression, according to the Leipzig Tageblatt, quoted in a Copenhagen despatch to the Exchange Telegraph Company. A member of the ex-Kaiser's retinue, who prevented Herr Hohenzollern from carrying out his intention, received a wound, it is said.
—Count Michael Karolyi, who took part in the recent proclamation of a Hungarian republic, is reported in a Budapest telegram to have attempted suicide in despair of the success of his efforts to reconstruct Hungary.
Dec. 10—Coblenz is friendly to American soldiers as they occupy the city.
—The French Army occupies Mainz and frees 2,600 interned Americans.
—At Paris a divorce was granted to Mrs. Paris Singer, wife of the son of the late Isaac Merritt Singer.
Dec 11—The 30-day armistice between the Allies and Germanic powers ended at 11 A. M., and discussion of a prolongation began at Treves. Belgium, France, Alsace-Lorraine and Luxemburg have been evacuated by the Germans. Guns, heavy, field, machine and minenwerfer, have been surrendered in the quantities stipulated. The German armies have evacuated the countries on the left bank of the Rhine, and the Allied troops have reached that river and hold the principal bridgeheads at Mainz, Coblenz, and Cologne. A large part of the railroad equipment has been surrendered, and the Germans are daily surrendering further rolling stock. The Germans have surrendered their submarines, their battleships and cruisers and destroyers, while Allied warships have free access to Baltic and Black Sea ports, and German ships in the latter have been surrendered. All shipping on the Rhine is now under control of an inter-Allied commission.
—The President's ship encountered heavy seas as it turned north from the Azores, toward Brest.
—The French Government offers its college and other educational facilities to students in the American Expeditionary Forces.
—The King and Queen of Roumania have returned to Bucharest.
—Influenza spreads anew.
—Nicholas Semernikoff, a former Russian Commissioner under Kerensky, committed suicide at a New York hotel.
—Mayor Hylan of New York holds for the Grand Jury, on a charge of manslaughter, several Brooklyn Rapid Transit Railroad officials, including President T. S. Williams, Vice-President J. J. Dempsey, Chief Engineer W. S. Menden, Superintendent T. F. Blewett; J. N. Hallock, president of a subsidiary company; and the motorman of the wrecked train, Edward Luciano, or Lewis.
—The Navy Department announced that on Dec. 9 six men of the crew of the armored cruiser Brooklyn were killed and thirty others injured, some seriously, in an explosion of coal dust aboard the vessel in the Harbor of Yokohama, Japan, where she was coaling, preparatory to a return to Vladivostok.
Dec. 13—The George Washington, with President Wilson and his party aboard, arrived at Brest, France, where they were received with great state by the French Government.

WAR BIRTH AND DEATH RATES IN GERMANY.

(From a Bulletin of the United States Department of Labor.)

THE following figures are published by the *Handelsblad*, relating to the birth and death rates in various large German cities. The statistics are for four weeks, the last half of December, 1917, and the first half of January, 1918:

CITY.	Birth Rate.	Death Rate.	CITY.	Birth Rate.	Death Rate.	CITY.	Birth Rate.	Death Rate.
Berlin	9.2	9.5	Dresden	7.9	16.4	Chemnitz	8.1	17.9
Hamburg	7.0	18.4	Frank.-on-the-M'n.	8.3	9.7	Breslau	14.0	22.9
Cologne	13.4	20.7	Dusseldorf	9.4	12.4	Stettin	12.5	17.2
Leipzig	6.5	15.9	Nuremberg	10.4	14.8	Hanover	10.8	17.9

For comparison the rates in some cities of Great Britain and neutral countries are given below. The British figures are for the week ended January 5, 1918:

CITY.	Birth Rate.	Death Rate.	CITY.	Birth Rate.	Death Rate.	CITY.	Birth Rate.	Death Rate.
London	20.4	21.3	Edinburgh	13.2	15.5	Christiania	17.4	13.9
Birmingham	24.0	14.4	Dublin	25.4	18.8	Stockholm	19.0	12.1
Liverpool	25.4	20.5	Amsterdam	22.3	15.0	Berne	19.8	12.0
Glasgow	22.3	15.4	Copenhagen	21.1	13.3			

FIRES, WRECKS, FLOODS, ETC.

1917.

Dec. 22—Train runs into crowd at Magnolia Station, 20 miles from Baltimore; 10 persons killed, half a dozen others injured.

—Newark Rubber Co's army raincoat plant at Newark, N. J., destroyed by explosion and fire; 4 lives lost; property loss, $14,000.

Dec. 22-3—Buildings in wholesale district, New Orleans, La., burn; damage estimated at $400,000.

Dec. 24—Knoxville St. car, Pittsburgh, Pa., runs away in tunnel and turns over; 14 Christmas shoppers killed and injured.

Dec. 25—New Haven train wrecked by broken rail 2 miles. so. of Roxbury, Conn.; 14 Christmas travellers injured.

Dec. 29—Fire at Skowhegan (Me.) Garage Co.'s plant destroys 34 automobiles.

Dec. 30—Adams & Co.'s leather dressing factory at Johnstown, near Gloversville, N. Y., burns; loss $300,000. Wilson & Green's lumber yard at Syracuse, N. Y., burns; loss $75,000; 250 horses (value $150,000) die in stable fire at Excelsior Park Boarding Stable, E. 124th St., N. Y. City; $125,000 worth of army supplies burn at L. I. freight transfer station, L. I. City, N. Y. Catholic church, convent, school house and Glebe House burn at North Sydney, N. S.; loss $150,000. Business block at Northfork, W. Va., burns; loss $200,000.

Dec. 31—Explosion in Government plant at Fall River, Mass., does $50,000 worth of damage. Explosion in steam vat at Estes Mill, Fall River, Mass., making absorbent cotton and rope for Government, does $30,000 worth of damage.

1918.

Jan. 1—Fire destroys Buckeye Cotton Oil Co.'s plant at Charlette, N. C.; estimated loss several hundred thousand dollars; 2 tenement houses at Fitchburg, Mass., burn, 21 families lose their homes but no lives lost; property loss $40,000.

—Boiler explosion at Philadelphia Navy Yard kills 2 men, injures 6. Fire at Catskill, N. Y., destroys post office, theatre and a number of stores; loss estimated at $250,000; 2 blocks in Norfolk, Va., business district destroyed by fire; 3 men killed, number injured; loss estimated at more than $2,000,000.

—At Toledo, O., a Christmas tree fire kills 3.

Jan. 2—Explosion in boiler room in new $3,000,000 garbage reduction plant at Greenridge, on Arthur Kill, Staten Island; $60,000 worth of damage. Curtis Machine Company, Jamestown, N. Y., burns; loss $50,000.

Jan. 4—One fireman killed, many injured in $500,000 fire at Hoboken, N. J. Gatti-McQuade Co.'s paper stock warehouse and Butler Bros.' (store supplies) destroyed.

Jan. 9—In Chicago moving picture theatre, Chicago Ave. and Leavitt St., burns; 4 firemen killed, 4 injured.

Jan. 10—Music Hall Building, housing two newspaper plants at La Salle, Ill., burns; loss $100,000. Fire destroys John J. Buckley's pork packing plant at Chester, Pa.; loss $250,000. Fire at Ottawa, Canada, destroys Catholic hospital, kills 1 woman, 4 children; property loss $100,000.

Jan. 11—A 65-mile gale drove 3 ocean steamers aground in harbor of Newport News, Va.

—Tornado sweeps through Eastern Alabama and Central Georgia, kills 16, injures more than 100. Snowfalls in Louisiana and Mississippi. First snowfall in nearly 15 years in this section.

Jan. 12—A gale attaining a velocity of 84 miles an hour sweeps over New York City. Before the gale was a heavy thunder shower, preceded by snow; temperature rose from 26 degrees, 7 A. M., Jan. 11, to 50 degrees, 7 A. M., Jan. 12, resulting in rapid melting of snow and frozen grounds, causing washouts on railroad tracks and floods in streets and cellars. Wright Hotel, Saginaw, Mich., burns; loss $75,000. Sixty-mile gale at Lynn, Mass., sends brick smokestack through roof of box company plant, kills 8, injures 20.

Jan. 13—Indian boys die in fire at Dwight Indian Training School. Marble City, Okla.

Jan. 14—Near Louisville, Ky., locomotive runs into Jeffersonville and Louisville car; 2 killed, 16 injured, 13 seriously. War Department loses $100,000 worth food supplies by fire at Washington (D. C.) Barracks, Quartermaster's Department.

Jan. 24—Philadelphia public school burns; 3 firemen killed, 15 injured by falling wall; loss $150,000. Cyclone, followed by tidal wave and flood, destroys town of Mackay in Queensland, N. S. W.; many persons killed; sugar valued at $3,000,000 destroyed.

Jan. 25—Near Corning, N. Y., 2 electric cars collide; 25 passengers injured, 9 seriously.

Jan. 26—Westinghouse Electric plant in Buffalo burns; loss $150,000. Fire destroys $1,000,000 worth of goods on Newark, N. J., quays; is checked by use of dynamite.

—Express train from Berlin, Germany, catches fire by explosion of bottle of benzine at Schleissheim; 10 killed, 50 injured.

—Explosion in Newport, R. I., naval works kills 12 workmen, injures 7. War cargo, Deepwater, American vessel, under control of U. S. Shipping Board at Baltimore, Md., pier, destroyed by fire and water. At Peterboro, Ont., $500,000 fire wipes out half of business section, including Royal Theatre and Dominion Bank.

Jan. 27—Taylor Building in City Square, Taunton, Mass., burns; loss $175,000. Columbia Hotel, Fredonia, N. Y., burns; loss $85,000.

Jan. 29—Ice gorges at Lower Ohio and Tennessee river points near Paducah, Ky., destroy a dozen steamboats, 2 drydocks, small craft; damage about $1,000,000.

Feb. 6—3 passengers and a trainman killed, 12 passengers injured by collision on Bangor and Aroostook Railroad.

—Wharf and warehouses at Newburgh, N. Y., burn; loss $500,000.

Feb. 10—Freight yard fire in Newark, N. J., destroys 17 freight cars, partially burns 20 others and burns a two-story building; cars contained army uniforms, blankets and other war supplies.

Feb. 12—Fire destroys Mine No. 5 of Jackson Hill Coal and Coke Co., Terre Haute, Ind.

Feb. 14—At least 38 children die when the Gray Nunnery at Montreal, Canada, burns.

Feb. 16—$100,000 home of Wm. J. Barker, New York manufacturer, at Riverside, near Greenwich, Conn., destroyed by fire and Mr. Barker burned to death while fighting flames. Cargo of Red Cross supplies, value about $500,000, on Scandinavian-American freighter Minsk, at Hoboken, N. J., pier, burns. Fire officals decide fire started by spontaneous combustion.

Feb. 22—A family of 9 die in fire at Peabody, Mass.

Feb. 19—A powder plant at Wayne, N. J., explodes; 4 hurt, 3 buildings wrecked; loss $10,000.

Feb. 24—$500,000 worth of chocolate at Hershey plant at Harrisburg, Pa., destroyed by fire.

March 3—John McE. Bowman's summer home at Greenwich, Conn., burns; estimated loss $100,000. Trial room at N. Y. City Police Headquarters burns; loss about $5,000.

March 15—A landslide in Elizabethtown cut, 19 miles east of Harrisburg, Pa., strikes Cincinnati, Indianapolis and Chicago express on Pennsylvania RR.; kills 2, injures 28.

March 17—Train strikes automobile at crossing, Pendleton, Ind.; kills 4.

March 20—Horace E. Waters & Co. lose 400 pianos in factory fire, E. 40th St., N. Y. City; loss $60,000. Fire destroys Wm. R. Thropp Sons Co.'s machine shop at Trenton, N. J.; loss estimated at $150,000.

March 26—Explosion in six-story building of Jarvis Warehouse Company, Inc., Jersey City, N. J., destroys building and causes fire; estimated loss $1,500,000.

March 29—3 women and 1 man lose lives by fire at theatrical boarding house, W. 38th St., N. Y. City; property damage $10,000.

April 7—Fire at Summerville, Mass., destroys 75 trolley cars, 16 snowploughs; loss estimated at $250,000.

April 8—Fire starting in new Penn. Hotel, N. Y. City, destroys row of houses; loss $75,000 to $100,000.

April 12—Highest tide known in many years in N. Y. City and suburbs floods cellars and low lying sections, causing damage—Seabright, N. J., estimated, $300,000; loss at Coney Island, $50,000; Brighton Beach and the Rockaways also suffer heavy losses. Boardwalk at Atlantic City flooded; 16 thoroughbreds valued at $50,000 die by fire at Prince George Park Track stable, Bowie, Md.

April 13—36 die by fire in State Hospital for Insane at Norman, Okla.

April 15—Long Island R. R. train of 12 cars, westward bound, carrying soldiers from Camp Upton, strikes a split rail near Central Islip; 3 soldiers killed, 40 injured.

April 16—Fire at Luna Park, Coney Island, N. Y., destroys $2,000 show.

April 25—Fire destroys Trethaway Bros.' tinfoil factory at Parsons, near Wilkes-Barre, Pa.; loss over $500,000.

May 9—Surface car runs away at 145th St., between Amsterdam and 8th Aves., N. Y. City, hits auto, kills driver; hits another car, both wrecked; 20 persons injured, 8 seriously.

May 10—Wooden railroad car goes over trestle at Camp Jackson; 8 soldiers killed, 26 hurt.

May 18—Explosions wreck Aetna Chemical Co.'s plant at Oakdale, near Pittsburgh, Pa.; 91 lives lost.

May 21—Tornado sweeps No. Ellis and So. Rooks Counties, Kan.; in town of Codell, Rooks County, churches, schools, large business houses and residences are demolished; hundreds of horses and cattle killed; much damage done to crops; 10 persons killed and dozens injured. Tornadoes sweep central part of Iowa; property damage estimated at over $1,000,000; 0 persons killed.

May 22—U. S. S. Wakiva collides with navy cargo carrier and sinks; 2 lost.

May 26—Fire in fur company's building, Kosciusko St., Brooklyn, does $100,000 worth of damage and drives 40 families from their homes.

June 15—Smokiest fire in city's history burns furniture warehouse, 10th Ave., between 39th and 40th Sts., N. Y. City; more than 150 overcome by smoke taken to hospitals, drug stores and saloons; estimated loss $150,000.

June 20—Newark, N. J., trolley car packed with ship workers wrecked by running into open switch on Lincoln Highway and So. 7th St.; 43 injured.

June 22—Rear end collision between equipment train and a Wallace-Hagenbeck Circus train on Michigan Central R. R. 5 miles west of Gary, Ind., kills 68, injures 127.

June 28—Three men killed and a score or more injured by westbound Aurora, Elgin and Chicago Limited electric train striking auto truck at Elmhurst, Ill.

June 29—The Ruff Building (3 stories) collapses in Sioux City, Ia.; dead estimated at 20 to 30.

July 2—Explosions of trinitrotoluol wreck Semet-Solvay Co.'s war plant at Split Rock, near Syracuse, N. Y.; 16 killed, over 200 injured.

—British Munition Ministry reports serious explosion in national shell filling factory in Midlands; kills from 60 to 70.

July 4—Contents of concrete storehouse on State Camp Grounds, consisting of blankets, tents, uniforms and equipment, near Peekskill, N. Y., destroyed by fire; estimated loss $35,000.

July 6—Island of Guam swept by typhoon; little loss of life or personal injury, but much property loss.

July 9—In head-on collision between passenger trains on Nashville and St. Louis R. R. at Dutchman's bend, 5 miles from Nashville, Tenn., at least 100 persons killed, as many more injured.

July 11—Fire in W. 16th St., N. Y. C., destroys Stillman & Stillman's rubber coat plant and Bijou Button Co.'s plant; loss $75,000.

July 12—Japanese dreadnought Kawachi (21,420 tons) blows up and sinks in Tokoyama Bay, 150 miles N. E. of Nagasaki; 500 of crew of 960 are lost.

July 13—10,000 barrels of crude oil on Spanish steamship Serentes, Upper Bay, off Owl's Head Buoy, Bay Ridge, So. Brooklyn, explode; ship a total loss; Captain and crew escape.

July 15—Taxicab runs wild at 42d St. and Broadway, N. Y. City, runs on sidewalk, knocks down more than 50 people; 3 seriously injured.

July 19—Explosion at Aetna Explosives Co.'s nitrate plant, Marquette, Mich., kills 3; estimated loss several hundred thousand dollars.

July 23—Fire destroys Jersey Felt Shoe Co.'s factory, Wooster St., N. Y. City; loss $75,000.

July 24—Main hangar and dirigible balloon destroyed, a dozen airplanes and several buildings damaged by fire at Naval Air Station, Norfolk, Va.

July 27—Explosion of munitions being taken from railway station at Shimonoseki, Japan, to barges in harbor kills 30, injures 60.

July 28—2 cars on scenic railway at Midland Beach, S. I., collide; 12 persons seriously injured.

Aug. 1—Union Bag & Paper Co.'s plant at Glens Falls, N. Y., burns; loss $759,000; 6 firemen and an employee killed by falling walls of grain storehouse burned at Peekskill, N. Y.; loss $250,000.

Aug. 8—Fire destroys 3 upper floors of Borden's Condensed Milk Co.'s stables; 185 horses saved; loss $15,000.

Aug. 14—De Kalb av. and Smith St. cars collide at Coney Island Ave. and Ave. Y, Brooklyn; 20 to 30 injured.

Aug. 15—Penn. R. R. train strikes auto on siding near Baltimore, Md.; kills 7.

Aug. 17—Explosion of depth bomb on U. S. S. Orizaba at sea kills Lieut. Commander Williamson and 3 enlisted men, wounds Commander R. D. White, Lieut. John C. Tyler and 18 men.

Aug. 21—Tornado strikes Tyler, Minn., kills 33, injures from 50 to 60 persons; property loss estimated at half a million dollars.

Aug. 22—A barge loaded with 540 tons of gasoline belonging to U. S. Expeditionary Forces burns at Paris dock.

Aug. 24—Green River Distillery plant and 43,000 barrels of whiskey burn at Owensboro, Ky.; loss $3,000,000.

Aug. 28—Fire destroys home of W. H. Smith, former President N. Y. C. R. R., at Mount Kisco, N. Y.; loss $150,000.

Aug. 29—Lightning strikes apartment house on Riverside Drive, N. Y. City, loosens a piece of terra cotta weighing 400 pounds, which falls to the street; a heavy rain falling at the time had left the streets deserted, so no one was injured.

Aug. 30—Fire wipes out five business concerns at Dobbs Ferry, N. Y., and temporarily puts electric lighting and gas plants of city out of commission; loss, $250,000.

Aug. 31—Boiler of tugboat Glen Cove, in Wallabout Canal, Brooklyn, N. Y., explodes; kills 1, injures 4.

Sept. 8—Fire destroys naval storehouse, [illegible]n, N. Y., with contents of interned German [illegible]ls, i. e., thousands of dollars' worth of bric-a-brac, tapestries, table linen, furniture, &c.

Sept. 11—New York, Ontario and Western Railroad strikes touring automobile near Earlville, N. Y.; 4 persons killed. Explosion at Eddystone Ammunition Company's shell loading plant, Chester, Pa.; kills 1, injures 17. Fire at New York Shipbuilding Company's yards, Camden, N. J., destroys factory; loss, $500,000.

Sept. 16—Ten of crew of coastguard cutter Seneca drown while trying to save British steamer Wellington, torpedoed by U boat. Burlington passenger train No. 43, west bound, runs into work train seven miles west of Alliance, Neb.; 12 killed, 18 injured. Extra freight train runs into rear of passenger train of Boston and Maine Railroad at Dummerston, Vt.; 3 killed, 22 hurt.

Sept. 17—Near Marshall, Mo., head-on collision between troop train and freight train of St. Louis and San Francisco Railroad; 11 are killed, 36 injured.

—A troop train is wrecked near Marshfield, Mo.; 11 killed, 36 injured. Fire destroys American Button plant (brass buttons for military uniforms), at Newark, N. J.; 8 girls, 1 man, 1 boy killed, 5 girls injured. 2 missing.

FIRES, WRECKS, FLOODS, ETC.—*Continued.*

Sept. 21—Boiler tubes on excursion boat Julia Stafford, New York City, explode, scalding 42 workmen; 4 will die; upward of 300 persons jump overboard. It is thought all were picked up or swam ashore. Fire at Kearny (N. J.) Foundation (Ship) Company plant; loss $15,000. Fire destroys summer home of Dr. Abraham Jacobi of New York City, at Bolton, Lake George, with valuable collection of relics. Atlantic City express train strikes auto at unprotected grade crossing at Pitman, N. J.; 4 killed.

Sept. 22—Explosion in ammunition factory at Woellersdorf, near Vienna, Austria, kills 382 and injures many others.

Sept. 25—Fire destroys Brooklyn, N. Y., warehouse; loss $100,000.

Oct. 3—On West Farms (N. Y.) of subway, south bound local hits train; 2 men killed, about 30 injured. In rear end collision of subway trains at Jackson Ave.,. Bronx, N. Y., 2 killed, 30 injured.

Oct. 4-5—A series of explosions in munition plant of T. W. Gillespie Loading Co. at Morgan, near South Amboy, N. J., wrecks many buildings, kills 50 to 100, injures 200 to 400; South Amboy, Perth Amboy, Sayreville and Tompkinsville practically destroyed. U. S. War Department takes charge; traffic into Manhattan through tubes and on East River bridges halted, and scores of buildings in lower financial district are temporarily vacated. Loss of plant about $18,000,000; to surrounding property upward of $50,000,000.

Oct. 8—2d Ave. L train telescopes 3d Ave. express near 187th St., N. Y. City; 1 killed, 14 injured.

Oct. 11—L. I. RR. train strikes open switch at Atlantic and Boyd Aves., Woodhaven, L. I.; 3 passenger cars are hurled from track; many injured.

Oct. 12-16—Forest fires sweep over Northern Wisconsin and Minnesota, area 55 miles wide, about 40 miles deep; upward of 1,000 men, women and children are burned to death, 12,000 or more are homeless and penniless; property damage conservatively estimated at $100,000,000.

Oct. 14—Explosions in munitions plant at Trenton, near Toronto, Can., kill nearly 100.

Oct. 16—Tidal waves follow earthquake in Porto Rico; property loss estimated at $34,000,000; 100 persons killed and 300 injured.

Oct. 21—Flare-up in American Can Co.'s shell loading plant, Kenilworth, N. J., seriously injures 2 men and 6 girls.

Oct. 24—Long Island R. R. train strikes motor truck coming from Camp Mills to Jamaica; 15 camp laborers injured.

Nov. 1—Green motorman speeds past "slow" signal at Malbone St. tunnel of Brighton Beach elevated rapid road, Brooklyn, N. Y.; five cars crowded with passengers jump track and crumble to pieces; autos for miles around commandeered to take victims to hospitals; 79 persons killed instantly, 10 more die, 62 seriously injured, hundreds hurt. Motorman and train guard arrested on technical charge of homicide.

Nov. 9—Football train running from Camp Grant, Rockford, to Chicago, Ill., collides with passenger train on Burlington Road 6 miles west of Aurora, Ill.; 2 soldiers killed, 12 hurt.

Nov. 11—U. S. Ophir destroyed by fire in Harbor of Gibraltar. Ship and cargo lost. 2 of crew, 3 members of Naval Reserve and Father Comstock of Oakland, Cal., lost.

Nov. 13—Pacific Mail S. S. Pennsylvania takes fire and sinks at dock in Iquique, Chili.

Nov. 14—Fire destroys the heart of the business district of Upper Sandusky, Ohio; more than $250,000 loss. A dozen mercantile houses and their contents, a theatre and a hotel were destroyed. Persons were caught under a falling brick wall and two were injured, probably fatally. Among the seriously injured was A. B. Whitney, President of the Ohio Manufacturing Company.

Nov. 16—A southeast hurricane, blowing ninety-five miles an hour and accompanied by a tidal wave, sweeps the west coast of Newfoundland, causing heavy losses.

Nov. 19—Fire in the business section of Bristol, Va.-Tenn., destroys four mercantile establishments, the Cumberland Telephone Exchange and nearby property. The loss estimated at half a million dollars.

—Flood-tide and gale flooded streets of Quebec; damage estimated at $1,000,000.

Nov. 21—Cunard liner Campania (12,950 tons), sinks in a gale in Firth of Forth, Scotland; no lives lost.

Nov. 23—Six men are killed and three others seriously injured in a head-on collision between freight trains on the Pennsylvania Railroad near Williamsport, Pa.

Nov. 29—Forge shop in British plant near Toronto, Ont., burns; loss $250,000.

—Wind of 75 miles an hour wrecks much property in Buffalo, N. Y.; at Niagara Falls boat houses and summer cottages are flooded.

Nov. 30—Part of business section of Brewsters, N. Y. burns; loss $150,000.

—"News Leader" plant at Richmond, Va. burns; loss $250,000; 3 employees severely burned.

—Atlantic Coast Line train derails near Kingstree, S. C.; 2 trainmen killed, many passengers injured.

Dec. 2—Maibohn Motor Co.'s factory at Racine, Wis., burns; loss $250,000.

Dec. 4—Earthquake destroys town of Vallenar and partially Copiapo, Chili.

Dec. 5—In France, an express train from Orleans crashes into and telescopes another train loaded with American material near Meung-sur-Loire. Twelve bodies removed from the wreck and identified; others not. Twenty-five persons injured. Four of the railroad cars smashed to bits.

—Atlantic Coast Line wreck near Elrod, N. C., kills 2, injures 30.

—British warship Cassandra strikes a mine in Baltic and sinks; 11 men missing, presumably killed by explosion.

—Eleven men were killed and 23 injured when four explosions and a resultant fire destroyed the detonator assembling unit of the du Pont cap works at Pompton Lakes, N. J. The countryside for miles around was shaken. Officials of the company said they believed an employee in the detonator building had dropped one of the missiles and caused the explosion.

BUFFALO FINE ARTS ACADEMY.

The Buffalo Fine Arts Academy was organized November 11, 1862, and incorporated December 4, same year. The building occupied by the organization was a gift from Mr. John Joseph Albright. It is of white marble, 250 feet long and 150 feet wide and of Grecian style. The City of Buffalo has been contributing toward the support of the Institution since 1909. The permanent collection of the Academy consists of 200 paintings, 800 engravings and etchings, and 56 sculptures, including casts. The total membership is 540. During each year twelve special exhibitions are given; a quarterly art journal is published. Lectures are given. Special efforts are made to interest the public and the school children. Several foreign exhibits, brought over by the director, Cornelia B. Sage, and passed on to other large museums after being first shown at the Albright Art Gallery, have made Buffalo noted in art circles. They included: exhibition of paintings and sculpture by the Société Nouvelle of France, of which Rodin was president; exhibition of French textiles; exhibition of the works (sculpture) by the great Constantine Meunier and others; the exhibition of American sculpture, held at the Albright Art Gallery in 1916.

CONGRESS CHRONOLOGY—HIGH LIGHTS ONLY.

1917.

Dec. 3—Sixty-fifth Congress opens its second regular session; Treasury Department gives estimate for fiscal year, $13,504,388,000, exclusive of sinking fund and postal service.
Dec. 4—The President addresses joint session; recommends that state of war be declared with Austria-Hungary.
Dec. 7—Both Houses pass joint resolution declaring state of war between U. S. and Austria-Hungary, one negative (Socialist) vote.
Dec. 12—Senate passes bill legalizing combinations of U. S. exporters.
Dec. 17—House adopts resolution to submit to the States a Federal Prohibition Amendment to U. S. Constitution (242 to 128).
Dec. 18—House repeals exemptions of Representatives and Senators' salaries from excess profits tax of 3 per cent.; Senate passes House Prohibition resolution, which now goes to the States for ratification.

1918.

Jan. 4—The President tells Congress in joint session his purpose in taking over the railroads; bill introduced in both Houses to carry his views into effect.
Jan. 8—The President states to Congress in joint session his fourteen peace points.
Jan. 10—House passes Federal Woman Suffrage Amendment by two-thirds vote (274 to 136).
Jan. 15—Senate defeats Print Paper Bill providing that U. S. Trade Commission take over country's paper mills.
Feb. 1—Senate Committee on Interstate Commerce by 11 to 4 limits Government railroad control to period of 18 months from end of war, President to have rate fixing power subject to review by Interstate Commerce Commission.
Feb. 11—In address to Congress the President discusses the recent speeches of von Hertling and von Czernin.
Feb. 18—House passes Urgent Deficiency Bill; Senate Finance Committee amends War Finance Corporation Bill by giving power to appoint the Directors to the President instead of to Secretary McAdoo.
Feb. 22—Senate passes Railroad Control Bill, appropriating $500,000,000 for Federal operation.
Feb. 26—Senate adopts conference report* authorizing spending of $50,000,000 by Shipping Board for housing labor at shipbuilding yards.
Feb. 27—House passes "Alien Slacker" Bill—subjects of "Allies" within military age must waive exemption or be barred from this country.
Feb. 28—House adopts Railroad Control Bill (six negative votes.)
March 4—Senate adopts conference report on Soldiers and Sailors' Civil Rights Bill; House passes Woman Spy Bill.
March 5—President asks Congress for authority to purchase piers of German steamship lines.
March 7—Senate passes War Finance Corporation Bill, Directors to be appointed by President.
March 8—President signs Soldiers and Sailors' Civil Rights Bill, which provides for a moratorium.
March 11—Senate authorizes Government to sell German property in U. S.
March 12.—Senate passes Urgent Deficiency Bill.
March 13—Senate adopts conference report on Railroad Control Bill.
March 15—House passes Daylight Saving Bill.
March 16—Senate passes Daylight Saving Bill.
March 21—President signs Government Railroad Control Bill; House passes War Finance Corporation Bill; Senate passes Agricultural Appropriation Bill, carrying $28,000,000.
March 23—Senate passes twelve minor but necessary war bills.
April 1—Both Houses adopt conference report on War Finance Corporation Bill.
April 2—House passes bill ($50,000,000) for housing workers in war industries.

*Adopting the conference report passed the bill in the Senate.

April 6—President signs Finance Corporation Bill.
April 10—Senate passes Sedition Bill (a supplement to Espionage Act).
April 13.—House passes Senate Draft Quota Bill.
April 15-16—Both Houses adopt conference report on Sabotage Bill—prison terms for interference with war industries, except for strikers.
April 29—Senate passes Overman Bill, after rejecting House amendments.
May 1—Senate passes War Industries Labor Housing Bill.
May 4—Senate adopts conference report on Sedition Bill.
May 7—House adopts conference report on Sedition Bill.
May 14—House passes Overman bill (295 to 2).
May 20—President signs Overman bill (for coordinating and consolidating Government bureaus and agencies).
May 22—Senate passes Naval Appropriation Bill ($1,620,000,000).
May 23—House adopts amendment to annual Agricultural Appropriation Bill providing that none of fund shall be available until President forbids use of food materials in production of malt or vinous liquors for beverage purposes.
May 28—Senate passes Urgent Deficiency Bill ($123,000,000).
May 31—House passes $12,000,000 appropriation for army of 3,000,000 and giving the President unlimited power.
June 10—House passes Soldiers and Sailors' Vocational Rehabilitation Bill.
June 14—Both Houses pass Vocational Rehabilitation Bill, appropriating $2,000,000.
June 15, 17—Both Houses pass Sundry Civil Appropriation Bill ($2,915,019,447).
June 19—Senate passes Pension Bill ($220,000,000); House passes bill to exclude foreigners from commanding vessels having U. S. registry.
June 21—House passes Alien Anarchist Deportation Bill.
June 24—Senate ratifies Reciprocal Conscription Treaty with Great Britain; House passes Fortifications Bill ($5,435,696,224, for artillery, ammunition and war supplies, three armies of 1,375,000 men each).
June 29—Senate passes Army Appropriation ($12,000,000,000), Fortification ($4,000,000,000) and Sundry Civil Appropriation ($3,000,000,000) Bills; both Houses pass $371,000,000 P. O. Bill, eliminating provision for continued use of privately owned pneumatic tube systems.
July 1—House passes new Deficiency Bill ($1,000,000,000).
July 5—House adopts resolution giving President control of wire communication.
July 6—Senate passes bill giving President control of shipping.
July 13—Senate passes Wire Control Resolution (46 to 16).
July 16—President signs Wire Control Bill.
Aug. 23—The House defeats amendment to Man Power Bill, which would postpone calling men of eighteen and nineteen until all others subject to draft had been put in uniform.
Aug. 24—House passes Man Power Bill (336 to 2), defeats "Work or Fight" Amendment and one to exempt New York City police.
Aug. 27—Senate passes Man Power Bill.
Aug. 31—The President signs Man Power Bill.
Sept. 4—Senate passes joint resolution authorizing President to establish "dry zones" near camps, munition factories, shipyards, &c.
Sept. 5—House passes Water Power Bill (231 to 23, 174 not voting).
Sept. 7—House passes "dry zone" joint resolution.
Sept. 16—House defeats proposed amendment exempting President and State officials from income tax.
Sept. 20—House passes record-breaking Revenue Bill designed to raise $8,182,492,000 by taxation; roll call shows 350 ayes, none in the negative.

CONGRESS CHRONOLOGY—*Continued.*

Sept. 21—Representative Robbins (Rep.) of Pennsylvania charges that 16 Southern States have received from U. S. Government a total of $490,-306,991 for camps and war plants, while Pennsylvania has received only a little more than $8,000,-000 and other Northern States in proportion; Mr. Heflin (Dem.) of Alabama denies that the Administration has shown sectionalism; he says Pennsylvania has received $50,000,000 to $60,000,-000 for every million dollars spent in Alabama and that the North generally has enjoyed the expenditure of $16,000,000 for every million dollars spent in the Southern States. House passes Agricultural Appropriation Bill.

Sept. 28—Senate passes Agricultural Appropriation Bill; Senate adopts conference report on Mineral Production Bill.

Sept. 30—The President appears before U. S. Senate and urges passing Woman Suffrage Amendment as a necessary war measure.

Oct. 1—Senate defeats Woman Suffrage Amendment by 54 ayes to 30 nays, a two-thirds favorable vote being requisite for passage.

Oct. 14—President signs Agricultural Appropriation Bill; Senator Lodge offers resolution before reading of President's message that there be no further communication with German Government on subject of peace except demand for unconditional surrender; this was tabled; Gore of Oklahoma proposed uninterrupted prosecution of war and peace treaty only with representatives of German people elected by them.

Oct. 18—House First Deficiency Appropriation Bill for 1919, carrying $6,345,755,666 for military, naval and civil establishments.

Oct. 24—Senate passes 1919 Deficiency Bill, adding $500,000 for interstate quarantine service and $900,000 for army contingencies; Senate ratifies Italian Selective Service Treaty.

Oct. 28—The President, in letter to Finance Committee Chairman, explains that Point III. in Jan. 8 address does not mean "free trade."

Nov. 11—President Wilson reads armistice terms to Congress.

Nov. 16—Mr. Daniels, in submitting a Naval Appropriation Bill, estimates needs of navy for fiscal year of 1920 at $2,441,900,000.

Nov. 20—At Senate investigation it was disclosed that the Brewers' Association had made cash contributions to the German-American Alliance.

Nov. 21—Congress adjourns. The President signs the Emergency Agricultural Appropriation Bill, making the U. S. dry from July 1, 1919, until the demobilization of the army.

Dec. 2—Congress reassembles.

NEW YORK STATE MUSEUM.

(Prepared by the Museum for the Almanac.)

The title, New York State Museum, is the statutory name of a scientific research organization. Historically it is the outcome of the great Natural History Survey of the State of New York organized in 1836. The nucleus of these now extensive collections are the scientific materials brought together during the existence of that survey. Under the present statute the "New York State Museum" includes the work of the State Geologist and his associates, who together form the Geological Survey of the State of New York; that of the State Botanist and his staff; of the State Entomologist and his staff; the Zoologist and the Archaeologist. The museum collections, as such, originate partly from the materials acquired for the researches of these officials and partly from special additions made to exemplify the resources of the State of New York. The State Museum is alternately known as the Department of Science of the University of the State of New York, and, as such, is under the administrative control of that university. The collections of the museum are arranged on a floor space of about 100,000 square feet on the upper floors of the State Education Building at Albany. These collections form what has been planned and worked out as an essentially State or provincial museum exhibiting the natural resources of animal and plant life, the mineral wealth, geological history, and aboriginal culture of New York State. It has not planned to receive, nor does it especially welcome, material from outside the State, unless this is adapted to illuminate the scientific problems of the State itself. The collections are open free on every week day, 9 A. M. to 5 P. M., and on Sundays, October 1 to May 1, 2 to 5 P. M.

Hall of Minerals—The general collection of about 5,000 specimens is supplemented by a very extensive and complete collection of minerals from New York State, probably the best in existence. There are probably in this hall about 14,000 specimens on exhibition.

Hall of Geology—The collections here illustrate the rock structure and the mineral wealth of the State, especially the application of minerals, ores and rocks to commerce and the industrial arts.

Hall of Fossils—This hall includes vertebrates and invertebrates and the long continued researches of the Geological Survey have made the collection of invertebrate fossils, and the corresponding classification of the rocks of New York, the standard of comparison for the world. The use of restorations of extinct animal life, with relief maps, reconstructions, &c., has helped to visualize the appearance of these.

Hall of Zoology—The animal life of New York is exhibited in this hall, the larger mammals in habitat groups and the smaller mammals, birds, fishes, reptiles and mollusks in extensive series of well-mounted specimens. The collection of birds eggs is one of the largest in America. This section also contains a representative gathering of insects, arranged to illustrate their economic relations to agriculture and forestry. The section of Botany maintains an herbarium of upward of 100,000 specimens of New York plants.

Halls of Archaeology and Ethnology—These contain six large groups representing the customs and habits of the Iroquois Indians in their natural state, before the advent of the white man. These figures have been cast from the best available representatives among the surviving Iroquois and mounted amid actual accessories and against painted backgrounds. They depict the hunt, warfare, council ceremony, industries and agriculture of the New York aborigines. The collections of relics of Indian life in New York are the most extensive in existence, and these collections, with the groups referred to, fill the mezzanine floors.

The museum owns three parcels of real estate, presented by citizens for preserving their geological interest; 1—The Clark Reservation near Syracuse, a tract of 104 acres characterized by its extraordinary display of abandoned cataracts and gorges produced by the flow of the post-glacial waters; 2—Stark's Knob Reservation, or Volcano, near Schuylerville; 3—The Lester Park, or Cryptozoon Ledge in the town of Greenfield, west of Saratoga Springs. The Legislature grants $55,000 a year for maintenance.

THE CINCINNATI MUSEUM OF ART.

The Cincinnati Museum Association, organized in 1880, and incorporated in 1881, gives exhibitions during the year, and has collections of modern American art which include the pictures, sculpture and etchings of Frank Duveneck; paintings, studies, drawings and etchings by Robert Blum; as well as a representation of the other leading American painters and sculptors. Gathering of casts of Greek sculpture and of carved ivory from the Roman to the Renaissance periods is installed in the Schmidlapp Building, and there is a large group of American Archaeology. The decorative arts are represented, the department of metal work including besides the Elkington reproductions, a group of original armor and the Conner collection of original silver. The museum holds also the Doane collection of musical instruments the Longworth gathering of India shawls, the Bookwalter collection of Oriental art, and the exhibition of Rookwood pottery, the Cincinnati art industry with which the museum is connected. There is a reference library

DEATH ROLL OF 1918.

(Includes deaths last half of Dec. 1917.)

Abdul Hamid II, (1842), Constantinople, Sultan of Turkey, Feb. 10.

Abingdon, William L. (1859), Northampton, England, actor, May 17.

Adams, Allan (1890), Brooklyn, N. Y., air mail pilot, Nov. 18.

Adams, Charles F. (1852), Brooklyn, N. Y., lawyer, lecturer, politician, April 20.

Adams, Henry (1838), Boston, Mass., historian, March 27.

Adams, W. Franklyn, N. Y. City, acolyte of "Little Church Around the Corner," July 15.

Aldunate, Don Santiago (1859), Chilian Ambassador to U. S., April 17.

Alexander, Mrs. Theresa S. (1840), Philipse Manor, N. Y., a founder of "Daughters of the Confederacy," Aug. 9.

Anderson, Adolph F. (1860), Kearny, N. J., inventor, July 31.

Anderson, Dr. Samuel F. (1865), Brooklyn, N. Y., nose and throat specialist, Aug. 5.

Andrews, Charles (1827), Syracuse, N. Y., former Chief Judge N. Y. Court of Appeals, Oct., 22.

Antrim, 11th Earl of—William Randal McDowell (1851), July 19.

Archambault, Sir Horace (1857), Montreal, Can., Chief Justice of Quebec, Aug. 26.

Arden, Edwin H. (1864), N. Y. City, actor, Oct. 2.

Arents, George (1835), N. Y. City, millionaire tobacco man, Feb. 22.

Armstrong, David M. (1835), N. Y. City, artist, May 26.

Smith, Mrs. Mabel Miller (1856), Brooklyn, N. Y., mother of three army officers, Sept. 1.
Smith, Miss Mary E. (Christine Faber) (1850), Brooklyn, N. Y., author, May 23.
Smith, Sir Swire (1842), Yorkshire, Eng., M. P., Mch. 16.
Smith, Wallace (1883), N. Y. City, Morris Plan Mgr., Nov. 18.
Snyder, Howard (1877), Jersey City, N. J., police lieutenant, shot while on duty, Feb. 16.
Spear, E. Holden (1857), Metuchen, N. J., newspaper man, Mch. 11.
Speyers, Rear Admiral Arthur B. (1846), N. Y. City, retired, Nov. 19.
Splan, John (1849), Lexington, Ky., "Sulky King," May 11.
Sprague, Homer B. (1829), Pres. N. Dakota U., Mch. 23.
Spring-Rice, Sir Cecil (1860), London, Eng., British Ambassador, Feb. 15.
Squire, George H. (1838), N. Y. City, former financial mgr. Equit. Life Ass'n Co., Nov. 14.
Starr, Lt. Philip C. (1890), Chicago, Ill., killed in action, Feb. 26.
Stephenson, Isaac (1833), Marinette, Wis., former U. S. Senator, Mch. 15.
Sterling, John A. (1857), Bloomington, Ill., Congressman, Oct. 17.
Sterling, John W. (1844), N. Y. City, lawyer, July 5.
Sterling, Gen. William H. (1829), Plainfield, N. J., Inspector of Rifle Practice, Jan. 30.
Stevens, James W. (1854), Yonkers, N. Y., former Grand Central Station Master, Sept. 20.
Stevens, Robert E. (1838), N. Y. City, theatrical mgr., July 21.
Stevens, Rev. William Du Bose, D. D. (1863), N. Y. City, army chaplain, Sept. 29.
Stillman, James (1851), N. Y. City, financier, Mch. 15.
Stillwell, Homer A. (1860), Chicago, Ill., Pres. Butler Bros., June 23.
Stoker, Frederick (1878), New Harmony, Ind., on staff of N. Y. World and Times, Nov. 29.
Stokes, James (1842), philanthropist, an organizer of Y. M. C. A., Oct. 4.
Stone, William J. (1849), U. S. Senator from Missouri, April 14.
Straight, Major Willard D. (1880), Paris, France, diplomatist and financier, Dec. 1.
Strobridge, F. H. (1857), Baltimore, Md., life ins. Pres., July 22.
Sullivan, John L. (1858), Feb. 2.
Summers, Maddin (1877), Nashville, Tenn., Consul General at Moscow, May 4.
Sutherland, Corpl. Gordon (1900), Springfield, Mass., killed in action, June 9.
Swan, Kingsley (1884), Brooklyn, N. Y., athlete, dog fancier, Aug. 2.
Sweeny, John W. (1847), N. Y. City, pass. agent and Confederate vet., Feb. 28.
Taggart, Capt. D. H., British merchant marine officer who sank a German submarine, Oct. 14.
Tailer, William S. (1895), Roslyn, L. I., aviator, killed in action, Feb. 4.
Talbot, Emily C. (1840), London, Eng., philanthropist, Great Britain's richest woman, Sept. 21.
Talbot, Joshua F. C. (1843), Maryland Congressman, Oct. 5.
Taltavall, Thomas R. (1855), Mahwah, N. J., inventor, telegrapher, Sept. 3.
Taylor, Lt. Herbert D. (1880), Baltimore, Md., army surgeon instructor, Oct. 7.
Taylor, Irving M. (1843), Irvington, N. Y., police justice, June 23.
Tebeau, Oliver P. (1864), St. Louis, Mo., baseball player, May 15.
Thierry, Joseph (1857), French Minister of Finance, Sept. 23.
Thompson, Robert (1838), Belfast, Ireland, M. P., Aug. 3.
Thompson, Dr. William L. (1877), N. Y. City, author, lecturer, Aug. 29.
Thomson, Hugh B. (1840), N. Y. City, armorer, Civil War vet., July 3.

DEATH ROLL OF 1918—*Continued.*

Thornisch, Alice (1833), N. Y. City, social and charity worker, Sept. 27.
Tillman, Benjamin R. (1847), Trenton, S. C., U. S. Senator, July 3.
Titus, George F. (1859), police inspector, May 17.
Toal, Daniel C. (1842), Brooklyn, N. Y., editor, Civil War vet., Sept. 24.
Tolman, Daniel H. (1850), Montclair, N. J., "loan shark," Feb. 12.
Treat, Mrs. Julia Hubbell, Newark, N. J., historian, July 18.
Trowbridge, Charles C. (1870), N. Y. City, physicist, Columbia prof., June 2.
True, Mrs. Anna C. (1839), Laclede, Mo., teacher of Gen. Pershing, June 4.
Trumbull, Dr. Charles S. (1848), Philadelphia, Pa., eye specialist, Feb. 21.
Tumulty, Philip A. (1846), Jersey City, N. J., father of Joseph P., sec'y. to President Wilson, Nov. 20.
Tyrrell, Dr. Charles A. (1846), N. Y. City, hygienic specialist, July 3.
Underhill, Harry C. (1860), Brooklyn, N. Y., author of legal text books, May 1.
Unger, Wilbur F. (1822), Montclair, N. J., author of books on Harmony, Oct. 13.
Urnan, Louis (1861), N. Y. City, chef at Biltmore hotel, Sept. 27.
Urquidi, Francisco (1877), Chihuahua City, former Mexican consul, Oct. 26.
Valdez, Ramon, President of Panama, May 3.
Valverde, Joaquin, Mexico City, Spanish composer, Nov. 6.
Van Hise, Charles R. (1857), Milwaukee, geologist, pres. Wis. Univ., Nov. 19.
Van Wyck, Robert A. (1847), Paris, France, first Mayor of Greater New York, Nov. 15.
Vassar, Rev. Dr. Thomas (1834), Elizabeth, N. J., oldest Baptist clergyman in New Jersey, July 3.
Vibbert, George A. (1868), former Mayor of New Brunswick, N. J., Oct. 12.
Viel, Dr. Rafael Blanco (1847), Chilian minister to Cuba, July 26.
Von Deenhof, Mme. Helen (1857), N. Y. City, opera singer, Aug. 30.
Wagner, Charles (1851), Paris, France, author of "The Simple Life," May 13.
Waixel, Mrs. Julia, N. Y. City operatic accompanist and coach, July 26.
Walden, Rev. Treadwell (1832), Boston, Mass., member U. S. Sanitary Commission in Civil War, May 21.
Waldron, Rev. D. W. (1840), Boston, Mass., Chaplain U. S. House Representatives 40 years, Dec. 5.
Wallace, Father Edward A. (1885), Brooklyn, N. Y., army chaplain, gassed in France, about Oct. 12.
Wallace, Henry E. (1855), N. Y. City, financial writer for "Bradstreet's," Nov. 23.
Wallas, Mrs. Frieda (1813), Brooklyn, N. Y., leaves 4 children, 43 grandchildren, 50 great-grandchildren, many great-great-grandchildren, Nov. 21.
Walsh, Richard (1829), Brooklyn, N. Y., founder of Amphion Musical Soc., May 14.
Ward, Rear Admiral Aaron (1851), Willowmere, L. I., July 5.
Ware, Edward J. (1858), N. Y. City, physician, Sept. 29.
Welch, Joe (1873), N. Y. City, actor, July 15.
Welcher, Fanny Avery, Hartford, Conn., art patron, July 23.
Weld, C. Minot, Milton, Mass., financier, Roosevelt classmate, Aug. 27.
Wells, Dr. George (1849), Annapolis, Md., Dem. leader.
Westengard, Prof. Jens Iverson (1871), Boston, Mass., member of Hague Council and adviser to King of Siam, Sept. 17.
Whaley—"Uncle Jim" (1857), Brooklyn, N. Y., turfman, Nov. 12.
Wheeler, Prof. Arthur M. (1836), New Haven, Conn., historian, July 17.
Whelan, Michael, Syracuse, N. Y., a founder of U. S. Cigar Stores Corp., Mch. 9.
Whidden, Dr. Roe W., Boston, Mass., Captain—heart disease specialist, died from wounds, Sept. 25.
Whitcomb, Frank I. (1868), N. Y. City, tourist ticket agt., Oct. 2.
White, Andrew D. (1832), Ithaca, N. Y., first Pres. Cornell U., Ambassador to Germany, Nov. 4.
White, Jay (1869), Naples, Italy, U. S. Consul, May 24.
White, William M. (1846), N. Y. City, keeper in Tombs, July 29.
Wiley, Alexander (1851), Brooklyn, N. Y., yachtsman, May 31.
Willard, Archibald M. (1836), Cleveland, Ohio, painter of picture "Spirit of '76," Oct. 11.
Williams, Evan (1868), Akron, Ohio, tenor, May 24.
Williams, Prof. Henry S. (1847), Havana, Cuba, geologist, July 31.
Williams, William (1829), Port Chester, N. Y., veteran R. R. man, Sept. 5.
Williamson, Rev. W. J., "friendliest man in St. Louis" (Mo.), Aug. 18.
Willis, William H. (1843), Brooklyn, N. Y., referee in bankruptcy, May 6.
Wilson, Mrs. Catherine A., (1847), Greenwich, Conn., pianist and singer, July 10.
Winter, Wallace; N. Y. City, aviator, killed in action, Mch. 10.
Wolff, Rev. Dr. Julius H. (1854), clerk of Newark, N. J., Presbytery, Nov. 18.
Wood, Edwin O. (1861), N. Y. City, historian, 33d Degree Mason, Apl. 23.
Wood, Brig. Gen. Henry C. (1832), Portland, Me., Aug. 30.
Woodruff, James G. (1840), Winsted, Conn., pres. of Clock Co., July 10.
Woolsey, David C. (1836), Peekskill, N. Y., steamboat captain, Aug. 16.
Wright, Henry Parks (1840), Dean of Yale College, Mch. 17.
Wright, Thomas (1857), Montclair, N. J., stained glass designer, Mch. 3.
Wynn, John P. (1862), Brooklyn, N. Y., police captain, Sept. 24.
Yager, Walter D. (1872), Springfield, Ohio, theatrical mgr., Mch. 8.
Yauch, Joseph H., Pres. 13th Regt., (Brooklyn, N. Y.), vet., ass'n., June 13.
Young, Mrs. Ella Flagg (1845), School Supt. in Chicago, Ill., Oct. 26.
Young, Samuel (1822), Belfast, Ireland, oldest M. P., Apl. 18.
Zentay, Miss Mary, N. Y. City, violinist, Oct. 3.
Zetheliis, Olof P. (1890), N. Y. City, Swedish editor, Oct. 14.

INFLUENZA MORE DEADLY THAN WAR.

THE Census Bureau, November 17, 1918, issued the following: "The Influenza epidemic has thus far taken a much heavier toll of American life than has the great war. The total loss of life throughout the country is not known, but the Bureau of the Census has been publishing, for forty-six large cities having a combined population estimated at 23,000,000, weekly reports showing the mortality from influenza and pneumonia. These reports, which cover the period from September 8 to November 9, inclusive, show a total of 82,306 deaths from these causes. It is estimated that during a similar period of time the normal number of deaths due to influenza and pneumonia in the same cities would be about 4,000, leaving approximately 78,000 as the number properly chargeable to the epidemic. The total casualties in the American Expeditionary Forces have recently been unofficially estimated at 100,000. On the basis of the number thus far reported, it may be assumed that the deaths from all causes, including disease and accidents, are probably less than 45 per cent. and may not be more than 40 per cent. of the total casualties. On this assumption, the loss of life in the American Expeditionary Forces to date is about 40,000 or 45,000.

"Thus, in forty-six American cities having a combined population of only a little more than one-fifth the total for the country, the mortality resulting from the influenza epidemic during the nine-weeks' period ended November 9, was nearly double that in the American Expeditionary Forces from the time the first contingent landed in France until the cessation of hostilities.

THE PHILIPPINES.

THE Philippine Islands, lying off the southern coast of Asia, between Formosa and Borneo, in longitude 116° 40′ and 126° 34′ E., and latitude 4° 40′ and 21° 3′ N., embrace 3,141 islands and islets, of which only 1,668 are named. The total land area is about 115,026 square miles. The two islands, with areas exceeding 10,000 square miles each, are Luzon, 40,969, being about the size of New York, and Mindanao, with 36,292 square miles. The only other islands having areas of over 1,000 square miles are:

Samar	5,031	Paragua	4,027
Negros	4,881	Mindoro	3,851
Panay	4,611	Leyte	2,722
Cebu	1,762		
Bohol	1,441		
Masbate	1,236		

POPULATION.

The estimated population for 1915 was 8,918,177. Racially the people are principally of Malay stock. The civilized tribes are practically all adherents of the Catholic Church, the religion being introduced into the country by the Spaniards when they took possession of the islands in 1565. The Moros are Mohammedans and the other wild peoples have no recognized religious beliefs. The wild tribes form about 10 per cent. of the entire population.

There are about twenty-five different tribes in the islands speaking some one of nineteen dialects, the most populous tribe being the Visayans, who constitute 47 per cent. of the entire civilized population; second, Tagalogs, 20 per cent.; third, Ilocanos, about 10 per cent.; Bicols, 7 per cent.; Pangasinan, 6 per cent.; Pampangan, 5 per cent.; Cagayan, 3 per cent., and Zambalan, 2 per cent.

By the Act of Congress approved August 29, 1916, the Philippine Commission was abolished, there being substituted as the Upper House of the Legislature a Senate composed of 24 members, and instead of the Assembly, a House of Representatives of 90 members, elected triennially.

PORTO RICO.

THE island of Porto Rico, over which the flag of the United States was raised in token of formal possession on October 18, 1898, is the most eastern of the Greater Antilles in the West Indies and is separated on the east from the island of St. Thomas by a distance of about fifty miles, and from Hayti on the west by the Mona passage, seventy miles wide. Distances from San Juan, the capital, to important points are as follows: New York, 1,411 miles; Charleston, S. C., 1,200 miles; Key West, Fla., 1,050 miles; Havana, 1,000 miles.

The island is a parallelogram in general outline, 108 miles from the east to the west, and from 37 to 43 miles across, the area being about 3,604 square miles.

Porto Rico is unusually fertile, and its dominant industries are agriculture and lumbering. In elevated regions the vegetation of the temperate zone is not unknown. There are more than 500 varieties of trees found in the forests, and the plains are full of palm, orange, and other trees. The principal crops are sugar, coffee, tobacco, maize, oranges, bananas, rice, pineapples and other fruits. The principal minerals are gold, carbonates, and sulphides of copper and magnetic oxide of iron in large quantities. Lignite is found at Utuado and Moca, and also yellow amber. A large variety of marbles, limestones, and other building stones are deposited on the island. There are salt works on the south coast, and at Cape Rojo on the west.

CUBA.

THE island of Cuba is 760 miles long, and its width varies from about 25 miles to 100 miles. Its area comprises 45,881 square miles, or about that of Pennsylvania. It has numerous safe and commodious harbors, that of Havana being one of the largest and finest in the world. Measuring from points of nearest approach to its neighbors, Cuba is about 100 miles from Key West, Fla., north; 54 miles from Hayti, east; 130 miles from Yucatan, west, and 85 miles from Jamaica, south. There are 2,360 miles of railway line and 200 miles of electric railways.

The two principal agricultural staples of the island are sugar and tobacco. It also produces in considerable quantities fruits, vegetables, timber and metals, mainly iron, manganese and copper ore, and is adapted to coffee and cotton raising. It has 1,246 miles of shaded roads. The average fluctuation of the temperature is 12 degrees. The average in January is 70.3; July, 82.4; extremes, 60 to 92.

The Government is republican in form. The President, who is chosen by popular suffrage, serves four years and appoints his own Cabinet. The Congress consists of a Senate and House of Representatives, one Representative being chosen for every 25,000 inhabitants, as nearly as possible. The provinces, of which there are six, corresponding to the American States, elect their own Governors and control their own internal affairs.

TUTUILA (AMERICAN SAMOA).

TUTUILA, the Samoan island which, with its attendant islets of Manu'a, Olosega, Ofu, Aunuu and Rose, became a possession of the United States by virtue of the tripartite treaty with Great Britain and Germany in 1899, covers, according to the Bureau of Statistics of the Department of Commerce, 55 square miles, and has (by census of February 1, 1912) 7,251 inhabitants. It possesses the most valuable island harbor, Pago-Pago, in the South Pacific.

WAKE AND OTHER SMALL PACIFIC ISLANDS.

THE United States flag was hoisted over Wake Island on July 4, 1898, by Gen. F. V. Greene, commanding Second Detachment Philippine expedition. It is a small island in the direct route from Hawaii to Hongkong, about 2,000 miles from the first and 3,000 miles from the second.

The United States possesses a number of scattered small islands in the Pacific. The largest are Christmas, Gallego, Starbuck, Penrhyn, Phoenix, Palmyra, Howland, Baker, Johnston, Gardner, Midway, Morell, and Marcus Islands. The Midway Islands are occupied by a colony of telegraphers.

The Santa Barbara group is a part of California.

HAWAII.

HAWAII was annexed to the United States by joint resolution of Congress July 7, 1898. A bill to create Hawaii a Territory of the United States was passed by Congress and approved April 30, 1900.

The area of the several islands of the Hawaiian group is as follows: Hawaii, 4,210 square miles; Maui, 760; Oahu, 600; Kauai, 590; Molokai, 270; Lanai, 150; Niihau, 97; Kahoolawe, 63. Total, 6,740 square miles.

At the time of the discovery of the islands by Capt. Cook, in 1778, the native population was about 200,000. This has steadily decreased, so that at the census of 1910 the native born numbered but 98,157. Total foreign born (1910), 93,752.

NEW YORK CITY MISSION SOCIETY.

President—A. F. Schauffler, D. D. *Vice-Presidents*—Eugene Delano, J. Cleveland Cady. *Treasurer*—Stephen Baker. *Superintendent*—Rev. A. H. McKinney. Headquarters, United Charities Building, 105 East Twenty-second Street.

GUAM.

THE island of Guam, the largest of the Marianas, was ceded by Spain by article 2 of the Treaty of Paris, December 10, 1898. It lies between latitudes 13° 13′ and 13° 39′ north and longitudes 144° 37′ and 144° 58′ east. Area estimated, 225 square miles. Distance from Manila, 1,506 miles; from San Francisco, 5,044 miles. The inhabitants call themselves Chamorros, but the present generation are a mixed race with the Malay strain predominating. Their language, a Polynesian tongue, is also called Chamorro. About 10 per cent. speak English. Instruction in the English language is compulsory in the public schools. The northern half of the island is a plateau from 400 to 600 feet in height and is, except where cleared for cultivation, wooded. The southern half is broken by hills from 1,200 to 1,300 feet high. They are barren, but the valleys between are fertile, and streams traverse this portion. There are no perennial streams in the northern half of the island, which is composed of coralliferous limestone, the southern half of volcanic clays. The productions are cocoanuts, corn, rice, tobacco, cocoa and tropical fruits. Only the dried meat of the cocoanut (copra) is exported.

The total population, July 1, 1918, exclusive of officers and enlisted men of the Navy and Marine Corps and their families was 14,344, of whom 14,124 were classed as "natives." Of the foreign born population only 69 were Americans. Death rate per thousand was 17.6; birth rate, 47.2. Guam is under the Navy Department, as a naval station. The Governor is a naval officer, designated by the President. Capt. Roy C. Smith, named May 30, 1916. A marine barracks, naval hospital and station ship are maintained. The Commercial Pacific Cable Company has a cable station in Guam, and cables from Manila, Yokohama, Midway and Yap Islands are landed here. The United States Department of Agriculture has an experiment station here. The port of entry is Apra, which is closed to foreign vessels, except by permit from the United States Government. Apra is commodious, but unimproved. Capital, Agana, in the north central part, on the western coast; population (estimated), 9,000. During the fiscal year ending June 30, 1918, the island exported 1,292 tons of copra, one-third to Yokohama and the other two-thirds to San Francisco. Total imports, exclusive of military and naval stores and supplies, were valued at $358,146.91, of which all but $82,432.44 was received from the United States or its possessions.

THE OATH OF HIPPOCRATES.

I swear by Apollo, the physician, and Aesculapius, and Health, and All-heal, and all the gods and goddesses, that, according to my ability and judgment, I will keep this oath and stipulation; to reckon him who taught me this art equally dear to me as my parents, to share my substance with him and relieve his necessities if required; to regard his offspring as on the same footing with my own brothers, and to teach them this art if they should wish to learn it, without fee or stipulation, and that by precept, lecture and every other mode of instruction I will impart a knowledge of the art to my own sons and to those of my teachers, and to disciples bound by a stipulation and oath, according to the law of medicine, but to none others. I will follow that method of treatment which, according to my ability and judgment, I consider for the benefit of my patients, and abstain from whatever is deleterious and mischievous. I will give no deadly medicine to any one if asked, nor suggest any such counsel; furthermore, I will not give to a woman an instrument to produce abortion. With purity and with holiness I will pass my life and practice my art. I will not cut a person who is suffering with a stone, but will leave this to be done by practitioners of this work. Into whatever houses I enter I will go into them for the benefit of the sick and will abstain from every voluntary act of mischief and corruption; and further from the seduction of females or males, bond or free. Whatever, in connection with my professional practice, or not in connection with it, I may see or hear in the lives of men which ought not to be spoken abroad, I will not divulge, as reckoning that all such should be kept secret. While I continue to keep this oath unviolated, may it be granted to me to enjoy life and the practice of the art, respected by all men at all times; but should I trespass and violate this oath, may the reverse be my lot.

CORCORAN GALLERY OF ART, WASHINGTON, D. C.

THE Corcoran Gallery of Art, at Washington, D. C., founded and endowed by the late William Wilson Corcoran in 1869, solely for encouraging American genius in the fine arts, is a private corporation controlled by a self-perpetuating board of nine trustees. The original home of the institution was at Pennsylvania Avenue and 17th Street; but in 1897 its collections were transferred to the present building, designed by Ernest Flagg of New York, and located at New York Avenue and 17th Street, N. W. The value of the building and grounds connected therewith is $1,000,000, and the present value of the collections is estimated at $1,500,000. The endowment fund amounts to $1,000,000.

The collection of paintings is particularly representative of American artists. In addition the gallery has examples of the French, Dutch, English, and other schools. The sculptures include casts from the antique and the Renaissance, and modern works, as well as original works in marble and bronze. There are over 100 original bronzes by Antoine-Louis Barye, French sculptor of animals. It is open to the public: Mondays, 12 M. to 5 P. M.; other week days, 9 A. M. to 5 P. M.; Sundays, 1.30 to 5 P. M.

UNITED STATES RESTRICTS BOOK PUBLISHING.

The following regulations, curtailing book publishing, were put in effect October 1, 1918, by the War Industries Board:

First. Beginning October 1, 1918, reduce new titles of books manufactured in this country 25 per cent. of the average of the three-year period July 1, 1915, to June 30, 1918. In the case of a publisher who has not been in business over five years, the reduction in titles may be from the number of titles published in the year ending June 30, 1918. A bonafide new publisher who maintains no connection with any existing publisher may apply to the War Industries Board for registration and allotment of the number of titles to be published in his first year. Books of research published under subsidy or war-service books published for the United States or allied Governments under subsidy are to be excepted from this regulation.

Second. Papers are to be reduced in weight as follows: (a) Books of 320 pages or over to be printed on 50-pound machine finish or eggshell or 60-pound supercalender. Smaller books may use up to 60-pound English finish, eggshell, or supercalender. (b) Juvenile and toy books: Weights to vary in accordance with the number of pages as follows: 257 pages or over, 60-pound machine finish, or eggshell, or supercalender; 256 pages or less, 70-pound machine finish, or eggshell, or supercalender; 192 pages or less, 80-pound machine finish, or eggshell, or supercalender. 128 pages or less, 90-pound machine finish, or eggshell or supercalender; 64 pages or less, 100-pound machine finish or eggshell, or supercalender. Cover stock for toy books, 125 pounds. Weights in all cases based on 25 by 38. (c) Type page: With a 100,000-word book of prose, 320 pages, 12mo. size (roughly 300 words to a page), as the standard, the type page shall scale down to a minimum of 150 words to a page for a prose book of 20,000 words.

Third. Coated paper is to be used only for inserts or color work and is limited to 25 by 38—80 pounds.

Fourth. Eliminate all coated paper for jackets and circulars.

Fifth. Circulars: No new circulars to be issued exceeding 4 pages in length. The term "circulars" here used means a description of one book or group or series of books. No circular to exceed the standard trimmed size of 8½ by 11.

Sixth. All shipment of books "on sale," "on consignment," or "protected" shall be prohibited, except that in any case where a travelling salesman of a publishing house has been unable to solicit an advance order for any particular publication (because of time limitation between the receipt of the manuscript and the publication of the book), then the publisher may ship a sample order "on sale," but such an "on sale" shipment to either of the large jobbers shall in no case be in excess of 100 copies, and no such "on sale" shipment to any other dealer shall be in excess of 5 copies.

Seventh. No "on sale" shipment shall be made for display or any other purpose except as stated in previous paragraph, and no rebates shall be made for unsold stock.

Eighth. Standard size of paper shall be used in printing all books so far as possible. The standard sizes are: Machine finish or eggshell: 28 by 38, 30½ by 41, 33 by 44, 35 by 46, 38 by 56, 41 by 61. Super and coated: 25 by 38, 28 by 42, 30½ by 41, 33 by 44, 38 by 50, 41 by 61. To avoid unnecessary wastage of paper on series of books already established special sizes may be made on orders of 5 tons or more.

PERIODICALS, ALL CLASSES INCLUDING DAILIES.

DEATHS IN U. S. NAVY FROM "WAR CAUSES," 1,233.

DEATHS in the navy from "war causes" totalled 1,233, Surgeon-General Braisted on November 26, 1918, told the House Naval Committee. No figures were given as to deaths from disease. The bodies of virtually all navy men dying in foreign service, the Surgeon-General said, have been returned home. He added there were 15,000 patients in naval hospitals.

BIG BROTHER MOVEMENT.

THE Big Brother movement was founded in 1904 in New York City. Since that time the work has been taken up in over one hundred cities, on lines laid down by this office. There is a staff of paid workers, supplemented by volunteers—lawyers, physicians, merchants, executives, teachers—all busy men selected because of their good-will and natural ability to do effective work. The Little Brothers are boys referred by parents, hospitals, police, courts, etc. They are the sons of widows, inebriates, prisoners, of careless or ignorant parents—boys who are largely the victims of their environment. The task is to ascertain the cause of the boys' trouble—whether it be truancy, stealing, lying, running away from home, etc.; then, with the co-operation of parents, through the mediation of the Big Brothers, to build up within the boy a sense of honor and good citizenship. Every possible agency is employed to secure results—hospitals for examination or operation, the Y. M. C. A., church and settlement gymnasiums, industrial classes and boys' clubs, Boy Scouts, trade schools, camps and farm schools.

President—Franklin C. Hoyt, of the Children's Court. *Vice-Presidents*—Rev. Wilton Merle-Smith, D. D., Luther H. Lewis, Robert L. Gerry. *Chairman Executive Committee*—Ernest K. Coulter. *Secretary*—Charles A. Taussig. *Treasurer*—Francis J. Danforth. *General Secretary*—Rowland C. Sheldon. Office, 200 Fifth Avenue, New York.

COURT OF HONOR.

FOUNDED 1895. One grand court; 1,197 district courts. Benefit members (men and women), January 1, 1917, 73,893: social members, January 1, 1917, 549; relief members, 1,967; total membership, 76,409; insurance in force January 1, 1917, $87,885,500.00; total benefits paid to August 31, 1918, $13,606,791,62; balance to protect certificate holders, August 31, 1918, $2,953,934.92.

Supreme Chancellor—A. L. Hereford, Springfield, Ill. *Supreme Vice-Chancellor*—Charles F. Wadsworth, Denver, Col. *Supreme Recorder*—W. E. Robinson, Springfield, Ill. *Supreme Treasurer*—L. M. Dixon, Springfield, Ill. *Supreme Medical Director*—Dr. G. M. French, Springfield, Ill. *Supreme Chaplain*—Rev. J. H. Hatfield, Columbus, O. *Supreme Conductor*—Mae F. Larkin, Clarksdale, Ill. *Supreme Guard*—Jennie B. Somers, St. Louis, Mo. *Supreme Sentinel*—Sena Edginton, Kansas City, Mo.

UNITED STATES CUSTOMS DUTIES.

(The following table covers only the articles of principal importance imported.)
(ad val.—ad valorem; n.s.p.f.—not specially provided for.)
* Effective March 1, 1914.

ARTICLES.	RATES OF DUTY UNDER	
	Law of 1909.	Law of 1913.
SCHEDULE A—CHEMICALS, OILS AND PAINTS.		
Acids, n.s.p.f.	25 p.c. ad val.	15 p.c. ad val.
Alcoholic compounds, n.s.p.f.	60c. lb. and 25 p.c. ad val.	10c. lb. and 20 p.c. ad val. to 40c. lb. and 20 p.c. ad val.
Alkalies, alkaloids, and all chemical and medicinal compounds, preparations, mixtures and salts, and combinations thereof	25 p.c. ad val.	15 p.c. ad val.
Ammonia, carbonate of, and muriate of	¾c. lb.	¾c. lb.
Coal-tar products, not medicinal and not colors or dyes	Free list.	15 p.c. ad val. and 2½c. lb.
All colors, dyes, or stains, whether soluble or not in water, color acids, color bases, color lakes, photographic chemicals, medicinals, flavors, synthetic phenolic resin, or explosives, not otherwise specially provided for in this title, when obtained, derived, or manufactured in whole or in part from any of the products provided for in Groups I. and II. (see below), natural alizarin and indigo, and colors, dyes, or color lakes obtained, derived, or manufactured therefrom	.....	30 p. c. ad val. and 5c. lb.
Group I. Acenaphthene, authracene having a purity of less than twenty-five per centum, benzol, carbazol having a purity of less than twenty-five per centum, cresol, cumol, fluorene, metacresol having a purity of less than ninety per centum, methylanthracene, methylnaphthalene, naphthalene having a solidifying point less than seventy-nine degrees centigrade, orthocresol having a purity of less than ninety per centum, paracresol having a purity of less than ninety per centum, pyridin, quinolin, toluol, xylol, crude coal tar, pitch of coal tar, dead or cresote oil, anthracene oil, all other distillates which on being subjected to distillation yield in the portion below two hundred degrees centigrade a quantity of tar acids less than five per centum of the original distillate, and all other products that are found naturally in coal tar, whether produced or obtained from coal tar or other source, and not otherwise specially provided for in this title. Group II. Amidonaphthol, amidophenol, amidosalicylic acid, anilin oil, anilin salts, anthracene having a purity of twenty-five per centum or more, anthraquinone, benzoic acid, benzaldehyde, benzyl-chloride, benzidin, binitrobenzol, binitrochlorobenzol, binitronaphthalene, binitrotuluol, carbazol having a purity of twenty-five per centum or more, chlorophthalic acid, cumidin, dimethylanilin, dinaisidin, dioxynaphthalene, diphenylaimin, metacresol having a purity of ninety per centum or more, methylanthraquinone, metanilic acid, naphthalene having a solidifying point of seveuty-nine degrees centigrade or above, naphthylamin, naphthol, nahpthylenediamin, nitrobenzol, nitrotoluol, nitronaphthalene, nitranilin, nitrophenylenediamin, nitrotoluylenediamin, orthocresol having a purity of ninety per centum or more, paracresol having a purity of ninety per centum or more, phenol, phthalic acid, phthalic anhydride, phenylenediamin, phenylnaththylamin, resorcin, salicylic acid, sulphanilic acid, toluidin, toildin, toluylenediamin, xylidin, or any sulphoacid or sulphoacid salt of any of the foregoing, all similar products obtained, derived, or manufactured in whole or in part from the products provided for in Group I., and all distillates which on being subjected to distillation yield in the portion distilling below two hundred degrees centigrade a quantity of tar acids equal to or more than five per centum of the original distillate, all the foregoing not colors, dyes, or stains, photographic chemicals, medicinals, flavors, or explosives, and not otherwise provided for in this title	.....	Exempt from duty.
Drugs	1¼c. lb. and 10 p.c. ad val.	15 p. c. ad val. and 2½c. lb.
Drugs and medicines in pills, capsules, etc	.....	10 p.c. ad val.
Glue, value not above 10c. per pound	2½c. lb.	25 p.c. ad val.
Oil, castor, gals.	35c. gal.	1c. lb.
Oil, olive in bottles, etc., gals.	50c. gal.	12c. gal.
Oil, whale, gals.	8c. gal.	30c. gal.
Opium, crude and not adulterated, containing 9 per cent. and over of morphia, lbs.	$1.50 lb.	5c. gal.
Paints, colors, pigments, etc.	30 p.c. ad val.	$3 lb.
Perfumery, cosmetics, containing alcohol	60c. lb. and 50 p.c. ad val.	15 to 20 p.c. ad val.
Perfumery, cosmetics, not containing alcohol	60 p.c. ad val.	40c. lb. and 60 p.c. ad val.
Soap, castile and unperfumed toilet soap	1¼c. lb.	60 p.c. ad val.
Soap, perfumed toilet	50 p.c. ad val.	10 p.c. ad val.
Soda, bicarbonate of	5-8c. lb.	30 p.c. ad val.
Sponges, not advanced in value by chemical processes	20 p.c. ad val.	¼c. lb.
Talcum	.....	10 p.c. ad val.
		15 p.c. ad val.
SCHEDULE B—EARTHS, EARTHENWARE & GLASSWARE.		
Cement	8c. 100 lbs.	10 p.c. ad val.
Earthenware, porcelain, decorated	60 p.c. ad val.	20 to 55 p.c. ad val.
Earthenware, common, not ornamented	25 p.c. ad val.	15 p.c. ad val.
Glassware, decorated or cut	60 p.c. ad val.	45 p.c. ad val.

ARTICLES.	RATES OF DUTY UNDER	
	Law of 1909.	Law of 1913.
Marble, manufactures of, except for jewelry, n.s.p.f.	50 p.c. ad val.	45 p.c. ad val.
Opera and field glasses, and frames for same	45 p.c. ad val.	35 p.c. ad val.
Spectacles and eyeglasses, and frames for same	Graduated rate.	35 p.c. ad val.
SCHEDULE C—METALS AND MANUFACTURES OF.		
Iron, bar, n.s.p.f.	6-10c. lb.	5 p.c. ad val.
Steel, n.s.p.f.	Graduated rate.	15 p.c. ad val.
Automobiles, valued at $2,000 or more and automobile bodies	.....	45 p.c. ad val.
Automobiles valued at less than $2,000, and automobile chassis and finished parts of automobiles, not including tires	45 p.c. ad val.	30 p.c. ad val.
Copper plates, n.s.p.f.	45 p.c. ad val.	20 p.c. ad val.
Pens, metallic, except gold pens	12c. gross.	8c. gross.
Table and kitchen utensils, metal, n.s.p.f.	45 p.c. ad val.	20 p.c. ad val.
Tin plates	1 2-10c. lb.	15 p.c. ad val.
Pins, not jewelry	35 p.c. ad val.	20 p.c. ad val.
Iron beams, girders, joists	Graduated rate.	10 p.c. ad val.
Cast iron pipe, andirons, plates, stove plates, hollow ware	8-10c. lb.	10 p.c. ad val.
Aluminum, and alloys of any kind in which it is the chief component, in crude form	7c. lb.	2c. lb.
Watch movements and watch cases, clocks and parts thereof	Graduated rate.	30 p.c. ad val.
Zinc in blocks, pigs or sheets	Graduated rate.	15 p.c. ad val.
SCHEDULE D—WOOD AND MANUFACTURES OF.		
Bamboo, wood, or straw blinds, etc	.....	20 to 25 p.c.ad val.
Briar wood and similar wood unmanufactured	15 p.c. ad val.	10 p.c. ad val.
Cabinet wood advanced from crude condition	Free.	15 p.c. ad val.
Paving posts, railroad ties, telephone, trolley and telegraph poles	10 p.c. ad val.	10 p.c. ad val.
House or cabinet furniture, and manufactures of wood or bark, n.s.p.f.	35 p.c. ad val.	15 p.c. ad val.
Willow furniture	.....	25 p.c. ad val.
SCHEDULE E—SUGAR, MOLASSES & MANUFACTURES OF.		
Sugars and syrups of cane juice	Not above 75 degrees polariscope 95-100 of 1c. per lb. and for each additional degree 35-1000 of 1c. per lb. additional.	Not above 75 degrees polariscope 71-100 of 1c. per lb.; for every additional degree 26-1000 of 1c. per lb. additional.*
Saccharin	65c. lb.	65c. lb.
Sugar cane in its natural state, or unmanufactured	20 p.c. ad val.	15 p.c. ad val.
Molasses, not above 40 degrees	20 p.c. ad val.	15 p.c. ad val.
Maple sugar and maple syrup	4c. lb.	3c. lb.
Glucose or grape sugar	1½c. lb.	1½c. lb.
Sugar candy, valued more than 15c. per pound	50 p.c. ad val.	25 p.c. ad val.
Sugar candy and all confectionery, n.s.p.f., valued at 15c. per pound or less	4c. lb. and 15 p.c. ad val.	2c. lb.
SCHEDULE F—TOBACCO AND MANUFACTURES OF.		
Tobacco, wrapper, leaf	$1.85 lb. to $2.50 lb.	$1.85 lb. to $2.50 lb.
Tobacco, filler	35c. to 50c. lb.	35c. to 50c. lb.
Tobacco, smoking	.....	55c. lb.
Snuff	55c. lb.	55c. lb.
Cigars and cigarettes	$4.50 lb. and 25 p.c. ad val.	$4.50 lb. and 25 p.c. ad val.
SCHEDULE G—AGRICULTURAL PRODUCTS AND PROVISIONS.		
Horses and mules and all live animals, n.s.p.f.	20-25 p.c. ad val.	10 p.c. ad val.
Barley, bushel of 48 pounds	30c. bushel.	15c. bushel.
Barley malt, bushel of 34 pounds	45c. bushel.	25c. bushel.
Oatmeal and rolled oats	1c. lb.	30c. 100 lbs.
Oats, bushel	15c. bushel.	6c. bushel.
Rice, cleaned	2c. lb.	1c. lb.
Macaroni, vermicelli, and all similar preparations	1½c. lb.	1c. lb.
Butter and substitutes	6c. lb.	2½c. lb.
Cheese and substitutes therefor	6c. lb.	20 p.c. ad val.
Hay	$4 ton.	$2 ton.
Honey	20c. gallon.	10c. gallon.
Hops	16c. lb.	16c. lb.
Seeds, flax-seed, linseed and other oil seeds, n.s.p.f. (bu. of 56 lbs.)	25c. bushel.	20c. bushel.
Seeds, castor (bu. of 50 lbs.)	25c. bushel.	15c. bushel.
Fish, except shell fish, packed in oil or in oil and other substances	Graduated rate.	25 p.c. ad val.
Fruits, apples, peaches, quinces, cherries, plums and pears	25c. bushel.	10c. bushel.
Fruits, preserved, n.s.p.f.	2c. lb.	1c. lb.
Fruits, oranges, grapefruit, and limes in bulk	1c. lb.	1½c. lb.
Lemons	1½c. lb.	½c. lb.
Pineapples in bulk	$8 per 1,000.	$5 per 1,000.
Nuts of all kinds, shelled or unshelled, n.s.p.f.	1c. lb.	1c. lb.
Spices, unground	Free list.	1c. lb.
Chocolate and cocoa unsweetened, prepared or manufactured, n.s.p.f.	Graduated rate.	8 p.c. ad val.
Chocolate and cocoa, sweetened, prepared or manufactured, valued at 20c. per pound or less	Graduated rate.	2c. lb.
SCHEDULE H—SPIRITS, WINES AND OTHER BEVERAGES.		
Brandy and other spirits manufactured or distilled from grain or other materials, n.s.p.f.	$2.60 gallon.	$2.60 gallon.
Champagne and all other sparkling wines, quarts	$9.60 per doz.	$9.60 per doz.
Wines, still, in casks, vermuth and similar beverages	45c. to 60c. gallon.	45c. to 60c. gallon.
Wines, still, in bottles, quarts	$1.85 per doz.	$1.85 per doz.
Malt liquors, in bottles, jugs, gallons	45c. gallon.	45c. gallon.
Mineral waters, in bottles, quarts	30c. doz.	20c. doz.

ARTICLES.	RATES OF DUTY UNDER	
	Law of 1909.	Law of 1913.
SCHEDULE I—COTTON MANUFACTURES.		
Cotton thread, uncolored, according to numbers	2½c. lb. to 28c. lb.	5 to 25 p.c. ad val.
Cotton thread, colored, bleached, according to numbers	6c. lb. to 67c. lb.	7½ to 27½ p.c. ad val.
Cotton cloth, uncolored, according to numbers	1c. sq. yard to 12½c. sq. yard.	7½ to 27½ p.c. ad val.
Cotton cloth, colored, bleached, according to numbers	Graduated rate.	10 to 30 p.c. ad val.
Cotton handkerchiefs or mufflers, hemmed or hemstitched, n.s.p.f.	Graduated rate.	30 p.c. ad val.
Cotton clothing, ready made	50 p.c. ad val.	30 p.c. ad val.
Cotton hosiery, pairs	70c. doz. to $2 doz. & 15 p.c. ad val.	30 to 50 p.c. ad val.
Cotton shirts, drawers, and all underwear, n.s.p.f.	60c. doz. & 15 p.c. ad val. to $2.25 doz. & 35 p.c. ad val.	30 p.c. ad val
Cotton, plushes, velvets, corduroys	9c. sq. yard & 25 p.c. ad val. to 12c. sq. yard & 25 p.c. ad val.	40 p.c. ad val.
Lace manufactures	60 p.c. ad val.	60 p.c. ad val.
SCHEDULE J—FLAX, HEMP AND JUTE AND MANUFACTURES OF.		
Flax hemp or ramie single yarns, finer than 80 lea or number	15 p.c. ad val.	10 p.c. ad val.
Mattings for floors	3½c. sq. yard.	2½c. sq. yard.
SCHEDULE K—WOOL AND MANUFACTURES OF.		
Alpaca, hair of	.....	15 p.c. ad val.
Combed wool or tops, n.s.p.f.	Graduated rate.	8 p.c. ad val.
Yarns	Graduated rate.	18 p.c. ad val.
Yarns of hair of angora goat and alpaca	.....	25 p.c. ad val.
Cloths, knit fabrics, felts not woven and all manufactures of every description, wholly or chiefly of wool, n.s.p.f.	Graduated rate.	35 p.c. ad val.
Blankets, n.s.p.f., and flannels	Graduated rate.	25 to 30 p.c. ad val.
Dress goods, women's and children's	Graduated rate.	35 p.c. ad val.
Clothing, ready made and wearing apparel of every description, n.s.p.f.	44c. lb. & 60 p.c. ad val.	35 p.c. ad val.
Carpets, woven whole for rooms, and rugs	10c. sq. foot & 40 p.c. ad val.	50 p.c. ad val.
Plushes, velvets and all other pile fabrics, cotton cut or uncut	Graduated rate.	40 p.c. ad val.
SCHEDULE L—SILK AND SILK GOODS.		
Silk partially manufactured, or spun silk	35c. lb. and graduated rate.	20c. lb. to 35 p.c. ad val.
Silk, wearing apparel	60 p.c. ad val.	50 p.c. ad val.
Silk, yarns, threads, artificial	45c. lb. to 60c. lb.	35 p.c. ad val.
Silk, all manufactures of, n.s.p.f.	50 p.c. ad val.	45 p.c. ad val.
SCHEDULE M—PAPERS AND BOOKS.		
Printing paper, unsized or glued and suitable for printing books and newspapers, but not for covers or binding (except Japan paper, imitation Japan paper, hand-made or machine hand-made paper, valued over 5c. lb., 12 p. c. ad val.; valued less than 5c. lb., free. There is a clause providing for a higher (reciprocity) duty on printing paper, in case any other country so taxes American paper.		
Indigo paste is derived from indigo and is dutiable as dye obtained from indigo.		
Books, of all kinds, bound or unbound pamphlets, engravings, photographs, n.s.p.f.	25 p.c. ad val.	15 p.c. ad val.
Paper manufactures of, n.s.p.f.	35 p.c. ad val.	25 p.c. ad val.
Playing cards	10c. pack and 20 p.c. ad val.	60 p.c. ad val.
SCHEDULE N—SUNDRIES.		
Beads, not threaded or strung	35 p.c. ad val.	35 p.c. ad val.
Brushes	40 p.c. ad val.	35 p.c. ad val.

Wood, n.s.p.f.
Wood alcohol.
Wood pulp.
Wool, n.s.p.f.
Works of art, originals or for certain institutions.
Wrought iron or steel nails, n.s.p.f.

LITIGATION OF CUSTOMS CLAIMS.

(By the Board of United States General Appraisers.)

A statutory judicial remedy is given by the Customs Practise Act of June 10, 1890, and supplements thereto, for the return of money illegally exacted by the administrative customs officials, before a special statutory Court of Customs Claims called the Board of United States General Appraisers. If the valuation by the local appraiser of imported merchandise upon which an ad valorem duty is assessed is disputed by the importer he may appeal for a re-valuation (or re-appraisement as it is called) within ten days after the local appraiser has made the assessment. If the Importer is dissatisfied with the classification by the Collector of Customs at the port of entry, he may file a protest in writing within thirty days with such Collector, who thereupon must forward the papers to the Board, and the case is regularly docketed.

There is no limitation upon the amount involved in such litigation. It covers and includes merchandise imported by Parcel Post and claims arising from the assessment and classification of baggage not exempt from duty. The trial of the case is usually had at the port of entry or some nearby place. Regular dockets for the trial of such cases are held at New York, Philadelphia, Boston, Baltimore, Chicago, Cincinnati, St. Louis, St. Paul, Seattle, Portland, San Francisco and Los Angeles. In addition special dockets are held in other customs districts at the convenience and on request of the importers' attorneys. There are no court costs and the procedure is simple and expeditious yet includes all the safeguards and protections of an ordinary court trial. Numerous claims against the Government, arising from the administration of the customs laws, are thus litigated and involve in the aggregate large sums of money. Reappraisement cases are heard by a single member of the Board with an appeal by either the Government or the importer from his judgment to a board of three. Classification cases, including contests over the legality of an appraisement, the legality of any administrative regulation promulgated by the Secretary of the Treasury, or the legality of other administrative action resulting in the levy of an excessive rate or amount of duty by the Collector of Customs, are decided by the Classification Board. An appeal lies from this Board's judgment to the Court of Customs Appeals at Washington from whence certiorari lies to the Supreme Court of the United States in treaty cases, constitutional cases and other cases which the Attorney General certifies as of sufficient importance.

The Clerk of the Board is De Witt P. Dutcher, 641 Washington Street, New York, N. Y. The Board consists of Jerre B. Sullivan (President) of Iowa, Byron S. Waite of Michigan, Eugene G. Hay of Minnesota, William B. Howell of New Jersey, Israel F. Fischer of New York, Samuel B. Cooper of Texas, Charles P McClelland of New York, George Stewart Brown of Maryland, and William C. Adamson of Georgia. The U. S. Court of Customs Appeals consists of Robert M. Montgomery, Presiding Judge; James M. Smith, Orion M. Barber, Marion De Vries, and George E. Martin, Associate Judges. Clerk, Arthur S. Sheldon, Washington, D. C.

NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS.

Chairman—Dr. John R. Freeman. *Secretary*—S. W. Stratton, SC. D. Joseph S. Ames, Ph. D.; John R. Freeman, C. E.; John F. Hayford, C. E.; Major Gen. W. L. Kenly, U. S. A.; Charles F. Marvin, M. E.; Michael I. Pupin, Ph. D.; Wallace C. Sabine, Sc. D.; Rear Admiral D. W. Taylor, U. S. N.; Lieut. Commander J. H. Towers, U. S. N.; Charles D. Walcott, Sc. D. The chief executives of the Air Service are as follows: John D. Ryan, director of the Air Service; Major Gen. Wm. L. Kenly, U. S. N. A., director of Military Aeronautics; W. C. Potter, acting director of Aircraft Production. The following is the list of the members of the Aircraft Board: John D. Ryan, chairman; Richard F. Howe, vice chairman; W. C. Potter Rear Admiral D. W. Tylor, U. S. N.; Captain N. E. Irwin, U. S. N.; Commander A. K. Atkins, U. S. N.; Major General Wm. L. Kenly, U. S. A.; Col. E. A. Deeds, U. S. A. S., A. P.; Col. R. L. Montgomery, U. S. A., A. P.

NATIONAL WAR LABOR BOARD.

Representatives of Employers—L. F. Loree, pres. Delaware & Hudson Co.; C. Edwin Michael, pres. Virginia Bridge & Iron Co.; Loyall A. Osborne, vice-pres. Westinghouse Electric & Manufacturing Co.; W. H. Van Dervoort, pres. Root & Van Dervoort Engineering Co.; B. L. Worden, pres. Lackawanna Bridge Co.

Representatives of Employees—Frank J. Hayes, pres. United Mine Workers of America; William L. Hutcheson, pres. United Brotherhood of Carpenters and Joiners of America; Thomas J. Savage, member general executive board International Association of Machinists; Victor Olander, representative International Seamen's Union of America; T. A. Rickert, pres. United Garment Workers of America.

Representatives of the Public—William Howard Taft, ex-President of the United States. Frank P. Walsh, former chairman Industrial Relations Commission.

PASSPORT REGULATIONS.

1. AUTHORITY TO ISSUE—Section 4075 of the Revised Statutes of the United States, as amended by the act of Congress approved June 14, 1902, provides that "the Secretary of State may grant and issue passports, and cause passports to be granted, issued, and verified in foreign countries by such diplomatic or consular officers of the United States, and by such chief or other executive officer of the insular possessions of the United States, and under such rules as the President shall designate and prescribe for and on behalf of the United States." The following rules are accordingly prescribed for the granting and issuing of passports in the United States:

2. TO WHOM PASSPORTS ARE ISSUED— Section 4,076 of the Revised Statutes of the United States (U. S. Comp. Stat., 1901, 2765) provides that "no passport shall be granted or issued to or verified for, any other persons than those owing allegiance, whether citizens or not, to the United States."

3. BY WHOM ISSUED AND REFUSAL TO ISSUE—No one but the Secretary of State may grant and issue passports in the United States (Rev. Stat., Secs. 4075, 4078) and he is empowered to refuse them in his discretion. Passports are not issued by American diplomatic and consular officers abroad, except in cases of emergency; and a citizen who is abroad and desires to procure a passport must apply therefor through the nearest diplomatic or consular officer to the Secretary of State. Applications for passports by persons in Porto Rico or the Philippines should be made to the chief executives of those islands. The evidence required of such applicants is similar to that required of applicants in the United States.

4. FEE—By act of Congress approved March 23, 1888, a fee of one dollar is required to be collected for every citizen's passport issued. That amount in currency or postal money order should accompany each application made by a citizen of the United States. Orders should be made payable to the Disbursing Clerk of the Department of State. Draft or checks will not be accepted.

5. APPLICATIONS: AFFIDAVIT OF APPLICANT—A person who is entitled to receive a passport, if within the United States, must submit a written application, in duplicate, in the form of an affidavit, to the Secretary of State. The application should be made by the person to whom the passport is to be issued and signed by him, as it is not proper for one person to apply for another. The affidavit must be made before a clerk of a Federal court or of a State court authorized by the act of Congress of June 29, 1906, to naturalize aliens, within the jurisdiction of which the applicant or his witness resides, and the seal of the court must be affixed; *but in any place where there is a Federal court the affidavit must be made before a clerk of such court*, unless there is in such place an agent of the Department of State, in which case the Secretary may, in his discretion, require the application to be made before such agent.

The applicant must state from what point he intends to leave the United States, and the date of his intended departure, and also, if by a port of the United States, by what ship he intends to sail.

(c) PHOTOGRAPHS—The application must also be accompanied by triplicate photographs of the applicant, on thin paper, unmounted, and not larger in size than three by three inches. If the applicant is going to a belligerent country, he must submit four copies of his photograph. One must be attached to the back of each application by the clerk of court or the department's agent before whom the application is made, with an impression of such officer's seal so placed as to cover part of the photograph but not the features, and the other sent loose, to be attached to the passport by the department. The loose photograph must be signed by the applicant across its face, so as not to obscure the features, and the signature thereon must correspond to the applicant's signature affixed to the application. *Photographs on cardboard or postcards will not be accepted.*

(d) WITNESS—The application must be supported by an affidavit of at least one credible witness, who has known the applicant at least two years, stating that the applicant is the person he represents himself to be and that the facts stated in the application are true to the best of the witness's knowledge and belief. This affidavit must be made before the clerk of court or the department's agent before whom the application is executed, and the witness must accompany the applicant when he makes his application. The witness must be an American citizen, established in a recognized profession or business and having his office or place of business within the jurisdiction of the court or the department's agent (e. g., a clergyman, lawyer, physician, banker, broker, real estate dealer, or merchant). The witness, in signing the application, should state the nature of his profession or business and his professional or business address. The applicant or his witness must be known to the clerk of court or the department's agent before whom the application is executed or must be able to satisfy such officer as to his identity and the *bona fides* of the application. *No lawyer or other person will be accepted as witness to a passport application if he has received or expects to receive a fee for his services in connection therewith.*

6. NATIVE CITIZEN—An application containing the information indicated by rule 5 will be sufficient evidence in the case of a native citizen; except that a person born in the United States in a place where births are recorded will be required to submit a birth certificate with his application. If a birth certificate is not obtainable, the application must be supported by an affidavit of the physician who attended the birth or affidavits of parents or other reputable persons having actual knowledge of the applicant's birth in this country. Passports issued by the Department of State or its diplomatic or consular representatives are intended for identification and protection in foreign countries and not to facilitate entry into the United States, immigration being under the supervision of the Department of Labor.

7. A PERSON BORN ABROAD WHOSE FATHER WAS A NATIVE CITIZEN OF THE UNITED STATES—In addition to the statements required by rule 5, his application must show that his father was born in the United States, resided therein, and was a citizen at the time of the applicant's birth. In such case evidence of the father's birth in this country, similar to that required in section 6, above, should be submitted.

8. NATURALIZED CITIZEN—In addition to the statements required by rule 5, a naturalized citizen must transmit his certificate of naturalization, or a duly certified copy of the court record thereof, with his application. It will be returned to him after inspection. He must state in his affidavit when and from what port he emigrated to this country and, if possible, what ship he sailed on, where he has lived since his arrival in the United States, when and before what court he was naturalized, and that he is the identical person described in the certificate of naturalization. The signature to the application should conform in orthography to the applicant's name as written in his certificate of naturalization, or an explanation of the difference should be submitted.

9. WOMAN'S APPLICATION—If she is unmarried, in addition to the statements required by rule 5, she should state that she has never been married. If she is the wife or widow of a native citizen of the United States, the fact should be made to appear in her application, which should be made according to the form prescribed for a native citizen, whether she was born in this country or abroad. If she is the wife or widow of a naturalized citizen, in addition to the statements required by rule 5 she must transmit for inspection her husband's certificate of naturalization or a certified copy of the court record thereof, must state that she is the wife (or widow) of the person described therein, and must set forth the facts of his birth, emigration, naturalization, and residence, as required in the rules governing the application of a naturalized citizen. She should sign her own Christian name, with the family name of her husband. (Thus, Mary Doe; not Mrs. John Doe.) A married woman's citizenship follows that of her husband. It is essential, therefore, that a woman's marital relation be indicated in her application for a passport, and that in the case of a married woman her husband's citizenship be established.

10. THE CHILD OF A NATURALIZED CITIZEN CLAIMING CITIZENSHIP THROUGH THE NATURALIZATION OF THE PARENT—In addition to the statements required by rule 5 the applicant must state that he

PASSPORT REGULATIONS—*Continued.*

or she is the son or daughter, as the case may be, of the person described in the certificate of naturalization, which must be submitted for inspection, and must set forth the facts of emigration, naturalization, and residence, as required in the rules governing the application of a naturalized citizen.

11. A RESIDENT OF AN INSULAR POSSESSION OF THE UNITED STATES WHO OWES ALLEGIANCE TO THE UNITED STATES—In addition to the statements required by rule 5, he must state that he owes allegiance to the United States and that he does not acknowledge allegiance to any other government, and must submit affidavits from at least two credible witnesses who are able to corroborate his statements as to birth, residence, and loyalty. No fee is required for the issuance by the Department of State of an insular passport.

12. EXPIRATION OF PASSPORT—*A passport expires six months from the date of its issuance.* A new one will be issued upon a new application, accompanied by the old passport; and, if the applicant be a naturalized citizen, the old passport will be accepted in lieu of a certificate of naturalization, provided the application upon which the old passport was issued is found to contain sufficient information as to the naturalization of the applicant.

13. WIFE, MINOR CHILDREN, AND SERVANTS—When the applicant is accompanied by his wife, minor children, and maid servant, who is a citizen of the United States, it will be sufficient to state the fact, giving their names in full, the dates and places of their births, and the allegiance of the servant, when one passport will suffice for all. In such case, however, three photographs of each person should accompany the passport application. For a man servant or any other person in the party a separate passport will be required. A woman's passport may include her minor children and maid servant under the above-named conditions. (The term "maid servant" does not include a governess, tutor, pupil, companion, or person holding like relation to the applicant for a passport.)

14. TITLES—Professional and other titles will not be inserted in passports.

15. SURRENDER OF OLD PASSPORTS—An applicant for a new passport who holds an expired or unexpired passport or passports should submit the latter to the clerk of court or agent of the Department of State before whom he executes his application for a new passport. In such case the clerk of court or agent of the Department of State will cancel the old passport by cutting out a piece of the seal thereon and stamping, or writing in indelible ink, the word "Cancelled," across the face of the passport, which may then be returned to the applicant. After cancelling an old passport the official who takes the application should make a notation on the margin thereof, giving the number and date of issuance of the passport cancelled.

16. BLANK FORMS OF APPLICATION—They will be furnished by the department free of charge to persons who desire to apply for passports. Supplies of blank applications are also furnished by the department to clerks of courts and are held by the department's agents.

CUSTOM HOUSE EXAMINATION OF BAGGAGE FROM ABROAD.

1. A declaration is required of every passenger; but the senior member of a family may declare for the entire family if the members thereof are all residents of the same country and have their baggage placed under the same letter on the pier. Your baggage will not be examined until you have prepared and delivered to the customs officers a declaration on this form.

2. Penalties under U. S. Revised Statutes 2802 and 3082—Failure to declare any article which should be declared subjects it to seizure and the passenger to criminal prosecution. The offering of gratuities to customs officers is a violation of the law.

3. Residence—Persons arriving in the United States are divided as follows: (*a*) Returning residents of the United States and (*b*) all persons other than returning residents of the United States; and their declarations must be made accordingly. Citizens of the United States shall be deemed to be returning residents of the United States, unless they present satisfactory evidence that they have given up their residence in the United States and have acquired an actual bona fide residence in a foreign country. Residence of a wife follows that of her husband and the residence of a minor child that of its parents.

4. Returning residents of the United States must declare all articles obtained abroad in any manner. This includes articles obtained by purchase, gift, exchange or otherwise; articles worn or carried on the person as well as those in the baggage; used articles as well as new, and trunks and other containers obtained abroad. Commissions for others and articles intended directly or indirectly for sale must be so described in the declaration. Articles which may be included in the $100 exemption must not be omitted from the declaration. The actual cost of repairs or alterations made abroad on any article taken out of the United States must be declared. Personal or household effects returned in the same condition shall be admitted free of duty upon their identity being established, provided that such articles as were obtained abroad on a previous trip were properly declared when originally imported.

5. All persons other than returning residents of the United States may bring in free of duty necessary and appropriate wearing apparel, articles of personal adornment, toilet articles, and similar personal effects actually owned by them and intended for their own wear and use. All other articles in their baggage or on their person must be declared. Household effects, foodstuffs, cigars and cigarettes, tools of trade, articles owned by others or intended for others or for sale or for business or professional use are among the items required to be declared.

6. The actual cost of declared articles must be stated in all declarations or the foreign market value thereof if obtained otherwise than by purchase. If articles have depreciated in value through wear or use, the attention of the appraising officer should be called to such fact at the time of the examination. Articles are appraised at their value in their condition as imported. Passengers dissatisfied with values placed upon dutiable articles may make demand for reappraisement to the officer in charge on the pier, but no such demand can be entertained after the articles have been removed from customs custody.

7. Cigars, cigarettes, tobacco and liquors must be declared. Adult passengers may be allowed free of duty and internal revenue tax 50 cigars or 300 cigarettes or 3 pounds of smoking tobacco, and 1 quart of spirits or wine or other beverage, if not for sale.

8. Merchandise or samples of merchandise, foreign or domestic, accompanying a passenger as baggage, whether the property of himself or another, must be declared as merchandise in this entry. A statement of the number of such packages and of the general character of the contents and the total value thereof will be sufficient.

9. Theatrical scenery, property and apparel and all other articles, foreign or domestic, which may be intended for use on the stage or for exhibition purposes, must be declared. Each package and its contents must be described.

10. All dogs must be declared. Collies, shepherd or sheep, and police dogs are subject to quarantine.

11. Bonded baggage—Baggage may be forwarded in bond. Passengers should specify on the declaration, in the space "Entry," the number of such packages, the general character and total value of the contents and the destination of the packages to be bonded.

12. The following articles are prohibited: Cuttings or parts of sugar cane and plants and seeds, except vegetable and flower seeds, unless a permit has been previously obtained from the Department of Agriculture, Washington, D. C.; smoking opium; fur-seal skins taken in the waters of the North Pacific Ocean, and garments made in whole or in part from such skins; aigrettes; osprey plumes, and the feathers or parts of wild birds. Such articles must be delivered to the customs officers on the pier.

CHIEF NEW YORK STATE LEGISLATION IN 1918

State Purchasing Committee—Chapter 400, amends the State Finance law. Creates a Central Supply Committee consisting of the Comptroller, the Commissioner of Education, the Superintendent of Public Works, the Secretary of the Trustees of Public Buildings, the Chairman of the Hospital Commission, the Fiscal Supervisor of Charities and the Superintendent of Prisons. After July 1, 1919, all materials and supplies, including furniture and furnishings, required for state departments, boards, commissions, offices and institutions which the Committee may determine shall be purchased by joint contract (not required to be purchased from the penal institutions of the State by the Prison law) shall be collectively advertised and contracted for.

Anti-Loafing Law—Chapter 625, requires every able bodied person in the state between the ages of 18 and 50 years to be occupied at least 36 hours a week in some useful job during the war.

Group Life Insurance—Chapter 192, amends the Insurance law. It adds to article 2, new sections 101-a to 101-d. Section 101-a defines group life insurance, as follows: "Group life insurance is hereby declared to be that form of life insurance covering not less than fifty employees with or without medical examination, written under a policy issued to the employer, the premium on which is to be paid by the employer or by the employer and employees jointly, and insuring only all of his employees, or all of any class or classes thereof determined by conditions pertaining to the employment, for amounts of insurance based upon some plan which will preclude individual selection, for the benefit of persons other than the employer; provided, however, that when the premium is to be paid by the employer and employee jointly and the benefits of the policy are offered to all eligible employees, not less than seventy-five per centum of such employees may be so insured."

Accident Insurance Policies—Chapter 182, provides that injured persons, or in case of death, their representatives, may sue under terms of liability insurance policies, notwithstanding bankruptcy or insolvency.

Public Service Law—Chapter 586, amends the Public Service Commissions law. This act is very similar in its terms to Chapter 585, but applies only to New York City, the latter being a general law, applicable to the whole State. Authorizes the Public Service Commission of the First District, with the concurrence of the Board of Estimate and Apportionment, to abrogate existing contracts, and arrange a new basis of payment to contractors for such work. The prices stipulated in existing contracts may be disregarded and future payments made upon the basis of the contractors' costs without allowance for profits.

Savings Banks—Chapter 176, amends the Banking law by permitting savings banks to act as depositary for safe-keeping of Liberty Bonds.

Monthly Tenants—Chapter 303, amends the Real Property law. Provides that in New York City, in the absence of a written agreement, tenancies are from month to month instead of until the following May 1.

Women Messengers—Chapter 434, amends the Labor law. Prohibits the employment of women under 21 as telegraph or messenger company messengers, and prohibits employment of women over 21 for more than six days or fifty-four hours a week, or before 7 A. M. or after 10 P. M.

Food Cold Storage—Chapter 433, amends the Public Health law. Extends the maximum time of storage to twelve months and requires monthly reports to the Commissioner of Foods and Markets (instead of every four months to the State Department of Health).

Lights on Vehicles on Wheels—Chapter 258, amends Highway law. Provides for a light or lights between half-hour after sunset and half-hour before sunrise on all wheeled vehicles, stationary or in motion, on public streets, avenues, highways or bridges in all parts of the State outside of Greater New York.

Heavy Auto Trucks Barred—Chapter 533, amends the Highway law. Forbids the driving or operating on public highways of the State outside of cities of auto trucks or trailers having combined weight, truck and load, of more than 25,000 pounds.

Lights on Motor Vehicles—Chapter 540, amends the Highway law. Provides for two front lamps and one red lamp in rear, to be lighted between half-hour after sunset and half-hour before sunrise; front lights to avoid dazzle or dangerous glare; rays of red lamp to shine on rear number plate so that vehicle number may be clearly seen.

More Pay for State Employees—Chapter 556, provides increases of pay for civilian employees of the State; twenty per cent. increase for those receiving $1,000 per year or less and fifteen per cent. increase for those receiving not more than $2,000.

Election Law Amendment—Chapter 323, provides for double election boards, one to receive the vote during the voting hours, the other to count the vote after the polls close.

City Pay-as-You-Go—Chapter 658, modifies the law by permitting New York City to issue each year, during the period of the war, and for one year thereafter, corporate stock and serial bonds to an amount not exceeding $15,000,000.00, the same to mature within certain periods and to be used for certain purposes.

Workmen's Compensation—Chapter 634, amends the Workmen's Compensation Act. By its terms it adds a new group (45) to the employments heretofore covered by the act. It is really a blanket inclusion of all other employments, so that now every employer in the State employing four or more workmen is required to secure compensation for his injured workmen, unless his employment is not carried on for pecuniary gain, or unless his employees are farm laborers or domestic servants. Chapter 643 also materially changes the requirements as to notice to be given by the injured employee. Knowledge of the accident by the employer or his agent, foreman or boss, is sufficient reason for failure to give notice.

Working Permits—Chapter 628, permits the issuance of permits to work in mercantile establishments during July and August only to children between 14 and 16, if the child has attended a public or parochial school for 130 days during the previous 12 months.

Narcotic Drug Control—Chapter 639, creates a Department of Narcotic Drug Control to be headed by a Commissioner appointed for six years at $16,000, to obtain data and information as to extent of drug addiction and means by which it may be controlled, reduced or eliminated, and make rules, regulations, rulings and decisions. The department has power to inspect hospitals and institutions, and the Commissioner power to administer oaths.

Practice of Medicine—Chapter 630, amends section 173 of the Public Health law by omitting the words "without salary or professional fees" from the paragraph which excepted from the general requirements as to the practice of medicine, "Any one while actually serving (without salary or professional fees) on the resident medical staff of any legally incorporated hospital."

NEW YORK STATE CIVIL SERVICE.

During the year 1917, 17,258 persons were examined and upward of 3,500 appointments were made to competitive places. On January 1, 1918, there were 19,628 positions, not including laborers, subject to the jurisdiction of the commission. These positions were classified as follows: Unclassified service, 1,476; classified service, exempt, 1,478; competitive, 11,102; non-competitive, 6,552. Detailed information can be got by addressing State Civil Service Commission, Albany, N. Y.

A one mill tax is equal to $1.00 tax on each $1,000 of real and personal property, the above rates therefore show for each year the tax on each $1,000 of valuation.

The year 1916 is for nine months owing to the end of the fiscal year having been changed by Chapter 118, Laws 1916, from September 30 to June 30.

STATE INSURANCE (WORKMEN'S COMPENSATION) FUND—Condition on January 1, 1918: Assets—investments, $2,680,155; cash on deposit, $382,518; accrued interest, $34,780; policy holders' accounts, $656,808; total, $3,754,261. Liabilities—reserve for losses, $3,020,862; reserve for deferred claim expenses, $90,626; reserve for unearned premiums, $108,129; reserve for expenses, $135,982; total, $3,355,579. The net premium income was $2,694,851. Losses paid were $1,142,411, of which $209,193 were medical; $506,284, temp. tot. disab.; $1,376, perm. tot. disab.; $15,364, perm. partial disab.; $280,553, dismemberment; $111,814, death, dependency; $17,827, death, funeral expenses.

THE CHURCH PENSION FUND.

(*Of the Protestant Episcopal Church of America, Headquarters 14 Wall Street, New York City.*)
President—Rt. Rev. William Lawrence, D. D., Bishop of Massachusetts. *Treasurer*—J. Pierpont Morgan. *Secretary*—Monell Sayre. *Trustees* (elected by the General Convention)—Rt. Rev. William Lawrence, D. D.; Rt. Rev. David H. Greer, D. D.; Rt. Rev. Theodore M. Morrison, D. D.; Rt. Rev. Robert A. Gibson, D. D.; Rt. Rev. Philip M. Rhinelander, D. D.; Rt. Rev. Rogers Israel, D. D.; Rev. William T. Manning, D. D.; Rev. James H. McIlvaine, D. D.; Rev. Edward L. Parsons, D. D.; Rev. Ernest M. Stires, D. D.; Samuel Mather, J. Pierpont Morgan, William Fellowes Morgan, Charles A. Peabody, William H. Trucsdale, Charlton Yarnell.

AMERICAN SUNDAY SCHOOL UNION.

Officers: *President*—Martin L. Finckel. *Vice-Presidents*—James F. Stone, M. D., W. A. Obydke. *Recording Secretary*—William H. Hirst. *Treasurer*—John E. Stevenson. *Secretary of Missions*—George P. Williams, D. D. *Editor of Publications*—James McConaughy. Headquarters, 1816 Chestnut Street, Philadelphia, Pa.

AMERICAN BOARD OF COMMISSIONERS FOR FOREIGN MISSIONS.

The head office of the American Board of Commissioners for Foreign Missions is at the Congregational House, 14 Beacon Street, Boston, Mass. MAYORS OF THE CITY OF NEW YORK.

BEFORE the Revolution the Mayor was appointed by the Governor of the Province; and from 1784 to 1820 by the Appointing Board of the State of New York, of which the Governor was the chief member. From 1820 to the amendment of the Charter, in 1830, the Mayor was appointed by the Common Council. In 1898 the term of the first Mayor of Greater New York (Van Wyck) began.

INTERNATIONAL ORDER OF GOOD TEMPLARS.

INTERNATIONAL SUPREME LODGE—*Int. Chief Templar*—Edvard Wavrinsky, M. P., Stockholm, Sweden. *Int. P. Chief Templar*—Jos. Malins, Birmingham, England. *Int. Vice-Templar*—Lars O. Jensen, Norway. *Int. Secretary*—Tom Honeyman, 160 Hill Street, Glasgow, Scotland.

NATIONAL GRAND LODGE—*N. C. T.*—Ben D. Wright, Lockport, N. Y. *N. V. T.*—Mrs. Harry E. Wellman, Kendall, N. Y. *N. Sec.*—Willard O. Wylie, Beverly, Mass. *N. Treas.*—W. P. Carlson, Minneapolis, Minn. Next session in 1919 at Manchester, N. H.

The International Order of Good Templars is a world-wide brotherhood of over 600,000 total abstainers, banded together for mutual protection and co-operation in temperance work.

The Order of Good Templars first sprang into existence in 1851 in Oneida County, New York State. One of its most radical features was the recognition of women's rights.

The last report of the International Secretary returned the number of grand lodges as seventy and the membership in both adult and juvenile branches 620,000. Grand lodges exist in nearly all States of the Union, in England, Ireland, Scotland, Wales, Denmark, Germany, Sweden, Norway, Switzerland, Hungary, Roumania, Holland, the various provinces of Canada, the West Indies, East, West and South Africa, Australia, New Zealand, British India, Iceland, and other countries.

The 1917 figures are subject to revision on receipt of the number of military service entrants.

The 1917 births, marriages, and deaths were, by boroughs, respectively, as follows: Manhattan, 61,612, 33,609, 36,947; Bronx, 16,902, 5,026, 8,489; Brooklyn, 50,468, 17,066, 25,338; Queens, 10,050, 2,725, 5,614; Richmond, 2,532, 784, 2,187. Infectious diseases in the whole city numbered the following cases: Diphtheria and croup, 12,624; measles, 27,419; scarlet fever, 6,260; small pox, 14; typhoid, 1,442; tuberculosis, 17,494; total, 62,253.

Deaths, by chief causes, were: Tuberculosis, 8,825; organic heart, 11,102; pneumonia, 7,268; bronchopneumonia, 3,783; kidney troubles, 6,727; cancer, 4,867; children's diarrhoea (under five years), 3,365.

Of the 141,564 babies born in New York City in 1917 there were 37,555 whose parents were natives of the United States; 28,989 babies had Italian parents; 24,099 had Russian or Polish parents; and 10,377 had Austro-Hungarian parents (meaning both parents in every case).

The maternal mortality rate in New York in 1917 (death rate expressed as per 10,000 females fifteen to forty-five years of age), was 4.15, as against 7.44 in 1905.

Of the 1917 deaths, 12,568 were under one year and 18,265 were under five years. The greatest number died, 5,842, when fifty to fifty-four years old; 5,235 died when forty-five to forty-nine years old; 4,370 died between seventy and seventy-four years; and 1,307 died when over eighty-five years.

BIRTH RATE IN NEW YORK AND FOREIGN CITIES.

(By W. H. Guilfoy, M. D., Director Bureau of Records, New York City Department of Health.)

The birth rate is per 1,000 of population.

CITY.	1913.	1917	CITY.	1913.	1917.	CITY.	1913.	1917.
Amsterdam.....	23.22	22.39	Florence.....	19.98	11.45	Paris.....	16.82	11.53
Barcelona.....	23.43	23.24	Glasgow.....	27.78	21.72	Stockholm.....	17.72	16.55
Birmingham.....	27.70	19.68	Lyons.....	15.84	9.48	Zurich.....	19.73	13.16
Bradford.....	20.00	13.06	Manchester.....	26.04	16.85	New York.....	25.99	24.67
Edinburgh.....	20.08	14.75	Milan.....	21.67	12.02			

The figures show marked decreases in birth rate in belligerent European countries, due to the war.

DEATH RATE IN NEW YORK AND FOREIGN CITIES, 1917, COMPARED.

Amsterdam, 12.50; Barcelona, 25.82; Birmingham, 12.53; Bologna, 16.71; Bradford, 13.76; Edinburgh, 14.79; Florence, 22.56; Genoa, 16.52; Glasgow, 15.09; Lyons, 14.81; Manchester, 13.39; Marseilles, 21.75; Milan, 16.77; Paris, 15.52; Stockholm, 11.88; Zurich, 10.44; New York, 13.70.

The tuberculosis death rate per 100,000 population was 150.0 in New York; 306.6 in Florence; 295.8 in Paris; 251.3 in Barcelona; 117.4 in Edinburgh and 194.2 in Stockholm. The infant death rate was 89.0 in New York; 63.0 in Amsterdam; 503.0 in Barcelona; 123.0 in Edinburgh; 188.0 in Florence; 96.0 in Paris; 74.0 in Stockholm; 70.0 in Zurich. The cancer death rate was 127.0 in New York, 128.1 in Amsterdam; 125.8 in Edinburgh; 173.2 in Florence; 119.2 in Paris; 125.5 in Zurich.

NOTE—The valuations for the year 1897 have been ascertained as follows: In Manhattan and The Bronx from tax bills of 1897 and from information furnished by the Department of Taxes and Assessments; in the Boroughs of Brooklyn, Queens, and Richmond from the reports of the various Boards of Supervisors as verified by the expert accountants of the City of New York. The valuations for year 1898 have been ascertained as follows: In Manhattan and The Bronx from the reports of the Department of Taxes and Assessments. In the Boroughs of Brooklyn, Queens, and Richmond as there was no tax levied in 1898, the valuations of the preceding year were repeated. The assessed valuations of real estate were increased in 1903 from a varying percentage thereto are of the full value to presumably the full value thereof

The tax rate varies, by boroughs. In 1918 it was $2.36 per $100 of assessed valuation in Manhattan; $2.08 in The Bronx, $2.40 in Brooklyn, $2.41 in Queens, and $2.46 in Richmond. The State tax rate, as levied by the city in 1918, was 0.9852 mills, and amounted to $8,463,756. The city tax rate in 1917 was: Manhattan, $2.02; Bronx, $2.08; Brooklyn, $2.07; Queens, $2.09; Richmond, $2.12.

REAL ESTATE EXEMPTED FROM TAXATION IN NEW YORK CITY.

OWNED BY THE CITY.

Education, Department of—Headquarters and Administration buildings, $1,214,500; colleges and sites, $9,403,000; schools and sites, $116,703,910; total, $127,321,410.

New York City Public Library system, $30,301,600.

The special revenue bonds in 1918 (column 5), included $4,600,000 tax notes, redeemable from the 1918 tax levy. The interest on the city debt is payable from the tax levy.

BONDED DEBT, CITY OF NEW YORK, JANUARY 1, 1898, AND JUNE 30, 1918.

The Funded Debt as at December 31, 1897, or January 1, 1898, of the various municipalities now distinguished as Boroughs which were consolidated into and formed the Greater City of New York, was as follows:

Borough.	Total Funded Debt, Jan. 1, 1898.	Less Sinking Fund Holdings Thereof.	Resultant Net Funded Debt.	Plus Special Revenue Bonds.	Net Funded Debt as Thus Established.	Total Funded Debt, June 30, 1918. (*a*)
Manhattan and The Bronx	$223,082,666.27	$85,654,317.52	$137,428,348.75	$3,061,645 01	$140,489,993.76	$67,347,971.18
Brooklyn	81,626,175.53	6,734,055.69	74,892,119.84	.....	74,892,119.84	31,655,637.41
Queens	13,709,935.62	330,000.00	13,379,935.62	.....	13,379,935.62	4,502,791.03
Richmond	3,486,736.67	.....	3,486,736.67	.....	3,486,736.67	1,596,300.00
Total	$321,905,514.09	$92,718,373.21	$229,187,140.83	$3,061,645.01	$232,248,785.89	$105,102,699.62

Total funded debt as above	$321,905,514.09	TEMPORARY DEBT. (Not included in above table.)	
Plus special revenue bonds of the former City of New York (payable from its tax levy for 1898)	3,061,645.01	Revenue bonds of the former City of New York	$2,007,600.00
		Revenue bonds or certificates of indebtedness of the former City of Brooklyn	4,060,000.00
Gross funded debt as at Jan. 1, 1898	$324,967,159.10		

(*a*) The above statement of the Funded Debt of The City of New York at consolidation considers and includes all of the funded debt of the former City of New York and of the municipalities in Brooklyn, Queens, and Richmond, which was recorded as at the date of consolidation, and also such additional amounts as were recorded in subsequent years as being funded obligations of said former municipalities to be assumed by The City of New York. In other words, the foregoing table accurately sets forth the funded debt assumed by The City of New York as at consolidation, divided according to the Boroughs which constitute the Greater City, with the exception that the Boroughs of Manhattan and The Bronx, having composed the former City of New York, are treated for the purposes of this table as one political entity.

It may be noted from (*a*) that the funded debt of these former municipalities has been reduced (June 30, 1918), to $105,102,699.62. Of this amount the Sinking Funds hold $24,726,539.93, and $80,376,159.69 is held by the public.

WHAT NEW YORKERS EAT IN A YEAR.

(Estimated by Pure Food Division, Department of Health. Figures represent Pounds.)

MEATS (beef, veal, pork, etc.), 684,315,000; fish, 57,031,250; poultry, 114,062,500; vegetables, 684,315,000; butter, 114,062,500; milk, 1,368,630,000; bread, 456,250,000; coffee, 57,031,250; tea, 28,515,625; fruit (including nuts), 228,125,000; sugar (including candy), 142,578,125; pastry, 114,062,500; salt, 57,031,250; fats, 57,031,250; cheese, 57,031,250; eggs, 142,578,125; canned goods, 171,093,750; total, 4,533,744,375.

CENSUS OF FOOD-HANDLING PLACES IN NEW YORK CITY.

BANKS IN MANHATTAN AND BRONX.

THE New York Clearing House at 77 Cedar Street is composed of banks and trust companies associated for exchanging checks and bills they hold against one another. The Federal Reserve Bank of New York and the Assistant Treasurer of the United States at New York also clear. Other banks, not members of the association, clear through members. The representatives of the members appear at the Clearing House at 10 o'clock every business day, with the checks and drafts to be exchanged. The resulting balances are ascertained in about an hour, and before 1.30 o'clock those indebted pay their balances, and after that hour the other banks receive the amounts due them. The Clearing House has been in operation since 1853.

Elsewhere in this section of the ALMANAC, under the heading "Statement of Banks in the New York Clearing House Association," will be found statistics as to the capital, profits, loans, gold holdings, and deposits of most of the institutions named in this table.

Banks are open from 10 A. M. to 3 P. M., and on Saturdays from 10 A. M. to 12 noon. Commercial paper except sight or demand bills, falling due on Saturday is payable on the following business day.

THE HALL OF FAME.

MARCH 5, 1900, the Council of New York University accepted a gift of $100,000, afterward increased to $250,000, from a donor; whose name was withheld, for the erection and completion on University Heights, New York City, of a building to be called "The Hall of Fame for Great Americans." A structure was built in the form of a terrace with superimposed colonnade connecting the University Hall of Philosophy with the Hall of Languages. On the ground floor is a museum 200 feet long by 40 feet wide, consisting of a corridor and six halls to contain mementoes of the names that are inscribed above. The colonnade over this is 600 feet long with provision for 150 panels, each about 2 feet by 6 feet, each to bear the name of a famous American.

Only persons who shall have been dead ten or more years are eligible to be chosen. Fifteen classes of citizens were recommended for consideration, to wit: Authors and editors, business men, educators, inventors, missionaries and explorers, philanthropists and reformers, preachers and theologians, scientists, engineers and architects, lawyers and judges, musicians, painters and sculptors, physicians and surgeons, rulers and statesmen, soldiers and sailors, distinguished men and women outside the above classes. Fifty names were to be inscribed on the tablets at the beginning, and five additional names every fifth year thereafter, until the year 2000, when the 150 inscriptions will be completed. In case of failure to fill all the panels allotted, the vacancies are to be filled in a following year.

In February, 1904, the plan was announced of a Hall of Fame for Women near the former, with places for 50 tablets. Its foundation has been begun.

The rules prescribed that the council should invite nominations from the public. Every nomination seconded by a member of the University Senate should be submitted to an electorate of one hundred eminent citizens selected by the council. Chancellor Emeritus MacCracken, who is "committeeman" of the hall, presides in the Senate when the Hall of Fame is considered. Address University Heights, New York City.

In October, 1900, the University Senate received the ballots of the electors. Of the one hundred judges selected ninety-seven voted. The number of names which had been submitted to them was 252. Of these each judge returned a vote for fifty. The rule required that no candidate receiving less than fifty-one votes could be accepted. The returns showed that but twenty-nine candidates received the required number and were chosen. These were as follows: George Washington, Abraham Lincoln, Daniel Webster, Benjamin Franklin, Ulysses S. Grant, John Marshall, Thomas Jefferson, Ralph Waldo Emerson, Henry W. Longfellow, Robert Fulton, Washington Irving, Jonathan Edwards, Samuel F. B. Morse, David G. Farragut, Henry Clay, Nathaniel Hawthorne, George Peabody, Robert E. Lee, Peter Cooper, Eli Whitney, John J. Audubon, Horace Mann, Henry Ward Beecher, James Kent, Joseph Story, John Adams, William E. Channing, Gilbert Stuart and Asa Gray.

In October, 1905, under the rules named above, the Senate received the ballots of 95 electors out of 101 appointed, of whom only 85 undertook to consider the names of women. A majority of 51 was demanded, but in the case of the names of women, a majority of only 47. The following eight persons were found to be duly chosen: John Quincy Adams, 59; James Russell Lowell, 58; William Tecumseh Sherman, 58; James Madison, 56; John Greenleaf Whittier, 53; Mary Lyon, 58; Emma Willard, 50, and Maria Mitchell, 48.

The hall was dedicated May 30, 1901, when twenty-five or more National associations each unveiled one of the bronze tablets in the colonnade, and on May 30, 1907, eleven new tablets were unveiled, orations being given by the Governors of New York and Massachusetts.

In October, 1910, the next ballot was taken, the number cast being 97 and the number required for a choice being 51. The following ten persons had the requisite number of votes: Harriet Beecher Stowe, 74; Oliver Wendell Holmes, 69; Edgar Allan Poe, 69; James Fenimore Cooper, 62; Phillips Brooks, 60; William Cullen Bryant, 59; Frances E. Willard, 56; Andrew Jackson, 53; George Bancroft, 53; John Lothrop Motley, 51. There were 211 nominees.

The fourth quinquennial election in 1915 secured the ballots of ninety-seven electors, three electors having died within the year. Nine names were admitted, viz., Alexander Hamilton, 70 votes; Mark Hopkins, 69; Francis Parkman, 68; Agassiz, 64; Elias Howe, 61; Joseph Henry, 56; Rufus Choate, 52; Daniel Boone, 52; with one woman, Charlotte Cushman, 53. Of these Hamilton and Agassiz had been elected in 1905 to the separate hall proposed for famous foreign-born Americans. When the Constitution was amended in 1914, to do away with the line of discrimination between native-born and foreign-born, it was required that the four foreign-born, already chosen, be re-elected in competition with the native-born put in nomination. The two above named were approved, while John Paul Jones and Roger Williams lacked a majority, but remain in nomination for the year 1920. The total names admitted in the four quinquennial elections is 50 men and 6 women.

No changes were made in 1918 in the constitution or rules. Nearly one-tenth of the electors have died, but their places will not be filled until 1919.

Henry M. MacCracken, Committeeman, University Heights, New York City.

BAR ASSOCIATION, CITY OF NEW YORK.

(Bar Association Building, No. 42 West Forty-fourth Street, New York City.)

President—George L. Ingraham. *Vice-Presidents*—J. Parker Kirlin, DeLancey Nicoll, Silas B. Brownell, E. Henry Lacombe, Edward W. Sheldon. *Recording Secretary*—Charles H. Strong. *Corresponding Secretary*—Eliot Tuckerman. *Treasurer*—S. Sidney Smith.

The Organization has 2,168 members. It was instituted in 1869, and its Presidents have been as follows: 1870 to 1879, William M. Evarts; 1880 and 1881, Stephen P. Nash; 1882 and 1883, Francis N. Bangs; 1884 and 1885, James C. Carter; 1886 and 1887, William Allen Butler; 1888 and 1889, Joseph H. Choate; 1890 and 1891, Frederick R. Coudert; 1892 to 1894, Wheeler H. Peckham; 1895 and 1896, Joseph Laroeque; 1897 to 1899, James C. Carter; 1900 and 1901, John E. Parsons; 1902 and 1903, William G. Choate; 1904 and 1905, Elihu Root; 1906 and 1907, John L. Cadwalader; 1908 and 1909, Edmund Wetmore; 1910 and 1911, Francis Lynde Stetson; 1912, Lewis Cass Ledyard; 1913 and 1914, William B. Hornblower; 1914 to 1916, George W. Wickersham; 1917 and 1918, George L. Ingraham. The admission fee is $100 from resident members and $50 from non-resident members; and the annual dues from resident members of more than six years' and less than twenty years' standing, $55, and of more than twenty years' standing, $60, and from members having offices in New York City and residing elsewhere of less than twenty years' standing, $30, and of more than twenty years' standing, $35; from members of less than six years' standing, $25; from non-resident members, neither residing nor having offices in New York City, $35; from resident members temporarily absent from the city, $10.

AMERICAN BAR ASSOCIATION.

EACH State and Territory is represented by one Vice-President and one member of the General Council. Membership about 11,000. This association of lawyers of the United States was organized in 1878. Officers: *President*—George T. Page, Peoria, Ill. *Secretary*—George Whitelock, 1416 Munsey Building, Baltimore, Md. *Treasurer*—Frederick E. Wadhams, 78 Chapel Street, Albany, N. Y. *Assistant Secretaries*—W. Thomas Kemp, Gaylord Lee Clark, 1416 Munsey Building, Baltimore, Md.

TUNNELS IN OPERATION IN AND ABOUT NEW YORK CITY.

(For Subways in and about New York City, see Index).

PENNSYLVANIA RAILROAD SYSTEM—Tunnels under Hudson River extend from Pennsylvania Railroad Station, New York, to Weehawken, N. J. There is no station at Weehawken, the electric trains from the Pennsylvania Station run to Manhattan Transfer, near Newark, N. J., without a stop. Work started April 1, 1904; completed in 1910. Two tubes of cast iron rings, 23 feet outside diameter and 21 feet 2 inches inside diameter; subaqueous portion 6,118 feet long.

Manhattan cross-town tunnels from the Pennsylvania Railroad Station, mentioned above, across New York under 32d and 33d Sts. to First Ave. Started July, 1905, completed in 1910. There are two tunnels, each with two tracks. The tunnels are built of concrete with the crown about 60 feet below the surface of the street.

East River Tunnels connect with the cross-town tunnels and extend under the East River to Long Island City. Started September, 1904; completed in 1910. Four separate tubes with rings 23 feet outside diameter, each tube from the Manhattan shaft to the Long Island City shaft, 3,900 feet long.

HUDSON AND MANHATTAN RAILROAD SYSTEM—North tunnels under the Hudson River from Jersey City to Morton St., New York. Started November, 1874; the first in New York, officially opened February 25, 1908. Two single track tubes, with a minimum inside diameter of 15 feet 3 inches, and approximately 5,700 feet long.

Up-town tunnels connect with north tunnels at Morton St. and extend to Christopher St. thence to Sixth Ave. and up Sixth Ave. to 33d St. Started March, 1904, completed in 1910. Section from Morton to 12th St. shield construction, remainder cut and cover.

South tunnels under Hudson River from Jersey City to the Church St. Terminal Buildings (Cortlandt, Church and Fulton Sts.), New York. Started May, 1905; opened for traffic July, 1909. Two tubes about 5,950 feet long with cast iron rings, 16 feet 7 inches outside diameter and 15 feet 3 inches inside diameter.

Tunnels (consisting of two single track tubes) extend from the Hoboken terminal of the Lackawanna Railroad to Washington St., Jersey City, with connections to the north tunnels and to the Erie Railroad Station. At Washington St. a branch runs to the Pennsylvania Railroad Station at Jersey City, where connections are made with the south tunnels. West from Washington St. to a point east of Summit Ave. is a double track concrete tunnel with a centre wall dividing the tracks. Work started March, 1906; completed in July, 1911.

Tunnels from Whitehall St., Manhattan, to Montague St., Brooklyn, from Old Slip, Manhattan, to Clark St., Brooklyn, from 14th St., Manhattan, to North 7th St., Brooklyn, and from 60th St., Manhattan, under Blackwell's Island to Queens, are under construction, all of which are part of the new subway system in New York. The first two and the last named will, it was stated, be completed and in service in 1919.

BELMONT TUNNEL under the East River from 42d St., New York, to Long Island City. Subaqueous portion two single track tubes with cast-iron rings 16 feet 10 inches outside diameter, and a clear inside diameter of 15 feet 6 inches. Through rock a horseshoe shaped concrete section is used and in other places a rectangular double track cross section with reinforced concrete lining. Construction started by New York and Long Island Railroad, July 12, 1905; practically completed January 1, 1908. (Commonly known as the Steinway Tunnel).

RAPID TRANSIT TUNNEL under the East River from the Battery, New York, to Joralemon St., Brooklyn, connecting the New York and Brooklyn subways. Started April, 1903; trains running January 9, 1908. Two tubes, 6,784 feet long, with a finished inside diameter of 15 feet 6 inches.

WEST SHORE RAILROAD TUNNEL, WEEHAWKEN, NEW JERSEY—Commenced in 1881, and completed twenty-three months later, at a cost of $525,000. It is double-tracked and the original length was 3,983 feet. A steel and concrete portal, constructed in 1907 at the east increased its length to 4,273 feet. One-fourth of the tunnel is bricklined, the remaining portion, unlined. The normal section is 27 feet in width and 19 feet high. 30,500 cubic yards of rock were removed, and five vertical shafts were utilized, giving ten working faces, and average progress of 173 linear feet per month was maintained. The average expenditure per linear foot of lined section was $200, and of unlined section, $110, and equivalent of $7.00 per cubic yard of excavation. The tunnel is a tangent, with the exception of the extended portion of the east end, previously mentioned, at which point the freight and passenger tracks divide. There is a grade of 0.30% towards the east, and 0.34% towards the west, from approximately the centre of the tunnel. It is ventilated by rotary fans, installed in 1911.

BERGEN CUT of Erie Railroad through Bergen Hill, Jersey City, parallel to the present tunnel, which is 4,700 feet long. The Bergen cut was started March, 1906, and completed July 1, 1910. It has five four-track tunnels, with open cuts between the tunnels, making a total length of 4,300 feet. Tunnel sections 58 feet wide at the bottom and 21 feet high.

LACKAWANNA RAILROAD TUNNEL through Bergen Hill, Jersey City. Started February 28, 1906; completed February 14, 1909. Parallel to and 24 feet away from old tunnel and of the same length, viz., 4,283 feet. New tunnel is double tracked, lined with concrete, having inside dimensions 23 feet high by 30 feet wide. Bush track construction used.

BROOKLYN FEDERATION OF JEWISH CHARITIES.

President—Edward Lazansky. *First Vice-President*—Simon F. Rothschild. *Second Vice-President*—Jacob Levy. *Treasurer*—Julius Dahlman. *Honorary Secretary*—Nathan S. Jonas. *Executive Director*—Max Abelman. *President of the Brooklyn Hebrew Orphan Asylum*—Louis L. Firuski. *President of the Jewish Hospital*—Edward C. Blum. *President of the United Jewish Aid Societies*—Adolf Bergida. *President of the Hebrew Educational Society*—Aaron William Levy. *President of the Young Men's Hebrew Association*—Grover M. Moscowitz. *President of the Training School for Nurses*—Hugo Hirsh. *President of the Council of Jewish Women and Council Home for Jewish Girls*—Mrs. A. H. Arons. *President of the Women's Auxiliary of the Brooklyn Hebrew Orphan Asylum*—Mrs. Otto Kempner. *President of the Women's Auxiliary of the Jewish Hospital*—Mrs. Nathaniel H. Levi. *President of the Young Men's and Women's Social Service Auxiliary of the Brooklyn Federation of Jewish Charities*—Algernon I. Nova.

The Brooklyn Federation of Jewish Charities is the central organization for the collection and distribution of the funds for the maintenance, in whole or in part, of the following institutions: Brooklyn Hebrew Orphan Asylum The Jewish Hospital of Brooklyn, United Jewish Aid Societies, Hebrew Educational Society, Training School for Nurses, Young Men's Hebrew Association, Women's Auxiliary Brooklyn Hebrew Orphan Asylum, Women's Auxiliary the Jewish Hospital, Council of Jewish Women (Brooklyn Section), Council Home for Jewish Girls (Amalie Seidner Memorial), Young Men's Hebrew Association of Bath Beach, Young Men's Hebrew Association of Borough Park, Machzike Talmud Torah, Hebrew National Schools, Glory of Israel Institute, Free Talmud Torah Association of Brownsville, New Hebrew School of Brooklyn, and the Young Men's and Women's Social Service Auxiliary. Other affiliated societies to which allotments are made: Montefiore Home for Chronic Invalids of New York City, Jewish Protectory and Aid Society (Brooklyn Cottage), Hawthorne, N. Y.; National Jewish Hospital for Consumptives, Denver, Col.; Jewish Consumptives' Relief Society, Denver, Col.

JURY DUTY IN MANHATTAN.

To be qualified to serve, a person must be not less than 21 nor more than 70 years of age, and he must be a male citizen of the United States, and a resident of the County of New York; and he is a resident within the meaning of the jury law if he dwells or lodges here the greater part of the time between the first day of October and the last day of June. He must be the owner, in his own right, of real or personal property of the value of $250; or the husband of a woman who is the owner, in her own right, of real or personal property of that value. He must also be in the possession of his natural faculties, and not be infirm or decrepit; intelligent, of good character, and able to read and write the English language understandingly.

THE FOLLOWING PERSONS ARE ENTITLED TO EXEMPTION.

A clergyman, minister of any religion officiating as such and not following any other calling. A practising physician, surgeon, surgeon-dentist, or veterinary surgeon not following any other calling, and a licensed pharmaceutist or pharmacist, or a duly licensed embalmer, while actually engaged in his profession as a means of livelihood. An attorney or counsellor-at-law regularly engaged in the practice of law as a means of livelihood. A professor or teacher in a college, academy, or public school, not following any other calling. Editor, editorial writer, or reporter of a daily newspaper or press association regularly employed as such and not following any other vocation. The holder of an office under the United States, or the State, or City or County of New York, whose official duties, at the time, prevent his attendance as a juror. A Consul of a foreign nation. A captain, engineer, or other officer actually employed upon a vessel making regular trips; a licensed pilot, actually following that calling. A superintendent, conductor, or engineer employed by a railroad company other than a street railroad company, or a telegraph operator employed by a press association or telegraph company who is actually doing duty in an office or along the railroad or telegraph line of the company or association by which he is employed. Honorably discharged firemen. Active and honorably discharged militiamen and active members of the Old Guard. A duly licensed engineer of steam boilers actually employed as such. Inspectors, poll clerks, and ballot clerks, or a person who is physically incapable. Grand, Sheriff's, Special, and Municipal Court Jurors.

COUNTY OF THE BRONX.

The law of the County of the Bronx, recently created, is the same as Manhattan, with the exception that there are no special jurors in the Bronx.

WHY NEW YORK AND LONDON BUSSES KILL PEOPLE.

PRESIDENT RITCHIE of the Fifth Avenue Coach Company stated, in an article, that the London 'Bus Company kills thirteen times as many passengers as the New York Company. Accidents cost the Fifth Avenue Coach Company about $150,000 a year, or at the rate of $70 per accident, whereas previously this reckoning showed only $50 per accident. This occasioned study to determine the causes of the increase. Considering all drivers (enginemen) on the same basis, the average cost per driver is $335. It has been determined that 86 per cent. of all accidents were caused by new men. The statistics also showed that the new men cost the company, on an average, $645 a year per man in accidents, the old employés averaging for this only $105, which would indicate that the experienced man is six times as efficient as a new man. The statistics further show that the old men average an accident once in eight months, and the new men one accident in every forty days. As a general average it is estimated that there is an accident for each man every seventy-two days. The number of passengers carried has increased from two to twenty-six million per year. During this period the pay of the men has increased from 30 cents an hour and no extra pay to 42½ cents per hour, some working from 8½ to 10 hours per day.

CUSTOMS DISTRICT OF NEW YORK—ITS FOREIGN COMMERCE.

First—Boundary line between Kings and Queens Counties in Newtown Creek, where same intersects E. River bulkhead line, prolonged, central line of Dutchkills Creek to prolongation of centre line until intersected by a prolongation of Rapalje Ave. (or 4th Ave.); Jackson Ave., old Bowery Bay Road, Astoria Ave. (or Flushing Ave.), Woolsey Ave., Steinway Ave. (or 10th Ave.), Potter Ave., Kouwenhoven (or 9th Ave.), Bowery Bay and E. River, to beginning (including Berrians Island).

Second—Point on line dividing Kings and Queens Counties in Newtown Creek, where same is intersected by central line of Dutchkills Creek, prolonged, Woodbine, Woodward, Palmetto, Grand View Ave., Linden, Forest Ave., Gates Ave., Fresh Pond Road, Hancock (or Hughes, or Woodbine), L. I. R. R., New Woodhaven Ave., Yellowstone Ave. (or New Woodhaven Ave.), intersection of Lawn Ave. (or Mill Creek), point opposite intersection of Junction and Newtown Aves., Justice, Laconia (or Broad), Queens Boulevard, Grand, Calamus Road, Fiske Ave., Woodside Ave., Skillman Ave., Greenpoint Ave., Celtic Ave., Dickinson Ave., Middleburg Ave., Woodside Ave., Jackson Ave., 4th Ave. (or Rapalje Ave), intersection of centre line of Dutchkills Creek to beginning.

Third—Jackson Ave. and Woodside Ave.; Middleburg Ave., Dickenson Ave., Celtic Ave., Greenpoint Ave., Skillman Ave., Woodside Ave., Fiske Ave., Calamus Road, Graud, Queens Boulevard, Laconia (or Broad), Justice (or Newtown Road), intersection of Junction Ave., point on Mill Creek, opposite intersection of Junction and Justice (or Newtown Road), following Mill Creek to intersection of Yellowstone Ave. and Lawn Ave. at Mill Creek, Flushing Creek, Strong's Causeway, Island Mill Road, Lawrence, Bradford Ave., Main, Lincoln Ave., Union Ave., Whitestone Ave., Bayside Ave., Little Bayside Road (or Saxe), Poppenhausen Ave., Bell Ave., northerly 300 feet to Mulford Ave., Littleneck Bay, intersection of Kouwenhoven (or 9th Ave.), Potter Ave., Steinway (or 10th Ave.), Woolsey Ave., Astoria Ave. (or Flushing Ave.), old Bowery Bay Road, Jackson Ave., (or Woodside Ave.), to the point of beginning.

Fourth—Waters of Little Neck Bay, where same is intersected by Mulford, prolonged; Bell Ave., Poppenhausen Ave. (or Little Bayside Road), Saxe (or Little Bayside Road), Bayside Ave., Whitestone Ave., Union Ave., Lincoln Ave., Main, Bradford Ave., Lawrence, Island Mill Road, Flushing Creek and Strong's Causeway, along Flushing Creek to intersection of line between 2d and 4th Wards, Newtown Road, Lefferts Ave., Atlantic Ave., So. Cochran Ave. (or Ward Ave.), Garden, Van Wyck Ave., old Lincoln Ave., Rockaway Boulevard (or Rockaway Road), to line between Brooklyn and Nassau, at Hook Creek, to prolongation of Mulford Ave., and Littleneck Bay to beginning.

Fifth—Intersection of line between Kings and Queens Counties and Atlantic Ave., Ferry, Jamaica Ave., Gherardi (or Woodland Ave.), Syosset (or 3d), Thrall, Syosset (or Russell), Woodhaven Ave., Jamaica Ave., Waterbury, Myrtle Ave., along boundary line between 2d and 4th Wards, Newtown Road, Lefferts Ave., Atlantic Ave., So. Cochran Ave., Garden, Van Wyck, old Lincoln Ave., Rockaway Road (or Rockaway Boulevard), boundary line between Queens and Nassau at Hook Creek, through Far Rockaway to Atlantic Ocean, through Atlantic Ocean and Jamaica Bay to intersection of boundary line between Kings and Queens Counties, to Atlantic Ave.

Sixth—Intersection of line between Kings and Queens Counties; Woodbine, Woodward Ave., Palmetto Ave., Grand View Ave., Linden, Forest Ave., Gates Ave., Fresh Pond Road, Hancock (Hughes or Woodbine), L. I. R. R., Woodhaven Ave., Woodhaven (or Yellowstone Ave.), Mill Creek (or Lawn Ave.), along Mill Creek to Flushing Creek to line between 2d and 4th Wards, Waterbury, Jamaica Ave., Woodhaven Ave., Syosset (or Russell), Thrall, Syosset (or 3d), Gherardi (or Woodland Ave.), Jamaica Ave., Ferry, Atlantic Ave. to line between Kings and Queens, along said line to intersection of Woodbine to the place of beginning.

RICHMOND COUNTY.

First—Upper New York Bay, at foot of Vanderbilt Ave.; Richmond Road, Rockland Ave. (formerly Egbert Ave.), Bradley Ave., (formerly Manor Road), Willow Brook Road, Watchogue Road, to a brook known as Palmers Run, west of Woolley Ave., Forest Ave. (formerly Cherry Lane), along Palmers Run to intersection of Post and Jewett Aves., along Palmers Run and Bodine's Creek, to Kill Van Kull, to upper New York Bay, along shore of upper New York Bay to beginning (to comprise and be identical with territory known as 1st and 2d Wards).

Second—Upper New York Bay at Vanderbilt Ave., along Vanderbilt Ave. to Richmond Road; Rockland Ave. (formerly Egbert Ave.), Bradley Ave. (formerly Manor Road), Willow Brook Road, Watchogue Road, to brook known as Palmers Run, west of Woolley Ave., Forest Ave. (formerly Cherry Lane), along Palmers Run to intersection of Post and Jewett Aves., along Palmers Run and Bodine's Creek to Kill Van Kull, Staten Island Sound (or Arthur Kill), Raritan Bay, along shores of Raritan Bay and lower New York Bay to the Narrows, along the Narrows and shore of upper New York Bay to beginning, and in addition, Shooters Island; so much of Buckwheat Island as is within the State of New York; Pralls Island, Meadow Island, Hoffman Island, Swinburne Island, and Great Kills Pt., to comprise and be identical with territory known as 3d, 4th, and 5th Wards.

The State Constitution provides that every county in the State, except Hamilton, shall always be entitled to at least one Member of Assembly, nor shall any county hereafter be constituted unless its population entitles it to an Assemblyman. Of the populous counties, Albany has 3 Assemblymen; Erie, 9; Kings, 23; New York, 31; The Bronx, 4 and part of one of Manhattan's thirty-one; Queens, 4; and Westchester, 4.

PROVISIONS OF STATE CONSTITUTION.

In 1852, Albany had 4 Assemblymen; Erie, 4; Kings, 3; New York County, 16; Westchester (including what is now the Bronx), 2; and Queens, 1.

SUBWAY SYSTEMS IN NEW YORK CITY.

(Compiled Under the Direction of Frank N. Robinson of the Public Service Commission of the First District.)

THE DUAL SYSTEM OF RAPID TRANSIT.

UNDER the Dual System of rapid transit for New York City all of the rapid transit lines operated by the Interborough Rapid Transit Company and the New York Consolidated Railroad Company (the latter a B. R. T. subsidiary), including the first subway and the elevated lines of the two systems, are combined in two great operating units, covering four of the five boroughs. Each company has lines which operate through the so-called community centre of the city, namely, the section of Manhattan Island below Fifty-ninth Street.

As stated above, New York's original subway, operated by the Interborough Rapid Transit Company and now denoted the First Subway, is an integral part of the Dual System. But under the operating conditions scheduled for the new lines, it loses its identity and is merged for operating purposes with other lines assigned under the dual agreements to the Interborough.

The Dual System was created when the city, through the Public Service Commission, on March 19, 1913, entered into an agreement (the dual contracts) with the Interborough Rapid Transit Company and the New York Municipal Railway Corporation (the latter a B. R. T. subsidiary), providing for the construction and operation of new subway lines, elevated and subway extensions of existing subways and third tracking and extensions of elevated railroads.

The city and the two companies contributed large sums for the construction of subway lines, while cost of equipment, plus the cost of construction of elevated extensions and elevated third tracking and other improvements, was met by the two companies on the respective systems. Despite the substantial contributions by the companies to the expense of subway construction, all subways and elevated extensions of subways are owned by the city, while elevated railroad extensions and third tracking on elevated railroads remain the property of the companies. The dual agreements included leases to the companies of the lines to be operated by them and their subsidiaries.

The contracts called for the construction of forty-four and 55 1-100 miles of new subways; 53 10-100 miles of new elevated railroads and 19 8-10 miles of third tracking and other additional track on the existing elevated railroads. The new lines, which will consist of about 330 miles of single track, made up of 260 miles of subway; 45 miles of elevated and 25 miles of new third track on existing elevated structures, taken in connection with the old lines with their 330 miles of track, constitute a mileage which will exceed not only that of all the other rapid transit systems in the United States, but, according to the best statistics at hand, of the entire world. In addition, it will be the most modern and the best equipped rapid transit system on the globe, and will carry passengers further for a fixed fare than any other transportation line. One ride of about twenty-three miles for a 5c fare will be possible.

GREATEST RAPID TRANSIT ADVANCEMENT.

The year 1918 saw the greatest rapid transit advance—in view of the number of new facilities placed in service and the transportation relief provided—in the history of the city. A number of the new lines included in the Dual System were placed in operation previous to 1918, but the latter year found most of the principal trunk lines in complete or partial service, with only a few lines remaining to be opened in 1919 and 1920. Included in the lines which remain to be finished are those providing new routes between Brooklyn and Queens and Manhattan by tunnels underneath the East River.

These tunnels are difficult engineering feats and require a longer time than does ordinary subway or elevated railroad construction. The past year, in addition, represented an altogether new era in transportation, in that it saw the Brooklyn company operating a line extending far into the heart of Manhattan Island. Previously the Brooklyn company barely skirted the eastern fringe of Manhattan, while the Interborough Company reached for only a short distance into Brooklyn. At the end of the new year both companies will reach far into the territory previously exclusively occupied by the other. What this means in joining and unifying the several boroughs can be readily foreseen.

Less than half a dozen general important contracts for the city owned work yet remain to be awarded, and but very few more for station finish and track installation. The end of the year 1918 witnessed most of the construction contracts awarded and substantially completed.

When the Dual System contracts were signed the first subway had been in operation for nine years. It consisted, first, of a four-track trunk line from City Hall Park through Lafayette Street, Fourth Avenue, Forty-second Street and Broadway, to Ninety-sixth Street, where it forked; one branch extending north on Broadway to Van Cortlandt Park and the other branch to West Farms. The major portion of the above lines were placed in operation in 1904. The work included in the above was known as Contract No. 1, Contract No. 2 was subsequently awarded and provided for an extension of the subway from City Hall to the Battery and underneath the East River by various thoroughfares to a terminus at Atlantic and Flatbush Avenues, Brooklyn.

The Dual System contract with the Interborough Company was known as Contract No. 3, and with the Brooklyn Company as Contract No. 4. Subsequent to the completion of the first subway the city determined to build certain additional lines, including the so-called triborough route in Manhattan and the Bronx; the Centre Street Loop in Manhattan and the Fourth Avenue Subway in Brooklyn. All of these lines later were included in the Dual System.

Of the Dual System lines, there were opened previous to 1918, exclusive of the first, or old subway, the Queensboro subway, the new third tracks on the Second, Third, and Ninth Avenue elevated railroads in Manhattan, operated by the Interborough Company; the Fourth Avenue subway in Brooklyn, its Eighty-sixth Street extension; its Sea Beach branch to Coney Island; its New Utrecht Avenue branch; the Liberty Avenue extension of the Fulton Street elevated lines; the Lutheran Cemetery line and large portions of the third tracking on the Brooklyn elevated lines, operated by the New York Consolidated Railroad Company; the Astoria branch of the Queensboro subway; the White Plains Road extension of the first subway; the Corona branch of the Queensboro subway; a portion of the reconstructed Brighton Beach line in Brooklyn; a portion of the Jamaica Avenue extension of the Broadway elevated railroad, Queens; the Jerome Avenue branch of the Lexington Avenue subway; a portion of the Seventh Avenue subway; the West Farms subway connection; the Queensboro Bridge elevated line, and the Broadway subway, Manhattan.

During 1917, 82 track miles of new lines were placed in operation, making a total of approximately 170 track miles of new lines in service at the beginning of 1918. At the time of going to press it was estimated that about 75 per cent. of the new track mileage of the Dual System would be in operation by the end of 1918.

NEW LINES OPENED IN 1918.

Material addition was made to the facilities then in service by the beginning of operation of several new lines in 1918, including extension of operation of the Broadway subway, on January 5, for local service between Times Square and Union Square. This line had been opened to the point last named in September, 1917. Operation of the Jerome Avenue line, begun in 1917, was extended to the northern terminus, Woodlawn, from Kingsbridge Road, on April 15, 1918. Early in January, 1918, operation of the Ninth Avenue elevated railroad was extended across the Harlem River to Sedgwick Avenue by shuttle service, later with through-train service. Still later the elevated train operation was carried to and over the Jerome Avenue line to Kingsbridge Road. On July 1, the new Seventh Avenue subway was placed in partial operation from Pennsylvania Station to South Ferry, while on the same day the third track on the Ninth Avenue

elevated line, from 125th Street to 155th Street, was put in service. On July 17, the new Lexington Avenue subway was placed in use for the first time, from Grand Central Station north to 167th Street in the Bronx, although the tracks from 149th to 167th Street had been in use for the temporary Jerome Avenue service, begun in June, 1917.

Most important among the transit developments of 1918 was the opening of the new East Side and West Side subways in Manhattan, for through service. The opening for temporary operation of the Seventh Avenue and Lexington Avenue lines, which form portions respectively of the West Side and East Side lines, has been referred to in the preceding paragraph. The beginning of this through service marked the termination of service as it has been given for a period of fourteen years on the old, or first subway, operated by the Interborough Company.

Under the Dual System contracts provision was made for dividing the first subway into two principal parts: One, the portion in Broadway north of 42d Street, with its branches; the other, the portion in Fourth Avenue and other thoroughfares south of 42d Street, on the East Side. The portion first referred to was joined to the new Seventh Avenue subway, thus constituting the West Side subway, while the second portion referred to was coupled up with the Lexington Avenue line and its branches in the Bronx, constituting the East Side subway. Such recomposition of the old subway line left the four tracks under 42d Street, formerly utilized for the through service, in the position of being a cross-bar between the East Side and West Side lines, which, taken together, resembled roughly the letter "H" in appearance. This term was applied to them by the late Mayor, William J. Gaynor.

The tracks composing the cross-bar to the "H" were assigned as follows: Two tracks for a shuttle service between the East Side and West Side lines, and two tracks for a continuation of the Queensboro subway west from Grand Central Station to Times Square.

The operation of the through East and West Side lines was begun on August 1, 1918, with appropriate ceremonies held at the Hotel Astor, and preceded by the running of a special train carrying the various City, Company, and Public Service Commission officials and guests who participated. An effort was made to put the complete "H" project in operation at that time, but owing to the extreme congestion at Grand Central Station and at Times Square, due to the unfamiliarity of the travelling public with the layout of the lines, the shuttle service was temporarily suspended for a few weeks after a brief tryout, and operation confined to the north and south lines.

Thus it is now possible for a subway traveller to board a train downtown on the Seventh Avenue line and go direct to Washington Heights or the Bronx by a less circuitous route than formerly. On the other hand, the East Side route is a more direct one to points in East Harlem and the Bronx, while larger parts of the sections traversed by the Lexington Avenue subway, and by the Seventh Avenue subway as well, have now achieved subway service for the first time.

The Seventh Avenue subway divides near Chambers Street into two two-track branches, one going south to the Battery, while the other extends through Park Place, Beekman and William Streets to Wall Street, the terminus of service when the line was first opened, but to be extended by the Clark Street tunnel (now under construction), to Brooklyn early in 1919. The Seventh Avenue line continues north from Chambers Street and Varick Street, through Varick Street extension and Seventh Avenue, joining the old subway at Times Square.

The Lexington Avenue subway joins the old subway near 42d Street and Park Avenue, turns diagonally into Lexington Avenue, and continues north to and under the Harlem River, dividing into two branches in the vicinity of 138th Street. One of these branches, still partially under construction late in 1918, extends east as a subway, and then as an elevated line to Pelham Bay Park, while the other continues north as a subway and then as an elevated line, under Mott, River, and Jerome Avenues to Woodlawn. In addition, a connection has been made between the last named branch of the West Farms branch of the old line (now a part of the West Side line), so that it is possible to operate trains from the West Farms branch over both the West Side line and over the East Side line. The stations on the West Side line are as follows:

Battery branch (Seventh Avenue subway): South Ferry, Rector Street, Cortlandt Street, Chambers Street.

Brooklyn branch (Seventh Avenue subway): Wall Street, Fulton Street, Park Place, Chambers Street.

Seventh Avenue subway (north of Chambers Street): Franklin Street, Canal Street, Houston Street, Christopher Street, Sheridan Square, 14th Street, 18th Street, 23d Street, 28th Street, Pennsylvania Station, Times Square.

Old Subway (main line): 50th Street, 59th Street, 66th Street, 72d Street, 79th Street, 86th Street, 91st Street, 96th Street.

Old Subway (Broadway branch): 103d Street, 110th Street, Columbia University—116th Street, Manhattan Street—128th Street, City College—137th Street, 145th Street, 157th Street, 168th Street, 181st Street, 191st Street, Dyckman Street, 207th Street, 215th Street, 225th Street, 231st Street, 238th Street, 241st Street.

Old Subway (Lenox Avenue-West Farms branch): 110th Street, 116th Street, 125th Street, 135th Street, 145th Street, Mott Avenue, Third Avenue, Jackson Avenue, Prospect Avenue, Intervale Avenue, Simpson Street, Freeman Street, 174th Street, 177th Street, Bronx Park.

Old Subway (White Plains Road extension): East 180th Street, Morris Park, Bronx Park East, Pelham Parkway, Allerton Avenue, Burke Avenue, Gun Hill Road, East 219th Street, East 225th Street, East 233d Street, Nereid Avenue—238th Street, 241st Street. (Last named station to be opened in 1919.)

NOTE—The Brooklyn connection of the West Side line has been completed, and stations at Clark Street and Borough Hall have been placed in service.

The stations on the East Side line are as follows:

Old Subway (Brooklyn branch): Atlantic Avenue, Nevins Street, Hoyt Street, Borough Hall.

Old Subway (main line): South Ferry, Bowling Green, Wall Street, Fulton Street, City Hall, Brooklyn Bridge, Worth Street, Canal Street, Spring Street, Bleecker Street, 8th Street, 14th Street, 18th Street, 23d Street, 28th Street, 33d Street.

Lexington Avenue Subway: Grand Central Station, 51st Street, 59th Street, 68th Street—Hunter College, 77th Street, 86th Street, 96th Street, 103d Street, 110th Street, 116th Street, 125th Street.

Lexington Avenue Subway (Jerome Avenue branch): Mott Haven, 149th Street, 161st Street, 167th Street, 170th Street, Belmont Street, 176th Street, New York University, 183d Street, Fordham Road, Kingsbridge Road, Bedford Park Boulevard, Woodlawn.

Lexington Avenue Subway (Pelham Bay Park branch): Third Avenue, Brook Avenue, Cypress Avenue, East 143d Street, East 149th Street, Longwood Avenue, Hunt's Point Avenue, Whitlock Avenue, Elder Avenue, Clasons Point Road, St. Lawrence Avenue, East 177th Street, Castle Hill Avenue, Zerega Avenue, Westchester Square, Middletown Road, Buhre Avenue, and Pelham Bay Park.

Very serious delays in the work of construction of the new lines occurred during the latter part of 1917 and a portion of 1918, owing to the fact that the demands caused by war conditions had been such as to delay the work, and in some respects to bring it almost to a halt. The effect was to delay the completion of certain lines, the operation of which was expected in 1918, and to put further back the opening date for other lines, the completion of which was looked for in 1919. Considerable work, however, has been so far advanced that its operation during 1919 is looked for.

Among the lines which it is expected will be in service before December, 1919, are:

(For operation by the Interborough): The Webster Avenue extension, Third Avenue elevated line; subway portion, Pelham Bay Park line, from Third Avenue to Hunt's Point Road; Eastern Parkway line, Brooklyn, with its Nostrand Avenue branch.

(For operation by the New York Consolidated Railroad Company—B. R. T.): Culver line, from Ninth Avenue to Avenue X; Coney Island terminal Broadway subway, from 42d Street to 59th Street and from Whitehall Street to Brooklyn; 59th Street

SUBWAY SYSTEMS IN NEW YORK CITY—*Continued.*

subway, from Seventh Avenue, Manhattan, to a connection with the Queens lines.

The new lines assigned for operation to the Interborough Rapid Transit Company, under the Dual System contracts, are: The Seventh Avenue subway, the Lexington Avenue subway, the White Plains Road extension, Jerome Avenue and Pelham Bay Park branches of the Lexington Avenue line, the 149th Street connection, the Clark Street tunnel line to Brooklyn, the Flatbush Avenue-Eastern Parkway line, Brooklyn; the Nostrand Avenue branch, Brooklyn; Livonia Avenue branch, Brooklyn; Queensboro subway, the Corona branch and the Astoria branch, together with third-tracking and reconstruction on the Second, Third, and Seventh Avenue elevated lines, with extensions of the Third Avenue and Ninth Avenue lines in the Bronx.

The lines similarly assigned to the B. R. T. for operation include: The Centre Street Loop subway, the Fourth Avenue subway, the Sea Beach, West End, and Culver branches; trackage rights over the Corona and Astoria branches; the Broadway subway in Manhattan; the 59th Street subway in Manhattan; Canal Street subway in Manhattan; the Montague Street Tunnel line; the 14th Street-Eastern line, and the Broad Street subway; together with third-tracking on the Broadway, Myrtle Avenue, and Fulton Street lines; construction of the Jamaica Avenue line and of the Liberty Avenue line, with reconstruction of the Coney Island Terminal and East New York Yards, and reconstruction of the Brighton Beach line, and connection of the same with the Fourth Avenue subway. The connection of the Fulton Street elevated line with the Fourth Avenue subway is also a part of the plan, when approved by the Board of Estimate.

TWELVE NEW RIVER TUBES.

More subaqueous tunnel work is under construction for dual system lines than has ever been attempted before. This work represents an expenditure of some $30,000,000, and includes four new tunnels of two tubes each and one tunnel of four tubes. The last named connects the Lexington Avenue line in Manhattan with its Bronx branch. The other tunnels mentioned are the Sixtieth Street tunnel connecting the Fifty-ninth Street subway with the Queens line; the tunnel for the Fourteenth Street-Eastern line; the new Interborough tunnel between Manhattan and Brooklyn and the tunnel connection between the Broadway subway in Manhattan and the Fourth Avenue subway in Brooklyn.

When the South Brooklyn rapid transit lines, operated by the Brooklyn company, are entirely reconstructed, a 5c fare will be given to Coney Island, thus standardizing the fare charged over all portions of the B. R. T. lines. Transfers will be freely given between the elevated and subway portions of this line, so that it will be possible for a passenger to reach any particular station on any one of the lines from any other particular station for one fare. Many new transfer points between elevated and subway lines will be added under the Brooklyn company's operation.

While practically no new transfer points will be added between elevated and subway lines on the Interborough system, the length of ride for a 5c fare on both Interborough elevated and subway lines will be vastly extended. Under Interborough operation it will be possible as a maximum ride for a passenger to go from the Two Hundred and Forty-first Street station on the White Plains Road line, near the Mount Vernon line, to New Lots Avenue on the Livonia Avenue extension, near the shore of Jamaica Bay.

As stated above, the city is to furnish most of the money for the building of the new subway lines and subway extensions, with contributions from each company toward the cost of construction, and with the total cost of equipment met by the companies. This equipment is to become the property of the City of New York when placed in operation and the cost is to be amortized out of earnings.

The total cost of the dual system, including equipment, real estate, power house construction and changes, interest during construction, etc., will be in the neighborhood of $400,000,000, and in excess of the cost of any other engineering operation, according to engineering authorities. Of the above sum about $60,000,000 will be contributed by the Brooklyn company; about $146,000,000 by the Interborough Rapid Transit Company, and the remainder, approximately $194,000,000, by the City of New York.

RAILROAD PASSENGER STATIONS IN MANHATTAN.

Baltimore & Ohio, foot W. 23d and Liberty Streets.

Central of New Jersey, foot of W. 23d and Liberty Streets; Sandy Hook Route (in Summer), foot of W. 42d and Cedar Streets, also.

Delaware, Lackawanna & Western, foot of Barclay, Christopher and W. 23d Streets.

Erie, foot of Chambers and West 23d Streets.

Hudson Terminal, Cortlandt, Dey, Church and Fulton Streets. Hudson and Manhattan R. R., Newark and Jersey City to Morton St., N. Y., to Christopher St., to 6th Ave., along 6th Ave. to 33d St.

Lehigh Valley, foot of West 23d and Liberty Streets.

Long Island, 7th Ave. and 33d St., foot East 34th St. Atlantic Avenue Branch; junction of Flatbush and Atlantic Avenues, Brooklyn.

New Jersey & New York, foot of Chambers and West 23d Streets.

New York & Long Branch, foot Liberty, Cortlandt, Desbrosses, West 23d Streets and 7th Ave. and 32d Street. In Summer, foot West 42d and Cedar Streets, also.

New York Central & Hudson River, 42d St. and 4th Ave.; Harlem, 125th St.; Harlem Division, 4th Ave. and 42d St., 125th; Putnam Division, 155th Street and Eighth Ave.

New York, New Haven & Hartford, 4th Avenue and 42d Street.

New York, Ontario & Western, foot of Cortlandt, and West 42d Streets.

New York, Susquehanna & Western, foot of Chambers and W. 23d Streets.

Northern of New Jersey, foot of Chambers and West 23d Streets.

Pennsylvania, foot of Cortlandt and Desbrosses Streets, 7th Avenue, 31st to 33d Street and Hudson Terminal.

Philadelphia & Reading, foot of W. 23d and Liberty Streets.

Staten Island, foot of Whitehall Street.

West Shore, foot Cortlandt and West 42d Streets.

Owing to the war the United States Railroad Administration, late in 1918, ordered the Baltimore and Ohio trains and the Lehigh Valley express trains to use the New York City Pennsylvania Terminal. Lehigh Valley local trains were directed to use the old Pennsylvania Terminal, foot of Montgomery St., Jersey City.

Many of the ticket offices of the various roads were consolidated, and union ticket offices were established as follows: Manhattan, 64 Broadway; 67 Chambers St., 31 W. 32d St., 114 W. 42d St. Brooklyn, 336 Fulton St.

CAUSES OF DEAFNESS.

(From the 1917 Report of the New York Institution for the Instruction of the Deaf and Dumb.)

THE causes of deafness, recorded from the statement of parents and friends, at the time of the admission of the pupil, were as follows:

Accidents, 2; catarrh, 1; cerebro-spinal meningitis, 99; cramps, 1; consumption of the stomach, 1; concussion of brain, 1; eczema, 1; pneumonia, 6; rickets, 5; smallpox, 1; vaccination, 2; otitis-media, 2; typhoid fever, 1; typhus fever, 1; unnamed fevers, 1; brain fever, 35; scarlet fever, 22; earache, 1; congenital, 198; hysteria, 1; marasmus, 1; running ears, 23; removal of adenoids, 1; heart trouble, 1; indigestion, 1; inflammation of the ear, 1; worms, 1; lockjaw, 1; convulsions, 9; fright, 2; membrane croup, 1; abscess of the ear, 3; whooping cough, 2; falls, 21; unknown, 29; measles, 3.

Ages at which loss of hearing occurred are—Congenital, 198; before 1 year, 34; between 1 and 2 years, 49; 2 years, 36; 3 years, 29; 4 years, 23; 5 years, 13; 6 years, 8; 7 years, 5; 8 years, 6; 10 years, 3; 12 years, 3; 13 years, 1; 14 years, 3; unknown, 72.

ASYLUMS AND HOMES IN MANHATTAN AND BRONX.

American Female Guardian Society and Home for the Friendless, 936 Woodycrest Ave.
Anthony Home, 119 E. 29th St.
Association for the Relief of Respectable, Aged and Indigent Females, Amsterdam Ave. and 104th St.
Baptist Home for the Aged, 116 E. 68th St.
Bellevue Settlement Home, 206 E. 30th St.
Bide-a-Wee Home (for Animals), 410 E. 38th St.
Big Sisters' Home, 378 E. Tremont Ave.
Casa Maria Home for Working Girls, 251 W. 14th St.
Catholic Home Bureau for Dependent Children, 105 E. 22d St.
Catholic Institute for Blind Sisters of St. Dominic, 119 W. 70th St.
Catholic Institute for the Blind, 222d St. and East Chester Road.
Catholic Protectory, Westchester, N. Y. City office and reception house, 415 Broome St.
Children's Cottage, 1960 Anthony Ave.
Christian Home for Girls (see Maedchenheim).
Christian Waiters' Home, 427 E. 51st St.
Christian Workers' Home, 7 Gramercy Park West.
Christodora House, 145 Ave. B.
Chrystie Street House, 77 Horatio St.
Church of God Missionary Home, 2132-2146 Grand Ave.
Church Mission of Help, 37 E. 28th St.
City Home for the Aged and Infirm, Blackwell's Island.
Clara de Hirsch Home for Immigrant Girls (see Hannah Lavanburg Home).
Clara de Hirsch Home for Working Girls, 225 E. 63d St.
Colored Orphan Asylum, Palisade Ave. and W. 259th St.
Colored Working Girls, Home for, 132 W. 131st St.
Co-operative Home for Small-Salaried Girls, 444 W. 23d St.
Darrach Home for Crippled Children, 118 W. 104th St.
Dominican Convent of Our Lady of the Rosary, 329 E. 63d St.
Dominican Sisters' Home for Working Girls, 207 E. 71st St.
Door of Hope (Tappan, N. Y.), office, 122 W. 14th St.
East Side Home for Destitute Childr., 326 E. 121st St.
Edgewater Creche (Englewood, N. J.), office, 105 E. 22d St.

Turkey—Represented by Spanish Consul.
Uruguay—Mario L. Gil, C. G., 17 Battery Place.
Venezuela—Pedro R. Rincones, C. G.; N. Veloz, V. C., 80 Wall St.

THE THREE BIG FAMILIES OF MOSQUITOES.

THE Swamp and Woods Mosquitoes: These mosquitoes make their appearance earlier in the Spring than do the other varieties. The first eggs to hatch are those that were laid late in the preceding Fall. These are generally laid on low ground or in swamps where they will most likely be covered by water early in the Spring. These mosquitoes begin emerging in April. The woodland species largely disappear by the middle of July, but the swamp species continue throughout the season. The former rarely leave the woodlands where they are bred, but the latter migrate as far as five miles. The number of the swamp species is lessened during the hot, dry weather by the drying up of the swamps and pools. They fly about shortly before sunset, but do not, as a rule, enter houses in large numbers. These mosquitoes are a very great source of annoyance during the early hours of the evening out of doors and in porches of houses.

The Salt Marsh Mosquitoes: Although there are many kinds of salt marsh mosquitoes, two are very abundant in this vicinity. One of them is the brown salt marsh mosquito, a large brown insect having narrow white bands on its feet. The other one is known as the white-banded salt marsh mosquito, and may be recognized by the white band across its beak, white bands on the feet, and a light yellowish streak along the back. Both kinds fly for long distances and will attack at all hours of the day and night.

The House Mosquitoes: These are the most troublesome of all. They bite not only in the early evening but also throughout the entire night. They constitute probably 90 per cent. of the indoor pest. They are strongly attracted by light and enter houses at every opportunity. The house mosquito breeds in any pool or receptacle containing standing water. It travels but short distances, and when abundant can generally be traced to a breeding place on the premises or quite near by. Common danger spots are rain pools, gutters, tin cans, rain barrels, tubs, cesspools and obstructed drains.

Mosquitoes breed only in water, and generally require from one to three weeks in hot weather to develop from eggs to winged insects; in cool weather the period is longer. Females may begin to lay eggs three days after full development, but as a rule they do not start until they are at least a week old. Males die in a few days; females may live a month or longer, or until they have a chance to lay eggs, and those that hibernate (winter sleep) in the adult stage may live from September of one year to June of the next. Mosquitoes may bite every second or third day, but when the cold weather comes the mosquitoes become sluggish or dormant and rarely feed before the following Spring. Only the female mosquito bites, *i. e.*, sucks blood.

MONUMENTS AND STATUES IN MANHATTAN.

(Temporary changes in location of some statues have been made owing to subway construction.)

ARTHUR, CHESTER A., Madison Square.
BARTHOLDI STATUE, see "Liberty."
BEAR AND FAUN FOUNTAIN (Seligman), Morningside Park and 116th St.
BEETHOVEN, bronze bust, on a granite pedestal, 15 feet high, Central Park, on the Mall; unveiled 1884.
BROWNSON, ORESTES A., bronze bust of, Riverside Park and 104th St.
BRYANT, WILLIAM CULLEN, Bryant Park, W. 42d St. and 6th Ave.
BURNS, bronze statue, Central Park, on the Mall; unveiled 1880.
BUTTERFIELD, GENERAL DANIEL, bronze figure, on marble pedestal.
CARRERE, JOHN M., memorial to, Riverside Drive and 99th St.
CERVANTES, bust of Cervantes, author of "Don Quixote," in Central Park.
COLUMBUS, marble statue, south entrance to Mall, Central Park; unveiled 1892.
COMMERCE, bronze figure, Central Park, near the 8th Ave. and 59th St. entrance; unveiled 1865.
CONKLING, bronze statue, Madison Square Park, cor. Madison Ave. and 23d St.
COOPER, PETER, statue opposite Cooper Union.
COX, bronze statue of the statesman S. S. Cox, erected by the letter-carriers, Astor Place.
DE PEYSTER, ABRAHAM, statue in Bowling Green.
DODGE, bronze statue of William E. Dodge, at Broadway, 6th Ave. and 36th St.; unveiled 1885.
ERICSSON, statue of the inventor, on the Battery.
FALCONER, THE, Central Park, near W. 72d St. entrance.
FARRAGUT, bronze statue, Madison Square Park, near 5th Ave. and 26th St.
FIREMEN'S MEMORIAL MONUMENT, 100th St. and Riverside Drive.
FORT WASHINGTON MONUMENT, Fort Washington Ave. and 183d St.
FOUNTAIN, 116th St. and Riverside Drive.
FRANKLIN, bronze statue, Printing House Square; unveiled 1872.
GARIBALDI, bronze statue, Washington Square; unveiled 1888.
GRANT, ULYSSES S., tomb, Riverside Drive and 123d St.; 160 feet high; dedicated April 27, 1897.
GREELEY, bronze statue, City Hall Park, unveiled 1890.
GREELEY, Greeley Square, 33d St. and Broadway.
HALE, bronze statue of Nathan Hale, martyr spy of the Revolution; City Hall Park, near Broadway and Mall St. Temporarily in City Hall Plaza.
HALLECK, bronze statue, Central Park, on the Mall; unveiled 1877.
HAMILTON, granite statue of Alexander Hamilton, Central Park, on the East Drive.
HANCOCK, in Hancock Square, St. Nicholas Ave. and W. 124th St.
HEINE, poet, Lorelei Fountain, Mott Ave. and 161st St.
HOLLEY, bronze bust of Alexander Holley, Washington Square; unveiled 1890.
HUDSON, HENRY, 100 foot shaft, Spuyten Duyvil.
HUMBOLDT, bronze bust, Central Park, near the 5th Ave. and 59th St. entrance.
HUNT, RICHARD M., Memorial, 5th Ave., opposite Lenox Library.
INDIAN HUNTER, bronze figure, Central Park, near lower entrance to the Mall.
IRVING, bronze bust, Bryant Park, on W. 40th St.; unveiled 1866.
JACK PHILIPS TITANIC MEMORIAL, U. S. Barge Office.
JEFFERSON STATUE, City Hall.
JEFFERSON, THOMAS, in front of the Pulitzer School of Journalism, Columbia University.
JOAN OF ARC, Riverside Drive and 93d St.
LAFAYETTE, bronze statue, Union Square, lower end of Park; unveiled 1876.
LIBERTY ENLIGHTENING THE WORLD, on Bedloe's Island, in the Harbor.
LINCOLN, bronze statue, Union Square, southwest corner; unveiled 1868.
LOWELL DRINKING FOUNTAIN, Bryant Park.
MAINE, U. S. S., MEMORIAL, National, Columbus Circle.
MARTYRS' MONUMENT, Trinity Churchyard, in memory of the American soldiers and sailors who died in the British prison ships in the Revolutionary War.
MAZZINI, bronze bust, Central Park, on the West Drive.
MOORE, bronze bust of Thomas Moore, the poet, Central Park, near the Pond and 5th Ave. entrance; unveiled 1880.
MORSE, bronze statue of the inventor of the telegraph, Central Park, near 5th Ave. and 72d St.
OBELISK, Central Park, near the Metropolitan Museum of Art; brought from Egypt, and erected 1881; granite, 70 feet long, and weighs 200 tons.
PULITZER FOUNTAIN, 5th Ave. and 59th St.
SCHILLER, bronze bust, Central Park, in the Ramble; unveiled 1859.
SCHURZ, CARL, statue, 116th St. and Morningside Drive.
SCOTT, bronze statue of Sir Walter Scott, Central Park, on the Mall; unveiled 1872.
SEVENTH REGIMENT, bronze figure of a soldier of this regiment, to commemorate its dead in the Civil War, Central Park, on the West Drive.
SEWARD, bronze statue, southwest corner of Madison Square Park; unveiled 1876.
SHAKESPEARE, bronze statue, Central Park, at the lower end of the Mall; unveiled 1872.
SHERMAN, GENERAL, equestrian statue, 5th Ave. and 59th St.
SIGEL, FRANZ, bronze monument, 106th St. and Riverside Drive, unveiled in October, 1907.
SIMS, bronze statue of Dr. Marion Sims, Bryant Park, north side.
SOLDIERS AND SAILORS' MONUMENT, Riverside Drive.
STRAUS MEMORIAL, Broadway and 106th St.
STUYVESANT, marble effigy of Gov. Peter Stuyvesant, in the outer wall of St. Mark's Church.
THE PILGRIM, bronze statue, Central Park, near E. 72d St. entrance.
THORWALDSEN, bronze statue, 59th St., facing 6th Ave.
VERDI, statue, Sherman Square.
VERRAZANO, statue, Battery Park.
WASHINGTON AND LAFAYETTE, bronze statue, W. 114th St., Morningside and Manhattan Aves.
WASHINGTON, bronze bust, City Hall.
WASHINGTON, bronze equestrian statue, Union Square, southeast side.
WASHINGTON, bronze statue, at the entrance to the Sub-Treasury Building, Wall St.; unveiled 1883.
WASHINGTON MARBLE ARCH, Washington Square, at the foot of 5th Ave. There are now two statues of Washington on the Arch—one representing Washington as President and the other as Commander-in-Chief of the Army.
WATER GATE, foot W. 110th St., where Henry Hudson landed.
WEBB, ALEXANDER S., bronze statue of, near main building, College of the City of New York.
WEBSTER, bronze statue, Central Park, on the West Drive, near 72d St.
WORTH, granite shaft in honor of Major-General Worth, U. S. A., at Broadway and 25th St.

LAFAYETTE STATUE UNVEILED BY MARSHAL JOFFRE.

In Brooklyn the unveiling of a bronze panel of Lafayette on May 10, 1917, was a historical occasion. Marshal Joffre, hero of the Marne, unveiled the statue, which was accepted for the city by Mayor Mitchel. Former Premier Viviani, who headed the French Commission to the United States, spoke briefly, as did Marquis de Chambruu, great-grandson of Lafayette. Others of note present were Vice-Admiral Chocheprat, George T. Wilson, Frederic R. Coudert, Frank L. Polk, Ambassador Jusserand, R. A. C. Smith, and H. A. Watkins. The work cost $35,000, the gift of the Henry Marteau estate. The sculptor was Daniel Chester French. The monument consists of a panel of bronze about 12 feet long and 10 feet high, against which is a figure of Lafayette in the uniform of a General in the Continental Army, with a negro holding his horse's head. The panel rests against a structure of granite of Italian Renaissance design.

LIBRARIES IN THE CITY OF NEW YORK.

Academy of Medicine, 17 W. 43d St.
Aeronautic, 280 Madison Avenue.
Aguilar.—See N. Y. Public Library.
American Bankers Association, 5 Nassau St.

METROPOLITAN MUSEUM OF ART, NEW YORK.

(Prepared for the Almanac by the Institution.)

THE Metropolitan Museum of Art, Fifth Ave. at 80th to 84th St.; reached by Fifth Ave. stages, 4th and Madison Ave. car line, and 3rd Ave. "L" trains, stopping at 84th St. Open 10 A. M. to 5 P. M. in Winter, 6 P. M. in Summer, Saturdays till 10 P. M., Sundays, 1 to 6 P. M. Free every day except Monday and Friday; admission 25 cents on Monday and Friday. *President*—Robert W. de Forest. *First Vice-President*, Elihu Root. *Second Vice-President*,—Henry Walters. *Secretary*—Henry W. Kent. *Director*—Edward Robinson.

The museum was incorporated April 13, 1870, "for the purpose of establishing and maintaining . . . a museum and library of art, of encouraging and developing the study of the fine arts, and the application of arts to manufacture and practical life, of advancing the general knowledge of kindred subjects, and, to that end, of furnishing popular instruction." After forty-eight years of growth, it has to-day, through bequests, gifts, and purchases, collections of incalculable value, embracing both fine and decorative arts. They comprise objects in almost every material—marble, stone, wood, pottery, porcelain, glass, metals, lace, textiles, &c.—and embody man's attempts throughout the ages to achieve his ideals of beauty. In date they range from 3,000 B. C. to the nineteenth century and represent the ancient world—Assyria, Babylonia, Cyprus, Egypt, Greece, and Rome—the Orient, including China, Japan, Corea, India, Persia, and Asia Minor; Europe from the Early Christian and Byzantine Art through the Romanesque, Gothic, Renaissance, and later periods; and our own country.

These collections are housed in a building erected by the city, in Central Park, affording 275,000 square feet of exhibition floor space. The cost of maintenance is over $400,000 a year, of which $230,000 is paid by the city. Among the unique individual objects or collections are the mastaba tomb erected about 4,500 years ago in the Egyptian cemetery at Sakkara for a Theban dignitary named Perneb and re-erected here in its original form, with its painted scenes in low relief still preserved; six large alabaster reliefs from the palace in Nimroud of Ashur-nasir-pal, who reigned over Assyria from 885 to 860 B. C.; an Etruscan bronze chariot of the sixth century B. C., the only complete ancient bronze chariot known; the Cesnola antiquities from Cyprus; a group of Roman fresco paintings from Boscoreale, especially those on the walls of a reconstructed cubiculum (bedchamber), and a gathering of ancient glass, "one of the richest and most important in the world." In the accumulations of Near Eastern Art of special interest are the domed room from a Jain temple in India, recently installed, the gift of Robert W. and Lockwood de Forest, which represents the wood carving of India and is supplemented by an extensive collection of Indian and Thibetan jewelry; the Indian miniatures in the Alexander Smith Cochran Collection, and some remarkable examples of early Indian stone carving; the Persian manuscripts and miniatures in the Cochran Collection; twenty-four manuscripts and a number of single sheets, represent such masters of decoration as Bihzad and Mirad, and some of the greatest names in Persian calligraphy from the fifteenth to the eighteenth century. The Far Eastern objects include the well-known Benjamin Altman gathering of Chinese porcelains and the Heber R. Bishop assemblage of jades.

OVER 1,200 PAINTINGS IN THE MUSEUM.

The paintings, over twelve hundred in number, represent the Italian, Spanish, German, Dutch, Flemish, French, English and American schools. There is an unusual showing of the works by Rembrandt, eighteen in all, thirteen received in the bequest of the late Benjamin Altman. Through the gift of J. Pierpont Morgan the Museum possesses a Raphael, the so-called Colonna Altarpiece, a Virgin and Child Enthroned with Saints. Groups of paintings kept together by the conditions under which they were received are: the George A. Hearn Collection, principally American in character; the Benjamin Altman Collection, strongest in its Dutch paintings, but including four Memlings, a Dürer, a Giorgione, a Fra Angelico, two Velazquezs, and other works of rare excellence; the Catharine Lorillard Wolfe Collection, consisting largely of works by French artists of the early and middle years of the nineteenth century; and the William H. Vanderbilt Collection, lent by George W. Vanderbilt, modern works, the French paintings being particularly important, and perhaps the best-known single picture being Millet's Sower.

Others of special note are the William H. Riggs Collection of arms and armor, which in its scope and quality ranks with European national collections, and, with the Ellis and Dino Collections, gives an opportunity to study the development of armor from the fifteenth to the eighteenth century; the Crosby Brown gathering of 3,600 specimens, including representative instruments of all nations, among them the earliest of the two existing pianos by Bertolommeo di Francesco Cristofori, the inventor of the pianoforte; and the William H. Huntington assemblage of portraits of Washington, Franklin, and Lafayette in all materials.

The Pierpont Morgan Collection, the gift of J. Pierpont Morgan, fills an entire wing and is a priceless gathering of the decorative arts of Europe from the Gallo-Roman and Merovingian periods to the end of the eighteenth century. The rarest and most precious section of the collection represents the supreme work of the goldsmiths, Byzantine and Mediaeval enamelers, and ivory carvers. The most comprehensive gathering included in the Pierpont Morgan wing is that brought together by Georges Hoentschel of Paris, the collector, and consisting of two parts: sculpture, furniture, textiles, ivories, woodwork, and architectural fragments of the Gothic period, chiefly of French, Flemish, Dutch, German, Spanish, and Italian origin, and French decorative arts of the seventeenth and eighteenth centuries—furniture and woodwork, many examples from historic buildings, decorative paintings, and ormolu fittings. Among the treasures of the Pierpont Morgan Collection are also five Gothic tapestries, known as the Sacrament Set because they picture in weaving the sacraments of the church; two sculptured groups, an Entombment and a Pietà, from the famous Château de Biron in southwestern France; superb examples of the goldsmith's craft from the fifteenth to the eighteenth century; a unique collection of snuff boxes, vanity boxes, scent bottles, and dance programmes, signed by famous jewelers of the eighteenth century; and a large collection of watches representative of the work of the best craftsmen in Europe from the sixteenth to the nineteenth century.

COLLECTIONS SERVICEABLE TO THE PUBLIC.

To make the museum collections serviceable to the public, to manufacturers and designers, to artists and art students, and to the pupils in the public and private schools of New York City and vicinity is the constant effort of the members of the museum staff, working on behalf of the trustees. Toward this end series of free public lectures are given on Saturday and Sunday afternoons, story-hours for the children of members and for all children are conducted weekly, special seminars are planned for salespeople and designers, as well as gallery talks for teachers and pupils and lectures for the deaf and the blind. Three class rooms are fitted up for the carrying on of class and lecture work, and an auditorium seating about 500 is provided for larger groups. Three members of the staff devote their time exclusively to the work of museum instruction, whose services may be obtained for a small fee by any visitor who desires to see the collections under expert guidance and will make an appointment in advance.

A reference library and a collection of photographs are open to the public, and a large collection of lantern slides is available on easy terms for lectures given anywhere east of the Mississippi. Opportunity to copy the objects in the collections themselves is granted with reasonable restrictions. A study room of textiles has been fitted up with every facility for the use of the large collection of laces and textiles, and other study rooms in different parts of the building are intended for the convenience of those who wish to study the various collections at length.

AMERICAN MUSEUM OF NATURAL HISTORY.

THE American Museum of Natural History, organized in 1869, was housed at first in the old Arsenal Building in Central Park. The corner-stone of the first section erected in Manhattan Square was laid by Gen. U. S. Grant, President of the United States, June 2, 1874, and the building was formally opened to the public by President Rutherford B. Hayes, December 22, 1877. Since then five sections have been added, the total cost to date being $5,319,821.48. By contract with the city the building, cases, and cost of maintenance are met by the city. The collections and their preparation, scientific work, including explorations and publications, are provided from the Endowment Funds and contributions from the trustees. The annual cost of upkeep alone now reaches $304,373, or $91,673 more than the sum provided by the city, which was $212,700 in 1917, while the total expenditure for the other purposes named was $391,558 in 1917. Thus the total amount derived from the Endowment Fund and provided by subscriptions from the trustees was $483,231.

Twenty-nine halls, having an aggregate floor space of 271,886 square feet, are devoted to exhibits, distributed as follows: Anthropology, living and past races of men, 13 halls; natural history, mammals, birds, reptiles, fishes and invertebrates, forestry and public health, 9 halls; geology, mineralogy and palæontology, the structure and past life of the earth, 8 halls. The value of the collections is more than $5,000,000. Special effort is made to have the exhibits of popular interest and educational value, and large sums are expended to carry out these aims, some of the more important groups having cost as much as $10,000, none of it furnished by the city. Educational work is also carried on by means of circulating collections and lectures delivered at the schools, and through the publications of the Museum. During the past five years the attendance, not including lectures, has ranged from 657,458 to 704,139 a year; in addition, the number of school children attending special lectures has ranged from 56,889 to 61,437 a year, the greatest number reached by the Museum being 1,378,599. The Museum is open free every day in the year, including holidays; week days from 9 A. M. to 5 P. M., Sundays from 1 P. M. to 5 P. M.

NEW YORK BOTANICAL GARDEN.

(By the Director, N. C. Britton.)

THE New York Botanical Garden occupies a reservation of nearly 400 acres of Bronx Park north of Pelham Parkway. The tract includes the beautiful natural features of the valley of the Bronx River, its gorge, its waterfall and its rapids, and over 100 acres of natural woodland, including the famous Hemlock Forest, the most southern grove of hemlock spruce near the Atlantic Coast. The institution was chartered by the Legislature of New York, 1891, and the first reservation of 250 acres was set aside by the city in 1895, and about 140 acres were added by the city in 1915. The grounds and buildings are open to the public every day in the year without charge. Grouped and labelled plantations include:

Herbaceous Gardens—To illustrate systematic, morphologic and economic botany, including 3,000 kinds of hardy plants from all parts of the north temperate zone, in a narrow valley 1,800 feet long. Each plot is labelled, showing its general contents, and each individual plant or clump of plants is also labelled.

Flower Gardens—To exhibit 1,500 kinds of herbaceous flowering plants, including peonies, dahlias, irises, gladioli, cannas, rose mallows, and chrysanthemums. In a valley east of the Bronx River and north of Pelham Avenue is a rose garden containing 400 kinds, shown by 5,000 plants.

Fruticetum, or collection of shrubs, on a plain northeast of the museum building, with over 1,000 kinds, grouped in their natural families.

Arboretum, or collection of deciduous-leaved trees, grouped in their natural families, includes over 400 kinds of hardy trees, at the east side of the reservation, over a length of about three-quarters of a mile and of varying width, including Japanese cherries, magnolias, and willows.

Pinetum, or collection of evergreen coniferous trees, in the southwestern portion of the grounds, occupying thirty acres, and includes 275 kinds, including pines, spruces, firs, hemlocks, cedars, and yews.

Museum Building, situated a short distance from the Botanical Garden Station of the New York Central & Hudson River Railroad, has a frontage of 312 feet, is Italian Renaissance; front approach is ornamented by a bronze fountain by Carl E. Telft and by terra-cotta and marble fountains and seats. The vista lines are formed by four parallel lines of tulip trees. Three floors are devoted to public exhibits.

Museum of Economic Botany occupies the entire main floor and comprises crude and refined products of plants used in the arts, the sciences, and the industries, as well as illustrative photographs and drawings. The exhibits include foods, drugs, fibres, gums, resins, sugars, rubber, spices, flavoring agents, dyestuffs, tanning material, plant-constituents, fixed oils, volatile oils, cork, starches, and other products.

Museum of Systematic Botany occupies the entire second floor, and illustrates by specimens, drawings and photographs, types of all the natural families of plants, commencing with those of the simplest structure and ending with the most complex.

Museum of Fossil Botany, installed in the basement, illustrates the ancestors of living plants since the first appearance of plant life on the earth. The specimens are installed in geological sequence. These three museums comprise over 20,000 labelled specimens.

There is a large public lecture hall in the basement of the museum building, in which free public lectures are given every Saturday afternoon from spring until autumn. The upper floor of the building contains the library of 29,000 volumes on botany, horticulture and related sciences, including several special collections; the herbarium, containing prepared and dried specimens of plants from all parts of the world, occupies the greater portion of several rooms on the upper floor and comprises some 1,500,000 specimens. There are also laboratories equipped for research on the upper floor, to which properly qualified students of botany are admitted and instructed by one or another member of the garden staff.

Conservatory Range No. 1—Near the terminal station of the Third Avenue elevated railway is a glasshouse 512 feet in length, with a central dome 90 feet high and wings extending from the main range so as to form a court open to the southwest; the area under glass here is nearly 1 acre, and the house contains 15 compartments. Here are exhibited palms of about 175 species, from all parts of the tropics and subtropics, large collections of agaves or century plants, aroids, bromeliads, orchids, bananas and their relatives, aloes, cacti, stonecrops, and other plants of tropical, sub-tropical and warm temperate regions.

Conservatory Range No. 2—The eastern side of the grounds, near the Allerton Avenue entrance, is composed of four greenhouses, divided into eight compartments, and the exhibits have comprised tropical ferns, orchids, and miscellaneous tropical plants. It is being enlarged through gifts of $50,000 by Messrs. Daniel and Murry Guggenheim, two additional greenhouses being devoted, one to an orchid house, the other to a central display greenhouse, including a lecture room.

The Mansion—A large stone house built by the Lorillard family in 1856, stands above the Bronx River near the waterfall. It is utilized for the Garden School, for shops and laboratories, and the collections of the Bronx Society of Arts and Sciences are installed in several rooms; there is also a lecture room and a reception room. The Horticultural Society of New York has also been given office facilities in this building.

The approximate cost of the plant, including buildings, roads, paths, grading, drainage and water supply, and including work in progress, has been about $1,725,000, of which amount about $1,425,000 has been expended by the city on grounds and buildings as a part of the Park System, and $300,000 has been contributed from private funds of the corporation, mainly obtained by gifts. The total value of the collections, all obtained from private sources, either from gifts, purchases or exchanges with other institutions, is about $500,000. Permanent funds held as endowment, obtained by gifts and bequests, aggregate $558,315. To this sum may be added bequests subject to life interests aggregating $30,000, and a recent bequest of Emil Wolff, value as yet unknown. Expenditures for maintenance at the present time are $150,000 annually, of which $120,000 comes from the city and $30,000 from funds of the corporation.

NEW YORK HISTORICAL SOCIETY GALLERY AND MUSEUM.

(By Robert H. Kelby, Librarian.)

THE New York Historical Society, founded in 1804, is open free to the public daily, Sundays excepted, 9 A. M. to 5 P. M., and on holidays, 1 to 5 P. M. (excepting Christmas, New Year's and July 4. Closed for the month of August for cleaning and repairs). The Society has occupied since 1908 the building on Central Park West between 76th and 77th Streets, completed and furnished by the Society at a cost of $1,000,000, including the land. The home before that was on Second Avenue. It is supported by endowment funds and membership fees without aid from city or State. The Society maintains a library, museum and gallery of art. The library contains 130,000 volumes and 150,000 pamphlets, newspapers, prints, maps and a large collection of manuscripts, all relating to American history. The newspaper collection numbers 5,386 volumes, of which 3,381 were printed in this city and State. The earliest file being the "Boston News-Letter," beginning in 1704. The first newspaper printed in New York City was "The New York Gazette," established in 1725 by William Bradford, the first printer in the Colony of New York. The Society's file of this paper begins with 1730. The largest collection of New York City and State newspapers may be found here. The old New York prints cover the period from the earliest "View of the City," published in 1651, to modern times, and is unrivaled in its completeness by either private or public collections elsewhere. Among which may be mentioned The Burgis View of the City, 1717, of which only one other copy is known; the Maverick View of Wall Street, about 1825, and the Tiebout Engraving of the City Hall on Wall Street. The maps include the James Lyne survey of the city in 1731, published by William Bradford—the first engraved map of the city published—one of two known copies; the Dyckinck plan of 1755, the Ratzer map of 1767, and the commissioners map of 1811, besides a large collection of atlases and maps of all periods. The more important manuscripts are the Cadwallader Colden papers, De Peyster family papers, James Duane papers, Albert Gallatin papers, General Horatio Gates papers, diary of Philip Hone, Rufus King papers, Lloyd family papers, Rutherford papers, and Lord Sterling papers.

MANY RELICS OF THIS CITY AND STATE.

The Museum contains many relics of New York and American history, besides an Egyptian collection of 3,000 objects, the first brought to America. Three mummied bulls from the tombs are features, while every form of Egyptian art during the Old and Middle Kingdoms and the Empire, 2900-1167 B. C., is represented. The collection is especially rich in papyri. The Society also possesses the Nineveh Sculptures, presented in 1858 by the late James Lenox. Of local relics the Beekman family coach, used before the Revolutionary War, in this city, may be mentioned, as well as the remains of the famous Equestrian Statue of King George II, and the statue of William Pitt (the Earl of Chatham), champion of the American cause in Parliament. The former was destroyed by the Americans, and the latter by the British, at the time of the Revolution.

The Gallery of Art now numbers over 1,000 paintings, including old masters. Over 300 of the paintings are American portraits: George Washington by Stuart, Peale and Durand, John Adams, John Quincy Adams, Bayard family portraits, Aaron Burr, Henry Clay, George and De Witt Clinton, John S. Copley by himself, De Peyster family portraits, Hamilton Fish, Benjamin Franklin, Albert Gallatin, Fitz-Greene Halleck, Alexander Hamilton, Andrew Jackson, John Jay, Thomas Jefferson, Lafayette, James Madison, Oliver H Perry, Edgar Allan Poe, Red Jacket, Schuyler family portraits, Stuyvesant family portraits, Zachary Taylor, Daniel Webster, and N. P. Willis. The Society also possesses the original water color drawings made by John James Audubon for his "Birds of America,"—460 beautifully executed pictures. Special exhibitions of the Society's collections are held from time to time to which the public is invited. Since the occupation of the present building in 1908 the Society's treasures in art and literature have been exhibited and freely placed at the disposal of the public for its enjoyment, use and study.

MUSEUMS OF THE BROOKLYN INSTITUTE OF ARTS AND SCIENCES.

THE Central Museum on Eastern Parkway at Washington Ave., the Children's Museum in Bedford Park, the Department of Education with activities in the Academy of Music building, and the Brooklyn Botanic Garden are under the general management of the Trustees of the Brooklyn Institute of Arts and Sciences. They receive appropriations from the city for maintenance, and their collections are provided for entirely from private sources. The construction work is done through the Department of Parks and the bills are audited through this department. Work on the new wing of the Central Museum was begun in 1918. Additions to the collections of sculpture include a group in wood carving, "The Game of Chess," by Axel Petersson, presented by William A. Putnam, and another group by the same artist acquired by purchase; also a marble, "The Dancing Faun," by Olin C. Warner, acquired by purchase, and a Roman replica of a Greek head of Aphrodite, loaned by A. Augustus Healy. Purchases of eight pieces of Colonial and early American furniture were made, besides the interior panelling of two rooms of the Bidwell House at Hartford, Conn., and the panelling, doors, windows and staircase of the Sewall House at Secretary, Dorchester County, Md. A collection of Egyptian gold jewelry and other works of Egyptian art was presented by Miss Theodora Wilbour as an addition to the memorial Wilbour collection. Mrs. St. Clair McKelway presented the signet ring formerly worn by St. Clair McKelway containing an Egyptian scarab of the eighteenth dynasty (Thotmes III.). Among the paintings are a portrait of the musical composer Haydn, by Langhi; John Watts, by Gilbert Stuart. The S. P. Avery collection includes porcelain, jade, teakwood, and cloisonné; the Wilbour assemblage includes works of Egyptian art. The Museum publishes a quarterly journal. William Henry Fox is the Director.

DESERT GROUPS A FEATURE OF THE COLLECTIONS.

The desert group, one of the largest of museum habitat exhibits, has been opened to the public. It gives a representation of desert flora, and epitomizes the life conditions, the physiography, the characteristic vegetal and animal forms of the arid regions in southwestern United States. The sooty albatross exhibit, the second of the Museum's habitat groups of antarctic animals, has recently been completed. Noteworthy among the smaller additions to the exhibits are a series of wax models of Long Island frogs, toads, and salamanders; several mounted specimens of Long Island freshwater fishes presented by Conservation Commissioner George D. Pratt; a giant lobster, hundreds of exquisitely prepared marine invertebrates, including coelenterates, holothurians, ascidians, &c., collected during the Pacific Coast Expedition of 1916. The work of the Department of Ethnology in the Museum has been devoted chiefly to the installation of the East Indian collections of 1914. The architectural material secured at that time has been in part employed as a setting for a painted Indian curtain dating from the early part of the seventeenth century. On the landing, the porch of a Jain rest house from Ahmadabad has been reconstructed. Attention has also been given to the Japanese and Chinese collections; valuable gifts of Japanese armor and East Indian weapons have been made by Mr. Herman Stutzer, while numerous important additions to the East Indian, Thibetan and Chinese collections have been acquired by purchase. There are frequent loan exhibitions, and special lectures to school children. The attendance at the Children's Museum is over 180,000 a year.

The Central Museum is open 9 A. M. to 6 P. M.; Sundays, 2 to 6 P. M.; Thursday evenings, 7.30 to 9.45; free except Mondays and Tuesdays, when the charge is 25 cents (10 cents for children under 16 years) free to school children every day. The Children's Museum is free at all times, and is open every week day: 9 A. M. to 5.30 P. M.; Sundays, 2 to 5.30 P. M.

THE WATER SUPPLY OF NEW YORK CITY.

(For the Almanac; by W. W. Brush, Acting Chief Engineer.)

Prior to the general introduction of Catskill water in 1917 the different boroughs had no water supply system in common. The water supply for the numerous communities, consolidated in 1898 to form the present city, was developed without considering the present city limits and can, therefore, be more clearly described by boroughs.

Manhattan and Bronx—The Boroughs of Manhattan and Bronx, prior to the introduction of Catskill water, were supplied entirely from the Croton watershed and from the Bronx and Byram watershed, the latter being now part of the Catskill system. The Croton watershed furnishes about half of the present supply for Manhattan and Bronx, the other half being supplied from the Esopus watershed. The Esopus watershed in the Catskills, from which the Catskill supply is obtained, has an area of 257 square miles. The water from the Esopus watershed is collected in the Ashokan Reservoir, about fourteen miles west of the Hudson at Kingston, N. Y., and about ninety-two miles from the northern city boundary. The available supply from the Esopus watershed is increased by the rainfall and run off on some twenty-two square miles of watershed (the Bronx and Byram watershed) tributary to Kensico Reservoir, which lies east of the Hudson River, and about seventeen miles from the northern city boundary. Under average rainfall and run-off conditions the available supply from the Esopus watershed is 375,000,000 gallons daily, and from the Bronx and Byram watershed about 20,000,000 gallons daily, making the total available supply of water from the Catskill system, 395,000,000 gallons daily; the safe minimum yield from these two sheds is 265,000,000 gallons daily.

The Croton watershed, which lies some 22 miles north of the city line, has an area of 375 square miles and a safe minimum yield of 336,000,000 gallons daily. Under average rainfall and run-off conditions the yield of this shed is 400,000,000 gallons daily. The water from the Croton watershed is collected in twelve reservoirs and six lakes and ponds.

Brooklyn—The Esopus watershed furnishes the entire supply for the Borough of Brooklyn, with the exception of the Twenty-ninth Ward, which is supplied by the Flatbush Water Works Company, a private water company, the source of supply being ground water collected from driven wells. The supply from the old Brooklyn system, which yielded about 150,000,000 gallons, and which is now held in reserve, was obtained from driven wells, infiltration galleries, and small streams located along the south shore of Long Island, extending from Brooklyn Borough easterly to the Suffolk County line.

Queens—The city supplies only the First and Third Wards in the Borough of Queens. The Esopus watershed furnishes the entire present supply to these wards. The First Ward was formerly supplied from the Brooklyn system, supplemented by a small amount derived from the municipal driven well pumping stations in the First and Third Wards. The Third Ward was supplied by two pumping stations, now held in reserve, one station drawing its supply from driven wells and the other obtaining about half its supply from wells and one-half from a small lake, the water being filtered. The combined yield of the two plants is about 6,000,000 gallons daily. The Second, Fourth, and Fifth Wards, Queens, are supplied by private water companies, the source of supply being entirely ground waters, collected by means of driven wells. There are four of these private companies, with two others serving special customers.

Richmond—The Borough of Richmond is supplied from the Esopus watershed, supplemented by a small amount (about 4,000,000 gallons daily), derived from wells pumped at two stations. Silver Lake Reservoir, the terminal reservoir for the Catskill system, is located in this borough. Richmond was formerly dependent for its supply on ground water drawn from wells, the city owning and operating six small plants having a total available capacity of about 14,000,000 gallons daily.

DAILY CONSUMPTION. AVERAGE FOR 1917.

Borough.	Supplied By City.	Supplied By Priv. Co's.	Borough.	Supplied By City.	Supplied By Priv. Co's.
Manhattan and Bronx....	373,800,000	None.	Richmond	12,400,000	100,000
Brooklyn.....	140,300,000	14,400,000			
Queens.....	18,300,000	25,100,000	Total.....	545,000,000	39,600,000

The South Shore (Staten Island) Water Works were acquired by the city, August 31, 1917.

OTHER DATA ON THE WATER SUPPLY.

(Supplied from Official Sources.)

New York City's Catskill Mountain water supply system is the greatest of waterworks, modern or ancient. The portion of the great project which has been completed constitutes three-quarters of the whole and embraces the Ashokan reservoir, an artificial lake twelve miles long for storing the waters of Esopus Creek, the Catskill Aqueduct extending ninety-two miles from this reservoir to the city's northern boundary and thirty-five miles within the city limits, including the branch of the Borough of Queens, Kensico storage reservoir near White Plains, Hill View equalizing reservoir at the city line and Silver Lake terminal reservoir on Staten Island. Construction was begun in 1907. Night and day the water now flows unceasingly from the mountains to Staten Island, 120 miles. To the city's permanent water resources an addition has been made which can be depended upon for at least 250 million gallons daily. Development of the second Catskill watershed, that of Schoharie Creek, just being inaugurated, will in a few years round out the system and make the total quantity of new water from the mountains not less than 500 million gallons each day. New York City uses 615 million gallons daily.

The new Catskill Mountain water supply is a gravity system. For New York City's Catskill Mountain water system there are two contiguous drainage areas, or watersheds, occupying the central portion of the Catskill Mountains lying between eighty-five and 125 miles from New York. The Schoharie watershed has an area of 314 square miles. Esopus has an area of 257 square miles. These two watersheds have a total area of 571 square miles, from which more than 500 million gallons of water daily can surely be drawn throughout each year. Along the aqueduct provisions have been made for storing a large quantity of water. From the Ashokan reservoir it is almost a three-days' journey for the water to flow through the aqueduct to the Silver Lake terminal reservoir on Staten Island.

THE GRAVITY SYSTEM.

One of the great advantages of the new supply of water from the Catskill Mountains is that the reservoirs in the mountains are at such elevations that the water can flow by gravity to the city and be delivered within its limits into the street mains at such pressures that it will rise to the heights necessary for service in practically all parts of the city and in buildings of all reasonable heights, without pumping. The pumping rendered unnecessary by this high gravity pressure of the Catskill water has cost the city and property owners large sums of money. This cost cannot be exactly stated, but it has been estimated for recent years at $2,000,000 per annum.

For surveys, real estate, construction, engineering and general supervision, and all other items except interest on the bonds, the total cost of the completed Catskill system will be about $177,000,000, of which $22,000,000 are for the Schoharie works.

The magnitude of New York's new water works and of the problem of supplying the metropolis with

water will be more comprehensible from a few comparisons. Each year New York adds people enough to make an Atlanta, a Hartford, a Memphis, or a New Haven; or every three years a Buffalo, a Cincinnati, or a San Francisco; or in four years, a Baltimore, or a Pittsburgh, or enough to populate the State of Rhode Island. Ashokan reservoir can hold nearly as much water as all the ten reservoirs of the Croton system and Kensico reservoir combined. All the Catskill reservoirs together hold nearly twice as much as the ten Croton reservoirs. Their contents would fill the North River from the Battery to Hastings.

The cut-and-cover aqueduct and the tunnels are more than big enough for railroad trains to pass through them with ease. Catskill Aqueduct is twice as long as the two Croton Aqueducts put end to end. The water which the Catskill Aqueduct can carry would be waist deep between the buildings in Fifth Avenue's fashionable shopping district, if flowing at a comfortable walking speed. The water used by New York City each day weighs about eight times as much as its population. The two deepest shafts of the city tunnel of the Catskill Aqueduct, one at the corner of Clinton and South Streets, and the other at the corner of Delancey and Eldridge Streets, Manhattan, are each as deep as the tower of the Woolworth Building is high. If the Eiffel Tower could be stood with its foundations in the Hudson River tunnel, its top would not appear above the river surface, or if two Woolworth Buildings were stood one on top of the other, the lower one having its foundation in the Hudson River tunnel, the top of the upper one would just reach the level at which the water flows away through the mountain on the east bank of the Hudson after rising in the shafts from the tunnel beneath the river.

The Catskill Aqueduct has interlinked the earlier systems of water supply and the distribution systems of all the five boroughs as they have never been before. For this reason, the Catskill system supplements the systems which preceded it and enhances their value to the city.

ASHOKAN RESERVOIR.

Ashokan reservoir, about fourteen miles west of the Hudson at Kingston, was built at a cost of nearly $20,000,000. The water which the reservoir holds would cover all Manhattan Island to a depth of thirty feet; the area of its surface is equivalent to that of Manhattan below One Hundred and Tenth Street. The water surface of the west basin when full is at an elevation of 590 feet above mean tide in New York Harbor. The level of the east basin, when full, is three feet lower than that of the west basin and from it flood waters overflow through the spillway and a brook channel into Esopus Creek about two miles below Olive Bridge dam. Water can also be drawn from one basin into the other through a gate-chamber in the dividing weir which contains four sluice gates, each five feet by fifteen feet. Olive Bridge dam is a massive structure consisting of a central masonry portion 1,000 feet long extended by earth dikes, or embankments, known as the North and South wings. The masonry part, founded on solid ledge rock, is built of cyclopean concrete, with pre-cast concrete face blocks. The wings of the Olive Bridge dam and the dikes are built of selected earth spread in layers four or six inches thick and compacted by heavy rollers. Each dike has a concrete core-wall extending to ledge rock or into very compact impervious earth foundation, often called hardpan. The bottoms and slopes of the reservoir basins were cleared of trees, brush, buildings and other objectionable things. Around the reservoir new highways, aggregating about forty miles in length, requiring the construction of ten new bridges, all of reinforced concrete, have been substituted for the submerged roads. One of these bridges, at Traver Hollow, is a three-hinged arch of 200-foot span, and Ashokan bridge, crossing the reservoir on the dividing weir, is 1,120 feet long and has fifteen arches of 67.5-foot span. In order to keep population at a reasonable distance from the shores of the reservoir and thus protect the waters from immediate pollution, sufficient area of land was taken to afford a marginal strip at least 1,000 feet wide all around the shore.

For constructing Ashokan reservoir, the contractors assembled approximately thirty miles of railroad, thirty-three locomotives, 579 cars, sixty derricks, seven cableways, sixteen steam rollers, nineteen steam shovels, a steel trestle bridge 390 feet long and eighty-five feet high, air compressors, stone crushers, concrete mixers, etc., costing much more than a million dollars.

KENSICO RESERVOIR.

Kensico reservoir, east of the Hudson, and thirty miles from the City Hall, contains enough Catskill water to supply New York several months if carefully husbanded. It acts as a storage reservoir. This reservoir is formed by the Kensico dam across the valley of the Bronx River, about three miles north of White Plains and fifteen miles north of the Hill View reservoir. For the new Kensico reservoir, 3,200 acres of land were acquired; which, in addition to the 1,300 acres acquired for the old reservoir and Rye ponds, make a total of 4,500 acres, providing a marginal protective strip around the entire flow line in but few places less than 500 feet wide. In order to secure a good quality of water in the substitute reservoirs, about 186 acres of swamp were cleared and covered with a layer of earth averaging a foot in depth, and the water before being drawn into the pipe line was passed through a temporary aerator just below Rye dike. Kensico dam is a gravity masonry structure of cyclopean concrete. The upstream face is of pre-cast concrete blocks. All this stonework is of coarse texture, in harmony with the massiveness and strength of the dam. All stone for the dam was obtained from a quarry nearby developed especially for the purpose. A public highway traverses the top of the dam. The length of the level part of the visible base of the dam, and of the terrace, is 1,025 feet. The vertical height of the exposed face, from the terrace to the top of the parapet, is 133 feet, but the maximum height from lowest foundation to top of parapet is 310 feet. Surveys for this reservoir were begun in May, 1906, and the contract for the dam, reservoir and substitute supply works was awarded in December, 1909. The amount of the contract, based on the bid prices and the approximate estimate of quantities, was $7,953,050.

HILL VIEW RESERVOIR.

Hill View reservoir is located in the City of Yonkers, just north of the New York City line, and fifteen miles south of Kensico reservoir. Its function is to equalize the difference between the use of water in the city as it varies from hour to hour and the steady flow in the aqueduct. It is an uncovered, artificial reservoir of the earth embankment type. It holds 900,000,000 gallons of water, with a depth of 36½ feet, and has a water surface of ninety acres. The contract for its construction was let for $3,270,000, in December, 1909. It was first filled December 29, 1915. The path around the top of the reservoir is 8,600 feet long. The reservoir is divided into two basins by a wall 2,740 feet long that contains the by-pass aqueduct so that either one or both basins may be used or be by-passed whenever required, or water delivered directly into the city tunnel.

THE AQUEDUCT NORTH OF THE CITY.

There are four distinct types of aqueduct, cut-and-cover, grade tunnel, pressure tunnel and steel-pipe siphon, north of the city line. Where hills or mountains cross the line, and it would have been impracticable or uneconomical to circumvent them, tunnels at the natural elevation of the aqueduct (hydraulic gradient) were driven through them. There are twenty-four of these grade tunnels, aggregating fourteen miles. They, also, are horseshoe shape, seventeen feet high by thirteen feet four inches wide, and lined throughout with concrete.

Where deep and broad valleys were crossed and there was suitable rock beneath them, circular tunnels were driven deep in the rock and lined with concrete. There are seven pressure tunnels, totalling seventeen miles, with a diameter of about fourteen feet. Drainage shafts were constructed so that each pressure tunnel can be unwatered for inspection, cleaning or repair.

SIPHON TUNNEL UNDER HUDSON RIVER.

The Hudson River is crossed by means of a tunnel wholly in granitic rock, at a depth of 1,114 feet

below sea level, between a shaft at Storm King Mountain on the west bank and another shaft on the east side of the river at Breakneck Mountain. The top of the west shaft is closed by a deep concrete plug, but the east shaft, which is the drainage and access shaft for the Moodna-Hudson-Breakneck pressure tunnel, as well as a waterway, required a removable cover, and for it steel castings and forgings of unusual size and shape had to be manufactured. The drainage shaft is fourteen feet in diameter inside the concrete inner lining, which protects the fifteen-foot-diameter steel interlining, outside of which concrete is solidly packed against the rock. About ten feet above sea-level, this shaft is covered by a steel casting nearly hemispherical in shape. This dome rests on a cast steel ring called the curb. To hold the dome in place against the pressure of the water when the aqueduct is in service, which at this point is 180 pounds per square inch, equivalent to a head of 410 feet, there are thirty-six anchor bolts, each 4½ inches in diameter and 50 feet long, made of nickel-chrome steel. These bolts go through bored holes in the flange of the dome and the curb, and through steel sleeves to a cast steel anchor ring 46 feet farther down. The object of these sectional steel sleeves is primarily to insure the application of the anchorage stresses at a suitable depth in the rock, secondarily to permit the removal of the bolts if desired in connection with the removal of the cover or for inspection and also for convenience and necessary adjustments during construction operations. The top and bottom sections of these sleeves are of cast steel, each with forty-seven collars on the outside to afford a good grip on the concrete; the middle sections are commercial pipe.

Steel pipe siphons were used in valleys where the rock was not sound or where for other reasons pressure tunnels would be impracticable. These steel pipes are made of plates from 7-16-inch to ¾-inch in thickness, riveted together, and are 9 feet and 11 feet in diameter. They are lined with 2 inches of cement mortar, enveloped with concrete and covered with an earth embankment. There are fourteen of these siphons, aggregating six miles. Three pipes are required in each siphon for the full capacity of the aqueduct, but only one pipe has been completed in all the siphons. The remaining pipes are now needed and must be constructed as soon as market conditions will permit. These pipes are not true siphons, but are given this name because of their approximate resemblance to an inverted siphon.

HOW THE WATER IS PROTECTED.

At the Ashokan reservoir, and also at Kensico reservoir, aerators have been built. The aerators are substantially alike and are great fountain basins, approximately 500 feet long by 250 feet wide, each containing about 1,600 nozzles, through which jets of water are thrown vertically into the air, permitting thorough admixture of oxygen from the atmosphere and removal of undesirable gases and other matters causing tastes and odors.

Within the screen chamber down stream from Kensico reservoir chlorine is introduced into the water flowing in the aqueduct for the destruction of germ life. The gas is delivered at the chamber compressed to a liquid state in steel containers holding one hundred pounds each. Chlorine is used to insure the practical sterilization of the water before it goes to the city and is wholly neutralized or dissipated before the water reaches the distribution pipes. In addition to the treatment whenever required by the methods outlined above, Catskill water constantly receives benefit from its long storage in the great reservoirs of the system. In them sedimentation, bleaching by the sun, oxygenation by the winds and sterilization by natural processes, all go on more or less continually.

THE CITY TUNNEL.

From Hill View reservoir, Catskill water is delivered into the five boroughs by a circular tunnel in solid rock reducing in diameter from 15 to 14, 13, 12, and 11 feet. The total length of the tunnel is eighteen miles. From two terminal shafts in Brooklyn, steel and cast iron pipe lines extend into Queens and Richmond. A 36-inch flexible-jointed, cast iron pipe, buried in a trench in the harbor bottom, has been laid across the Narrows to the Staten Island shore, whence a 48-inch cast iron pipe extends to the Silver Lake reservoir, holding 435,000,000 gallons. The total length of this delivery-system is over thirty-four miles. The tunnel is at depths of 200 to 750 feet below the street surface, thus avoiding interference with streets, buildings, subways, sewers and pipes. These depths are necessary, also, to secure a substantial rock covering to withstand the bursting pressure of the water inside and afford the requisite watertightness. The waterway of the tunnel is lined throughout with Portland cement concrete.

The city tunnel, which is the longest tunnel in the world for carrying water under pressure, or for any other purpose, was constructed from twenty-five shafts, including the downtake shaft at Hill View reservoir, about 4,000 feet apart, located in parks and other places where they interfered very little with traffic. Through twenty-two of these shafts the water is delivered into the street mains. These connections from the tunnel to the mains are made by means of vertical riveted steel pipes (called risers) embedded in concrete in the upper part of each shaft and lined with concrete to prevent corrosion inside. Concrete fills all spaces outside the risers, sealing the shafts against the escape of water excepting through the pipes. Provision is made at Shaft 11 in Morningside Park and at Shaft 21 on the shore of the East River, at Clinton and South Streets, Manhattan, for unwatering the tunnel, whenever necessary, for inspection, cleaning or repairs. Unusual features in connection with the operation of the tunnel are the bronze riser valves in the shafts. The former are located about 100 feet below the top of sound rock and are designed to close automatically in case of an important break in the valve chamber or in the street mains. They can also be closed by hand from within the chambers at the shaft tops.

The cost of the portions of the Catskill Aqueduct within the city limits, including the tunnel, pipe lines, appurtenances and Silver Lake reservoir, is $23,000,000.

SHAFTS OF THE CITY TUNNEL.

Shaft.	Location.	Depth (Feet).	Shaft.	Location.	Depth (Feet).
1	Downtake, Hill View reservoir	308	13	93d St. and Central Park	250

SILVER LAKE RESERVOIR.

The terminal Silver Lake reservoir for the Catskill water system, located on Staten Island, is about 2,400 feet long and 1,500 feet wide It holds 435,000,000 gallons. Earth embankments close natural de-

pressions in the ground and a dividing dike paved with concrete forms two basins. From a gate chamber built in this dike, reinforced concrete conduits extend to the boundary of the reservoir, and cast iron pipes prolonged from them connect with the Narrows siphon and with the Staten Island service mains.

In order that the Catskill aqueduct might be most safely and economically located, extensive surveys and sub-surface explorations were made of both topographical and geological character. It was necessary for the board's engineers to make about 3,000 miles of line surveys, besides the very extensive topographical surveys of the reservoir sites and the final location of the aqueduct. For determining the exact location of the deep valley crossings, geological explorations by means of borings into the rock, with diamond and shot drills, were necessary, and were carried on under the immediate supervision of skilled, practical geologists. Such explorations were also made for the locations of the dams and for other features of the work. In the aggregate, these borings amounted to 240,000 feet, or forty-five miles. Some deep and difficult drilling was required also in connection with the location of the city tunnel and its shafts, particularly in the lower east side of Manhattan Island, where the old bed of the East River was crossed, which lies west of the present location of that river. Hundreds of test pits, auger borings, wash-drill borings and other forms of sub-surface explorations were used in various parts of the aqueduct. The extensive and useful information gained in this way was of great aid to the engineers designing the works and to the contractors in bidding on their construction.

MAXIMUM MONTHLY CONSTRUCTION PROGRESS.

Grade tunnel excavation, 425 linear feet; pressure tunnel excavation, 530½ linear feet; shaft excavation, 183 linear feet; concreting cut-and-cover aqueduct, 1,740 linear feet; concreting grade tunnel, 2,453 linear feet; concreting pressure tunnel, 2,834 linear feet; concreting shaft, 310 linear feet; placing masonry in Kensico dam, Contract No. 9, 84,450 cubic yards.

Laying 66-inch steel pipe, week, 1,409 linear feet; laying 48-inch cast iron pipe, week, 1,748 linear feet; laying 36-inch submerged pipe, week, 984 linear feet.

Cast steel dome on top of drainage shaft, Hudson tunnel, 46.25 tons; bronze section valve, city tunnel, 66-inch, 20.5 tons; bronze riser valve, city tunnel, 72-inch, 21.4 tons; bronze riser valve, city tunnel, 48-inch, 9.4 tons; bronze shaft cap, city tunnel, 72-inch by 48-inch by 48-inch, 11.8 tons; bronze shaft cap, city tunnel, 48-inch by 30-inch by 30-inch, 4.8 tons.

ELEVATIONS ABOVE TIDE IN NEW YORK HARBOR.

Ashokan reservoir, east basin, 587 feet; Ashokan reservoir, west basin, 590 feet; aqueduct at headworks (flow line), 511 feet; Kensico reservoir, 355 feet; aqueduct at Kensico lower gate chamber, 330 feet; water level, eastview filters, 322 feet; aqueduct at filter effluent (flow line), 312 feet; Hill View reservoir, 295 feet; Silver Lake reservoir, 228 feet.

When the city tunnel is in service, water can be delivered in lower Manhattan at an elevation 260 feet above tide level and in Brooklyn about 240 feet above tide level, under working conditions.

DISTANCES FROM ASHOKAN RESERVOIR.

To Hudson River crossing, 45 miles; to Croton Lake, 64 miles; to Kensico reservoir, 75 miles; to Hill View reservoir (New York City line), 92 miles; to Silver Lake reservoir, 119 miles.

Earth excavation in open cut, 16,000,000 cubic yards; earth excavation in tunnel, 50,000 cubic yards; rock excavation in open cut, 1,000,000 cubic yards; rock excavation in tunnel, 2,700,000 cubic yards; masonry in open cut, 4,200,000 cubic yards; masonry in tunnel, 1,100,000 cubic yards; cement, 6,700,000 barrels; cast iron, 27,000 tons; steel, 32,000 tons; bronze and brass, 3,000,000 pounds.

CHRONOLOGY OF THE WORK.

Report to Manufacturers' Association; sources west of Hudson River, considered for Brooklyn, March 15, 1897; Constitutional amendment passed exempting water supply bonds from debt limit, November 8, 1904; Board of Water Supply Commissioners appointed by Mayor McClellan, June 9, 1905; Chief Engineer began his duties, August 1, 1905; plan for development adopted by Board of Estimate and Apportionment, October 27, 1905; development of watersheds of Esopus, Rondout and Catskill Creeks, approved by State authorities, May 14, 1906; experimental shaft, now west shaft, of Hudson pressure tunnel, begun February 23, 1907; first sod turned, with appropriate ceremonies, by Mayor McClellan, near Garrison, June 20, 1907; police bureau established, February 28, 1908; first contracts placed for aqueduct structure, near Peekskill, April 28, 1908; first masonry laid for Olive Bridge dam, Ashokan reservoir, September 19, 1908; maximum contractors' forces, 17,243 men, at active field work, August 23, 1911; maximum contractors' earnings, $2,214,000 for month, November, 1911; headings of Hudson pressure tunnel met, and "holing through" shot fired by Mayor Gaynor, January 30, 1912; storage of water in Ashokan reservoir begun, September 9, 1913; last heading in city tunnel between Shafts No. 8 and 9, "holed through" by Mayor Mitchel, January 12, 1914; began filling Kensico reservoir with Catskill water, November 22, 1915; began filling Hill View reservoir with Catskill water, November 30, 1915; first delivery of Catskill water into distribution pipes of New York City, December 27, 1915; transfer of maintenance of Esopus watershed and operation of completed reservoir and aqueduct structures, to Department of Water Supply, Gas and Electricity, August 1, 1917; civic celebration of introduction of Catskill water into New York City, October 12, 13, 14, 1917.

GIVING NEW YORK CITY FIRE PROTECTION.

High Pressure Fire Service System—The high pressure fire service system in Manhattan is bounded by Thirty-fourth Street, Madison Avenue, Twenty-fourth Street, Lexington Avenue, Fourteenth Street, Third Avenue, Bowery, Houston Street, East River, Battery, North River. There are two pumping stations—Gansevoort and West Streets, and Oliver and South Streets. Each station has six electrically driven centrifugal pumps. Either fresh or salt water may be used. Each pump can deliver 3,000 gallons a minute. The combined capacity of the two stations is equal to about fifty fire engines. The distributing system consists of 128 miles of mains, eight to twenty-four inches in diameter, and about 2,750 four-nozzle hydrants. There are approximately 696 telephones communicating with Fire Department headquarters and with the main and subsidiary stations of the New York Edison Company, from which the necessary electric power is obtained. The present system cost about $9,380,000.

In Brooklyn there are two high pressure fire service systems. The one for the business and manufacturing districts is bounded by the Navy Yard, St. Edward's Street, St. Felix Street, Fort Greene Place, Fifth Avenue, Twenty-fourth Street, Fourth Avenue, Thirty-ninth Street and the water front, covering an area of 4.8 square miles. The supply is furnished by two stations, one located at the foot of Joralemon Street, and the reserve at Willoughby and St. Edward's Streets. Both draw their supply from the Ridgewood mains. The main station is connected to the East River. The pumps are electrically operated in both stations, and have a combined rated capacity of 24,000 gallons per minute. The distributing system consists of about forty-five miles of mains, eight to twenty inches in diameter.

The Coney Island high pressure system protects an area of 470 acres. The pumping station is located at West Twelfth Street and Coney Island Creek. The total capacity is 4,500 gallons per minute. The water is distributed through six miles of mains.

THE WATER SUPPLY OF NEW YORK CITY—*Continued.*

STATISTICS OF ASHOKAN, KENSICO AND SCHOHARIE RESERVOIRS.

	Ashokan.	Kensico.	Schoharie.
Capacity, total	132,000,000,000 gals.	38,000,000,000 gals.	22,000,000,000 gals.
Capacity, available	128,000,000,000 gals.	29,000,000,000 gals.	20,000,000,000 gals.

PLANTS OF THE CATSKILL AQUEDUCT REGION.

(By Norman Taylor, for a Brooklyn Botanic Garden Leaflet.)

From near sea-level to the highest mountains, within one hundred miles of the city stretches the Catskill water system, and this diversity of elevation suggests at once a division of the plant life of the area into the mountain and lowland types of vegetation. This may not be such an artificial division as at first sight appears when it is remembered that many of our local wild flowers are found only on the mountain tops of the Catskills or at elevations in excess of 1,500 feet. Others, again, common enough near the mouth of the Hudson, seem to creep rather sparingly up the valley, perhaps as far as the Highlands, only to find these hills a barrier to a more northerly journey.

There are many striking illustrations of these well marked tendencies of plant distribution in the region. For instance, near the mouth of the Croton River there is a tree of the yellow pine (Pinus echinata), more than fifty miles north of its usual home, near the pine barrens of New Jersey. And on the Palisades, opposite Yonkers, there grew, until quite recently, large masses of the native yew (Taxus canadensis), otherwise at home in the highland region northward. Near Peekskill Bay and just below it on Verplanck Point are many specimens of the ninebark (Physocarpus opulifolius), which, while it is common enough northward, is rare or wanting below this in the valley. Near Judge Parker's estate at Esopus is an island, without name, upon which occur the most southerly specimens of the arbor vitae (Thuja occidentalis) in the aqueduct region. Near Piermont, just below Nyack, are large quantities of marsh fleabane (Pluchea camphorata), on what are locally called the "Flats." This plant is obviously an intruder from the salt marshes of the Long Island and New Jersey coasts.

Scores more of these exceptions could be cited to prove the general rule that the flora of the Catskill Aqueduct region is of two types. It is true that they intergrade somewhat, but on the whole the Highlands seem to act as a barrier to many of our wild plants, particularly to the mountain species, some of which have never been known to occur in the valley south of Storm King or Anthony's Nose. It is through the former that the aqueduct takes the great plunge under the Hudson to the east bank of the river.

THE MOUNTAIN PLANTS.

No real Alpine conditions are found in the Catskills, the highest peak being scarcely over 4,000 feet. But there are many peaks that are over 2,000 feet, and toward the summit of these, and on the top of Slide Mountain, there occurs a group of plants that are found practically nowhere else in the aqueduct tract. Some of the more conspicuous of them are:

Braun's Polystichum (Polystichum Braunii), a strong growing fern, growing in rocky woods.

Balsam Fir (Abies balsamea), the tree of fragrant memory, common enough near the head-waters of Esopus Creek, unknown in the lowlands.

Wood Reed Grass (Cinna latifolia); besides the Catskills it has been found at Pine Plains, Dutchess County.

Several species of sedge, which are plants with the general aspect of grass, notably Carex novae-angliae.

Mountain Yellow-eyed Grass (Xyris montana), known only from the highest regions of the Catskills, in our area.

Mountain Strawberry (Fragaria Canadensis), and its relative Fragaria terra-novae, both isolated on the highest peaks in the watershed of the Ashokan Reservoir.

Mountain Ash (Pyrus sitchensis), differing from the common mountain ash in its short-pointed leaves. The latter is common in many places in the valley, but P. sitchensis is found only at the highest elevations.

Violet (Viola Selkirkii), known in the Catskill region, only from near mountain summits, and usually only above 2,500 feet where another species, peculiar to high elevations, Viola renifolia, is also found.

One-flowered Wintergreen (Moneses uniflora), with small white flowers in June. Found in the Adirondacks and nearly to the Arctic Circle, but reaching nearest to New York City in the Catskills.

Canadian Blueberry (Vaccinium Canadense), a low bush not over eighteen inches tall, with leaves bright green on both sides, and nearly evergreen.

Adoxa (Adoxa Moschatellina), remarkable because it is found in New York State only near Arkville, Delaware County, on mountains that drain into the upper portion of Ashokan Reservoir.

Large-leaved Golden Rod (Solidago macrophylla), reaching its most southerly distribution point on the highest peaks of the Catskills, and found far northward in the Hudson Bay region.

At somewhat lower elevations, in fact nearly throughout the Catskills and in the higher elevations of the Hudson Highlands, are many other species that are rare or wanting along the lower stretches of the Hudson nearer sea-level. Among the most beautiful of these are:

Clintonia (Clintonia borealis), with yellow flowers and glossy basal leaves.

Green Orchis (Habenaria hyperborea), with spurred, irregular, greenish-white flowers.

Showy-fringed Orchid (Habenaria grandiflora), with very striking purple-fringed flowers in July.

White Adders-Mouth (Microstylis monophyllos), a small orchid with whitish flowers.

Coral-root (Corallorhiza trifida), a slender saprophytic orchid with whitish stems and flowers, but no leaves.

Northern Stitchwort (Stellaria borealis), a white-flowered chickweed-like herb found on wet rocks and flowering in summer.

Mountain Sandwort (Arenaria groenlandica), making small tufts in rocky places. Flowers white, in summer.

Foam Flower (Tiarella cordifolia), with beautiful white flowers in May and June, so plentiful as to suggest its common name. Found very sparingly below Peekskill, if at all.

Purple or White Avens (Geum rivale), with not very numerous flowers, and tassel-like, silky fruits.

Barren Strawberry (Waldsteinia fragarioides), a strawberry-like plant with white flowers, and dry fruits. Leaves nearly evergreen.

Ginseng (Panax quinquefollum), known only from Haverstraw Bay northward. Formerly much collected for its supposed medicinal qualities, and now nearly extinct in the region.

Labrador Tea (Ledum groenlandicum), a low bog shrub with russet foliage and white flowers. Known only from Dutchess County northward.

Three-leaved Solomon's Seal (Smilacina trifolia), very rare in the Hudson Valley in Dutchess County; unknown south of it.

Twisted-Stalk (Streptopus amplexifollus), with greenish-white flowers and leaves bluish beneath. Known only from the Catskills.

Showy Ladies' Slipper (Cypripedium reginae), the finest of all the ladies' slippers. Flowers white, variegated with crimson stripes. From Dutchess County and northward.

Round-leaved Orchis (Habenaria orbiculata), has two large, nearly round leaves, flat on the ground. They are silvery beneath.

Rattlesnake Plantain (Epipactis tesselata), a small orchid with variegated leaves and whitish flowers on slender spikes.

Golden Seal (Hydrastis canadensis), now known only from near West Point and northward; very rare. Formerly much collected for its medicinal roots.

Anemone (Anemone riparia), known only from Dutchess County in our area.

Hepatica (Hepatica acutiloba), a pointed-leaved form of this common wild flower in the aqueduct region only from the Catskills.

Three-toothed Cinquefoil (Potentilla tridentata), a white-flowered herb with a woody base, the leaflets toothed at the end. Found only from Dutchess County and the Catskills.

Seneca Snakeroot (Polygala Senega), sometimes called mountain flax. Flowers in long, slender spikes; white, tinged with green.

Giant St. John's Wort (Hypericum Ascyron), almost a shrub, with large yellow flowers. Grows in moist places, only in the Catskills in the Hudson Valley region.

Dwarf Cornel (Cornus canadense), its greenish-white bloom, suggestive of miniature dogwood, is borne at the end of the stems, which are scarcely over four inches tall. Known now only from the Highlands northward.

Ague-weed (Gentiana quinquefolia), somewhat like the common fringed gentian, but without the fringe. Rare in northern Westchester County, and increasing northward through the Highlands to the Catskills.

Bugle-weed (Lycopus membranaceus), with the aspect of mint, but without the mint odor. Known only from the Catskill area.

Hobble-bush (Viburnum alnifolium), a shrub with showy white flowers and red fruits. Common north of the Highlands at moderate elevations and in the Catskills.

Swamp Laurel (Kalmia polifolia), a small relative of the mountain laurel which is scattered all along the water system. K. polifolia is a bog shrub with two-edged twigs and known only from Dutchess County northward.

Wild Rosemary (Andromeda glaucophylla), a low bog shrub with white drooping flowers and whitish foliage, known in the region only from Orange and Putnam Counties northward.

Van Brunt's Jacob's-Ladder (Polemonium Van Bruntiae), a blue showy herb found in the Catskills, but scarcely south of them in the water system.

Oswego Tea (Monarda didyma), commonly cultivated but apparently wild only in the Catskills, so far as our region is concerned. Flower scarlet and showy.

Twin-flower (Linnaea borealis), a low-carpeting plant with twin-flowers. Rare or wanting now south of the Highlands, although there are old records of it from Long and Staten Islands.

Wood Valerian (Valeriana uliginosa), a pink or white flowered herb known only from the northern end of the Highlands northward.

Scores more of these northern species of plants could be cited, but space forbids more support of the general thesis that the Catskill water system cuts through two distinct floral regions. Many trees, such as the spruce, larch, and bur oak, and a considerable number of shrubs follow the same general distributional tendency as the herbs, their occurrence south of Peekskill being very rare or unknown The few exceptions mentioned earlier only serve to prove the rule.

THE LOWLAND PLANTS.

Of the 2,038 native flowering plants found wild within one hundred miles of the city, about 1,600 are found in the Hudson Valley and Catskill regions.

Deducting those that we have seen to be of northern tendencies, there remain a large number of species that make up the great bulk of vegetation of these regions. These generally distributed plants are too numerous to mention here. Wherever the vegetation has been undisturbed, as through the Highlands, it is still a forest region with a wealth of wild flowers and ferns and shrubs as undergrowth. In spite of the wealth of plants, there appears to be no species endemic there, i. e., found nowhere else.

As illustrating the tendency of many essentially lowland plants not to grow north of the Highlands the sweet-gum (Liquidambar Styraciflua), sour gum (Nyssa sylvatica), and tulip tree (Liriodendron tulipifera), are interesting. All are common near the city and south of it. The first has never been recorded north of Peekskill, Nyssa is very rare north of the Highlands, while the Tulip Tree is unknown as a wild tree in the Catskills.

Perhaps the most beautiful of all the shrubs of the Catskill Aqueduct system is the mountain laurel (Kalmia latifolia), whose white or pinkish flowers color great areas in the Highlands and at other places.

THE BIG EAST RIVER BRIDGES.

(For details of the big bridges not in the running text, see table.)

BROOKLYN BRIDGE.

THE tolls are: For foot passengers, free; railway fare, 3 cents, or 2 tickets for 5 cents. Roadway tolls for vehicles abolished July 18, 1911. On August 23, 1897, the bridge railway was leased to the elevated railroad companies (now operated by the Brooklyn Rapid Transit), paying therefor 10 cents per car; trolley cars, 5 cents per round trip. About 250,000 people cross the bridge in a day. Width of bridge, 86 feet. Length of each land span, 930 feet. Length of Brooklyn approach, 998 feet. Length of New York approach, 1,562 feet 6 inches. Size of Manhattan caisson, 172 x 102 feet. Size of Brooklyn caisson, 168 x 102 feet. Timber and iron in caisson, 5,253 cubic yards. Concrete in well holes, chambers, etc., 5,669 cubic feet. Weight of Manhattan caisson, about 7,000 tons. Weight of concrete filling, about 8,000 tons. Manhattan tower contains 46,945 cubic yards masonry. Brooklyn tower contains 38,214 cubic yards masonry. Depth of tower foundation below high water, Brooklyn, 45 feet. Depth of tower foundation below high water, Manhattan, 78 feet. Size of Manhattan tower at high water line, 140 x 59 feet. Size of Manhattan tower at roof course, 136 x 53 feet. Total height of towers above high water, 272 feet. Grade of roadway, 3¼ feet in 100 feet. Height of towers above roadway, 153 feet. Size of anchorages at base, 129 x 119 feet. Size of anchorages at top, 117 x 104 feet. Size of anchorages, 89 feet front, 85 feet rear. Weight of each anchor plate, 23 tons. Number of cables, 4. Diameter of each cable, 15¾ inches. Length of each single wire in cables, 3,578 feet 6 inches. Ultimate strength of each cable, 12,000 tons. Weight of wire, 11 feet per pound. Each cable contains 5,296 parallel (not twisted) galvanized steel, oil-coated wires, closely wrapped to a solid cylinder, 15¾ inches in diameter. Permanent weight suspended from cables, 13,820 tons.

MANHATTAN BRIDGE.

Manhattan terminal, Bowery and Canal St.; Brooklyn terminal, Nassau, near Bridge St. Width of bridge, 122 feet 6 inches. Length of each land span, 725 feet. Length of Manhattan approach, 2,067 feet. Length of Brooklyn approach, 1,868 feet. Bridge is of double-deck design, first deck has one 35-foot roadway in centre and two subway tracks on each side and one 11-foot footwalk on each side, top deck has four trolley tracks. Approximately 40,000 cubic yards excavation for each anchor pier; approximately 115,000 cubic yards masonry and concrete in each anchor pier. Height of cables at top of tower above mean high water mark, 322 feet 6 inches. Height of roadway at centre of bridge above mean high water mark, 149 feet. Grade of roadway 3 ⅛ feet in 100 feet. Number of cables, four, 37 strands in each cable; 256 wires in each strand; 9,472 wires in each cable; 37,888 wires in four cables. Size of wire, 0.192 inches in diameter. Size of cable completed, 21¼ inches in diameter. Length of each wire, 3,223 feet 6 inches (anchor to anchor). Ultimate strength of each cable, 26,600 tons. Weight of steel in cables and suspenders, 7,800 tons. Weight of steel in other parts main bridge, 33,900 tons. Weight of steel in approaches, 18,300 tons. East footwalk opened to pedestrians July 18, 1910. West footwalk opened May 11, 1911.

WILLIAMSBURG BRIDGE.

The tower foundations for the bridge in Manhattan are at the foot of Delancey Street, and in Brooklyn at a point between South Fifth and South Sixth Streets. The bridge ends at Clinton Street in Manhattan, and at Havemeyer Street in Brooklyn. Construction commenced November 7, 1896. Size of Manhattan caissons (2), 76 x 60 feet; Brooklyn caissons (2), 79 x 63 feet. Depth of tower foundations in Manhattan, north caisson 55 feet, south caisson 66 feet below mean high water; in Brooklyn, north caisson 107 feet 5 inches, south caisson 91 feet 9 inches below mean high water. Height of masonry in Manhattan and Brooklyn towers, 23 feet above mean high water. Total height of towers above mean high water, 332 feet 9 inches. Size of both anchorages at top, 149 feet x 127 feet 5 inches. Length of each side span, 596 feet 6 inches; Manhattan approach, 2,650 feet; Brooklyn approach, 1,865 feet. Width over all, 118 feet. Two roadways, each 20 feet wide, two footwalks, each 17 feet 8 inches wide. Height of roadways at towers, 125 feet 8 inches above mean high water. Height of roadways at centre of bridge, 145 feet 6 inches above mean high water. Number of supporting cables, 4. Diameter of each cable, 18½ inches. Length of each single wire in cables, 2,985 feet. Total length of wire in four cables, 17,404 miles. Weight of four cables, including suspenders, 4,900 tons. Weight of structural steel and iron in main bridge, 26,300 tons; in approaches, 16,600 tons; total, 47,800 tons. Surface railway for Brooklyn lines began operation November 3, 1904. Surface railway for Manhattan lines began operation February 9, 1905. Elevated railway began operation September 16, 1908.

QUEENSBORO BRIDGE.

Plans approved by the War Department, February 23, 1901. Main bridge is a continuous cantilever. Bridge, with approaches, extends from Second Avenue, between 59th and 60th Streets, Manhattan, to Crescent Street, Queens. Construction commenced June, 1901. Height of highest masonry piers, 124 feet above mean high water. Length of Manhattan approach, 1,052 feet; west channel span, 1,182 feet; island span, 630 feet; east channel span, 984 feet; length of Queens approach, 2,672 feet 6 inches. Queens plaza has a length of 1,152 feet, from Crescent Street to Jackson Avenue. Width over all, 89 feet 6 inches. Width of roadway, 52 feet 3 inches. Two sidewalks, each 16 feet wide. Height of roadway in central portion of bridge, 143 feet above mean high water. Height of footwalks in central portion of bridge, 165 feet above mean high water. Height of lower balconies on towers on Blackwell's Island, 202 feet 6 inches above mean high water. Height of upper balconies on towers on Blackwell's Island, 333 feet above mean high water. Weight of steel and iron in main bridge, 52,600 tons; in approaches, 20,066 tons. Total, 72,666 tons. Bridge opened for pedestrians and vehicles, March 30, 1909. Surface railway began operation September 19, 1909.

HELL GATE ARCH BRIDGE.

The bridge spans the East River at Hell Gate, between Ward's Island and Astoria, Long Island. Designed and built by Gustav Lindenthal for the New York Connecting Railroad to connect the Pennsylvania and New York, New Haven systems. It is the longest arch in the world. The upper chord of the arch is 300 feet above mean high water at the centre and 180 feet at the ends of the span; the lower chord is 260 feet above mean high water at the centre and 40 feet at the ends. The arch carries four railway tracks (two passenger and two freight) on a solid concrete deck. It is the heaviest bridge in the world, weighing 52,000 pounds per lineal foot and carrying a loading of 24,000 pounds per lineal foot, making a total carrying capacity of 76,000 pounds per lineal foot. The steel work weighs 19,000 tons and the flooring and track weigh 7,000 tons. The heaviest single member weighs 185 tons and has a cross section of 1,384 square inches. The width of the bridge is 93 feet between railings and 60 feet between centres of trusses. The Long Island tower is 104 x 140 feet at the base and is founded on rock in open cut at 20 feet depth. The Ward's Island tower is 119 x 140 feet at the base and rests on 21 pneumatic concrete caissons, founded on rock varying from 58 to 120 feet below the ground surface. Height of towers, 240 feet. Total concrete in towers, 110,000 cubic yards. Total concrete in bridge towers and approaches, 500,000 cubic yards. Construction of arch commenced November, 1914. Arch was erected by cantilevering out from the towers, each half being held by connection to temporary backstays built behind the towers. The two halves were joined October 1, 1915. Entire steel work completed January, 1916.

HOW MANY PERSONS CROSS THE EAST RIVER BRIDGES IN A DAY.

(The figures, taken by the City, cover traffic in both directions for 24 hours, Thursday, October 25, 1917.)

	Brooklyn Bridge.	Manhattan Bridge.	W'msburgh Bridge.	Queensboro Bridge.	Total, All 4 Bridges.
Elevated and subway cars	4,458	3,054	3,545	1,032	12,089
Surface cars	6,421	1,402	7,653	2,113	17,589
Vehicles	5,060	14,359	10,277	13,431	43,127
Elevated and subway passengers	118,022	158,876	216,396	28,540	521,834
Surface car passengers	114,742	41,192	152,683	35,427	344,044
Vehicle passengers	8,767	28,265	19,211	28,870	85,113
Pedestrians	5,303	1,084	1,799	1,060	9,246
Total people crossing bridges	246,834	229,417	390,089	93,597	960,237
Percentage of change from 1916	+ 9.0	+28.3	+ 6.6	+18.1	+12.9
Percentage of total East River bridge traffic	25.7	23.9	40.6	9.8	100.0

The totals of the count taken on Thursday, December 7, 1916, were: Elevated and subway cars, 10,820; surface cars, 20,412; vehicles, 35,034; elevated and subway passengers, 432,666; surface car passengers, 339,898; vehicle passengers, 66,897; pedestrians, 10,993; total people crossing the bridges, 850,454; per cent. of increase over 1915, +5.8.

Elevated trains began operation over Queensboro Bridge on July 23, 1917. Subway trains began on Manhattan Bridge on September 4, 1917.

TRAFFIC ON OTHER CITY BRIDGES.

Borough.	Bridge.	Surface Cars.	Vehicles.	Car Passengers.	Vehicle Passengers.	Pedestrians.	Total Persons Crossing.
Brooklyn	Hamilton Avenue	789	11,964	25,461	16,789	14,388	56,638

All except the Hell Gate are municipal-owned bridges.

REGISTERS OF NEW YORK COUNTY—1812-1918.

Elbert Herring, May 1, 1812, to April, 1815; William T. Slocum, May 1, 1815, to December, 1817; James Gilbert, January, 1818, to December, 1820; James W. Lent, January, 1821, to December, 1828; Thomas Franklin, May, 1829, to February, 1830; Jameson Cox, December, 1830; Gilbert Coutant, 1831, to December, 1833; William H. Bunn, 1834-1836; James Gulick, 1837-1839; J. Sherman Brownell, 1840-1845; Samuel Osgood, 1846-1848; Cornelius V. Anderson, 1849-1851; Garret Dyckman, 1852-1854; Peter Asten, part of 1854; John J. Doane, 1855-1857; William Miner, 1858-1860; John Keyser, 1861-1868; John McCool, 1864-1866; Charles G. Halpine, 1867, to August 2, 1868; Patrick H. Jones, August, 1868, to December, 1868; Michael Connolly, 1869-1871; Franz Sigel, 1872-1874; Patrick H. Jones, 1875-1877; Frederick W. Loew, 1878-1880; Augustus T. Docharty, 1881-1883; John Reilly, 1884-1886; James J. Slevin, 1887-1889; Frank T. Fitzgerald, 1890-1892; Ferdinand Levy, 1893-1895; William Sohmer, 1896-1897; Isaac Fromme, 1898-1901; John H. J. Ronner, 1902-1905; Frank Gass, 1906-1909; Max S. Grifenhagen, 1910-1913; John J. Hopper, 1914-1917; James A. Donegan, 1918.

The Registers office of New York County is the oldest in the State. It was established in 1812. The county covered then the same territory as now. The date of the earliest realty property record in the office is 1654—a Dutch deed. The realty records before 1812 were kept by the County Clerk. The block-system of indexing was established in 1891. In 1906 the Registers office moved into the new Hall of Records.

CIVIL SERVICE RULES IN THE CITY OF NEW YORK.

SYNOPSIS of regulations governing the admission of persons into the Civil Service of the City of New York. Information may also be had by applying to the Secretary of the Municipal Civil Service Commission, Municipal Building, 14th floor.

Under the White Civil Service Law, Chapter 370, Laws of 1899, April 19, the rules apply to all positions in the service of the City of New York except officers elected by the people, all legislative officers and employés, heads of any department, or superintendents, principals, or teachers in a public school, academy, or college. This requires "examinations, wherever practicable, to ascertain the fitness of applicants for appointment to the Civil Service of said city." The Constitution requires that these examinations shall be competitive, "so far as practicable."

The entire Administration of the City of New York is divided into two general services, namely: The Unclassified Service and the Classified Service. The Unclassified Service includes all elective officers; the officers and employés of the Board of Aldermen; members of the Board of Elections; the head, or heads, of any department of the City Government; or any person appointed by name in any statute.

The Classified Service includes all positions not in the Unclassified Service.

The Classified Service is divided into four classes, namely:

EXEMPT CLASS—The Exempt Class includes the deputies of principal executive officers authorized by law to act generally for and in place of their principals; one secretary of each officer, board, and commission authorized by law to appoint a secretary; one clerk and one deputy clerk, if authorized by law, of each court, and one clerk of each elective judicial officer. In addition thereto there may be included in the Exempt Class all other subordinate offices for the filling of which competitive or non-competitive examination may be found to be not practicable.

NON-COMPETITIVE CLASS—Includes all those positions of a minor nature, in the city institutions or elsewhere, that it is not practicable to fill through competitive examination.

LABOR CLASS—Includes all unskilled laborers and such skilled laborers as are not included in the competitive or non-competitive classes.

COMPETITIVE CLASS—Includes all positions in the Classified Service (excepting those in the Exempt, Non-Competitive or the Labor Class) for which it is practicable to determine the merit and fitness of the applicant by competitive examination.

Vacancies in the Exempt Class may be filled without examination, appointments being made by the Mayor or other official having jurisdiction over the department where the vacancy exists.

Positions in the Non-Competitive Class are filled as a result of the examinations held by the department where the person is to be employed.

FILING APPLICATIONS FOR POSITIONS IN COMPETITIVE CLASS—Applications for positions in the Competitive Class will be issued and received only for the position or positions advertised, and only during the period specified by the commission in such advertisement. Advertisements for the various examinations appear in the prominent daily papers and in the *City Record*. The *City Record* is on file in the reading room of any of the city libraries.

All applications for an examination must be on a prescribed form addressed to the "Secretary of the Municipal Civil Service Commission." When an examination is advertised application blanks may be obtained at the office of the commission, Room 1400.

Application blanks will be mailed upon request provided a self-addressed stamped envelope or sufficient postage is enclosed to cover the mailing. The commission will not guarantee the delivery of the same. Postage on applications forwarded by mail must be fully prepaid.

Applicants must be citizens of the United States and residents of the State of New York. The requirement as to residence may be waived by the commission, but only with the proviso that applicants become residents of the State of New York prior to the date of their appointment.

Applicants for patrolmen must have resided within the State of New York at least one (1) year prior to the date of appointment.

The prescribed application form filled out in the applicant's handwriting sets forth the following;

The applicant's name, age, residence, statement regarding citizenship or naturalization, statement regarding arrests or previous service in a City Department, if any, and also the certificate for citizens whose residences or places of business are within the City of New York.

In examinations for positions requiring previous experience, applicants must fill in and file with their application an experience paper. In some examinations where experience is a qualifying subject, applicants receiving less than the minimum passing mark in this paper are barred from the remainder of the examination.

Applications for positions in the Labor Class are issued and received continually.

Applicants for all positions in the Competitive and the Labor Classes are required to take a medical and physical examination.

Applicants for Labor Class positions that require previous training or experience must take an oral or practical test; no written examination is given to applicants.

CONDUCT OF EXAMINATIONS.

Applicants shall be admitted to examination upon the production of the official notification to appear for that purpose.

All paper upon which examinations are to be written shall be furnished to the applicants by the examining board and shall bear some suitable official indorsement, stamp, or mark, for the purpose of identifying the same.

All examinations shall be in writing, except such as refer to expertness or physical qualities, and except as herein otherwise provided.

The sheets of questions shall be numbered and shall be given out in the order of their numbers, each, after the first, being given only when the competitor has returned to the examiners the last sheet given to him. In general, no examination shall extend beyond five hours without intermission; and no questions given out at any session, to any candidate, shall be allowed to be answered at another session.

Each examiner shall exercise all due diligence to secure fairness and prevent all collusion and fraud in the examinations.

The time allowed for completing the examination shall be announced before the first paper is given out.

The following municipal departments and offices come under jurisdiction of Civil Service rules:

- Accounts, Com. of.
- Armory, Board of.
- Art Commission.
- Assessors, Board of.
- Bellevue and Allied Hospitals.
- Board of Ambulance Service.
- Board of Inebriety.
- Board of Water Supply.
- Borough President in each Borough, Office of the.
- Buildings, Bureau of.
- Central Purchase Committee.
- Charities, Dept. of Public.
- Child Welfare, Board of.
- City Chamberlain.
- City Record, Supervisor of the.
- Civil Service Commission.
- College of the City of New York.
- Coroners.
- Correction, Dept. of.
- Court, City.
- Court, City Magistrate.
- Court House Board.
- Court, Municipal.
- Court of Special Sessions.
- Docks and Ferries, Dept. of.
- Education, Dept. of.
- Elections, Board of.
- Estimate and Apportionment, Board of.
- Finance Dept.
- Fire Dept.
- Health Dept.
- Hunter College.
- Law Dept.
- Licenses, Dept. of.
- Mayor's Office.
- Normal College.
- Parks, Dept. of.
- Parole Commission.
- Personal Service, Bureau of.
- Plant and Structures.
- Plumbers, Examining, Board of.
- Police Dept.
- Public Works Bureau.
- Revision of Assessments, Board of.
- Sinking Fund Commission.
- Standards and Appeals, Board of.
- Street Cleaning, Dept. of.
- Taxes and Assessments, Dept. of.
- Tenement House Dept.
- Water Supply, Gas, and Electricity, Dept. of.
- Weights and Measures.

Inspectors of Elections and Poll Clerks are not subject to competitive examination.

The minimum height of firemen has been reduced one inch, from 5 ft. 7 in. to 5 ft. 6 in.

PARKS IN MANHATTAN AND BRONX.

THE total area of improved parks in Manhattan is 1,275 acres; unimproved parks, 209 acres; playgrounds, 5 acres; parkways, streets, etc., under jurisdiction of Department of Parks, 40,929 feet long, width varying from 90 to 168 feet.

The following is a list of the larger parks:

Battery, foot of Broadway. 21 acres.
Bryant, 6th Ave. and W. 42d St. 4¼ acres.
Carl Schurz, between Avenue B and East River, E. 84th St. to E. 89th St. 12½ acres.
Central, 843 acres (see below).
Chelsea, 27th St. and 9th Ave. 3 acres.
City Hall Park, Broadway, Park Row, and Chambers St. 8 acres.
Colonial, 145th to 155th St., Bradhurst Ave. to Edgecombe Ave. 12¾ acres.
Columbus, Mulberry and Bayard Sts. 2¾ acres.
Corlears Hook Park, Corlears and South Sts. 8 acres.
De Witt Clinton, 52d to 54th St., North River. 7 acres.
Fort Washington, Ft. Washington Point, Hudson River. 40 2-3 acres.
Hamilton Fish Park, Houston and Willett Sts. 3½ acres.
Highbridge Park, 155th St. to Washington Bridge, west of Driveway. 75 2-3 acres.
Isham, 213th St. and Broadway to Harlem Ship Canal. 8 acres.
John Jay, 76th to 78th St., East River. 3 acres.
Kuyter Park, 129th St. and 3d Ave. .298 acres.
Madison Square, Broadway and 23d St. 6¾ acres.
Manhattan Square, Central Park W., 77th to 81st St. 17½ acres.
Morningside, between Columbus and Amsterdam Aves. and W. 110th and W. 123d Sts. 31¾ acres.
Mount Morris, between Madison and Mt. Morris Aves. and 120th and 124th Sts. 20 acres.
Park Ave., 34th to 42d St.; 56th to 96th St. 8 acres.
Riverside Drive Extension, 135th St. to 158th St.
Riverside Park, between Riverside Drive and the N. Y. C. R. R. and W. 72d and W. 129th Sts. 140 acres; and from 135th St. to 158th St. 24 acres.
St. Gabriel's Park, 1st Ave. and 35th St. 3 acres.
St. Nicholas, 130th to 141st St., St. Nicholas Ave. to St. Nicholas Terrace, 19¾ acres; and west of St. Nicholas Terrace and the extension at 130th and 141st Sts. 7½ acres.
Seward, Canal and Jefferson Sts. 3 acres.
Straus, 106th St. and Broadway.
Stuyvesant, Rutherfurd Pl. and E. 16th St. 4 acres.
Thomas Jefferson, 111th St., 1st Ave., 114th St. and Harlem River. 15½ acres.
Tompkins Square, Avenue A and 7th St. 10¼ acres.
Union Square, Broadway and 14th St. 3½ acres.
Washington Square, 5th Ave. and Waverley Pl. 8 acres.

Of the parks in Manhattan named in the above list, Fort Washington, High Bridge, St. Nicholas and Isham are unimproved. The Harlem River Driveway is 11,562 feet long and 100 to 150 feet wide; Morningside Drive is 3,538 feet long and 90 feet wide; Riverside Drive is 17,000 feet long and 90 to 168 feet wide, and the extension, 135th to 158th Street, is 6,560 feet long.

SOME FACTS ABOUT CENTRAL PARK.

The great park of New York extends from 59th St. to 110th St., being over 2½ miles long, and from 5th Ave. to 8th Ave., being over half a mile wide. It covers 843 acres, of which 185 are in lakes and reservoirs and 400 in forest, wherein over half a million trees and shrubs have been planted. There are 10¼ miles of roads, 5½ of bridle paths, and 31 of walks. The landscape architects of the Park were Frederick Law Olmsted and Calvert Vaux. Work was begun on the Park in 1857. The following fanciful names have been officially applied to the several entrances to the Park: 5th Ave. and 59th St., Scholar's Gate; 6th Ave. and 59th St., Artist's Gate; 7th Ave. and 59th St., Artisan's Gate; 8th Ave. and 59th St., Merchant's Gate; 8th Ave. and 72d St., Woman's Gate; 8th Ave. and 81st St., Hunter's Gate; 8th Ave. and 85th St., Mariner's Gate; 8th Ave. and 96th St., Gate of All Saints; 8th Ave. and 100th St., Boy's Gate; 8th Ave. and 110th St., Stranger's Gate; 5th Ave. and 67th St., Student's Gate; 5th Ave. and 72d St., Children's Gate; 5th Ave. and 79th St., Miner's Gate; 5th Ave. and 90th St., Engineer's Gate; 5th Ave. and 96th St., Woodman's Gate; 5th Ave. and 102d St., Girl's Gate; 5th Ave. and 110th St., Pioneer's Gate; 6th Ave. and 110th St., Farmer's Gate; 7th Ave. and 110th St., Warrior's Gate.

UNION SQUARE AND OTHER SQUARES.

Union Square was purchased by the city in 1833 for $116,051; Madison Square, in 1847, for $65,952; Tompkins Square, in 1834, for $93,358; Washington Square, in 1827, for $77,970, and Manhattan Square, in 1839, for $54,657.

PUBLIC PLAYGROUNDS IN MANHATTAN.

59th to 60th St., west of Amsterdam Ave.; 180-184 Cherry St.; south side of 101st St., between 2d and 3d Aves., west of Sutton Place, 59th to 60th St.; Carmansville Playground, between 151st and 152d Sts., Amsterdam Ave.; corner Worth and Baxter Sts.; west of 1st Ave., between 67th and 68th Sts.

BOWLING GREEN PARK.

The first park space in the City of New York was that now called Bowling Green Park. In 1732 this plot of ground was leased by citizens for playing the game of bowls. The plot was originally square and in the middle there was erected, in 1770, a lead statue of George III. After the Declaration of Independence the statue was torn down by a mob and the lead used for making bullets for the American army. In 1786 Bowling Green was first laid out as a park. At that time it was the centre of the fashionable residential district.

BATTERY PARK.

Open water existed originally where the Staten Island Ferry houses now stand, and the site of the Aquarium was under water until about 1800. State Street was not laid out until 1789, and was then bounded by the Bay on one side. A ledge of rocks stretched across Manhattan Island, and facing these rocks along the edge of the water there was built in the early days a line of defensive works known as "The Battery." These works extended from Whitehall Street to what is now Rector Street, and cannon were mounted behind them. About 1723 the first steps were taken to fill in to the present water line, but many years passed before this was actually accomplished.

CITY HALL PARK.

The present City Hall Park constitutes a part of what was known in the latter half of the seventeenth century as "The Common Lands," which stretched from the site of the Post Office northward toward the Tombs, and from the line of Broadway across what is now Park Row. This land was originally used for the grazing of cattle and, at its northeasterly end, was what was known as "Fresh Water Pond." The land originally comprising The Commons was gradually reduced by the laying out of streets and the construction of buildings. At the close of the Revolutionary War improvements were begun in City Hall Park. The erection of the present City Hall was authorized in 1803, and it was ready for occupancy in 1811. During the Civil War the present site of the Post Office Building was occupied by sheds, where the soldiers were supplied with food. After the war it was ceded to the United States Government as a site for the Post Office.

THE PARKS IN THE BRONX.

The chief parks above the Harlem are: Bronx, north of E. 182d St. and White Plains Road; 719 1-3 acres. Claremont, Belmont St., Clay Ave. and 170th St.; 38 acres. Crotona, Fulton, 3d, and Arthur Aves.; 154½ acres. De Voe, Sedgwick Ave. and 188th St.; 5¾ acres. Echo; 4 acres. Franz Sigel, Walton

PARKS IN MANHATTAN AND BRONX—*Continued.*

Ave. and 158th St. and Mott Ave.; 17½ acres. Macomb's Dam, Jerome Ave. and 162d St.; 27 acres. Pelham Bay, on Long Island Sound and East Chester Bay; 1,756 acres. Poe; 2½ acres. St. James, Jerome Ave., Creston Ave. and E. 191st St.; 11¾ acres. St. Mary's, 149th St., St. Ann's and Robbins Aves.; 34¾ acres. University; 2¾ acres. Van Cortlandt, northern boundary of city; 1,132¾ acres. Washington Bridge, Sedgwick Ave., Harlem River; 8½ acres.

There are three eighteen-hole golf courses, embracing in all about 250 acres. Two of these courses are in Van Cortlandt Park and one in Pelham Bay Park. In addition to the ordinary playgrounds there is a one-quarter mile running track, twenty feet wide, at Macomb's Dam Park, said to be the best and fastest public track in America, owing to the condition it is kept in; an athletic field at Crotona Park, used by the school children of Manhattan principally, containing a track one-fifth of a mile in length. In this athletic field is a stand for spectators which cost the city $40,000. At Pelham Bay Park there is a one-quarter mile track, with an athlete's lodge, containing lockers, shower baths, etc. There are forty baseball diamonds and ninety tennis courts.

Bronx and Pelham Parkway contains 232.42 acres; Crotona Parkway, 12.30 acres; Mosholu Parkway, 33.10 acres; Spuyten Duyvil Parkway, 28.10 acres.

PARKS IN BROOKLYN AND QUEENS.

Gross postal receipts, year ended June 30, 1918, $4,781,388.

PUBLIC MARKETS IN NEW YORK CITY.

THE public markets are West Washington, Gansevoort, Washington, Jefferson and Delancey in Manhattan, and Wallabout in Brooklyn.

Washington Market, at Fulton and West Streets, covers an area of 175 x 203 feet, and was established in 1812. Meat, fish and game, butter, eggs, cheese, fruits and vegetables are sold there. The city charges for space in this market.

West Washington Market—Established in 1889 at Gansevoort and West Streets, covers 369 x 400 feet. There are ten buildings—two-story structures in blocks of twenty stands, with marketing space on the first floor and offices on the second. It is a wholesale market in which meat, garden produce and live poultry are sold. The stalls are leased.

Jefferson Market, at Greenwich Avenue and Sixth Avenue, occupies 36,000 square feet. This is a retail market. Space is rented by the city to dealers.

Gansevoort Market—An open square bounded by West, Little West Twelfth, Washington and Gansevoort Streets, has no buildings of any kind. It is by legislation restricted to the use of farmers and gardeners for the sale of products they themselves have grown. Each farmer is charged 25 cents daily. It is mostly a wholesale market for dealers.

Delancey Street Market is under the approach to Williamsburg Bridge at Pitt and Willett Streets, where fish, vegetables and fruits and miscellaneous dry goods are sold. It occupies a space 400 x 100 feet.

Harlem Market—Under Harlem Bridge, 130th Street and 3d Avenue. Things are sold at retail.

Queensboro Market—Retail, under Queensboro Bridge; Manhattan approach, 1st Avenue, Avenue A, 59th and 60th Streets.

Wallabout Market has an area of thirty-six acres. It extends from Clinton Avenue to East Avenue, to Wallabout Basin. The city owns the land and the ground is leased. Many farmers use this market to sell their produce to dealers, and pay 25 cents a day for each wagon space in the market. Mostly all the purchases are wholesale.

FEDERAL EMPLOYMENT AGENCIES IN NEW YORK CITY.

Manhattan—22 E. 22d St.; 79 Centre St.; 126 Clinton St.; 436 E. 14th St.; 57th St. and 3d Ave.; 86th St. and Lexington Ave.; 111th St. and Lexington Ave.; 519 Hudson St.; 240 W. 23d St.; 112 W. 46th St.; 124th St. and Lenox Ave.; 139th St. and Lenox Ave.; 58 Cooper Sq.; 211 Bowery; 142 Bowery.

Bronx—363 E. 149th St.; 575 Tremont Ave.; 2537 Decatur Ave.

Brooklyn—310 Jay St.; 715 Flatbush Ave.; 2463 Atlantic Ave.; 52d St. and 3d Ave.; 927 Broadway; 244 Broadway; 673 Manhattan Ave.

Queens—171 Hunter Ave.

Richmond—9 Union Ave., Mariners Harbor.

HOW TO FIND ANY STREET NUMBER IN NEW YORK.

To find what street is nearest, take the number, cancel last figure, and divide by 2, add the key number found below. The result will be the nearest street. The key numbers are: Avenue A, 3; Avenue B, 3; Avenue C, 3; Avenue D, 3; First Avenue, 3; Second Avenue, 3; Third Avenue, 9 or 10; Fourth Avenue, 8; Fifth Avenue to Central Park, 18 or 17; above Mount Morris Park, 24; Sixth Avenue, 6; Seventh Avenue, 12; Eighth Avenue, 9; Ninth Avenue, 13; Tenth Avenue, 14; Eleventh Avenue, 15; Lexington Avenue, 22; Madison Avenue, 26; Park Avenue, 34 or 35; Columbus, Amsterdam, and West End Avenues, 59 or 60; Broadway above 14th Street (subtract), 30 or 31; Central Park West, divide house number by 10, and add 60; Riverside Drive, divide house number by 10, and add 72.

1883	2,169	3,512,848						

The figures from 1898 include the five boroughs. Number of fires from 1866 to 1897, inclusive, 72,891; total loss from 1866 to 1897, inclusive, $128,116,733.00; average annual loss per fire from 1866 to 1897, inclusive, $1,757.65.

The first fire engines used in New York were worked by hand and were imported from England in 1731. The population was then 8,628, and there were 1,200 houses. The engines were housed in a part of the City Hall, then at Wall and Nassau Streets. The first Fire Chief was Anthony Lamb, a mathematical instrument maker, with a shop in Old Slip. His salary was $60 a year. In 1737 a volunteer fire department was organized. The paid Fire Department dates from 1865. The first paid Chief was John Decker. The first paid engine company was at Centre and Chambers Streets.

FIRE COMMISSIONERS, NEW YORK CITY.

John J. Scannell, January 1, 1898, to December 31, 1901; Thomas Sturgis, January 1, 1902, to December 31, 1903; Nicholas J. Hayes, January 1, 1904, to December 31, 1905; John H. O'Brien, January 1, 1906, to October 10, 1906; Francis J. Lantry, October 11, 1906, to February 10, 1908; Hugh Bonner, February 11, 1908, to March 17, 1908; Nicholas J. Hayes, March 21, 1908, to December 31, 1909; Rhinelander Waldo, January 1, 1910, to May 23, 1911; Joseph Johnson, June 1, 1911, to December 31, 1913; Robert Adamson, January 1, 1914, to December 31, 1917; Thomas J. Drennan, January 1, 1918.

NEW YORK POLICE REGULATIONS FOR STREET TRAFFIC.

THEY serve as a model for other cities.

Streets are primarily intended for vehicles, but drivers must exercise all possible care not to injure pedestrians.

Pedestrians should: First, Avoid interference with vehicular traffic and to this end not step from the sidewalk without first looking to see what is approaching. Second, Cross the street at a right angle, preferably at a crosswalk, and, where a traffic policeman is stationed, wait for his signal. Third, Stand on the sidewalk or close to the track when waiting for a car. Fourth, Face the front of the car when alighting and observe the traffic on the right before moving to the sidewalk, and if passing behind the car observe the traffic in both directions.

Pedestrians should keep to the right and not stop so as to obstruct a sidewalk or crosswalk or an entrance to a building.

Pedestrians on streets with narrow sidewalks should use the sidewalk on their right.

The following regulations for vehicles shall be observed by the drivers thereof, who shall also comply at all times with any direction by voice, hand or whistle from any member of the police force as to starting, stopping, slowing, approaching or departing from any place, the manner of taking up or setting down passengers, and the loading or unloading of anything. Police officers may temporarily divert traffic to avoid congestion.

PASSING, TURNING, ETC.

A vehicle meeting another shall pass to the right.

A vehicle overtaking another shall pass to the left and not pull over to the right until entirely clear of it, except in passing a street car, when it shall keep to the right if distance between car and curb permits. A vehicle turning into a street to the right shall turn the corner as near the right-hand curb as practicable. A vehicle turning into a street to the left shall pass around the point of intersection of the two streets. A vehicle turning from one side to the other of a street shall do so by making a complete swing at the next street intersection. A vehicle shall keep as near as practicable to the right hand curb, so as to leave the centre of the street clear for overtaking traffic—the slower the speed the nearer the curb: A vehicle on a street divided longitudinally by a parkway, walk, sunken way, viaduct, isle of safety, or cab stand, shall keep to the right of such division. A vehicle passing around a circle shall keep to the right from entrance to exit. A vehicle shall not back to make a turn if it obstructs traffic, but shall go around the block or to a street wide and clear enough for the purpose. A vehicle shall not follow another too closely for safety.

STOPPING, STANDING, WAITING, PARKING.

A vehicle shall not stop with its left side to the curb, except on a "one-way" traffic street. A vehicle waiting at the curb shall promptly give way to a vehicle arriving to take up or set down passengers. A vehicle shall not be left in such position as to prevent another from moving up parallel and close to the curb in front of an entrance to a building, nor so as to prevent another already stopped near the curb from moving away, nor within ten feet of a fire hydrant.

A vehicle shall not be parked or otherwise stopped so as to prevent the free passage of other vehicles in both directions at the same time or in one direction in a "one-way traffic" street.

A vehicle, unless parked, shall not stand backed up at any angle to a curb, except while actually loading or unloading, and if horse-drawn and with four wheels shall stand parallel with the curb, faced in the direction of traffic.

A vehicle, unless a street car, shall not stop in any street, except near the curb, and then so as not to obstruct a crossing or cross walk, except to allow another vehicle or pedestrian to cross its path.

A street car shall not stop within an intersection of streets, nor within five feet of a street car ahead, nor so as to obstruct a cross walk.

OVERTAKING STREET CARS.

A vehicle in overtaking or meeting a street passenger car which has been stopped for the purpose of receiving or discharging a passenger or passengers, shall not pass or approach within eight (8) feet of such car so long as such car is so stopped.

When in the performance of duty, the following vehicles shall have the right of way: U. S. Mail, Police, Fire, Fire Patrol, Bureau of Buildings, Emergency Repair of Public Service Corporations, Ambulances, also the Military. Conditions warranting, North and South traffic shall have the right of way. A vehicle in front of a street car shall immediately turn out upon signal. A vehicle shall not so occupy any street as to obstruct traffic. A vehicle, on the approach of fire apparatus, shall immediately draw parallel and near to the curb and stop. A street car, on the approach of fire apparatus, shall stop so as not to interfere with its passage.

SIGNALS.

A vehicle's driver when slowing or stopping shall give timely signal by hand or whip, or in some other unmistakable manner. A vehicle's driver when about to turn either from a standstill or while in motion, shall give timely signal by hand or whip or in some other unmistakable manner to indicate the direction of the turn. This is especially important when turning to the left. A vehicle before backing shall give ample warning. Police whistle signals shall indicate: One blast—North and South traffic stops and East and West proceeds. Two blasts—East and West traffic stops and North and South proceeds. Three or more blasts—The approach of fire apparatus or other danger. A vehicle shall be equipped with lights and sound signals as prescribed by law. Sound signals are prohibited, except for necessary warning.

A vehicle shall not exceed the rate of speed established by law and shall proceed with great caution, especially in making turns in crossing other streets and cross walks, and in passing other vehicles. A vehicle shall not cross a sidewalk to or from an alley, lot or building faster than a horse walks.

The use of a vehicle is prohibited when it is so constructed, enclosed, equipped or loaded as to be dangerous, retard traffic, or prevent the driver from having a view sufficient for safety. The use of a vehicle is prohibited when it is so loaded with iron or other materials as to create loud noises while in transit. A vehicle when loaded with any material extending beyond its rear shall be provided with a red flag by day and a red light at night on the extreme rear end of such load. No one less than sixteen years of age shall drive a vehicle intended for commerical purposes. No one shall ride upon the rear of a vehicle without the driver's consent, nor with any part of his body protruding. A vehicle unless confined to tracks shall not tow more than one other vehicle and the connection shall be not longer than sixteen feet. Coasting is prohibited when dangerous. The use of a motor muffler cut-out is prohibited. Dense smoke from motors is prohibited.

CONTROL, TREATMENT AND CONDITION OF HORSES.

A horse shall not be unbridled nor left unattended in a street or unenclosed space without being securely fastened, unless harnessed to a vehicle with wheels so secured as to prevent its being dragged faster than a walk. A driver shall continuously hold the reins in his hands while riding, driving, or leading a horse. No one shall over-load, over-drive, over-ride, ill-treat or unnecessarily whip any horse. No one shall crack or so use a whip as to excite any horse other than that which he is using, or so as to annoy, interfere with or endanger any person.

POLICE FORCE OF NEW YORK CITY.

1 Chief Inspector, 1 Borough Inspector at $4,200, *22 Inspectors, 17 Surgeons* (one designated as *Chief Surgeon* at $6,000), *1 Superintendent of Telegraph.*

HACK AND CAB FARES IN MANHATTAN BOROUGH.

THE legal rate of fare, of which an official copy shall be furnished by the Bureau of Licenses and carried by every licensed hackman, shall be as follows:

Mileage rates charged for general driving.

Maximum rates of fare shall be as follows:

Motor Vehicles (Except Sight-Seeing Cars)—For not more than two passengers: For the first half-mile, or any fraction thereof, 30 cents; for each succeeding one-quarter mile, or any fraction thereof, 10 cents. For three or more passengers: For the first half-mile, or any fraction thereof, 40 cents; for each succeeding one-sixth mile, or any fraction thereof, 10 cents.

Sight-Seeing Cars—No rates are hereby established for sight-seeing cars, but a schedule of the rates charged for each trip shall, before the trip, be prominently displayed upon the car, and a charge greater, or attempt to charge any passenger a sum greater, than that set forth in said schedule shall be deemed a violation of this article.

Horse-Drawn Vehicles—For cabs: For the first mile, or any fraction thereof, 50 cents; for each succeeding one-half mile, or any fraction thereof, 20 cents. For coaches: For the first mile, or any fraction thereof, 70 cents; for each succeeding one-half mile, or any fraction thereof, 30 cents. Hourly rates (applying only to horse-drawn vehicles when shopping or calling, and not including park or road driving, nor driving more than five miles from starting point): For the first hour, or any part thereof, $1.50; for each additional one-half hour, 50 cents. In case of public hacks on which taximeters are not affixed, when driving on the numbered streets or numbered and lettered avenues in the Borough of Manhattan, twenty blocks north and south, and seven blocks between the numbered and lettered avenues constitute a mile for the purpose of this ordinance. The rate card, as provided for hereafter, shall state the number of blocks constituting a mile in the Borough of Manhattan.

Applying Both to Motor-Driven and Horse-Drawn Vehicles: For waiting time at the rate of $1.50 per hour. For each piece of luggage carried outside, 20 cents. No charge shall, however, be made for hang bags and suit cases. Ferriage and tolls in all cases to be paid by the party using the vehicle

Any violation of the provisions of this article, or any charge or any attempt to charge any passenger a greater rate of fare than that to which the public hack is entitled under the provisions of this article, shall render the offender liable, upon conviction thereof before any City Magistrate, to a fine of not exceeding $10, or in default of payment thereof to imprisonment in the City Prison for a period not exceeding ten days.

Every driver of a public hack, immediately after the termination of any hiring or employment, must carefully search such hack for any property lost or left therein, and any such property, unless sooner claimed or delivered to the owner, must be taken to the nearest police station and deposited with the officer in charge within twenty-four hours after the finding thereof, and the Captain of the precinct to which such report shall be made shall forward a written notice to the Bureau of Licenses with brief particulars and description of the property.

Every driver of a public hack shall have the right to demand payment of the legal fare in advance, and may refuse employment unless so prepaid, but no driver of a public hack shall otherwise refuse or neglect to convey any orderly person or persons upon request anywhere in the city, unless previously engaged or unable to do so.

All disputes as to the lawful rate of fare shall be determined by the police officer in charge of the police station nearest to the place where such dispute is had.

WAR'S EFFECT ON NEW YORK SCHOOL CHILDREN.

(From a New York City Health Department Bulletin.)

THE Bureau of Child Hygiene has completed a survey of 171,691 school children in the public schools of the Borough of Manhattan, all who were in attendance at the time, during intensely cold weather. That these children came to school while others remained at home would seem to show that they were rather hardier, from a physical standpoint, than the children not examined. This survey was made for the sole purpose of determining the condition of nutrition of these children. The Dunfermline scale was used. No. 1 means a child who is perfectly normal from the nutritional point of view. No. 2 means a child who is in passable condition, that is, one who is not perfectly normal, but who does not yet have the stigmata of undernourishment. These are the so-called "borderline cases" and any pronounced change in their living conditions would undoubtedly have a distinct effect upon their physical condition. No. 3 indicates a child who is distinctly undernourished, who bears the stigmata of malnutrition and who needs immediate supervision and readjustment of life and environment. No. 4 represents a child so seriously undernourished as to need immediate medical attention; in fact, a case of pronounced malnutrition or marasmus. In this survey of 171,691 children, the following results were found: No. 1, 29,781 (17.3%); No. 2, 104,908 (61.1%); No. 3, 31,718 (18.5%); No. 4, 5,284 (3.1%).

AGE.	Number Examined.	% No. 3 or No. 4.	AGE.	Number Examined.	% No. 3 or No. 4.	AGE.	Number Examined.	% No. 3 or No. 4.
6.....	14,259	22.5	10.....	21,439	23.4	14.....	12,603	15.4
7.....	18,444	23.4	11.....	20,231	22.0	15.....	5,702	14.2
8.....	20,033	24.3	12.....	19,443	19.6	16.....	1,119	12.1
9.....	21,187	25.2	13.....	17,231	18.1			

It was not found that nationality played any important part in the consideration of the prevalence of undernourishment, although it is of interest to note that of the Italian children examined, 28.7% were found undernourished. These Italian children comprised 23% of the total number examined. The children from Russia and Poland, who comprised 26% of all the children examined, were found undernourished in 19.8% of the cases.

PUBLIC SCHOOLS OF NEW YORK CITY.

Under an act of the Legislature (Chapter 786 of the Laws of 1917) a new Board of Education, consisting of seven members, as against forty-six formerly constituting that body, was appointed by the Mayor January 2, 1918, the term of office in each instance being seven years.

PUBLIC education in New York City began with the founding of the Free School Society (after 1826 the Public School Society) in 1805. The society started in a small way, depending upon private subscriptions, but soon received aid from the city. It gradually expanded, and until 1842 had control of the moneys supplied for educational purposes by the city and the common school fund of the State. This condition of affairs was unique. The society, being under the direction of high-minded citizens, enjoyed a large degree of public confidence. So anomalous a system could not last, however, and by an act of the Legislature, passed in 1842, the Board of Education was established. The Public School Society continued to conduct its schools until 1853, when, by mutual consent, they were all taken over by the board. The society at that time had more than a hundred schools; the value of the property it transferred to the city was estimated at $450,000, and during its existence it educated some 600,000 children. The Board of Education was an elective body from 1842 to 1871, the members being chosen first by wards, and from 1863 by school districts; since 1871 they have been appointed by the Mayor. In Brooklyn a Board of Education was created in 1843; the members were chosen by the Common Council until 1862, in which year the appointing power was vested in the Mayor. When consolidation took effect, in 1898, separate school boards were provided for the several boroughs (Manhattan and the Bronx being united), with a central Board of Education (composed of delegates from the four school boards, 19 in all) having charge of the finances, the erection and repair of buildings, the acquiring of sites, the purchase and distribution of supplies, etc. This system was dropped on the revision of the Charter in 1901, and since 1902 there has been one Board of Education for the city.

The Board of Superintendents, consisting of the superintendent of schools and eight associate superintendents, has large powers in the nomination, promotion, and transfer of teachers, the recommendation of text-books and scholastic supplies, the determination of courses of study, the fixing of qualifications for teachers' licenses, etc. Its important acts require the approval of the Board of Education. There are twenty-six district superintendents, whose duties are to visit schools and observe the work of teachers. The Board of Examiners (consisting of four examiners) conducts all examinations for would-be teachers, and prepares eligible lists. The school superintendents and examiners, as well as the supervisor of free lectures, the superintendent of school buildings, the superintendent of school supplies, and the director of attendance (whose duties are indicated by their titles), have terms of six years each. The Board of Education appoints all these officials and also a secretary, an auditor, and a director of reference and research, having no fixed term.

The regular school day is five hours in length, but in September, 1913, it was decided that four hours should be considered full time for classes of the first-year grades; the kindergarten session is three hours in length.

By the Equal Pay Law of 1911 elementary teachers began at $720 a year and were increased $60 a year, up to $1,500; in the upper grades, $1,820 to $2,260; assistant principals and heads of departments, $2,400; principals, $3,500; high school salaries, from $900 to $3,150; training school teachers, $1,000 to $3,250; district superintendents and examiners, $6,000; associated superintendents, $6,500; city superintendent, $10,000. Late in 1918 a "bonus," or temporary increase, at the rate of $100 a year, was allowed the rank and file, covering September 1 to December 31; and the Board of Education put in a request to the Board of Estimate for an extra allowance of $3,500,000 for salary increases.

Early in 1915 the duplicate school plan (practically the Gary system) was adopted in two schools, Public School 45, the Bronx, and Public School 89, Brooklyn. It has since been adopted in thirty other schools in the city.

The budget appropriation of the Department of Education for 1918 was $44,213,519, of which $36,684,613 constituted the fund for teachers' salaries. For 1919 the appropriation requested was $46,104,330; ($8,517,232 of this amount is for administration, etc.), the teachers' salaries fund being $37,589,098. The number of elementary schools is 515—154 in Manhattan, 179 in Brooklyn, 56 in the Bronx, 95 in Queens, and 34 in Richmond. The number of high schools is 24. There are also three training schools for teachers, four vocational schools and three truant schools. In the elementary schools there are 1,602 men and 17,839 women class teachers; in the high schools 1,233 men and 1,295 women. In the trade schools there are 131 teachers. One hundred and fifty-five attendance officers enforce the Compulsory Education Law. The latest available figures show the registered attendance up to September 11, 1918, in the elementary schools, as follows: Manhattan, 269,845; Bronx, 108,969; Brooklyn, 291,248; Queens, 68,190; Richmond, 16,781; total, 755,033, as against an average attendance of 664,885 in 1917.

Number on part time: Elementary schools, 40,238; in high schools, 3,109; total on part time, 43,347. The total registration of students in the high schools up to September 11 was 70,366; in the training schools, 1,029; in the vocational schools, 2,241.

Teachers incapacitated after thirty years' service are retired on pensions (half pay).

SCHOOLS IN MANHATTAN.

(The roster of the Board of Education is elsewhere, under "Government of the City of New York".)

LINCOLN MEMORIAL.

THE memorial is being erected in Potomac Park on the axis of the United States Capitol and the Washington Monument, in accordance with plans prepared by Henry Bacon of New York City.

Work on the construction of the memorial was commenced on Lincoln's Birthday, February 12, 1914, when the first sod was turned by the Special Resident Commissioner, ex-Senator Blackburn. The foundation was completed and the cornerstone laid February 12, 1915. By act of Congress, February 28, 1916, the limit of cost was increased to $2,594,000, to include the approaches The whole amount has been appropriated, and about $2,000,000 expended.

FOR BUSINESS MEN

AND ALL OTHER KINDS OF MEN

GUARANTEED LOW COST LIFE INSURANCE

The purpose of life insurance is to protect the family and the insured at the lowest reasonable premium. Travelers policies guarantee from the beginning the maximum amount of life insurance for the premium paid.

They contain a DISABILITY PROVISION of great value in case you suffer permanent total disability from accident or disease.

DISABILITY POLICIES

provide indemnity for injuries, large amounts for loss of life, dismemberment, and loss of sight due to accidents, and indemnity for disability from all diseases.

GROUP INSURANCE

is achieving great importance and every business man should inform himself by writing to us for pamphlets.

OUR COMPENSATION AND LIABILITY POLICIES

provide complete coverage and the most efficient safety engineering service in the world. We also write

AUTOMOBILE POLICIES

against accident, liability and collision.

The Key To Success
Stop Forgetting

The secret of business and social success is the ability to remember. I can make your mind an infallible classified index from which you can instantly select thoughts, facts, figures, names, faces. Enables you to **concentrate, develop self-control, overcome bashfulness, address an audience.** Easy. Simple. During the past 20 years I have trained thousands of people to STOP FORGETTING.

My Remarkable Memory Test Free

Write to-day for copy of my book "How to Remember." I've had this test copyrighted—it's the most ingenious and most conclusive test for the memory ever devised. I'll send it to you, free, and tell you how to obtain a copy of my deLuxe Edition, "How to Speak in Public," a handsomely illustrated $2 book absolutely free. Don't be handicapped with a poor memory any longer —write me to-day. Address.

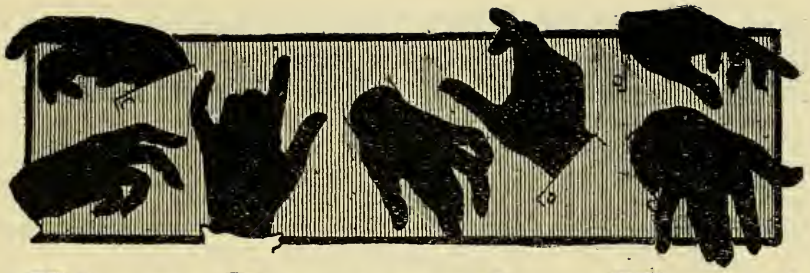
SLINGERLAND'S SCHOOL OF MUSIC, (Inc.) Dept. 501, Chicago, Ill.



The Secret of Fast Typewriting

80 to 100 Words a Minute Easy for Any One

Now, for the first time, has an idea been discovered which puts speed—great speed and accuracy—within the reach of every typewriter user. Almost overnight it has revolutionized the whole typewriting situation.

Stenographers who formerly never exceeded 30 to 40 words a minute are writing 80 to 100 words with less effort and with far greater accuracy than ever before. And their salaries in many cases have jumped from a meagre $8 to $15 per week to $30, $35 and even $40.

Typewrite the New Way

European music teachers, when training their pupils for the piano, invariably give special finger exercises. This is because the untrained way is not the right way. The best results cannot be obtained—the fingers simply cannot be used correctly—unless the student develops and strengthens the proper muscles.

This training is even more essential to expert typewriting. The reason that so few people can write no more than 30 to 40 words a minute is because their fingers are not flexible or nimble enough. The new, easy method overcomes this at once—develops finger strength and flexibility by simple, easy exercises away from the machine—trains the fingers beforehand for their work and with a minimum of machine practice brings results that border on the miraculous.

Learn at Home—Only 10 Easy Lessons

No matter how low your present speed, no matter how labored your efforts, no matter how weak or clumsy your fingers now seem to be, no matter how little or how much experience you have had, no matter what other courses you have taken, this new method will positively bring you the desired results, as thousands of stenographers—and ministers, lawyers, reporters and writers as well—have already proven. There are only 10 lessons, amazingly easy and fascinating. A few short weeks of spare time study is all that is required.

Mail To-Day for Bigger Pay.

Write for Particulars

If you are ambitious to get ahead—if you want to make your work easier—if you want to get more money in your pay envelope—don't wait a single moment before sending for full particulars about The New Way in Typewriting.

This new method is bringing such marvelous results to others—is proving itself to be so sure a means of quickly increasing salaries—that you will be doing yourself a big injustice if you fail to write **at once.** Tear off the coupon **now,** or write a postal or letter before you **turn the page.**

Gentlemen: Please send me full particulars about the New Way in Typewriting. This incurs no obligation on my part.

SHORTHAND IN 30 DAYS

You can learn in spare time in your own home, no matter where you live. No need to spend months in study, as was formerly necessary. The Boyd Syllabic System is easy to learn—easy to write—easy to read. Simple, Practical, Speedy, Sure. No ruled lines—no positions—no shading, as in other systems. No long list of word signs to confuse. Only nine characters to learn and you have the entire English language at your absolute command. This system is now widely used by stenographers, private secretaries, newspaper reporters. Lawyers, ministers, teachers, physicians, literary folk and business men and women may now learn shorthand for their own use through home study. A perfect shorthand system for any purpose—and does not require continual daily practice. Our graduates hold high-grade positions in all sections of the country. Send to-day for free booklet, testimonials, offer, etc.

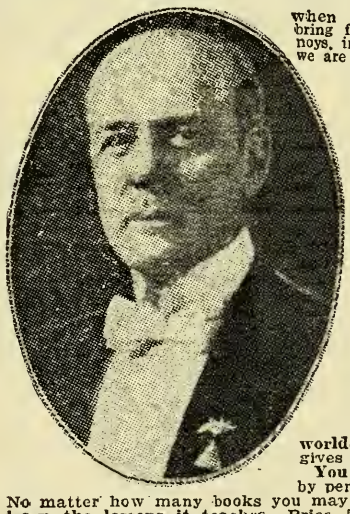
Established 1869.

CONCENTRATION SPELLS SUCCESS



when **rightly** used, but when wrongly used it **is sure** to bring failure. Most persons concentrate on that which annoys, irritates and makes for failure and loss of memory. When we are sick it is hard to concentrate on the thought of being well. When we are despondent from any cause it is difficult to concentrate on the idea of our ever being happy again. When we have lost money it is easy to concentrate on our loss, but almost impossible to concentrate on our having an abundance again.

We all lock the doors and windows of our home to keep out intruders, but do **you** lock the doors and windows of **your** thought world, and so keep out the thoughts which take away one's strength, hope, faith, courage, memory, ambition, power and ability?

Do you belong to the class of people who have used their **concentration** rightly or wrongly? Do you own your own mind? Has your **concentration** brought you success or failure; happiness or sorrow; health or sickness; brilliancy of mind or loss of memory? Can you concentrate for five minutes on any one thing you want, shutting out entirely every random, stray tramp thought? Try it.

"Concentration —Its Mentology and Psychology."

By F. W. SEARS, M. P. (Master of Psychology) teaches how to do this. The person who can concentrate **rightly** for what he wants, when and where he wants to—whether it is for money, health, love, increased business, a better job, political power, social position, good memory or anything else he may desire—has at his command the **greatest power in the world, a power** which, when he learns to use it rightly gives him the **mastery of himself and his environment.**

You possess this **power** and can learn to use it **rightly** by persistently applying the lessons taught in this book. No matter how many books you may have read, **this book is different. You need to learn the lessons it teaches.** Price 50 cents, postpaid. Stamps accepted. **Worth a thousand dollars.** Money back if you want it.

CENTRE PUBLISHING CO., Suite 666, 108-110 West 34th Street (at Broadway), New York

Note—Dr. Sears Lectures Every Sunday at 11.15 A. M. in the Criterion Theatre, Broadway, at 44th Street, New York City.

You Can Earn $250 A MONTH With This NEW MACHINE

YOU HAVE A BEAUTIFUL FACE

BUT YOUR NOSE?

BEFORE

AFTER

IN THIS DAY AND AGE attention to your appearance is an absolute necessity if you expect to make the most out of life. Not only should you wish to appear as attractive as possible, for your own self-satisfaction, which is alone well worth your efforts, but you will find the world ingeneral judging you greatly, if not wholly, by your "looks," therefore it pays to "look your best" at all times.

Permit no one to see you looking otherwise; it will injure your welfare! Upon the impression you constantly make rests the failure or success of your life. Which is to be your ultimate destiny? My new **Nose-Shaper,** "TRADOS" (Model 24), corrects now ill-shaped noses without operation, quickly, safely and permanently. Is pleasant and does not interfere with one's daily occupation, being worn at night.

Write today for free booklet, which tells you how to correct ill-shaped noses without cost if not satisfactory.

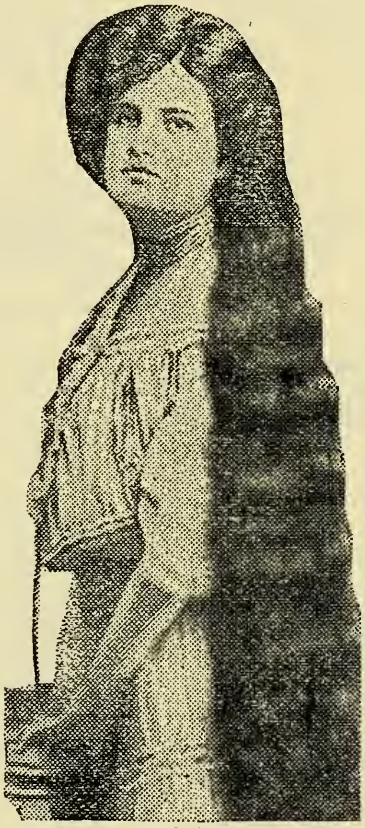
STOP DANDRUFF

And Falling Hair

Get a Small Bottle of *DANDERINE*

And Double the Beauty of Your Hair



To be possessed of a head of heavy, beautiful hair; soft, lustrous, fluffy, wavy and free from dandruff is merely a matter of using a little Danderine.

It is easy and inexpensive to have nice, soft hair and lots of it. Just get a small bottle of Knowlton's Danderine now—all drug stores recommend it—apply a little as directed and within ten minutes there will be an appearance of abundance, freshness, fluffiness and an incomparable gloss and lustre, and try as you will you, cannot find a trace of dandruff or falling hair; but your real surprise will be after about two weeks' use, when you will see new hair—fine and downy at first—yes—but really new hair—sprouting out all over your scalp—Danderine is, we believe, the only sure hair grower, destroyer of dandruff and cure for itchy scalp, and it never fails to stop falling hair at once.

If you want to prove how pretty and soft your hair really is, moisten a cloth with a little Danderine and carefully draw it through your hair—taking one small strand at a time. Your hair will be soft, glossy and beautiful in just a few moments—a delightful surprise awaits every one who tries this.

DANDERINE—35c a Bottle **At Drug and Toilet Stores**

Lift Off Corns!

"Freezone" Is Magic! Lift any Corn or Callus right off with fingers —No pain!

Drop a little Freezone on an aching corn, instantly that corn stops hurting, then you lift it right out. It doesn't hurt one bit. Yes, magic!

Why wait? Your druggist sells a tiny bottle of Freezone for a few cents, sufficient to rid your feet of every hard corn, soft corn, or corn between the toes, and calluses, without soreness or irritation. Freezone is the much talked of ether discovery of a Cincinnatti genius.

BROWN'S BRONCHIAL TROCHES

were first introduced to the public in the year 1850 and are known over the entire world as a preparation of superior merit for the relief of coughs and throat troubles.

They give prompt and effective relief in the coughing spells and throat irritation incident to Bronchitis, Asthma and Lung troubles.

Of great value to singers, speakers, preachers and teachers, as a means to clear the voice, remove hoarseness and irritations caused by use of the voice.

As they contain no opiates or anything injurious, BROWN'S BRONCHIAL TROCHES may be used in all cases where cough or throat lozenges are employed, without the least danger.

Look for the signature on the wrapper. Not sold by weight.

A sample package sent to any address on request.

DEAFNESS CONQUERED!

GENEROUS OFFER OF A FREE BOOK TO ALL DEAF PEOPLE WHO WISH TO HEAR

Deaf people everywhere will rejoice with all their hearts over the new treatment for Deafness that is restoring hearing in so many cases once thought hopeless. In order that everyone may learn of this treatment—by all odds one of the best yet known for Deafness—the finder of this successful new method has written a very interesting and helpful book which he will send absolutely free of charge to any person who suffers from Deafness. It shows in the plainest manner the causes of Deafness and Head Noises, and points out the way to regain clear and distinct hearing. Careful drawings of the ear and its complicated passages, made by the best artists, illustrate the book.

Deafness Specialist Sproule, author of this desirable work, has for thirty years been making a thorough investigation of Deafness and Head Noises, and his successful new treatment for Deafness is the reward of all his patient study. Now he wishes every one who suffers from Deafness in any degree to learn how science can conquer this cruel affliction.

Don't neglect your Deafness any longer! Send for this book to-day, and learn how hearing is being restored, quickly and permanently. Many who once believed their Deafness incurable have already gained perfect hearing by following the advice given in its pages. Write your full name and address on the dotted lines, cut out the free book coupon. Mail to

The milder cases are **often controlled in a single day.** Won't you try it at our expense? Address Dr. Van Vleck Co., Dept. WA 19 Jackson, Mich. Send no money. Send today.

Baldness Conquered

RECIPE MAILED FREE

A veteran business man, who was almost completely bald and had tried numerous tonics, lotions, shampoos, etc., without benefit, came across, while on a journey, an Indians' recipe by which he grew a complete crop of healthy, luxuriant hair that he now possesses.

When Bald

Others—men and women —have reported remarkable hair growth by the same method. Whoever wishes the recipe may obtain it free by writing to John Hart Brittain, BA-294 Station F, New York, N. Y.

Indians' Secret of Hair Growth

In a vast number of cases, when hair falls out, the roots are not dead, but remain imbedded in the scalp, alive, like seeds or bulbs, needing only fertility. The usual hair tonics, etc., are of no avail in such cases. The Indians' method is purposed to nourish the hair and stimulate the growth.

Wonderful results reported. *For men's, women's and children's hair.* If you are bald, or losing hair, or have dandruff, you should get the recipe. It is a pleasure to observe the starting of new hair and its steady increase until a prolific growth supersedes thin hair or baldness. Cut out this notice; show to others who want beautiful hair. The recipe is free. *This is genuine.*

Hair Grown

Become Thin FREE BOOK

If you would like to reduce 9 to 69 pounds in a rational, safe, p[illegible]t way by guaranteed method (endorsed by physicians) send for free book, "Reduce Weight Happily," to Korein Co., NB-294, Station F, New York, N. Y. It will come in plain wrapper. Likely to add years to your life and bring great joy.

QUICK HAIR GROWTH
Box Free To You!

Would You Like Such a Result as This?

Do you want, free, a trial box of Koskott, that has proved successful in so many cases? If so, you need only to answer this adv. by postcard or letter, asking for FREE BOX. This famous preparation is for dandruff, thinning hair and several forms of BALDNESS. In many cases, a new hair growth has been reported when all else had failed. **FREE** So why not see for yourself? Koskott is used by men and women; it is perfectly harmless and often starts hair growth in a few days. Address: Koskott Laboratory, East 32d St., KA-294, New York.

Quit Cigarettes!

A wonderful relief from slavery to cigarettes is reported by Chas. Ohnesorge, who had been addicted 14 years and after trying various so-called cures in vain found just the information he wanted in a book published and sent free to anybody by Edward J. Woods, TB-294, Station F, New York, N. Y. Thousands of persons, both sexes, who were addicted to cigarettes, pipe, chewing, snuff, etc., have been gladdened by this free book. Getting rid of tobacco habit means better health, longer life, greater earning efficiency, tranquillity, contentment and other benefits.

SHE WAS OBESE

The shadow on this picture gives you an idea how she looked and felt. By taking Oil of Korein and following the easy directions she reduced 38 pounds in three months. Now she is agile, attractive, mentally alert and in better health. Reliable anti-fat self-treatment. Buy a small box at the drug store. Oil of Korein; it comes in capsules. Many women have reduced easily, lastingly, 10 to 60 pounds. Safe and pleasant method, endorsed by physicians. For free book of advice (in plain wrapper) write to Korein Co., NA-294, Station F, New York City.

To the Wife of One Who Drinks

If this should reach the eyes of a wife, mother or friend of some good man who drinks liquor to excess and cannot overcome the self-ruining habit, let her write to Edward J. Woods, DA 294, Station F, New York, N. Y., for confidential information which is likelly to bring great joy—a complete victory over the drink habit.

ECZEMA

Also called Tetter, Salt Rheum, Pruritus, Milk Crust, Water Poison, Weeping Skin, etc.

DR. CANNADAY
Eczema Specialist
for 15 Years

For fifteen years I have been treating one disease alone, ECZEMA. I have handled over one million cases. I do not pretend to know it all, but I am convinced the disease is due to an excess of acid in the blood, and closely related to rheumatism and cancer. This acid must be removed.

Eczema is called by some people Itch, Tetter, Salt Rheum, Pruritus, Milk Crust, Weeping Skin, etc. I am fully convinced Eczema is a curable disease, and when I say it can be CURED, I mean just what I say—C-U-R-E-D, and not merely patched up for a while to return worse than before. It makes no difference what other doctors have told you, or what all you have tried, all I ask is just a chance to prove to you that this vast experience has taught me a great deal that would be of help to you. If you will write me to-day I will send you a free trial of my mild, soothing, guaranteed treatment that will do more to convince you than I or anyone else could in a month's preaching. It's all up to you. If you suffer any more with eczema and refuse to merely write to me for free trial, just blame yourself. No matter where you live, I have treated your neighbors. Merely dropping me a postal today is likely to give you more real comfort in a week than you ever expected to enjoy again. Do it right now; your very life may be at stake.

J. E. CANNADAY, M. D., 1423 Court Bk., Sedalia, Mo.

Reference: Third National Bank, Sedalia, or ask your banker to find out about me.

Send this notice to some poor sufferer from eczema, It will be a kind act by you

Cured His Piles

Now 88 Years Old, But Works at Trade of Blacksmith and Feels Younger Since Piles Are Gone.

The oldest active blacksmith in Michigan is still pounding his anvil in the town of Homer—thanks to my internal method for curing piles.

Mr. Jacob Lyon, Homer, Mich.

I wish that you could hear him tell of his many experiences with ointments, salves, dilators, etc., before he tried my method. Here is a letter just received from him:

Homer, Mich., June 27, 1917.

Mr. E. R. Page, Marshall, Mich.

Dear Sir: I want you to know what your treatment has done for me. I had suffered with piles for many years and used suppositories and all kinds of treatments, but never got relief until I tried yours. Am now completely cured. Although I am 88 years old, and the oldest active blacksmith in Michigan, I feel years younger since the piles have left me. I will surely recommend it to all I know who suffer this way. You can use my letter any way you wish and I hope it will lead others to try this wonderful remedy.

Yours truly, J. L. LYON.

Don't let a doctor cut you and don't waste money on foolish salves, ointments, dilators, etc., but send to-day for a Free Trial of my internal method for the Permanent Cure of Piles.

I especially want to send it to those apparently hopeless cases where all forms of salves, ointments, dilators and other local treatments have failed.

TO CELEBRATE 30TH ANNIVERSARY

PROMINENT SPECIALIST WILL GIVE AWAY TREATMENT

FREE

Catarrh Specialist Sproule.

A man who is celebrating his 30th anniversary of successful work is naturally in a very happy and generous frame of mind.

This is just the condition of Catarrh Specialist Sproule of Boston, whose picture you see here. For 30 years he has been curing Catarrh all over the country.

He has given up everything for what he felt was his life work—a post of surgeon in the British Royal Mail Naval Service—days and nights to study and research. He has travelled extensively, observing the effects of climate on Catarrh. Little wonder when you know all this that he is to-day known as The Catarrh Specialist of America.

His method of treatment is new, different from others, and has brought untold joy to hundreds and hundreds of Catarrh Sufferers.

But, you say, I would like to see this treatment. Here is your opportunity. **To celebrate his 30th anniversary, Catarrh Specialist Sproule offers his famous Catarrh Treatment Free to all who write during 1919.**

Think what this offer means to you! You secure a treatment which is famous all over America—you see for yourself a method of treatment which has really cured Catarrh, and you get this treatment for nothing.

SEND TO-DAY

Remember this is a most expensive celebration for the Specialist and he can't afford to do it for long. You must not miss the chance. Just get paper and pencil and jot down your full name and address, with just three words, "Catarrh Treatment Free." If you have a post-card handy, use that. The point is, to send at once for this treatment, so that you can get it free and try it for yourself.

You know how loathsome and disgusting a disease Catarrh is. You know that it leads to dreadful incurable troubles. Perhaps you have always thought that Catarrh was incurable. You had not realized that there was a man who has devoted more than a quarter of a century to its study, who has such a vast experience that he must have cured scores of cases **just like yours.**

Don't delay, but write right now for the Free Anniversary Treatment.

Free to ASTHMA SUFFERERS

A New Home Cure That Anyone Can Use Without Discomfort or Loss of Time

We have a new Method that cures Asthma, and we want you to try it at our expense. No matter whether your case is of long-standing or recent development, whether it is present as occasional or chronic Asthma, you should send for a free trial of our method. No matter in what climate you live, no matter what your age or occupation, if you are troubled with Asthma, our method should relieve you promptly.

We especially want to send it to those apparently hopeless cases, where all forms of inhalers, douches, opium preparations, fumes, "patent smokes," etc., have failed. We want to show everyone, at our own expense, that this new method is designed to end all difficult breathing, all wheezing, and all those terrible paroxysms at once and for all time.

This free offer is too important to neglect a single day. Write now and then begin the method at once. Send no money. Simply mail coupon below. Do It Today.

New Treatment That Knocks Rheumatism

75c BOX FREE TO ANY SUFFERER

Up in Syracuse, N. Y., a treatment for rheumatism has been found that hundreds of users say is a wonder, reporting cases that seem little short of miraculous. Just a few treatments even in the very worst cases seem to accomplish wonders even to neutralize the uric acid and lime salt deposits in the blood, driving all the poisonous clogging waste from the system. Soreness, pain, stiffness, swelling just seem to melt away and vanish.

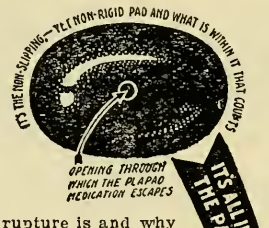
The treatment first introduced by Mr. Delano is so good that its owner wants everybody who suffers from rheumatism or who has a friend so afflicted to get a free 75c package from him to prove just what it will do in every case before a penny is spent. Mr. Delano says: "To prove that the Delano treatment will positively overcome rheumatism, no matter how severe, stubborn or long standing the case, and even after all other treatments have failed, I will, if you have never previously used the treatment, send you a full size 75c package free if you will just cut out this notice and send it with your name and address with 10c to help pay postage and distribution expense to me personally."

F. H. DELANO

403 E Wood Building, Syracuse, N. Y.

I can send only one Free Package to an address.

Stop Using a Truss



Yes, STOP IT, I say! You KNOW by your own experience that it is only a makeshift—a false prop against a collapsing wall, and that it is undermining your health. Why, then, continue to wear it? Let me point out a better way.

FREE TO THE RUPTURED

I want to send to every RUPTURED SUFFERER, absolutely FREE, A TRIAL OF PLAPAO and my interesting, instructive 48-page book on Rupture—explains what rupture is and why trusses and similar MERE MECHANICAL supports cannot be relied upon. The PLAPAO-PADS are nature's way. This simple, inexpensive home treatment gives quick relief, strengthens weakened muscles. Does away with steel and rubber bands that chafe and pinch. Close the hernial opening as nature intended, so the rupture CAN'T come down. Hundreds have testified under oath that the PLAPAO-PADS positively and permanently cured their rupture—some of them most aggravated cases and of long standing. Awarded Gold Medal and Grand Prix.

Soft as Velvet—Easy to Apply—Inexpensive

There is no metal about the PLAPAO-PADS—no straps, buckles or springs attached—soft as velvet. Easy to wear. No delay from work. Easy to apply and require no readjusting. Process of recovery is natural, so afterward no use for trusses. Ask me to prove what I say by sending Trial PLAPAO and a most convincing mass of evidence FREE—no charge for it now or ever—nothing to be returned. Don't wait. Write today—NOW.

Plapao Laboratories, Inc.
BLOCK 341, ST. LOUIS, MO.

PILES

CAN BE CURED

without an operation. Some of the worst cases have been cured with

PAZO OINTMENT

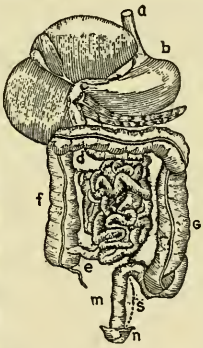
in 14 days and most cases are cured in 6 days.

PRICE, 60 CENTS

ENTONA

Original Gluten Suppositories (16 in Box)

An old remedy, used by physicians for both adults and infants ever since it was formulated in 1877 by Dr. Frank Fuller, President of the Health Food Company.



Constipation ordinarily occurs in the rectum (m). Why try to relieve by harmful drugs in pills and tablets which hurt the stomach (b) and must pass through the twenty or thirty feet of intestines (c, d, e, f, g) before they reach the rectum (m)?

ENTONAS "reach the spot" immediately. Made of food substances, they strengthen the muscles and lubricate the irritated parts.

Send for your sample, free, or stop at the nearest druggist's and get a 50-cent box.

Relief Now FREE for CATARRH Sufferers

You Can Now Treat This Trouble In Your Own Home and Get Relief at Once.

HOW THE REMEDY FOR CATARRH WAS DISCOVERED.

The Trouble Begins Here

In the upper nasal cavity the catarrhal mucus collects and either runs out through the nostrils, or dropping down, it hardens and forms in chunks or long strings just where the soft palate or uvula is located.

The Trouble Gets Worse

It then drops down the throat with food or drink and creates a condition wrongly diagnosed as indigestion and stomach trouble.

You Never Can Tell What Serious Trouble Catarrh May Develop.

From the stomach it mixes with all food and enters the blood to call upon the entire system to get rid of it. Gauss' Combined Method acts in all these stages from the nasal cavities to the throat, stomach, intestines, the blood, liver, breathing apparatus, bowels, kidneys, bladder and skin. It is the most comprehensive treatment ever discovered.

This terrible disease has raged unchecked for years simply because symptoms have been treated while the cause of the trouble has been left to circulate in the blood and bring the disease back as fast as local treatments could relieve it.

C. E. Gauss, who experimented for years on a treatment for Catarrh, found that after perfecting a balm that relieved the nose and throat troubles quickly he could not prevent the trouble beginning all over again.

On test cases he could completely remove all signs of Catarrh from nose and throat, but in a few weeks they were back.

Careful experiments and investigations have shown that as the troubles were expelled from the nose and throat the real cause of the disease was overlooked, and in a short time the Catarrh would return stronger than ever. Mr. Gauss has gone way ahead of the ordinary methods and has provided a treatment that

Goes to the Root of

- Stopped-up noses
- Constant "frog-in-the-throat"
- Nasal discharges
- Hawking and spitting
- Snoring at night
- Bad breath
- Frequent colds
- Difficult breathing
- Smothering sensation in dreams
- Sudden fits of sneezing
- Dry mucus in nose

and any of the other symptoms that indicate approaching or present catarrh.

Removes the Cause

Immediately Gives Relief to the Nose and Throat, Thus Preventing Serious Complications

Reese Jones, of Scranton, Penn., says that after trying many other treatments, he used this new method and—"My nose is now entirely clear and free and I am not bothered by the disease any more. The New Combined Treatment is worth its weight in gold."

Temporary relief from catarrh may be obtained in other ways, but the New Combined Treatment must inevitably be accepted for *permanent* results.

Sarah J. Cape, Mount Pella, Tenn., says: "I suffered the pains and distress of catarrh for thirteen years and, needless to state, tried nearly every method. But by your new method I was *completely* cured, and you cannot imagine the joy that has come over me."

Trial Treatment FREE

This new method is so important to the welfare of humanity, so vital to every person suffering from any form of catarrh, that the opportunity to actually *test* it and *prove* its results will be gladly extended without one cent of cost.

A large trial treatment, with complete, minute directions, will be sent free to any catarrh sufferer.

Send no money, take no risks, make no promises. Simply clip, sign and mail the coupon and the test package of the New Combined Treatment will be sent, fully prepaid, together with the valuable book on Catarrh.

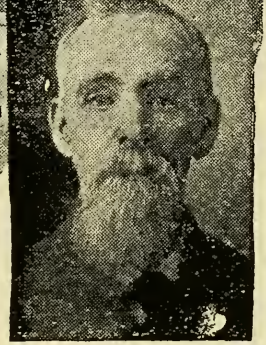
Wanted To Die!



Yet, at 72 He Lives To Tell Wonderful Story

Hydraulic Engineer Finds Cure for Rheumatism

After Suffering Agonies Many Years

HOW IT HAPPENED

"Eleven years ago I was in a hospital for seven weeks, at a cost of over two hundred dollars. For two years I suffered torments, and winter before last I was laid up six weeks under doctor's care. Truly in the last twelve years I have wanted to die, I was in such agony. I would say, 'good Lord take me rather than go through it again.'

"But now I am a new man. I am a better man to-day than I was twelve years ago. I can almost put my leg over the back of my head. I could do that at 30, now I am 72."

Mr. Willson, the well known Hydraulic Engineer, is only one of thousands who suffered for years, owing to the general belief in the old, false theory, that "Uric Acid" causes rheumatism. This erroneous belief induced him and legions of unfortunate men and women to take wrong treatments. You might just as well attempt to put out a fire with oil as to try and get rid of your rheumatism, neuritis and like complaints, by taking treatment supposed to drive Uric Acid out of your blood and body. Many physicians now know that Uric Acid never did and never will cause rheumatism; that it is a natural and necessary constituent of the blood; that it is found in every new-born babe, and without it we cannot live!

It took Mr. Willson twelve years to find out this truth. He learned how to get rid of the true cause of his rheumatism and recover his strength from "The Inner Mysteries," a remarkable book now being distributed free by an authority who devoted over twenty years to the scientific study of this malady. And Mr. Willson says: "Now I know, and I never can forget—the carrier left it in my box and I came near throwing it in the fire. But something prompted me to look it over. Thank God I did."

NOTE: If any reader of the World Almanac wishes the book that reveals these facts regarding the true cause and cure of rheumatism that were overlooked by doctors and scientists for centuries past, simply send a post card or letter to H. P. Clearwater, 380 A Street, Hallowell, Maine, and it will be sent by return mail without any charge whatever. Send now! You may never get this opportunity again. If not a sufferer yourself, be sure to hand this good news to some afflicted acquaintance.

Crooked Spines Made Straight

Any form of spinal trouble can be relieved in your own home without pain or discomfort, by a wonderful anatomical appliance, invented by a man who cured himself of Spinal Curvature. Its results are marvelous. It is nature's own method. Eminent physicians endorse it. The Philo Burt Method relieves the pressure at the affected parts of the spine, the whole spine is invigorated and strengthened, all soreness is taken out of the back, the cartilage between the vertebrae is made to expand, the contracted muscles are relaxed and the spine is straightened. **We guarantee satisfaction and let you use it 30 days.** There is bright hope for you, no matter how long you have suffered. We have successfully treated over 30,000 cases and have strong testimonials from every State in the Union. Each Appliance is made to order from individual measurements and fits perfectly.

Write for our free book. Describe your case so we can mail definite information.

Hair Trouble Successfully Treated

CALVACURA STOPS HAIR FALLING

THE CALVACURA METHOD is a scientific, natural method, invariably producing gratifying results.

Mrs. Lina Belperio, whose photograph appears here, sent us a very interesting sworn statement of the remarkable results she and her children obtained from the Calvacura Method. We would like to send you a copy of this statement.

Mrs. John Malouin writes: "The sample box started a growth of new hair and I am so pleased I am sending for a full treatment."

Mr. Frank H. Wright says: "Your Calvacura No. 1 cured me, also my brother-in-law, and I can recommend it to any one."

Do You Suffer from Dandruff, Falling Hair, Prematurely Gray Hair, Stripy, Sticky or Matted Hair, Itching or Eczema of the Scalp? Are you bald headed or nearly so?

Delays Are Dangerous—If you suffer from any of the hair troubles mentioned above, do not neglect it, try to relieve the trouble at once. Let us send you our illustrated book, "The Triumph of Science Over Baldness," and a liberal sample of Calvacura.

From Photograph—Not Retouched.

Successful Scientific Treatment

Simple Test—If you find hairs adhere to your comb, examine them closely. If the root is pale, dry, dead looking, take warning; correct the trouble if you want to save your hair and make it grow.

Let Us Prove to you by sending you a **Sample Treatment** that the Calvacura Natural Method of Hair Culture stops the falling of hair, driving away dandruff and eczema of the scalp and promotes the growth of new hair. We will send a liberal sample of Calvacura No. 1 and our illustrated book on the care of the hair and scalp, if you will write your name and address plainly on a piece of paper and enclose it with ten cents silver or stamps, as evidence of your good faith, in an envelope addressed **Union Laboratory, 213 19th St., Binghamton, N. Y. DO IT NOW, BEFORE YOU FORGET.**

Tobacco Habit BANISHED in 48 to 72 Hours

Immediate Results

Trying to quit the tobacco habit unaided is a losing fight against heavy odds, and means a serious shock to your nervous system. So don't try it! Make the tobacco habit quit you. It will quit you if you will just take Tobacco Redeemer according to directions.

It doesn't make a particle of difference whether you have been a user of tobacco for a single month or for 50 years, or how much you use, or in what form you use it. Whether you smoke cigars, cigarettes, pipe, chew plug or fine cut or use snuff **Tobacco Redeemer** will positively remove all craving for tobacco in any form in from 48 to 72 hours. Your tobacco craving will begin to decrease after the very first dose—there's no waiting for results.

Tobacco Redeemer is absolutely harmless and contains no habit-forming drugs of any kind—the most marvelously quick, thoroughly reliable remedy for the tobacco habit the world has ever known.

Not a Substitute

Tobacco Redeemer is in no sense a substitute for tobacco, but is a radical, efficient treatment. After finishing the treatment you have absolutely no desire to use tobacco again or to continue the use of the remedy. It quiets the nerves, and will make you feel better in every way. If you really want to quit the tobacco habit—get rid of it so completely that when you see others using it, it will not awaken the slightest desire in you—you should at once begin a course of **Tobacco Redeemer** treatment for the habit.

Results Absolutely Guaranteed

A single trial will convince the most skeptical. Our legal, binding, money-back guarantee goes with each full treatment. If **Tobacco Redeemer** fails to banish the tobacco habit when taken according to the plain and easy directions, your money will be cheerfully refunded upon demand.

Let Us Send You Convincing Proof

If you're a slave of the tobacco habit and want to find a sure, quick way of quitting "for keeps" you owe it to yourself and your family to mail the coupon below or send your name and address on a postal and receive our free booklet on the deadly effect of tobacco on the human system, and positive proof that **Tobacco Redeemer** will quickly free you from the habit.
